Now Meet THE CORN MASTER

Records of 12 to 20 acres a day picked and husked are by no means unusual with Oliver's new *2-Row Corn Picker-Husker.* The amount of work done, of course, varies according to condition of land, crop and power. Under favorable operating conditions, owners report as high as 25 acres covered.

Back of every Oliver Corn Picker-Husker is 10 years of sound engineering experience, 10 years of actual field experience, and 10 years of unceasing research for better ways of picking and husking corn. The final result of this *tenth of a century* of work is the new OLIVER CORN MASTER — a 2-Row Picker-Husker for modern farmers!

Come in and see for yourself, the many quality features built into this new machine. Be the judge yourself—but don't buy any picker until you have seen the CORN MASTER.

GOODELL FARM HOME BURNED TO GROUND

Frank Gee Property Is Destroyed Thursday Afternoon

GOODELL—The home of Mr. and Mrs. Frank Gee burned to the ground a mile east of Goodell Thursday afternoon. The fire started from a defective stove pipe leading from the cook stove in which a fire had been started The elderly couple lives a quarter of a mile from the nearest telephone and by the time the Goodell fire department reached the scene the home was beyond saving

Some furniture was removed from the lower floor, but the home, valued at between $2,500 to $3,000, was totally destroyed An insurance policy of $1,500 was carried upon the home.

Northern Lumber Company Remodels Room For Displays

The Northern Lumber Company has improved their diplay facilities by remodeling a room formerly used for a work shop and located in the southwest part of the building

This room has been refinished and a unique method of displaying various kinds of wallboards is used. The walls and ceiling have been divided into sections, or panels, and each panel has a different kind of material. Likewise, the window casings have been made using different types of wood.

By this type of display, a customer can easily choose the kind and type of material for his home Besides the display of wall board. the room will also be used for displaying various kinds of home equipment.

Glen Seney Died At Iowa Falls, Ia.

FORMER KLEMME DRUGGIST WAS BURIED AT IOWA FALLS, SUNDAY

Funeral services for Dr. Glen Seney were held from the Wilbur Funeral Home at Iowa Falls, Sunday at 2:00 o'clock and burial was made at the Iowa Falls cemetery

Dr. Glen Seney was in the drug business in Klemme several years ago. He was born at Sheffield. January 25, 1899. He was graduated from the Mason City high school and took a course in pharmacy at Des Moines. He was in the drug business here a few years, then sold his business and moved to a farm near Alexander. Later he attended Iowa State College at Ames and became a registered Veterinarian and practised his profession for several years.

In January of this year he moved with his family to Iowa Falls and became associated with Dr W L. Evers, Iowa's oldest veterinary surgeon.

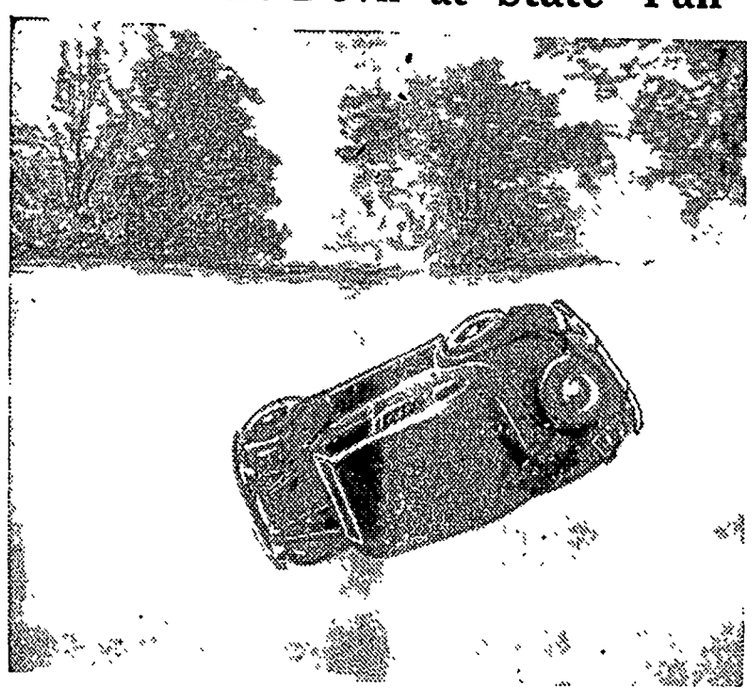
Dr. Seney was marrid at Alexander in 1920 to Beulah Arends. The widow, a son 7, his mother, Mrs. Edith Seney of Iowa Falls; and a sister in Sioux Falls, South Dakota, survive.

Rev. E. Robie, of Newhall officiated at the funeral services Dr. Seney died at an Iowa Falls hospital Thursday, following a brief illness.

GOT YOUR DUCK STAMP

If not, your postmaster can furnish it to you. All persons over 16 years are required to have one to shoot ducks. Landowners or tenants are not exempt even though they shoot them on their own land.

Auto Dare-Devil at State Fair



Des Moines Ia Special—Deliberately rolling a car, end over end while traveling 60 miles an hour, is one of the new stunts headlining the big "Thrill Day" program at the Iowa State Fair here on Sunday afternoon, Aug 29 In addition, the thrill day features include Capt. F F Frakes who smashes an airplane into the side of a house, a headon collision between two speeding automobiles, driving a car into fifty sticks of exploding dynamite, crashing a motorcycle through a flaming board wall, and other sensational, hair-raising events. Officials say there will be more thrill events in the one afternoon's program than have ever before been assembled at any one celebration in the midwest.

Klemme Banker Set The Pace In Annual 4-H Club Beef Sale

F. A. ARNOLD BUYS CHAMP AT 4-H CLUB SHOW IN GARNER

Payed $36 A Hundred For Grand Champion Baby Beef

Fred Arnold, Klemme banker, paid the record price for the grand champion baby beef of those sold at the ninth annual 4-H club show in Garner Saturday afternoon His bid was 36 cents a pound The calf, an Angus 16 months old weighing 1,135 pounds, was shown by Donald Greimann, son of Mr and Mrs. Addis Greimann, two miles south of Garner. Thirty-seven head of choice baby beeves were sold at an average price of $17 25 a hundred pounds

ARE THEY STARLINGS

Reports from over the state indicate that bounties paid by counties on starling since the law went into effect on July 4th total several hundred dollars. At 10c each the amount represents a great many starlngs.

Because the bird is not common in the state of Iowa, it is felt that many blackbirds, grackles and perhaps others are being mistaken for starlings. To acquaint the people of Iowa with this species the Conservation Commission has furnished County Auditors with a complete discription of the bird in its various stages of plummage. to assist in identification.

Anyone interested in these birds may obtain a copy of the identification description by writing to the Commission or to the local Conservation Officer.

Be sure it is a starling before you shoot

RIFLE SHOOTERS, NOTE

Under the new fish and game laws the shooting of a rifle on or over public waters or public highways of the state is unlawful.

Under the federal regulations for taking migratory game, it is unlawful to use any firearm except a shotgun.

Who Pays The National Debt?

By RAYMOND PITCAIRN
National Chairman Sentinels of the Republic

Out of the welter of political news emanating from Washington during recent weeks has come a cheering statement

It is that the administration has renewed its promise to work toward a balanced budget.

With a national debt hovering around the $37,000,000,000 mark—highest in our history — and a growing deficit, the American people will hope that that promise is fulfilled.

It means so much to them! Why?

Because, as all economists point out, public debt means merely postponed taxes, and taxes mean a slash out of every worker's income.

This is obviously true when the worker pays his taxes directly And it is just as true when he pays them indirectly—for our so-called "painless taxes" hit both the man who produces the goods on which they are levied and the consumer who ultimately purchases them in the form of food, or clothes, or shelter, or the necessary tools and equipment of his vocation.

Moreover, as economists point out further, heavy debts and their ominous threat of increased taxes curtail production, and with it employment. **And it is primarily to increased employment with its spread of earnings among all citizens that every producer, whether on the farm or in the many fields of business activity, must look for restoration of the purchasing power on which depends his livelihood.**

For progress toward a balanced budget, dispatches point out, certain brakes on Federal spending are required. They include an effort on the part of the heads of the many departments, bureaus and commissions at Washington to keep within their budget estimates.

Those brakes should be applied. Certainly that is not too much to ask of our office-holders, when it influences so deeply the income and living standards of the American people.

Politicians create the Public Debt. But the workers—and their families—pay it.

Injured In Fall From Basement

Mrs. Herb Bailey suffered a severe cut on her head as the result of a fall Sunday evening. In going to the basement of her home she tripped near the top of the stairs and fell to the cellar floor below.

Hand Injured In Wringer

Mrs. Wm. Smith suffered a painful injury Tuesday when she got her hand caught in the wringer of a washing machine. No bones were broken but her hand was bruised and the skin injured.

Will Have Party

Mrs. Zabilka's Sunday School Class will have a party at the church Tuesday evening. LaVohn Larsen is in charge of the eats and Novella Bredbenner will look after the games.

Klemme School Is Ready For Opening September 6

Another Heavy Rain Last Wednesday Evening; Hail Did Some Damage Also

A heavy rain fell again in this section last Wednesday evening and a steady drizzle continued throughout the night. North and west of Klemme more or less damage was caused by hail which fell during the early part of the evening.

The rains were followed by cool. cloudy weather and the moisture soaked down into the ground and was a great benefit to all crops.

NO SERVICES SUNDAY AT KLEMME REFORMED

On account of the Synod meeting to be held at Plymouth, Wis, there will be no services this Sunday at the Klemme Reformed Church

BERDICE SCHWICHTENBERG MARRIES YOUNG FARMER FROM GREELEY, IOWA

Miss Berdice Schwichtenberg, daughter of Mrs Emma Schwichtenberg of Twin Lakes Township, and Mr. Wesley Fenstermann, of Greeley, Iowa, were married at the Klemme Methodist Chuch parsonage by Rev Wm Zabilka last week Wednesday, August 18th at high noon.

The young couple left immediately for Greeley where Mr. and Mrs. Fensterman will reside on a farm.

Four buildings in little Cloudcroft, New Mexico, burned because residents mistook the customary alarm for firecrackers. The alarm is three pistol shots.

Auto Accident At Garner Claims Life

BRADFORD WOMAN KILLED IN WRECK SOUTH OF GARNER LAST SUNDAY P. M.

Mrs Sam Thompson, 55, of Bradford, died in a Mason City hospital Sunday night as a result of injuries received in an auto accident a mile south of Garner on Highway 69 Sunday afternoon. She was accompanied by her husband, son and his wife and their small daughter.

As the Thompson car, a Ford Model A, attempted to make a left turn across the highway, they were struck by an Oldsmobile driven by Mrs. Schweger and Mrs. Tom Ball, of Kansas. The latter were not injured. Both cars were badly wrecked.

NOTICE

To all Land Owners, Tenants, and to Whom it may Concern:

Notice is hereby given that all weeds growing on highways shall be cut or destroyed before October 1st, 1937.

This order is in accordance with Chapter No. 131, Laws of the 47th General Assembly, and unless complied with said weeds will be ordered cut and destroyed, and the costs thereof be taxed to the adjoining land owner.

Published by order of the Board of Supervisors.

FRED C. MISSAL
County Auditor

The new telescope being erected at Mont Palomar, California, will be able to penetrate space to a distance of 1,200,000,000 light years. A light year is the distance light will travel in one year moving at a rate of 186,000 miles a second.

MANY IMPROVEMENTS MADE IN SCHOOLHOUSE

(By Supt. W. H. Gablreth)

Students returning to school September 6 will see a number of improvements around the building Mr. Patet has been busy all summer cleaning the building and remodeling and refinishing parts of it.

In the first place. the building has been made more safe in case of fire. A new and larger fire gong can be heard plainly in all rooms. New fire extinguishers, including a large two and one-half gallon machine for the furnace room, have been installed. Every room in the building now has an extinguisher within thirty feet of its door.

Shelves for dinner buckets have been built in all of the grade rooms, and the high school students have a place to store their dinners on the first landing Many students previouly have left sacks and pails on the floor.

A new filing cabinet has been added to the office equipment, and the railing there has been altered to provide a work shelf. The offic floor has been painted, and the coat racks on the landing have been moved inside the fifth and sixth grade room.

The walls of the manual training room have been repainted, and this department will have some new equipment in the form of a new double bench and power saw. The lower hall and stage have been refinished with a new type of floor seal which will be used on more floors next year if it proves successful.

In the assembly room students will be greeted by a new arrangement of the class pictures, and, of course, the class of 1937 has been added to the group. The new pirture, "Navaho Indian," presented to the school by the Josten Jewelry Company, is hung at the front of the room. The trophy case, a gift of the class of 1937, will have a prominent place up front. Six new desks have been installed for high school students, and the high school library has been newly catalogued

All classes will meet for short periods in the morning of the first day of school; then the teachers will have a meeting in the afternoon.

Teachers Ask Release

Miss Hazel Azeltine, of Rowan was in Klemme on business Friday She was here to seek release from her teaching contract as she had a better position offered elsewhere Miss Allen, high school domestic science teacher is also asking her release so she can accept a better paying position in Illinois. The Board granted both releases, but Miss Azeltine decided to return to Klemme again and so will fullfill her contract here.

Miss Allen goes to Wheaton, Ill, where she has signed for the coming year.

Miss Margaret Brakel. of Mason City, has been hired to teach in the high school and will teach both commercial subjects.

NOTICE!

Hereafter when it is necessary to shut off the City Water, the bell at the Town Hall will be rung a half hour before he water is shut off. This arrangement will give everyone a chance to draw a supply of water.

GEORGE BUSEMAN,
Town Marshall 1tc.

Crime is rampant in California. We read in the morning paper where a golf expert shot 69.

Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington.—President Roosevelt stated to the newspaper correspondents in his press conference the other day that crop control must be brought back. He said it with some emphasis. Within a few days before that, he had given his approval to a bill placing a minimum on wages and a maximum on hours in which labor could work in industries whose productions enter into interstate commerce.

Wants Crop Control Back

The President was not specific as to details of the legislation in either case but it is important to note that he has reaffirmed his position on these two principles for it is to be remembered that both the NRA and the AAA were thrown out by the Supreme court a long time ago, and the President seeks now to restore them in another form.

This circumstance would seem to confirm assertions that have been made in various quarters lately that the President wants to maintain a "planned economy" for this country. It would seem that he is determined to go ahead along those lines and that his program for reorganizing the Supreme court was a part and parcel of the scheme. In other words, the President's new declaration about crop control and wages and hours and his support of the Wagner housing bill represent a return to the original theories which he held for "remaking" our nation.

After discussing these circumstances pro and con with proponents as well as opponents in the congress, the conclusion is inescapable that Mr. Roosevelt and his advisers are headed into new ground. They desire evidently to make the federal government the most important factor in our national life and to set aside little by little the functions of state and local governments by their course of action.

Undoubtedly there is strong argument for the policies they have adopted; certainly, there are many functions which the national government can perform more effectively and more efficiently than they can be performed by state governments, and equally, it is true that some phases of our national life should not be subjected to the influence of state lines. On the other hand, there surely is valid reason why Washington bureaucrats should not be allowed to interfere in the daily practices and convictions of individuals.

The reason I believe all of this is so important now is that always there has been a tendency of federal functions to expand. To say this in another way: Federal officials from the lowest to the highest seem to be equipped with a particular faculty for delegating to themselves additional authority as soon as they are accorded power. What the country should fear then, it seems to me, is the steady encroachment upon the rights of states and thereafter the rights of individuals. Perhaps I should have reversed the order and should have said, first, encroachment upon the rights of individuals and, second, thereafter encroachment upon the rights of states.

Now, there are those persons in considerable number who believe sincerely that the federal government is the agency through which all public functions should operate. I cannot agree. Rather, long experience in Washington convinces me that the old, old argument for state rights—so long one of the tenets of the Democratic party—has too much merit to be overthrown without consideration for the effects of the new theories. It may be that human nature has changed enough to accept new theories and live happily thereunder but I am quite convinced that human nature does not change so fast.

* * *

To get down to cases in application of the principles discussed above, let us consider the wages and hours bill. That measure shows how this encroachment takes place and gives a rather clear picture of the expansive nature of federal policies.

Wages and Hours Bill

The wages and hours bill first creates a labor standards board. It is circumscribed by certain limitations which say that it cannot fix wages above forty cents per hour nor can it reduce the number of working hours per week below forty. Further, a great number of lines of work are exempted from jurisdiction of the board—work of a seasonal character, farm labor, labor in certain specified industries which obviously cannot be subject to regulation without destruction of the business itself. Besides these restrictions, there is an implied warning in the bill against sudden or abrupt changes in business practices that would dislocate industrial operation or curtail employment.

These delimitations would seem to leave the board without a great deal of authority. Such, however, is not the case. Among those industries remaining under jurisdiction of the board, there is yet as much power as obtained under NRA and its codes which were so hidebound and so inelastic that thousands of firms were in open rebellion against the restrictions unless they were able to pass on the higher costs resulting from these restrictions, to the public. That is, unless they could make the consumer pay the added cost, they faced eventual bankruptcy.

I do not say that the labor standards board as now conceived will go as far as the NRA codes but experience with the present national labor relations board indicates that the public should expect the maximum exercise of power instead of any middle of the road policies. The labor relations board has become a festering sore on private initiative. Business interests everywhere, while being pounded on the back by the administration to employ more workers, are kept in a constant state of confusion by the bias of the board. This is the board which was designed by Senator Wagner, of New York, to maintain peace between labor and employers. If the labor standards board can use discretionary powers accorded it and can proceed in correcting abuses of labor as rapidly as is "economically feasible," it may be able to develop better conditions in industry. But such language as the words "economically feasible" are subject to all kinds of interpretation and if the membership of the labor standards board happens to include some radical labor leader, most anything will be economically feasible.

It is from such quirks of law that bureaucrats expand their powers.

* * *

But there is yet another phase of this policy that demands consideration. While the United States is one unit under the federal government, it is made up of a number of sectional units and each sectional unit comprises a number of states and even each state in some cases embraces subdivisions where practices in business and living traditions are as different as day and night. A regulation as to the fairness of hours or wages in New England may be, and probably would be, wholly inapplicable in Alabama or Georgia. A regulation that would operate satisfactorily in Pennsylvania may be, and probably would be, completely sour in the Pacific coast states. Yet this board cannot administer its regulations on a piece-meal basis; they must apply to the whole country and it is only fair to assume from the existing facts that whereas rulings may be advantageous to some sections of labor, they might completely destroy other sections of labor. The same results can be expected from the effects of these rulings on the employers, except that where the effect is adverse on employers businesses can be driven into bankruptcy—and the jobs they provided disappear.

Another Phase

I think there can be no denying that no law will be successful unless it has the co-operation, the active support, of a very large majority of the people. If proof be needed, it is only necessary to recall how the prohibition laws were not enforced in those areas where public sympathy with them was lacking. It does not require very much time to determine whether a law is popular. During the life of the NRA, those who opposed such impossible regulations as General Hugh Johnson dictated were branded by President Roosevelt at first as "chiselers." It was a biting criticism. Yet, within a few months there were more chiselers than there were those who believed that the law could possibly be made to work. I am very much afraid that there will be more chiselers under the wages and hours law than there are those who believe in its efficacy.

* * *

The initial operations of the board and the law probably will not create a great deal of dissension. But there will be disgruntled groups of workers and there will be dissatisfied employers who will seek exemption or changes or special consideration by regulation. In some cases, obviously, the board will issue new rules. As likely as not those new rules will upset some other group or region or section and they will demand consideration.

Both Sides Will Buck

Just here, it might be recalled how under the AAA crop control law, wheat, cotton and corn were originally considered but tobacco had to have protection and rice and potatoes and peanuts, and every other farm product had its champions battling for consideration before the Supreme court held that the law with its processing taxes was an invalid delegation of power by congress. Therefore, while I may be "seeing things" concerning the labor standards board and the new proposal for crop control, the records surely support my statement that anytime the federal government starts a new policy it begins at the same time to enable expansion of federal power far beyond the original concept of a program.

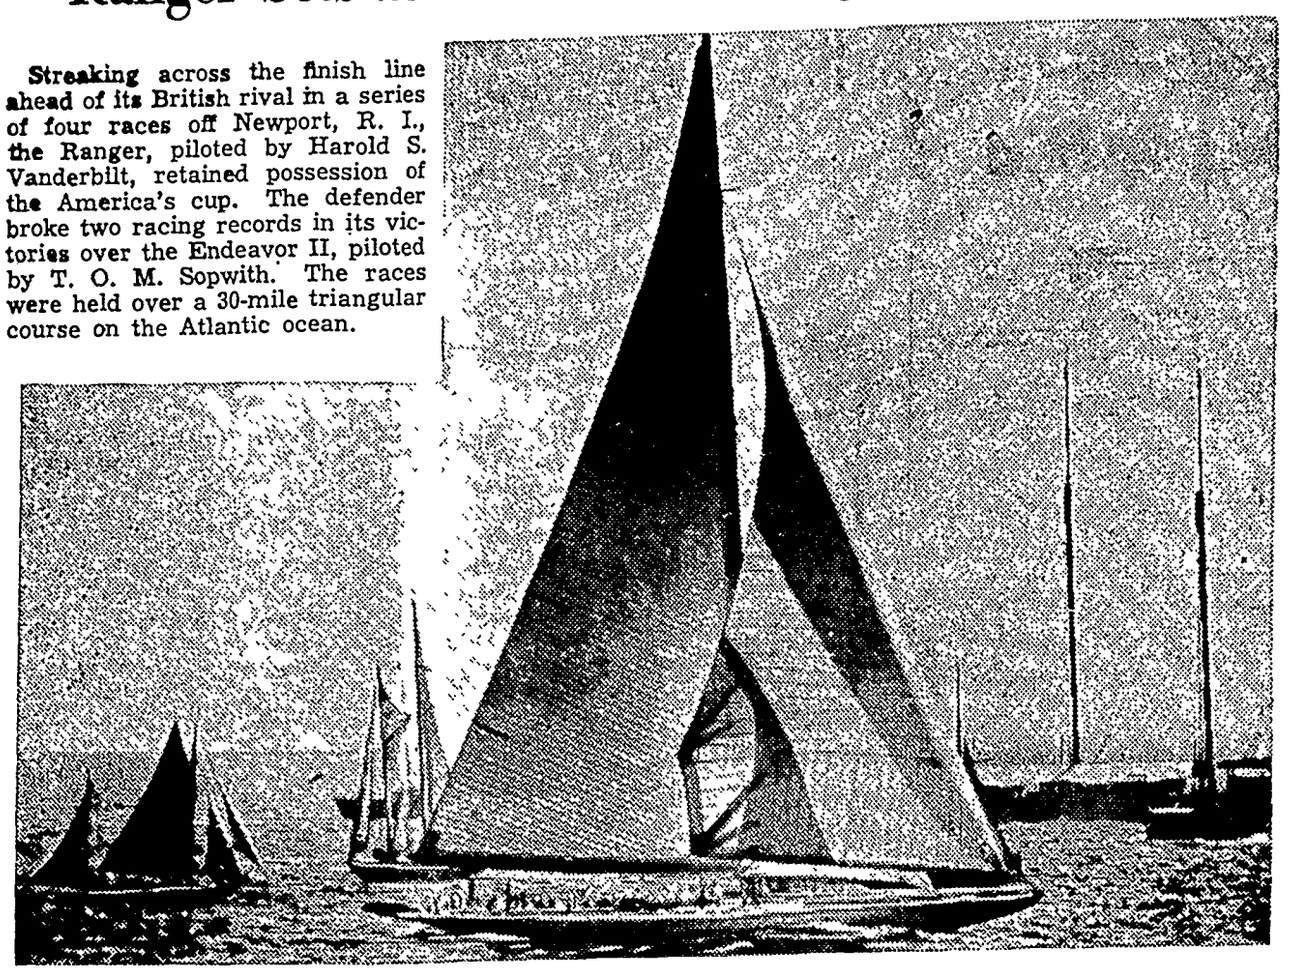
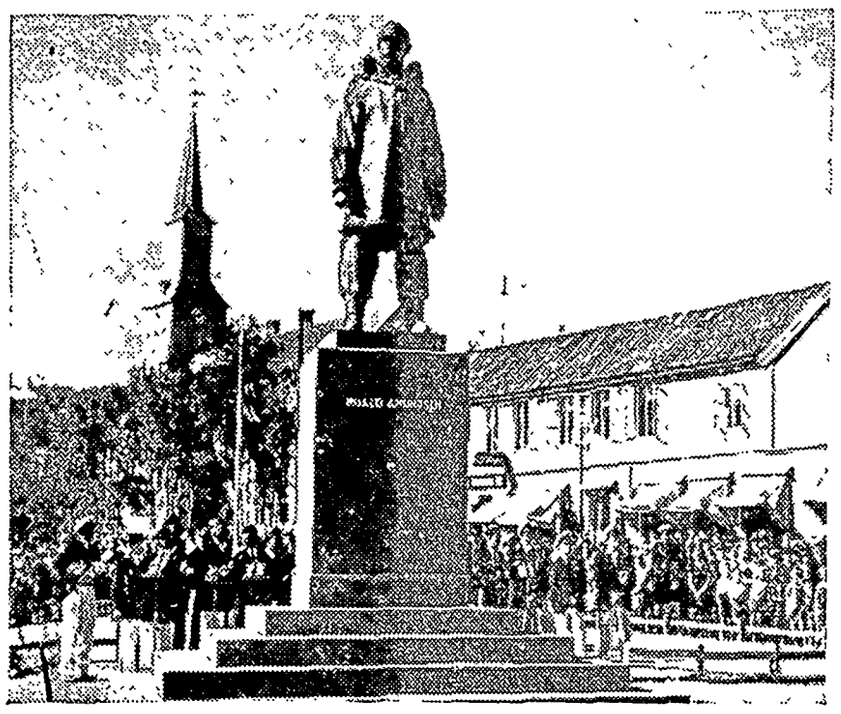
Ranger Sets Record in Retaining America's Cup

Streaking across the finish line ahead of its British rival in a series of four races off Newport, R. I., the Ranger, piloted by Harold S. Vanderbilt, retained possession of the America's cup. The defender broke two racing records in its victories over the Endeavor II, piloted by T. O. M. Sopwith. The races were held over a 30-mile triangular course on the Atlantic ocean.



Monument to Amundsen Is Unveiled



A monument to Roald Amundsen, the great Arctic and Antarctic explorer who was the first to reach the South pole, as it appeared following its recent unveiling at Tromsoe, Norway. The memorial, costing $4,250, was raised by popular subscription. Its sculptor was Carl E. Paulson. Lincoln Ellsworth, Amundsen's companion on a North Pole expedition contributed $1,000 to the fund for its construction.

NOVEL SURF SLED

Miss Althea Martin shown with the new type of surf sled patented by a Los Angeles newspaper man, which will lessen the danger of the rider getting hurt in the surf. The streamlined pontoon below its nose allows it to float the rider in perfect safety, while the stabilizer shield along the tail holds it to a straight course.

Flaming Death Follows Collision on Highway

This happened when a truck carrying four new automobiles and another machine collided on a highway west of Akron, Ohio. The four cars and truck were consumed in the fire. At the right may be seen the auto, also burning. The driver of the truck escaped injury when he jumped from the cab, but the driver of the car was burned to death.

NEW TAMMANY CHIEF

Christopher D. Sullivan, new leader of Tammany Hall in New York who succeeded the late James J. Dooling as head of the famous Democratic organization. Following his election, Grover Whalen withdrew as a candidate for mayor of New York in favor of Senator Royal S. Copeland. Mr. Sullivan has been a member of the famous Democratic organization for many years.

Chiang Unites China Against Japs

Generalissimo Chiang Kai-shek, under whose personal control the financial and economic resources of all China were placed in the struggle against Japanese aggressions in the north. Chiang, who heads China's supreme war council, is shown as he left a conference at Nanking.

POET WAS ONCE A LAWY

READ this story of the co tional lawyer who became of our most famous poets. M dreaming, unsuccessful lawyer a man with a profitable and im tant law practice, important en to associate with Clarence Da at one time A busy man of merce who became a writer songs and poems, sonnets, es and drama!

Edgar Lee Masters was bor the little town of Garnett, Kan 1868. His father was a descen of old Virginia stock; his mo the daughter of a Methodist min and descendant o. Israel Putna American Revolutionary fame. family moved to Petersburg, and later to Lewistown, where gar was raised in the typically spectable atmosphere of small America.

He did newspaper work for local weekly, learned the prin trade, and studied law under father, who was one of the lea lawyers in the state. In 1891

gar Lee Masters was admitted the bar and practiced in partners with his father. The following he opened his own office in Chic where he was a highly succes lawyer until 1920.

But even in high school, Ed Lee Masters was interested in w ing and he never forgot his a bitions. He contributed to the verly Magazine of Boston and Saturday Evening Call of Peoria; wrote poems for a Chicago ne paper. His first book, published 1898, while he was struggling to tablish a practice in Chicago, called simply "A Book of Verse "Songs and Sonnets" followed, none of them attracted much tention until his "Spoon River thology" was published in 1915.

Those of you who lament y unexciting lives and yearn for portunity, look at his dual pers ality, the poet who has won s high awards in the realms of erature.

...ochet Her a Chic Little Dress

By CHERIE NICHOLAS

...E, two, three!—here they are, ... trio of pretty little crocheted ... worn by a trio of pretty little ...s pictured. And do little folk ...minine gender love the dresses ...oting mothers and big sisters ...t for them! Well, just show ...icture to wee daughter or sis... niece or little girl neighbor ...e wager that their opinion on ...bject will make elders seek ...t hooks, yarns and books of ...ctions instanter, forthwith and ...t delay.

...se cunning frocks are sup... to be party dresses—that's ...y the designers thereof listed ...on fashion's program, but for ...art charming as any one of ... would be to wear to a party, ...lieve your little girl will be ...g to wear her crochet dress ... day Why not? The idea of ...l wear will be found perfectly ...cal, workable and demonstra... it is crocheted of fast dye ...rized cotton yarn that washes ...ew and is so much easier to ...r than a dress that has to be ... each time. Serviceable, too ...ost no wear-out to it!

...king of smart styling in cro... ...ashions for little folks, never ...professionals paid so much at... to this angle as during re... ...ears. The result speaks for ...in the three models pictured. ... is the charmingly styled prin... ...worn by little Miss Six-Year... ...possibly she may be seven); ...y the dress shown to the left ...es a new high in swank so far ...hildren's fashions are con... ...d. It is crocheted of mercer... ...cotton, and we leave it to you ...nahze it in the color your little ...happens to like best. It has ...sleeves as stylish as can be ...s buttoned all the way down ...ront with crocheted buttons a ...artest mode. It really does ...ke long to crochet this dress ... is delightful pick-up work to ...e you to "improve each shin... ...our."

...le Two-Year-Old, who stands centered in the foreground, has on a fluffy-ruffle type of dress with bows on the shoulders and a ribbon run through the waistline of the very full skirt. It is just the sort of be-ribboned dress that makes an adorable child look more so. Why not make two of 'em, one for Sunday-go-to-meetin' dress and one for everyday service?

Party days for a small girl mean ribbons and lace, cambric tea and ice cream and cake. What could be nicer to wear at such festive times than the lacy dress which the cunning youngster to the right is wearing? It is crocheted of delicate mercerized cotton quite to this miniature queen's taste, you may rest assured. It will also prove a boon to mother for it is dependably serviceable for all its fragile appearance, will wash, of course, and all that has to be done is to pull the lacy crochet into shape here and there caressingly with your fingers —doesn't require the least mite of ironing.

Here's a suggestion or two to mothers who are making over dresses for little daughter's play and school wear. Leading Paris couturiers are combining crochet and various materials. The idea would work out admirably in "fixing over" children's clothes. A cloth or sturdy linen dress that needed lengthening could be made attractive by adding desired inches of plain crochet done either in the identical shade of the fabric it is to trim or contrasting it. Make a matching crochet belt of the mercerized cotton and carry out the idea further with crochet buttons and perhaps decorative pockets of the crochet.

...EW SLEEK BLACKS

By CHERIE NICHOLAS

...all appearances much is "go... ...ack before the eyes" of fash... At any rate there is nothing ... way of a frock so outstanding ...ly fall style showings as sleek ... gowns of either gleaming sat... ...of slinky, slenderizing, flatter... ...the-figure jersey which may ...her a pure silk weave or of ...etic texture. The vogue for ...ype of frock is pronounced. ...drape effects predominate in ...shioning of these stylish all... ... gowns somewhat after the ...er pictured. Top them with a ...raped toque or one as shown.

NEW FABRIC TRENDS FOR AUTUMN SEASON

Trends in the silks and rayons which Paris fabric houses have prepared for the fall costume collections:

New plain silks have a softer, more velvety touch, a duller surface than before.

Rayons of intricate weaving are dull, pebbled, "crushed," have fine matelasse patternings, Ottoman ribs, plain or fancy, and many novelty surfaces obtained by uneven yarns.

Serge or twill weaves appear in delicate silks or rich metals.

Neon lights have inspired a whole group of lames made with colored metal yarn, also new changeable, mosaic, cashmere and jewel effects using the same colored metal.

Novelty velvets are made with pile that is completely dull or has only a medium luster. Also with printed gold backs or satin backs.

Metals and lames are finely patterned or quite plain, elaborate in texture and often have small Paisley, Persian, Byzantine, Oriental and Eighteenth century designs.

Capes Replace Jackets in Early Ensembles for Fall

First autumn ensembles often replace coats or jackets by capes, and are trimmed with sleek, flat furs. One such is Martial and Armand's three-piece costume of brown wool, already ordered by several smart women. The skirt features front fullness and is topped by a leopard gilet which shows beneath a hip-length circular case of the brown wool finished with a tiny flat collar of leopard skin that is knotted under the chin.

Pleats for Autumn

Autumn will be a season to wear box-pleated numbers with built-up waistlines, and the newest manner of raising a waistline is to build the skirt up at the sides only.

FARM TOPICS

VENTILATED MOWS KEEP HAY BETTER

False Floors, Open Sides, Found Good Practice.

Supplied by the United States Department of Agriculture.—WNU Service

Better ventilation of hay stored in mows offers two practical advantages to farmers, tests by the bureau of chemistry and soils indicate. Well ventilated hay keeps its quality better. It does not get so hot and there is less danger of fire from spontaneous heating Mows with false floors to allow air to circulate under the piled hay, and mows with one or two open sides formed by studding are two devices for improving ventilation of stored alfalfa hay Both worked well in practical tests Good ventilation is particularly desirable if hay is not well cured and has to be put in the mow with more moisture than is desirable.

The bureau of chemistry and soils found that hay within about six feet of an open face retained its quality better than hay farther in Dividing large mows into small compartments by means of alleyways formed by studding, is suggested. Each compartment should not be over approximately 12 feet wide, with at least two exposed sides parallel to each other, thus bringing all the hay within a distance of six feet of an open face where moisture and heat may escape

For "under ventilation" a "false floor" of two-by-eight timbers on edge with two-by-four scantlings laid across them was tested. In piles up to 15 feet high, the hay kept better and did not get so hot as similar hay piled flat on the mow floor.

These ventilation experiments are part of the investigation of the spontaneous heating of hay which the bureau of chemistry and soils has had under way for several years. The tests were all with alfalfa hay, most of them with hay moister than farmers prefer to put in the mow. When hay was stored with less than 30 per cent of moisture it kept well. Hay of a distinct brown color resulted when the moisture content of the hay as stored exceeded approximately 30 per cent Ventilated storage had a good effect on hay quality since it reduced the quantity of brown and moldy hay produced.

Plumage of Hen Reveals Egg-Producing Capacity

There was a time when farmers sold their ragged and faded birds because of their unsightly appearance and kept the slick-coated, yellow-legged individuals because of their attractiveness. That time is past and the practice is now reversed, asserts a poultryman in the Boston Globe.

The persistence of production is measured very largely by the condition of the plumage during the summer and fall. If the hen lays regularly she usually retains her old feathers, but if for any reason other than sickness or broodiness she stops laying, the feathers begin to drop. This brings on the condition we know as molting.

The order in which the feathers fall is first from the neck, then the back, body, wings and tail. The neck molt is rather common at any season of the year, even in good layers, but if the molt progresses to the back, the primary feathers of the wing generally molt also. The stage is seldom reached unless the hens have entirely ceased laying. Cessation of laying is likely to bring on a general molt.

Removing Groundhogs

Where groundhogs have become troublesome around ditch banks and embankments they may be gassed in their dens by using either carbon disulphide or calcium cyanide, says George D. Jones of the Missouri College of Agriculture. A small amount of either chemical may be placed in the entrance of each tunnel and the openings closed with dirt.

"Producers' Grade" of Eggs

Eggs sold at auction ungraded for size, but of a quality referred to as "extra" or better, are sold without grading at the auction as "producers' grade." The "extra" quality referred to is the second grade, specials. All eggs in "producers' grade" must have clean, sound shells, air cells ¼ inch or less, yolk may be visible, while firm and clear, with no visible germ development, no blood spots, and eggs must be uniform in shape.

No Tails—No Wails

Sheepmen in the Uvalde section of Texas are using rubber bands instead of surgery to bob lambs' tails, according to information received by the B. F. Goodrich company. The newest method of tail bobbing involves only the tight application of a rubber band in the right location which stops circulation. After a time the tail drops off, saving expense, time, and trouble for ranchmen and some pain and possible infection for the lambs.

STAR DUST

Movie • Radio

By VIRGINIA VALE

SO GREAT has been the success of "A Star Is Born," all the Hollywood studios are busy making pictures concerning the private lives of film stars. Just copy cats, that's what the film producers are.

First one of these pictures to reach the screen is "Hollywood Cowboy" with George O'Brien as the star and it is a very entertaining Western. Most pretentious of them all is "Stand In" which boasts Leslie Howard and Joan Blondell in the cast. Most soothing to the ears is "Music for Madame" in which Nino Martini lifts his voice in song, and the biggest novelty is Grand National's "Something to Sing About."

—★—

Divorces don't interfere with business judgment in Hollywood. For instance, when William Wyler was asked what player he would like to have in the leading role of "Having a Wonderful Time" he said that only Margaret Sullavan, his ex-wife, had the beauty and acting skill required for the role Up spoke Henry Fonda, another ex-husband of Margaret's, to say that he would like to play opposite her. So, just to complete the cycle, they telephoned her present husband, Leland Hayward, who is her manager, and asked him if she would be free to make the picture before going back to New York for stage engagements and he said he would be happy to arrange it.

Margaret Sullavan

—★—

"The Toast of New York" starring Frances Farmer is a fascinating picture. It deals with the picturesque period when Jim Fisk was becoming a big shot in Wall Street, when business men went around brandishing buggy whips when they weren't conniving to get control of a railroad, or wreck each other's fortunes.

—★—

All over the country box-office records are being broken by "Saratoga," the picture on which Jean Harlow was working at the time of her tragic death. Her fans would be happier, I think, to see one of her old pictures again, a gay, lighthearted picture like "Bombshell" or "Reckless," for in "Saratoga" she is but a pallid shadow of her former self.

—★—

After arguing for weeks about her salary demands, RKO have at last signed Ruby Keeler to make two pictures a year for them. She won't be in the next Fred Astaire picture, however, for Joan Fontaine has that leading role nailed down. Joan has been working like a beaver, taking dancing and singing lessons preparing for this big chance. Ruby's first will be "Love Below Freezing," the picture which will bring little Mitzi Green back to the screen.

—★—

A few weeks ago Josephine Hutchinson was busily reading plays, planning to go back to the stage because she was so depressed over the parts Warner Brothers had given her. But when her Warner contract expired, M-G-M signed her up and now she says she won't go back to the stage until she is old enough to play character roles.

—★—

Freddie Bartholomew's guardian has lost one round of her battle to get M-G-M to pay him more money. The studio has taken him out of the cast of "Thoroughbreds Don't Cry" and given the role to Douglas Scott who played in "Wee Willie Winkie." As soon as Freddie Bartholomew started making big money, his parents, who had left his care in the entire charge of his aunt from his infancy, swooped down on the household and wanted the privilege of spending his money. A court fight followed wherein his aunt tried to protect him, and she did win his guardianship.

Freddie Bartholomew

—★—

ODDS AND ENDS—Paramount troupes on location are running into plenty of trouble: "The Buccaneer" company near New Orleans had their camera barge wrecked in a sudden storm. An earthquake in Alaska held up work on "Spawn of the North." Furnace-like weather on the California desert knocked out several members of the "Wells Fargo" troupe, and expense checks did not arrive in time to cover production expenses of Clyde Elliot and his gang in Singapore . . . Bob Burns and his bazooka have a rival! Mischa Auer has invented a pop-o-phone and plays it whenever offered the slightest encouragement. It consists of a row of pop bottles containing varying amounts of water.

How Germans Protect Bee Hives.

How the Honey Bee Lives and Performs His Very Important Duties

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

LITTLE does the average layman know of the active life of the honey bee which in summer is conspicuous flying from flower to flower, bearing pollen that plants may blossom and bear fruit in season.

The young queen bee, a few days after leaving the hive in which she has been born, selects a day for her wedding flight. She usually chooses a clear, warm, quiet day because her honeymoon is short, and she must make the most of it. Only when she leaves the hive with a swarm, probably a year hence, will she have another occasion to fly.

Mating always takes place on the wing, and if conditions are such that the queen cannot fly she will die a virgin. The strongest drone is her mate, for the queen is a good flyer, and the weak are thus eliminated in this wise provision to maintain the strength and vigor of the race.

Before the queen has had time to return to the hive after the mating flight, the drone will have fallen to the earth, dead.

Because of her specialized duties and the fact that she does not engage in outside work and is not subject to the hazards of weather and enemies that might prey upon her, the queen may live to the ripe old age of three or four years. When she becomes too old, or when she can no longer produce queen and worker bees, or if she becomes accidentally crippled, the bees will raise another queen to replace her and for a while both mother and daughter may work side by side in the hive. But this arrangement does not last long. The old queen will shortly disappear.

The marked differences between the queen and worker bee, both of whom come from the same kind of fertilized egg, have already been mentioned. Their difference in behavior is even more pronounced. The worker bee is armed with a straight sting, the end of which is barbed like a harpoon. When a worker bee stings, it cannot disengage its sting. The violent effort of tearing itself loose from the well-anchored sting so severely damages the tissue of its body that it dies within a few minutes. Normally it can sting only once.

When Rival Queens Battle.

The sting of the queen, instead of being straight and barbed, is smooth and curved. It is constructed so that it can easily be withdrawn when she uses it. The queen seemingly does not realize that she possesses this very effective weapon. She may be picked up and handled as harmlessly as a kitten.

If the queen gets into the wrong hive in returning from her mating flight, a royal battle is sure to ensue, and the two queens fight it out until death comes to the weaker.

If the queen used her sting indiscriminately, she might easily lose her life in meeting an enemy with which she could not cope. If she were being handled by her keeper and attempted to free herself by stinging him, he might instinctively retaliate by crushing her frail body. Should he do so, it would jeopardize the future life of the colony, especially if there were no larvae in the hive from which a successor could be raised. For her protection therefore, she depends upon her own daughters or sister workers, who far outnumber her and whose sacrifice is not so fatal to the well-being of the colony.

The drone usually is regarded as a lazy individual, but, after all, he is the father and is entitled to certain respect. He gathers no food, nor does he help defend the family; he has no tools to collect sweets nor has he a sting to defend even himself. During his brief existence, however, he has certain privileges not accorded his sisters. He can safely visit neighboring colonies. Neither workers nor queens are accepted in other hives, but during the breeding season drones are allowed to come and go as they please.

Know One Another by Smell.

When the breeding season is over, and the honeyflow comes to a close, the bees become more economical with their food supply, which must carry them through the long, cold winter. Then they drive all the drones from the hives, thus dooming them to perish soon for lack of food and shelter.

The person who can recall the names and faces of several hundred acquaintances is unusual; yet in a family of 80,000 individuals the bee instantly recognizes every member. It is evident that recognition is not through the sense of sight; instead, it is effected by the more highly developed sense of smell.

Every colony has a distinctive family odor, different from that of every other colony. If a strange bee attempts to enter a hive, the guards at the entrance detect its alien odor and drive it away. When a colony is divided into two parts, the parts placed in separate hives and given queens that are sisters, the bees in each half develop different odors. Within a week's time they become total strangers to each other. Were the halves united again, the bees would disregard the existence of any relationship.

It sometimes happens that a beekeeper unites two or more colonies, which separately are too weak to produce a crop or to survive a hard winter. The usual method is to place one hive on top of the other, inserting a sheet of newspaper between them. The bees from both sides gnaw small holes in the paper, and in doing so, they "rub noses," but the holes at first are not large enough for the bees on either side to engage in combat. The apertures permit the mingling of the odors of the two units, so that by the time the holes are large enough for the bees to pass through, the two parts have an identical odor. Thus union takes place peacefully.

If it becomes necessary to place a new queen in a colony, it is essential that she be properly "introduced." The old queen is removed at least an hour before the newcomer is "presented." In this interval the colony discovers that it is queenless and it may start constructing new queen cells.

Even though the colony desires a queen, it would not do to release the usurper, because her strange odor would antagonize the bees and endanger her life. She is placed in a wire cage to protect her from assaults. Although her new subjects would kill her were she suddenly released, they feed her by inserting their tongues through the meshes of the wire.

Must Store Food for Winter.

Honeybees help perpetuate their race by their insatiable desire to gather nectar. Unlike bumblebees, hornets, yellow jackets, and wasps, honeybees cannot live from hand to mouth. They must store enough food during the summer to keep the colony alive throughout the winter. Of the four other insects just mentioned, all the individuals in each colony die at the approach of winter except the young mated queens, and these simply crawl into protected places where they hibernate. During this period they require no food.

Among honeybees, only the drones die in the fall. The queen and the workers live and are semi-active throughout the winter. It is important, therefore, to gather enough food during the summer to maintain the colony during seasons when insect activity largely ceases.

At the end of the swarming season, which coincides with the height of the breeding season, the queen lays fewer and fewer eggs until fall, when the rearing of the brood entirely ceases. Cold weather has overtaken the colony by this time, imposing changes in its organization to cope with low temperatures. Individual honeybees die of chill at temperatures well above freezing; in fact, they seldom fly when the temperature is lower than 45 degrees Fahrenheit.

BOY SCOUTS ABROAD

Thirty thousand boys in their teens from 37 countries, speaking 30 different languages, foregathered in Holland the first week in August for a grand international boy scout jamboree. It was probably the largest crowd of boys ever assembled anywhere since the Children's Crusade when the zealous youth of all Europe set forth on foot for Jerusalem to recapture the Holy Sepulcher from the Moslems. Certainly it was the most representative recreational gathering of youth ever held.

Though they could not most of them understand the words of each other's conversation no one who understands the camaraderie of boyhood can doubt that every boy knew what the other boys who spoke in strange tongue were saying. They all had a common bond of interest for though the details of their scout-craft differ between nation and nation, the boy scouts of all the world have the same underlying principles and ideals. Honor and loyalty brotherhood goodwill and helpfulness speak the same language in all lands.

The world needs more of such international contacts of youth. There would be greater hope for peace if the youngsters of all nations had more chances to get acquainted with each other. The impressions and friendships that form in boyhood are the lasting ones. It will be hard for fire-eaters and demagogues to persuade these boy scouts who foregathered in Holland that all the people of any other nation than their own are scoundrels and should be hated as enemies. They know better. They have lived with them, played with them, swapped keepsakes with them and sung with them around the campfires.

They know that the boys of other countries are just like themselves.

SEASONAL VEGETABLES MAY BE COLD-STORED

Cold storage lockers may be utilized for the preservation of fresh fruits and vegetables as well as meats, says T. J. Maney, Iowa State College horticulturit. Experience has shown that many kinds of vegetables can be frozen and stored very satisfactorily, especially those which are of seasonal type that cannot be secured on the market fresh but for a few weeks.

Among the Iowa grown vegetables which lend themselves to cold storage at this time of the year, explains Maney, are green and wax beans, lima beans, peas, sweet corn and spinach.

After vegetables are prepared for storage they are first chilled rapidly in a freezer room, temperature 0 to 10 degrees F. After they have been thoroughly frozen they are transferred to the locker room where the temperature is maintained between 8-15 degrees above zeroe.

Vegetables to be stored should be treated as follows:

Green and wax beans—Snip, sort, wash, blanch 2-3 minutes, chill and pack dry or cover with 2 per cent brine in almost any type of container.

Lima beans—Shell, sort, blanch 2-3 minutes, chill and pack dry.

Peas—Hull, blanch ½-1½ minutes, chill and pack dry or cover with two per cent brine.

Spinach -- Sort leaves, wash carefully, blanch 2-2½ minutes, chill, pack dry.

Sweet corn—Blanch with husks 6 minutes, or without husks 3-4 minutes; pack dry either way.

In all the above processes blanching involves plunging in hot water for the time indicated, chilling is accomplished by placing in cold water. A 2 per cent brine consists of 2 pounds of salt to 98 pounds of water.

STOUDER WARNS FARMERS ABOUT ANTHRAX EPIDEMIC

Because of the severe anthrax epidemic in nearby South Dakota and Nebraska counties, Iowa farmers would be wise to check carefully the cause of any "suspicious" sickness among their livestock, says K. W. Stouder, Iowa State College extension veterinarian.

Anthrax is one of the most dangerous animal diseases and at the same time one of the most difficult to permanently eradicate, he warns. Spores of this disease live for years in the soil.

Symptoms of the disease are labored breathing, a high temperature and sometimes doughy swellings beneath the skin. It is usually fatal. Any farm animal may contact the disease, although horses, mules and cattle are most commonly affected. Humans can also contact anthrax.

Early detection of the disease is imperative wherever it breaks out, Dr. Stouder says, so a veterinarian should be called when anthrax is suspected.

Animals exposed to anthrax may be immunized against the disease with bacterin or aggression inoculations, Dr. Stouder says. It takes 10 days, usually for these injections to take effect.

In South Dakota and Nebraska where the anthrax scourge has already killed large numbers of cattle, state and federal veterinarians are driving ahead with a control program in the hope of stamping out the present outbreak within another two weeks. Carcasses of deceased animals are being burned and strict sanitation measures are being followed.

All shipments from infected Nebraska and South Dakota counties have been banned by the state veterinarian, H. A. Seidell, Des Moines.

ITEMS OF INTEREST FROM ELL TOWNSHIP

Herman Barz and son, Gerald, left Monday morning for a few days visit with relatives at Minneapolis.

Mr. and Mrs. Lewis Neuberger and son, Lester, and Donald and Roger Neuberger were Sunday evening visitors at the John Neuberger, Sr. home.

Miss Ethel Swanson was an over-night guest at the Mrs. Rose Tanner home, Saturday.

Mrs. James Lilly and son, Gene, of Cedar Rapids, and Mr. and Mrs. Will Beier, of Goodell were supper guests at the O. W. Lemke home Thursday evening.

Mr. and Mrs. Kermit Holck and Hollie Holck visited at the Albert Kehl home Sunday evening.

Mr. and Mrs. Oscar Swanson and family, Mr. and Mrs. Carl Swanson and family, Mr. and Mrs. Orville Bridges and daughter, Mr. and Mrs. Ruben Lemke, Mary and Albert Swanson and Joe and Ed. Blanchert, and Mrs. John Johnson and family enjoyed a picnic at Clear Lake, Sunday.

ITEMS OF INTEREST FROM AVERY TOWNSHIP

Mr. and Mrs. Robert Marshall, Clyde Marshall and Miss Lois Kennedy were callers at the Harlow Helps home, Tuesday.

Mr. and Mrs. Fred Bachman and son, Wayne, were business callers at the Harlow Helps home Tuesday.

Mr. and Mrs. Fritzel are doing the chores for the Albert White family while they are visiting relatives in Colorado.

Mr. and Mrs. Bennie Beek and son, Gary, of Clear Lake were visiting one evening recently at the John Trampel home.

Mrs. George Griggs was visiting at the Clarence Bachman home Wednesday afternoon.

Mr. and Mrs. Robert Roths and Dean and Marlene were Mason City visitors Friday.

Peter Trampel and sons, Harmen and Clarence, spent Saturday forenoon at the John Trampel home.

Dale Roths was visiting at the home of his grandparents, Mr. and Mrs. Fred Bachman, Friday.

Some from this vicinity attended Achievement Days in Garner Friday and Saturday.

Mr. and Mrs. William Bohning and William and Faye, of Belmond; Walter Schlichting, Johnnie and Elmer Trampel were visitors at the Peter Trampel home Sunday afternoon.

Mr. and Mrs. Henry Buseman were Sunday visitors at the Mrs. Mary Roths home.

Mr. and Mrs. Tony Tebbens and sons were Sunday evening visitors at the Will Waddingham home.

Mrs. Herman Beek and son, Donald, of Davenport, were entertained as dinner guests at the John Trampel home, Sunday.

Mr. and Mrs. Robert Roths and children were Sunday afternoon visitors at the Harvey Harberts home.

Eastern Star District Meeting

The Yearly Eastern Star District meeting will be held at Mason City next week Wednesday, September 1st at eight o'clock in the evening at the High School Gymnasium. There will be a six-thirty dinner at the Lutheran Church, served for forty cents. All who desire to attend, please make reservations for the dinner.

Move To New Jail

Back in 1851 a bank located at Wapello, county seat of Louisa county, erected what was considered a most excellent building for that day, but in 1861 the bank sold the structure to the county and the latter has used it for a jail ever since. Apparently it has held the prisoners just as safely as other jails. At least nothing is said about their having escaped. This year, the county got extravagant and built a new one. The new one has room for 22 prisoners and there is one cell which it is claimed no prisoner can ever get out of. The sheriff moved in last week.

ALFALFA CURING ESSENTIAL

Alfalfa may lose from 15 to 20 per cent of its weight through moisture evaporation from the time it is cut until it is in the stack or mow, says C. B. Juday, Iowa State College agronomist.

Since alfalfa usually contains around 35 per cent moisture when it is standing in the field, it is essential that it be allowed time to dry out before storing. Juday explained that alfalfa is usually cut at 18-20 per cent moisture, and that 25 percent was the uppermost limit for safe storage.

Alfalfa must not be too dry when picked up or many of the leaves will be lost.

Melanism

The term melanism has been applied as the converse of albinism, both of which occur in wild animals. Melanism is more rare than albinism in this country, but throughout intertropical America both make their appearance quite frequently in warm-blooded animals according to an authority in Los Angeles Times. Melanism is caused through an abnormal development of black pigment, while albinism is brought about through lack of it.

AMERICAN BOY INTRODUCES A NEW FOOTBALL GAME

In the early fall issues of THE AMERICAN BOY there'll be presented the story of a new game—six-man football—fast as professional football, wide open as basketball, thrilling as hockey!

The game came to life through the need of small schools for some substitute for 11-man football, which was too expensive Stephen Epler, a Nebraska graduate student in atheletics, developed the game of six-man football to meet this need In six-man football anybody can score, the possibility of injury from mass plays is minimized, and the game is open enough for spectators to follow every exciting development

The new game is a hit New schools are taking it up every day In coming issues THE AMERICAN BOY tells the world about this practical new game In addition it presents The American Boy Official Handbook, which can be obtained from the magazine at 20 cents a copy, or 15 cents when bought in bulk

NOTE· Subscription prices of THE AMERICAN BOY will be raised in the near future Send your subscription order at once to take advantage of the bargain rates now in effect· one year at $1.00 or three years at $2.00 Foreign subscriptions 50c a year extra Send your name, address and remittance to THE AMERICAN BOY, 7430 Second Blvd, Detroit, Mich. On newsstands the price is 15c a copy.

Driving a car is a full time job It cannot be safely combined with sociabilty, sight-seeing, window shopping or day dreaming Just remember if you are traveling 30 miles an hour—you'll go 44 feet in a single second. If another car is approaching you at the same speed it means that 88 feet will be covered in one second, while you glance out the window or away from the road

---

It seems to us that the rising generation retires about the time the retiring generation is rising

PLAN SINK LOCATION

Running water pumped by electricity is a change being brought to many Iowa farm homes by the installation of electricity And to a housewife water in the house may mean a kitchen sink to replace the wash bowl and improvised drain

Frequently this will require some rearrangement of the kitchen equipment Miss Dorothy Simmons, extension home management specialist at Iowa State College says a number of families have found it an advantage to plan the entire arrangement first before any work is done

In choosing a new sink, Miss Simmons cites the importance of taking careful measurements to be sure it will fit into the space intended for it It should be placed high enough so that those who use it need not stoop It is desirable that the space directly below the sink be left open so that plumbing can be reached easily Cupboards may be built under properly constructed drain boards

Lighting and ventilation will help decide the location of the sink The location of the drain and the water pipes must also be considered Since the sink is a center for food preparation as well as dishwashing its location with relation to the stove and to shelves where dishes and silver are stored is important

The Cat Brought One

Since snakes have been getting into houses and barns of late the house cat of Mrs John Roggensack a resident of the town of Marquette, must have decided to bring in one A few days ago, while Mrs Roggensack was sitting in the house, the cat came in dragging a full grown rattlesnake with seven rattles The cat had caught the reptile in its teeth just behind its head and held it firmly there as she dragged it into the house It was still alive, but the woman finished killing it with a stick Cats have often been known to catch small garter snakes, but this was quite an undertaking

Biggest Straw Stack

Some farmers are claiming the tallest stalk of corn, but F. G Schultz, a farmer whose home is near the village of Bremer, has a new claim to offer He claims to have the biggest straw stack in Iowa on his farm The immense stack is 85 feet long, 30 feet wide and 27 feet high He has enclosed this immense pile of straw by a wire fence ten feet high Years ago farmers used to burn their straw just to get it out of the way but now it is worth good money This pile of straw was threshed from 40 acres of oats, and besides the straw, the field yielded 2,500 bushels of grain No estimate was given as to the tons of straw.

Another Snake Found

It seems that horned toads are not the only animals which can still live while walled up for years. The report comes from Marshaltown that while workmen were engaged in tearing down and re-building the wall of the Security Savings Bank, they found a garter snake about 14 inches long in the brick wall It was said that the snake was active and showed no signs of having been walled up for years Those who saw the snake thought that it may have crawled into a small hole and then been unable to reverse itself and crawl out again.

Colonial records of the year 1663 disclose that when Jasper Abrahamsen was found guilty in a criminal case the burgomasters decreed that he was to be "brought to the place where criminal justice is usually executed, be bound to a stake and severely flogged, and the Hangman shall make a gash in his left cheek or jaw so that the blood flows, further he shall be banished for the term of five and twenty years from the cities jurisdiction . . ." Abrahamsen and Hendrick Jansen, a companion, went carousing through the city, demanding food and drink, entering houses and assaulting people in the city streets. Jansen received a similar sentence. —New York Sun.

Bluegrass can often be seeded very successfully in late August or early September.

The U S. dead letter office received 108,455 letters last year that could not be delivered because of faulty address, which contained $96,326.

BOY SCOUTS ABROAD

Thirty thousand boys in their teens from 37 countries, speaking 30 different languages, foregathered in Holland the first week in August for a grand international boy scout jamboree It was probably the largest crowd of youngsters ever assembled anywhere since the Children's Crusade when the zelaous youth of all Europe set forth on foot for Jerusalem to recapture the Holy Sepulcher from the Moslems Certainly it was the most representative international gathering of youth ever held

Though they could not most of them understand the words of each other's conversation, no one who understands the camaraderie of boyhood can doubt that every boy knew what the other boys who spoke in strange tongue were saying They all had a common bond of interest, for though the details of their scout-craft differs as between nation and nation, the boy scouts of all the world have the same underlying principles and purposes Honor and loyalty brotherhood goodwill and helpfulness speak the same language under all skies

The world needs more of such international contacts of youth There would be greater hope for peace if the youngsters of all nations had more chances to get acquainted with each other The impressions and friendships that form in boyhood are the lasting ones. It will be hard for fire-eaters and demagogues to persuade these boy scouts who foregathered in Holland that all the people of any other nation than their own are scoundrels and should be hated as enemies They know better. They have lived with them, played with them, swapped keepsakes with them and sung with them around the campfires.

They know that the boys of other countries are just like themselves.

SEASONAL VEGETABLES MAY BE COLD-STORED

Cold storage lockers may be utilized for the preservation of fresh fruits and vegetables as well as meats, says T J Maney, Iowa State College horticulturnt Experience has shown that many kinds of vegetables can be frozen and stored very satisfactorily, especially those which are of seasonal type that cannot be secured on the market fresh but for a few weeks.

Among the Iowa grown vegetables which lend themselves to cold storage at this time of the year, explains Maney, are green and wax beans, lima beans, peas, sweet corn and spinach.

After vegetables are prepared for storage they are first chilled rapidly in a freezer room, temperature 0 to 10 degrees F After they have been thoroughly frozen they are transferred to the locker room where the temperature is maintained between 8-15 degrees above zeroe

Vegetables to be stored should be treated as follows:

Green and wax beans—Snip, sort, wash, blanch 2-3 minutes, chill and pack dry or cover with 2 per cent brine in almost any type of container

Lima beans—Shell, sort, blanch 2-3 minutes, chill and pack dry

Peas—Hull, blanch ½-1½ minutes, chill and pack dry or cover with two per cent brine.

Spinach — Sort leaves, wash carefully, blanch 2-2½ minutes, chill, pack dry

Sweet corn—Blanch with husks 6 minutes, or without husks 3-4 minutes; pack dry either way.

In all the above processes blanching involves plunging in hot water for the time indicated, chilling is accomplished by placing in cold water A 2 per cent brine consists of 2 pounds of salt to 98 pounds of water.

STOUDER WARNS FARMERS ABOUT ANTHRAX EPIDEMIC

Because of the severe anthrax epidemic in nearby South Dakota and Nebraska counties, Iowa farmers would be wise to check carefully the cause of any "suspicious" sickness among their livestock, says K. W Stouder, Iowa State College extension veterinarian.

Anthrax is one of the most dangerous animal diseases and at the same time one of the most difficult to permanently eradicate, he warns. Spores of this disease live for years in the soil.

Symptoms of the disease are labored breathing, a high temperature and sometimes doughy swellings beneath the skin It is usually fatal. Any farm animal may contact the disease, although horses, mules and cattle are most commonly affected Humans can also contact anthrax

Early detection of the disease is imperative wherever it breaks out, Dr. Stouder says, so a veterinarian should be called when anthrax is suspected.

Animals exposed to anthrax may be immunized against the disease with bacterin or aggression inoculations, Dr. Stouder says It takes 10 days, usually for these injections to take effect.

In South Dakota and Nebraska where the anthrax scourge has already killed large numbers of cattle, state and federal veterinarians are driving ahead with a control program in the hope of stamping out the present outbreak within another two weeks Carcasses of deceased animals are being burned and strict sanitation measures are being followed.

All shipments from infected Nebraska and South Dakota counties have been banned by the state veterinarian, H. A. Seidell, Des Moines

ITEMS OF INTEREST FROM ELL TOWNSHIP

Herman Barz and son, Gerald, left Monday morning for a few days visit with relatives at Minneapolis.

Mr. and Mrs. Lewis Neuberger and son, Lester, and Donald and Roger Neuberger were Sunday evening visitors at the John Neuberger, Sr home

Mr and Mrs. Robert Roths and children were Sunday afternoon visitors at the Harvey Harberts home

Eastern Star District Meeting

The Yearly Eastern Star District meeting will be held at Mason City next week Wednesday, September 1st at eight o'clock in the evening at the High School Gymnasium. There will be a six-thirty dinner at the Lutheran Church. served for forty cents. All who desire to attend, please make reservations for the dinner.

Move To New Jail

Back in 1851 a bank located at Wapello, county seat of Louisa county, erected what was considered a most excellent building for that day, but in 1861 the bank sold the structure to the county and the latter has used it for a jail ever since. Apparently it has held the prisoners just as safely as other jails. At least nothing is said about their having escaped. This year, the county got extravagant and built a new one The new one has room for 22 prisoners and there is one cell which it is claimed no prisoner can ever get out of. The sheriff moved in last week.

ALFALFA CURING ESSENTIAL

Alfalfa may lose from 15 to 20 per cent of its weight through moisture evaporation from the time it is cut until it is in the stack or mow, says C. B. Juday, Iowa State College agronomist.

Since alfalfa usually contains around 35 per cent moisture when it is standing in the field, it is essential that it be allowed time to dry out before storing. Juday explained that alfalfa is usually cut at 18-20 per cent moisture, and that 25 percent was the uppermost limit for safe storage.

Alfalfa must not be too dry when picked up or many of the leaves will be lost.

Melanism

The term melanism has been applied as the converse of albinism, both of which occur in wild animals. Melanism is more rare than albinism in this country, but throughout intertropical America both make their appearance quite frequently in warm-blooded animals according to an authority in Los Angeles Times. Melanism is caused through an abnormal development of black pigment, while albinism is brought about through lack of it

AMERICAN BOY INTRODUCES A NEW FOOTBALL GAME

In the early fall issues of THE AMERICAN BOY there'll be presented the story of a new game—six-man football—fast as professional football, wide open as basketball, thrilling as hockey!

The game came to life through the need of small schools for some substitute for 11-man football, which was too expensive Stephen Epler, a Nebraska graduate student in atheletics. developed the game of six-man football to meet this need In six-man football anybody can score, the possibility of injury from mass plays is minimized, and the game is open enough for spectators to follow every exciting development.

The new game is a hit. New schools are taking it up every day In coming issues THE AMERICAN BOY tells the world about this practical new game In addition it presents The American Boy Official Handbook, which can be obtained from the magazine at 20 cents a copy, or 15 cents when bought in bulk.

NOTE· Subscription prices of THE AMERICAN BOY will be raised in the near future Send your subscription order at once to take advantage of the bargain rates now in effect: one year at $1 00 or three years at $2.00 Foreign subscriptions 50c a year extra Send your name, address and remittance to THE AMERICAN BOY, 7430 Second Blvd, Detroit, Mich. On newsstands the price is 15c a copy.

Driving a car is a full time job It cannot be safely combined with sociabilty, sight-seeing, window shopping or day dreaming Just remember if you are traveling 30 miles an hour—you'll go 44 feet in a single second. If another car is approaching you at the same speed it means that 88 feet will be covered in one second, while you glance out the window or away from the road

---

It seems to us that the rising generation retires about the time the retiring generation is rising

PLAN SINK LOCATION

Running water pumped by electricity is a change being brought to many Iowa farm homes by the installation of electricity And to a housewife water in the house may mean a kitchen sink to replace the wash bowl and improvised drain.

Frequently this will require some rearrangement of the kitchen equipment Miss Dorothy Simmons, extension home management specialist at Iowa State College. says a number of families have found it an advantage to plan the entire arrangement first before any work is done

In choosing a new sink, Miss Simmons cites the importance of taking careful measurements to be sure it will fit into the space intended for it It should be placed high enough so that those who use it need not stoop It is desirable that the space directly below the sink be left open so that plumbing can be reached easily Cupboards may be built under properly constructed drain boards

Lighting and ventilation will help decide the location of the sink The location of the drain and the water pipes must also be considered Since the sink is a center for food preparation as well as dishwashing, its location with relation to the stove and to shelves where dishes and silver are stored is important

The Cat Brought One

Since snakes have been getting into houses and barns of late the house cat of Mrs John Roggensack, a resident of the town of Marquette must have decided to bring in one A few days ago, while Mrs Roggensack was sitting in the house, the cat came in dragging a full grown rattlesnake with seven rattles The cat had caught the reptile in its teeth just behind its head and held it firmly there as she dragged it into the house It was still alive, but the woman finished killing it with a stick Cats have often been known to catch small garter snakes, but this was quite an undertaking.

Biggest Straw Stack

Some farmers are claiming the tallest stalk of corn, but F G Schultz, a farmer whose home is near the village of Bremer, has a new claim to offer He claims to have the biggest straw stack in Iowa on his farm The immense stack is 85 feet long, 30 feet wide and 27 feet high He has enclosed this immense pile of straw by a wire fence ten feet high Years ago farmers used to burn their straw just to get it out of the way, but now it is worth good money This pile of straw was threshed from 40 acres of oats, and besides the straw, the field yielded 2,500 bushels of grain No estimate was given as to the tons of straw.

Another Snake Found

It seems that horned toads are not the only animals which can still live while walled up for years. The report comes from Marshaltown that while workmen were engaged in tearing down and re-building the wall of the Security Savings Bank, they found a garter snake about 14 inches long in the brick wall It was said that the snake was active and showed no signs of having been walled up for years Those who saw the snake thought that it may have crawled into a small hole and then been unable to reverse itself and crawl out again.

Colonial records of the year 1663 disclose that when Jasper Abrahamsen was found guilty in a criminal case the burgomasters decreed that he was to be "brought to the place where criminal justice is usually executed, be bound to a stake and severely flogged, and the Hangman shall make a gash in his left cheek or jaw so that the blood flows, further he shall be banished for the term of five and twenty years from the cities jurisdiction . . ." Abrahamsen and Hendrick Jansen, a companion, went carousing through the city, demanding food and drink, entering houses and assaulting people in the city streets Jansen received a similar sentence. —New York Sun.

Bluegrass can often be seeded very successfully in late August or early September.

The U S. dead letter office received 108,455 letters last year that could not be delivered because of faulty address, which contained $96,326.

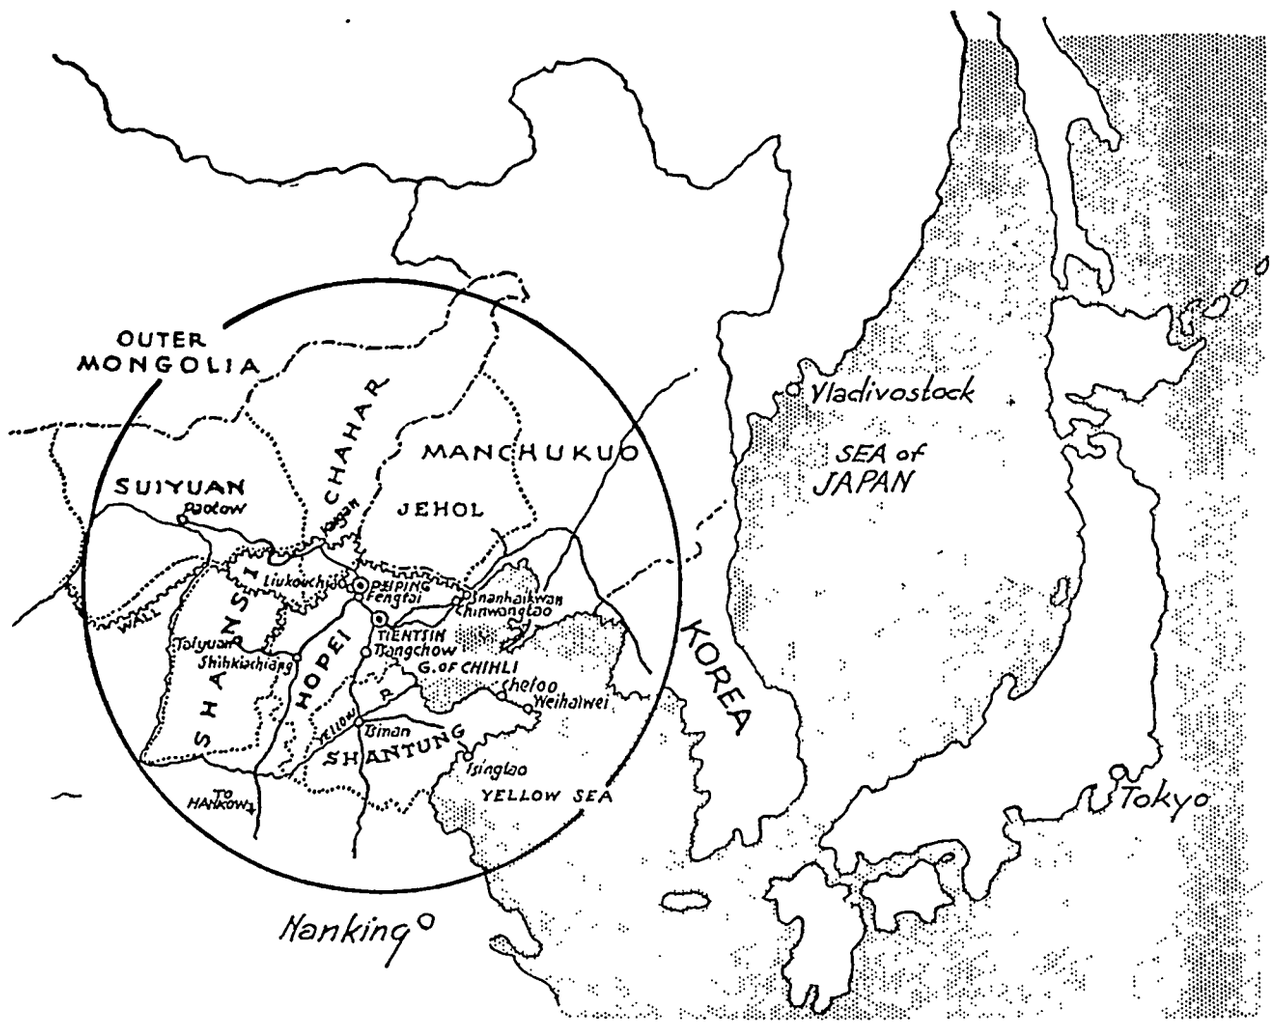
WHAT'S BEHIND THE WAR IN CHINA

Japanese Seek New Wealth They Failed to Find in Manchukuo; Chinese Are Not Yet Ready for Unified Resistance.



Circled on the map above are the five North China provinces which may be the next step in Japanese expansion.

By WILLIAM C. UTLEY

JAPAN is an ambitious nation and a needy one. Her ambition is the governmental and economic leadership of Asia, or at least eastern Asia. Her needs are territory for an ever-expanding population, raw materials that her own islands cannot produce in sufficient quantity, markets for her manufactured goods and adequate defense against her enemies.

This is why you read every few years—or even every few months—of a new war scare in North China. Sometimes it is not merely a scare, but an actual war, even as today, whether war has been officially "declared" or not.

Always upon the Chinese who oppose her gradual expansion, Japan wreaks a vengeance which to us across the Pacific often seems all out of proportion to the "aggression" committed by opposing her. But after each of these retributions she is found, when the smoke and flames clear away, to have assumed domination or even actual control over one more piece of territory.

Just how much more her influence will be extended after the present conflict has died out it is impossible to say. Indeed, that may depend upon the degree of opposition she meets. If the Chinese national government at Nanking, under the dictatorship of Gen. Chiang Kai-shek, decides to let the twenty-ninth army carry the main burden of defense, Japan will probably emerge with nothing more than an extension of control to cover the Peiping-Tientsin area and part of the province of Chahar. If, however, a China now more united than at any time since the downfall of the Manchu dynasty decides to come en masse to the aid of the twenty-ninth army, Japan may attempt to punish China to terrible degree. Successful in this, Japan would probably extend her dominance throughout all the five northern provinces and virtually all of China south of the Yellow river valley.

Japan's Westward March.

If Chiang Kai-shek does throw the full strength of China at Japan, it will be a fight to the death. For the Japanese are full of that strange oriental pride which permits no loss of prestige. They will fight China to the bitter end before they will submit to a compromise on their demands. "Death before dishonor!" is more than a slogan with them. It is a law of nature as inexorable as the law of gravity.

The fighting in North China today is but another step in Japan's westward march. Earlier steps were those which resulted in control, tantamount to annexation, over the Chinese provinces of Manchuria and Jehol. For a short time after those steps were taken Japan marked time, strengthening her hold upon these provinces, and fortifying her front against Russia, the eternal enemy.

Manchukuo was supposed to open up vast, new and desirable horizons. Japan's population of 70,000,000 was growing at the rate of 1,000,000 a year; her people needed more room and more raw materials. Since 1931 she has poured investments totaling 1,400,000,000 yen into the puppet state Some results were forthcoming—soy beans and kaolaiang, chemicals, slight increases in iron ore and coal, and a good increase in oil shale—but these fell far short of Nippon's hopes.

Manchukuo was supposed to open up a great new market for Japanese manufactured goods; but the increase in exports to the United States for 1935 over 1934 was equal to one-third of the total exports to Manchukuo. As a new home for Japanese colonists Manchukuo was pretty much of a flop; less than 250,000 Japanese live there today.

It was apparent that Japan could not, in pursuing her hegemonic policy, continue marking time for very long. In North China were larger fields for her exports; in addition, the area was that much closer to the great market of China proper. So the Japanese began to cast covetous eyes upon Hopei, which includes the cities of Peiping and Tientsin; Chahar, which lies between Mongolia and Manchukuo; Suiyuan, Shansi and Shantung. They penetrated (peacefully, to be sure) through Hopei and Chahar, until these two became practically self-governing states.

Anti-Japanese Spirit Grows.

In Hopei's eastern countries, Japanese influence blossomed into a virtual protectorate. But when it reached a certain point Japan's peaceful invasion was halted. With the rise of Chiang Kai-shek, the Chinese were developing a new unity, although they were not nearly so unified as our states are, for instance. Yet the anti-Japanese spirit was becoming more widespread and more open. It probably culminated in the skirmish between Chinese and Japanese at Marco Polo bridge, the incident which gave rise to the present grave crisis.

It is assumed by many observers in the Far East that the incident was seized upon by Nippon as an excuse for further Japanese invasion on the pretext of retaliation, which would extend Japanese control over the five North China states and even to the south, eventually. Others contend that Japan's immediate objective is the strengthening of her grip on Hopei and Chahar.

Yet it cannot be overlooked that the other three provinces hold rich prizes for Toyyo. Shansi contains more than half of all the coal in China; the other northern provinces are capable of great cotton production for Japanese industries and for the manufacture of gunpowder, so essential to a militant nation. Japan once imported the bulk of the cotton crop of China, which is third in the world's production; but China began to restrict her cotton exports to Japan and left the latter in a bad way.

Suiyan and Chahar are extremely important to Japan's military strategy, for they would act as an efficient buffer along the left flank of her Asiatic front, greatly strengthening her position on the mainland.

On the other side of these provinces lies Sovietized Mongolia. The terrain of Suiyuan and Chahar, partly included in the Gobi desert, is wild and difficult, and without satisfactory transportation facilities. It would take only a small, well-trained Japanese army to prevent penetration by the Russians and to prevent the spread of communism. Further, the Japanese, in possession of these two provinces, could then put an end to their use as a base for communist guerilla warfare against Manchukuo and Jehol.

Railroads Key to Control.

On the peninsula of Shantung are the rich Yellow river valley and the ports of Chefoo, Weihaiwei and Tsingtao. With Hopei and Shansi, Shantung forms the transportation center of North China. In possession of the peninsula Japan would be in a position to control the Gulf of Chihli and the Yellow sea.

Key to domination of China is its railroad system. Who controls the railroads can control the territory they serve. It may be seen upon the accompanying map how the railroads of North China radiate from the area about Peiping and Tientsin. Once Japan is in complete control of this area her influence could follow the rails to the important city of Kalgan in Chahar, and from there to Paotow in Suiyuan; into the southwest over the Peiping-Hankow railway to Shihkiachiang and southern Hopei, and to Taiyuan in Shansi; southward from Tientsin to Tsangchow and across the Yellow river to Tsinan, thence southward again to Nanking itself and eastward to the port of Tsingtao. These railroads, in addition to one across Hopei from Tsangchow to Shihkiachiang which the Japanese wish to build if they can get the permission of China, are of tremendous military importance.

From the latest dispatches it appears Japan is in control of the all-important line between Tientsin and Peiping, although it is a precarious sort of control, with the Chinese twenty-ninth army constantly threatening to attack. Actually, during the early days of the present crisis, the Chinese did press a drive along this railroad, capturing three key stations, only to lose them again after a brief tenure.

Liukouchiao, the railroad junction south of Peiping which controls the Peiping-Hankow railroad route, is also vital to Japanese hegemony; it was the scene of one of the early battles.

As this is being written Gen. Chiang Kai-shek is faced with a decision that China has had to make again and again since the Japanese awakened to the necessity for expansion. Shall he declare open warfare against Japan, or shall his national government continue to make feeble protests while the local troops of the North defend their country—ineffectively, as they are wont to do?

Japanese Better Equipped.

China is more united today than it has been for many years in the past; indeed the very bond of unity has been the common feeling of indignation over the encroachment of the Land of the Rising Sun. There are many demands for war pouring into Nanking from the provinces. But the feeling is generally that the time has not yet come for general and unified effort to throw out the invaders.

Local Chinese forces in Hopei and Chahar are not equal to the task of repulsing the Japanese, even though every last man is ready to lay down his life. The twenty-ninth army is fairly well equipped, but hordes of the provincial troops have only long swords with which to battle airplane bombers, artillery, tanks and machine guns. The Japanese are ready to make war with the finest modern paraphernalia, and there are plenty of troops ready for replacements. Chiang's only hope, if he should declare war, would be to dispatch the national government's best troops to the North China front and defeat the Japanese with sheer power of numbers—for he could outnumber them two to one, and better.

Probably he will decide to let the Japanese have what they want, just as they took what they wanted in Manchuria and Jehol.

Canada Looks to Beavers for Key to Drouth Problem

Their Return May Stem Erosion of Soil, Also

Ottawa.—Comeback of beavers will play a part in solving the drouth and soil erosion problems in Canada. Because of their industrious building of dams and underwater homes, beavers regulate the flow of water, make streams navigable, create reservoirs for time of small rainfall, and so indirectly keep sufficient seepage in the ground to allow trees and grasses to grow.

In charge of the venture is Canada's beaver man, Grey Owl.

Grey Owl likes beavers. He has them in to lunch, he takes them on his travels. Grey Owl feeds baby beavers milk from a syringe, he likes the young beavers wet on his knee. He lets them build their house in his cabin, and delights when they chew the legs of his chairs.

Helps Beavers Build.

Grey Owl decided that if the beavers were once more to be numerous they must overcome their fear of mankind.

Here is how he started to cultivate the beavers' confidence. When he saw the animals having difficulties with extra large trees, his axe cut through the timber quicker than their teeth. The beavers found trees chopped down for them ready to use in building their houses. They found a man actually helping them construct dams, plug the difficult places, make their houses waterproof. Grey Owl's wife, Anahareo, taught the beavers to come at her call. Beavers swim out to her canoe. Wherever Grey Owl and Anahareo go for the Canadian government they in this way help the beavers of their new locality, teach them to trust man.

Where they found injured or orphaned baby beaver they nursed and fed them. They found beaver like apples and boiled rice, in addition to their natural food of willow shoots and leaves. Grey Owl found that the beavers cry like humans, that their voice registers feelings with inflections easy to interpret, that beavers have the simpler emotions, show gratitude and affection.

Changes Working Hours.

To further aid in studying the beaver, Grey Owl has been able to change the beaver from a night worker to a day worker so that cameras could film the little animals in action. Due to Grey Owl's perseverance with these animals, numerous government films have been made to show the necessity of saving the beaver from constant hunting.

The results are already showing after Grey Owl's few years of work with the beavers for the Canadian government.

Find No 'Psychic' Talent Among University Classes

Minneapolis, Minn.—Tests of a large class of freshmen and sophomore students at the University of Minnesota, here, to discover any individuals that might have special mind-reading or telepathic ability failed to reveal a single individual so talented, Dr. Kenneth H. Baker reported to the current issue of the Journal of Experimental Psychology.

The tests conducted were similar to those made at Duke university in which the subjects attempted to call each card in a special set as it was removed from a deck held face down before them. The results are not conclusive, Dr. Baker warns, but represent only a preliminary attempt to secure subjects who could duplicate the performances reported from Duke university.

Newest Night Comfort Is Air-Conditioned Bed

Cincinnati.—Aid for hot weather sleeping or for patients afflicted with hay fever is an air-conditioned canopy for beds which is entirely transparent to overcome the dislikes of people with claustrophobia. Most everyone has this dislike of closed spaces in some degree or another

The canopy, made of a trade material known as Pliofilm, is soft, can be rolled up, is lightweight and washable. The canopy is placed over a bed like a mosquito cloth which a mother uses to cover the baby in his carriage, and at the foot of the bed the canopy covers the outlet of a small airconditioning unit.

A lowering of the temperature by ten degrees is claimed for the unit and the excess humidity is simultaneously removed.

X-Rays Predicted Carolina's Quints Before Their Birth

They Only Happen Once in 40,000,000 Pregnancies

Chicago.—The North Carolina quintuplets, prematurely born last November, but who died at birth, will go down in medical history as the first quintuplets ever diagnosed as such before birth.

An X-ray picture was taken of the mother when she entered the Duke hospital, Durham, to have her baby. The film showed four heads and five bodies.

Next day the babies were born and, like the Dionnes, all were girls. Four were normal and the fifth was a headless freak. Two of the babies survived as long as 30 minutes.

Doctors Argue, Study.

Doctors throughout the country for the first time read and argued over this quintuple pregnancy, which brings the total of reported quintuplets in all medical history up to 35.

Once in 40,000,000 births is the expectancy of quintuplets.

Not only were the North Carolina births the first instance of a diagnosis of quintuplets being made prior to delivery, but because the babies died in a hospital it was possible for the physicians to make a complete anatomical study of the fetuses, placenta and membranes.

One Egg or Several?

Drs. E. C. Hamblen, R. D. Baker and G. D. Derieux report the case and their finds in the Journal of the American Medical Association.

What will provoke the most discussion among physicians, upon reading this report, is whether these babies sprang from one egg cell or from several. Were they identical or where they not?

The Duke hospital doctors are themselves perplexed, after presenting all their findings, but are inclined to the opinion that the five babies may well have been derived from a single ovum.

Think You Slept Quietly? Aha, You Just Don't Know!

Chicago.—When you wake up after a sound night's slumber you may feel as though your rest was unbroken and continuous all night long.

Really, though, you went through a changing pattern of deep sleep, stirring movement, near - arousal and then sinking down into the depths of quiet sleep again. This pattern is repeated over and over throughout the night, but as morning approaches the depths of sleep become shallower and the sleeper is easier to awaken until the alarm clock finishes the job.

This pattern of sleep was found in the course of experiments conducted at the department of physiology of the University of Chicago with both dogs and humans. By electrical means the tossings and stirrings of the sleepers were recorded and measurement was made of the degree of noise required to disturb them.

Each person seems to have his own pattern of movement and level of sensitivity to noise, and he tends to follow this pattern more or less regularly, the investigators, Drs. F. J. Mullin, N. Kleitman and N. R. Cooperman, said in reporting their findings to the Journal of Experimental Psychology.

The ease with which a person can be awakened is related to the length of time since he last moved, rather than the time of the night.

Individuals differ in both restlessness and soundness of their sleep, but the differences are not always in the same direction for both factors. On the average, the most quiet sleeper is the one most easily aroused, it was found.

During the course of the night, the test subjects sometimes would stir, wake and press a signal key to inform the investigator they had roused, and yet not recall the act in the morning. Some people do this with alarm clocks.

Worse Drouths Would Empty Fertile Regions

Denver —With climatic changes larger than those that brought the drouths and windstorms of the past few years, there would be a migration of man from the fertile parts of the nation where he now lives, Dr M M Leighton, chief of the Illinois state geological survey, predicted to the meeting here of the American Association for the Advancement of Science.

But a more immediate problem than a possible return of the glacial period is the preventing of the drift of America's fertile soils Even midwestern farmers must conserve and protect their greatest natural resource, he warned Dust storms take place even in a moist climate if bare areas are exposed to the wind. In more arid regions the balance between erosion and vegetation is so critical that man must actively aid nature.

Lesson for August 29

GOD CONDEMNS INTEMPERANCE.

LESSON TEXT—Leviticus 10 1, 2, 8-11; Proverbs 31:4, 5; Isaiah 28.1-8, Romans 14:21

GOLDEN TEXT—Wine is a mocker, strong drink is raging: and whosoever is deceived thereby is not wise. Prov. 20 1.

PRIMARY TOPIC.—What a Wise King said

JUNIOR TOPIC—When a Man Drinks.

INTERMEDIATE AND SENIOR TOPIC—How Drinking Harms Others

YOUNG PEOPLE AND ADULT TOPIC—Why Beverage Alcohol Is a Social Foe.

The use of intoxicating liquors is financially unprofitable to the nation, scientifically unwise and destructive, socially degrading, and morally wrong.

I. The Problem.

The selected Old Testament scriptures which comprise our lesson present the use of intoxicants as causing four socially undesirable results.

1. Religious disobedience (Lev. 10:1,2; Isa. 28:7). Two things we may rightfully expect of those who serve the nation in its religious life: (1) a vision of God and obedience to that vision in life and service, and (2) the exercise of sound God-guided judgment in the affairs of the people. But note what happens when the prophet and the priest turn to wine and strong drink. "They err in vision" (Isa. 28:7). That is, they have no clear concepts of divine truth, and lead the people into error. Further, we see that "they stumble in judgment." To every true servant of God comes repeatedly the opportunity and the need of rendering judgment, that is, of advising and counselling those to whom he ministers. If his mind is befuddled by the use of alcohol (or, for that matter, of any other kind of worldly indulgence) he will "stumble," and cause his people to stumble.

A sad incident is related in Lev. 10:1,2 of the sons of Aaron, appointed to the priesthood and instructed in its privileges and duties, but coming with strange fire to be offered before the Lord. Swift and terrible was the judgment they received. We are not told directly that they were intoxicated, but it is implied in the fact that there is an immediate injunction against the use of wine by the priests.

Lest someone think that such a thing could not happen in our day the writer mentions word which recently came to him that a leading seminary has professors on its staff who defend the so-called moderate use of alcoholic drink.

2. Political disorder (Prov. 1:5). While political leaders make sanctimonious protestations that government agencies are not influenced by the liquor interests, it is common knowledge to even those who are slightly informed that the two are closely associated. The result of that unholy alliance is rightly described in Prov. 31:5—"They forget the law, and pervert the judgment of any of the afflicted." Much of the sad disorder in the body politic is traceable directly to the door of the makers and sellers of alcoholic beverages.

3. National decay (Isa. 28:1-6). "Overcome with wine"—stricken down, useless in life, without true ambition, such is the picture of the man who gives himself to drink. Poverty, with all its attendant social problems, follows on the heels of the sale and use of intoxicants. Some liquor dealers are beginning to sense a rising tide of opposition to their business, and are advertising, "We do not want bread money," but the fact is that it is all too often bread money that goes for liquor, and the vile stuff is still on sale where the poor man may readily spend his "bread money" for it.

4. Personal degradation (Isa. 28:8). "Vomit and filthiness" are not very nice words, but they describe accurately the ultimate condition of the drinker and his surroundings. The writer knows a young man who boasts that he never gets drunk because the "booze" makes him so sick that he vomits it up. Imagine a supposedly intelligent man drinking stuff so vile that his stomach (evidently having more sense than his head) sends it back—and then boasting of his ability to drink more!

II. The Solution, a Divine Principle (Rom. 14:21).

Thousands of Christian people have solved not only the drink problem, but practically every question of conduct and social life by applying this principle. Surely no true follower of Christ will be guilty of doing anything that will cause any brother to be offended, to stumble, or to be made weak.

Foundations

The foundation of domestic happiness is faith in the virtue of woman; the foundation of political happiness is confidence in the integrity of man; the foundation of happiness, temporal and eternal, is reliance on the goodness of God.—Landor.

Reading Good Books

Book love is your pass to the greatest and purest and the most perfect pleasures that God has prepared for His creatures.

Here's Planned Prettiness

IF AUTUMN comes will you be left behind with faded summer frocks, Madam? No, no, many times no—that is, not if you will but accept this cordial invitation from Sew-Your-Own. It's the easy way to become frock-sure of chic for yourself and your daughters, as well. So Madam, why not sew, sew, sew-your-own!

A Dutch Treat.

It isn't often mother gets a break (it's beauty before age, you know) but this trip she does. Sew-Your-Own has designed, especially for her, an all-occasion frock (above left) that's simply lovely to look at. If father's compliments have become a bit rusty from lack of use, this frock will bring them back to their former brightness It's pretty in any fabric: gingham, silk crepe, rayon prints, percale, or sheer wool.

It's a treat, too, for mother when she finds a dress for Little Sis that's as carefully planned as the captivating model above center It gives the growing girl the fluffing out she needs in the shoulders, and the prettily flared skirt offers her graceful poise indoors, plus full freedom for activity out of doors It's adorable with the collar and cuffs in white linen. It heightens the contrast of her luscious healthy suntan.

Chic for the G. F.

And a treat for all concerned is the frock Sew-Your-Own has created for The Girl Friend. She may be collegiate, high schoolish, a steno, mother's helper, or a young lady of leisure, but whatever she is she'll look the part and prettier in a take-off on Pattern 1327. It is new, novel, and easy to sew. It is undoubtedly the frock to wear when your escort, the time, and the place are important.

The Patterns.

Pattern 1372 is designed for sizes 34 to 46. Size 36 requires 4⅔ yards of 35-inch material.

Pattern 1987 is designed for sizes 4, 6, 8, 10, and 12 years. Size 6 requires 2 yards of 35-inch material, plus ⅜ yard contrasting.

Pattern 1327 is designed for sizes 12 to 20 (30 to 38 bust). Size 16 requires 4¼ yards of 39-inch material, plus 3½ yards of cord for lacing. With long sleeves, 4⅝ yards required.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Locker System In Operation, Store Builing Being Improved

KLEMME FOOD MARKET STORE REMODELING AND ENLARGING

With the completion of the new cold storage and refrigerator locker system at the Klemme Food Market, work of enlarging and remodeling the store is under way

Walls will be taken out, the old refrigerator rooms will be removed and the front store room will be moved further to the rear An addition is being built to the southeast part of the building

When all work has been completed the store will be considerably larger and more convenient

Locker System Working

The cold storage and locker system is now in operation and a number of people are already beginning to store meat in the plant

Mr C A Larsen plans to have an opening day in the near future

GEORGE JOHNSON AND ELMER NEITLAND DRAW TERMS ON LARCENY CHARGE

Plead Guilty To Charge Of Stealing Eggs From Local Produce Dealer

Sheriff "Dutch" Brouwer and Deputy Elmer Katter were in Klemme Thursday gathering clues and running down suspects who stole several cases of eggs from the Matt Smith Produce store the past week

George Johnson and Elmer Neitland were taken into custody by the sheriff and after questioning both men pleaded guilty and were sentenced by Judge M H Kepler at Northwood. Saturday Both men are to serve five years at Fort Madison for the crime and were taken to that place Monday by Sheriff Brouwer

Johnson and Neitland disposed of eggs to buyers at Ventura, Meservey and Swaledale.

No one has yet been able to figure out why it is that you can find men that will drink out of the same bottle but who wouldn't eat with the same fork.

Balanced Powers In Our Government

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

Although the Seventy-fifth Congress ended its sessions many days ago, America continues to hear vigorous discussion concerning what it accomplished or failed to accomplish.

In much of this discussion there is a deep note of disappointment. The average citizen has seen few signs of effective steps towards reducing either the cost of living or the cost of government both of which bear so heavily on his earnings. He has observed little evidence of constructive action to widen the scope of employment opportunities —on which rest our greatest hopes of recovery.

To many American citizens various other needs appear to have been forgotten during the eight months of debate.

But one phase of Congressional activity has aroused widespread interest. This was the effort of many Congressmen to assert their authority as the people's representatives and the people's voice in government To a degree seldom seen during recent years, Congress during its past session, fought for the independence of the Legislative branch, which makes our laws; the Executive branch, which administers them, and the Judicial branch, which interprets them

It was this balanced form of government which, historians agree, contributed so greatly to the success of the Constitution whose 150th anniversary we celebrate this year.

It was this balanced form, with its safeguards for all citizens, which enabled America to make so notable a contribution to the history of human liberty and government of, by and for the people.

If members of the Seventy-fifth Congress have succeeded in strengthening that principle and the Constitution which perpetuates it, their sessions have not been in vain.

Kings Heralds Will Meet

The September meeting of the Kings Heralds will be held Sunday morning at the Methodist Church.

HELLO, FOLKS!

A seven and one-half pound baby girl was born to Mr and Mrs. Carl Anderson at the Forest City hospital this Wednesday morning. The Andersons now have two fine girls in their family.

Two Klemme Couples Married The Past Week

LORETTA KAHLER AND FRED JAHNKE WED

Bride And Groom Both Well Known In Garner And Klemme Territory

(Garner Leader)

Miss Loretta Kahler, second daughter of Mr and Mrs Earl Kahler, was married to Fred Jahnke, son of Mr and Mrs Henry Jahnke of Klemme, at the Bethlehem Lutheran parsonage at Mason City at 3 o'clock Friday afternoon, August 20th

The Rev C A Hinz officiated at the ceremony, and Mrs Hinz played the Wedding March from "Lohengrin' preceding the single ring service Attendants were Mr and Mrs Raymond Gruben of Nora Springs, brother-in-law and sister of the bride

The bride was attired in a bright blue crepe dress with blue accessories, and she carried a corsage of pink roses Her attendant wore a pink taffeta dress with white acceessories Both the bridegroom and his attendant wore blue suits.

Mrs Jahnke is well known in this vicinity, having lived around Garner almost all her life. She attended Klemme high school and later worked at Britt and then in the White Lily cafe at Klemme and the Garner cafe here She is now employed at the R. E. Nesbit cafe in Garner

Mr Jahnke has spent most of his life around Klemme and is now employed at the Garner Sales Company

The couple has rented apartment rooms over Roe's I G A store and will start housekeeping there September 1st

STROMER FAMILY HELD REUNION LAST SUNDAY

Gathering Is To Be Annual Affair

The descendants of Mr. and Mrs Charles L. Stromer met Sunday at the Paul Stromer home Fifty-nine years ago Mr and Mrs Stromer with their children, Henry and Bertha, came from Chicago and settled on this place which has been the Stromer homestead for three generations. Ten families partook of a bounteous picnic dinner The afternoon was informally spent in visiting and recalling old times. Sunday was also the birthday of one of the group, Mr Irwin Priebe. It was decided to make this reunion an annual event. The meeting next year will be at the home of Mr and Mrs. Fred Schmidt. Those in attendance were Mr and Mrs. Julius Priebe. Mr and Mrs. Fred Schmidt and family, Mr and Mrs. Irwin Priebe and family, Mr and Mrs. Paul Goll and family, Mr and Mrs. Herman Schmidt and Luverne, Mrs Elizabeth Stromer, Mr. and Mrs Victor Huenemann and family, Miss Dalia Stromer, Mr. Fernon Griggs, Mr and Mrs. Rudolf Beinert and family, Mr and Mrs Paul Stromer and family and Mrs Grosshuesch, Gertrude, Ewalt and Edward.

Taxpaying time is around the corner, second installment of taxes become due September 1st.

KLEMME GIRL MARRIED LOCAL FARMER LAST WEDNESDAY AFTERNOON

Miss Mabel Griffen Bride Of Oscar Durham At Home Wedding

Miss Mabel Griffen, daughter of Alvina Griffen, and Mr Oscar Durham, Liberty township farm hand, were united in marriage at the Griffen home Wednesday afternoon, August 25th at 2 o'clock. Rev Wm Zabilka, pastor of the Klemme Methodist Church officiated, using the single ring ceremony.

The wedding rituals were performed in the presence of a few of the immediate relatives

The Bride wore a Royal blue crepe dress trimmed with mail heads and accessories to match. She was attended by Miss Ardith Meyer, who acted as Bride's Maid and who wore a blue flowered silk chiffon wiht accessories to match.

The Groom wore the conventional dark suit and his Best Man, Marvin Doaley, wore a navy blue suit.

The Bride was born in Klemme and has spent all of her life in this community, attending the local schools and graduating with the high school class of 1936 She is affiliated with the Methodist Church and Sunday School

The Groom is a native of Albia, Iowa. Both of his parents died several years ago Recently he has been in this community and is employed at the Kermit Stille farm in Liberty township. The young couple expect to make their future home in this community

After the wedding ceremony a luncheon was enjoyed at the home of the Bride's mother

Miscellaneous Shower Held For Recent Bride

A miscellaneous shower given in honor of Mrs Oscar Durham by the ladies of the neighborhood, was held at the Alvina Griffen home Thursday afternoon A social time was enjoyed in playing games, and visiting, after which a nice lunch was served Mrs. Durham received a number of gifts from her friends

LEGION-AUXILIARY NOTES

The Septemer meeting will be held at the Martha Bredbenner home Sept 9th.

We have been asked to have our membership in by the 15th Members or prospective members can signify their interest by paying dues of one dollar and having name sent in by Treasurer Mrs. Coobs before that date .

The Unit wants to thank the retiring officers for the interest and work the past two years. Much credit is due Miss Bock and her corps of officers for the success of the organization during their term in office

Six members attended the County Meeting at Garner Tuesday, at which time officers were installed Those attending from this Unit were Mrs. E. J Arnold, Mrs Martha Bredbenner, Mrs Ben Coobs, Mrs P. W Johnson, Mrs W F Pavey and Miss Lydia Bock

Members of the Rosendahl family had a picnic at Clear Lake, Sunday. Those present were: Mrs Louisa Rosendahl, Walter Rosendahl and family, Irvin Rosendahl and family, Ewald Josten and family, Verner Priebe and wife.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG WASHINGTON D C

Washington. — Some years ago, when New England's sharp-tongued George H. Moses sat in the presiding officer's chair as president pro tempore of the senate, I used to marvel at the speed with which he got rid of legislation. The Republicans were in control of the senate. The late Senator Charles Curtis of Kansas was the Republican leader. Between the astute Curtis and the nimble-witted Moses, the senate many times really ran in high gear.

Like Old Times

To me, it was reminiscent of the old days, therefore, when I watched Vice President "Jack" Garner operate in the senate the other day to get the judiciary reform bill through that body without permitting a deluge of debate. I think Mr. Garner performed on that occasion with even greater finesse than did Senator Moses because Mr. Garner did not wait for cues from the floor of the senate; he simply took charge and, knowing what the job was, saw to it that things were accomplished in record time.

But the significance of this incident should not be overlooked. It was noteworthy, of course, that the senate should pass the court bill and send it to the house in a total of six hours. It was noteworthy that the Vice President established a precedent by granting permission to senators to include in the Congressional Record speeches they would have made if the debate had been prolonged. And yet it was the implication of the senate action that seems to me to be the most important phase of that situation.

The way I see the picture is this: The ease with which that bill was put through demonstrates that those who opposed the original bill to add six new justices to the Supreme court were objecting only to the court packing and not to the reforms in procedure.

The bill as it becomes law provides for a number of changes in court procedure to the end that adjudication of controversy can be accomplished much more quickly than has been the case in the past. It does not include any addition to the membership of the Supreme court and it does not include any provision for sending hand-picked judges into the various circuits and districts as the White House and the Department of Justice may decide. In other words, the new law leaves the judiciary system independent and again establishes it as a coordinate branch of the government, equal in all respects to the legislative, which is congress, and the executive, which is the President and the executive departments. There can be no doubt that this piece of legislation is worthwhile although to the layman the benefits may not immediately appear. It must be regarded, however, simply as a piece of legislation that cuts much legal red tape and those who must avail themselves of the courts or those who are forced under jurisdiction of courts will come more nearly obtaining justice than heretofore.

I have said in these columns before that when the senate refused to accept the President's orders and pass legislation that would permit him to appoint six new justices to the Supreme court at one time, the President suffered one of the worst political defeats he has ever encountered. He probably will never meet with another such disastrous setback.

It was obvious to the vast majority of senators and representatives and to observers here within six weeks after Mr. Roosevelt submitted the court packing bill that he could not force it through. He refused nevertheless to admit defeat. In consequence, it took nearly six months of bitter and futile wrangling in the senate to convince the President that he was on the wrong side of the question as far as public sentiment was concerned.

So, congress has wasted nearly all of the 1937 session on a proposition for which it was not responsible.

It may be said that congress should remain in session under those circumstances and give all of the time that is necessary to deliberation of measures before it. Yet, facts must be faced. One of these facts is that through all of the months prior to adjournment scores of members were wearing themselves down fighting against a proposition with which they could not agree. In the meantime, Washington's summer settled down. Washington's summer is a completely hot and humid summer. Most of the members of the senate and house are no longer boys of college age. They cannot withstand the physical rigors of heavy work under weather conditions that prevail in a Washington summer. Thus it is not strange at all that as July passed and August wore on, most of the members wanted to go to places more comfortable than the Capital city and that constituted a terrific urge to get rid of whatever legislation was before them with the very minimum of effort. In consequence, there has been some very bad legislation and congress is now wholly to blame for it.

* * *

A friend of mine, a well-known doctor, who is not a politician, knows nothing about politics—a man, in short, who minds his own business and tries to do the best job of which he is capable, asked me a question the other day that precipitated this discussion. He asked me why the newspapers throughout the country were giving so much space, front page space at that, to the political fight over the Democratic nomination for mayor in New York.

New York's Fight

My doctor friend observed that which is true, namely, that the mayor of New York is only mayor of that city and has no jurisdiction or power anywhere else; he observed as well that New York City is simply a subdivision of the state of New York and that New York state is only one state out of forty-eight in our nation. Further, he suggested that he, and he believed millions of others, could not possibly have any interest in whether Tammany or the New Deal faction of Democrats in New York City should win the nomination and their mayoralty candidate.

Superficially, the doctor was right. His thoughts, however, do not touch the root of that situation. Fundamentally, the battle between Tammany and the Democrats in New York is a battle between the old line, conservative Democrats throughout the nation and the New Deal faction of the party which is headed by President Roosevelt. It is vitally important also to the Republicans for the reason that the Presidential election of 1940 is almost certain to be a campaign in which we will find conservatives from whatever party aligned on one hand and radicals from whatever party aligned on the other side. To that extent, the New York primary and mayoralty election is the beginning of the 1940 presidential campaign.

The bitterness that is going to prevail from here on has been given something of a preview by the charge by Senator Copeland, the Tammany candidate, that President Roosevelt was interfering in a purely local fight. Senator Copeland's activities in the senate have been almost wholly antagonistic to the President and the New Deal generally. Where the President has been sound, as the conservatives recognize sound policies, Senator Copeland has fought alongside of the New Dealers. Otherwise, he has not concealed his opposition to radical New Deal proposals.

Thus, when Senator Copeland broke openly and accused the President of stooping to local politics, he opened the way for conservatives everywhere to strike back at the political machine managed by Postmaster General Jim Farley in Mr. Roosevelt's behalf. As one house member suggested: "Senator Copeland has put fire into the fight."

The selection of Senator Copeland by the famous Tammany organization in New York City was the signal for the New Deal faction of the great city to take off their coats. They promptly announced selection of New York Supreme Court Justice Mahoney as their candidate against Copeland. There are four burrough organizations behind Mahoney. There is only the Tammany group behind Copeland. On the face of it, it would seem that the senator cannot win. The fact seems to be, however, that there will be a rather close race for the reason that some of the four organizations behind Mahoney may not be able to control the Democratic votes in their bailiwicks as entirely as Tammany Hall will control Democrats so long affiliated with that organization. Certainly, according to the best advices I can get, the Copeland charge against Mr. Roosevelt is likely to swing a good many Democrats to the Copeland ticket. This will be so because New York City always has resented outside influences in its political battles. Senator Copeland can be counted upon as well to broaden the charge so that Mr. Farley's tentacles in New York City politics where he has long been active will be made to appear like the strangling, crushing arms of an octopus. In other words, the conservatives who are supporting Copeland will not let the charge of interference by the President become of less consequence any time it is retold.

True, Secretary Marvin McIntyre of the White House staff denied that the President had talked politics with the Mahoney leaders. But the denial was not accepted by Copeland as being sincere, for he added:

"I am not afraid of Mr. Roosevelt's reprisals. The President enjoys a great personal popularity, but his political popularity is swiftly disappearing."

French Express Train Wreck Costs 27 Lives

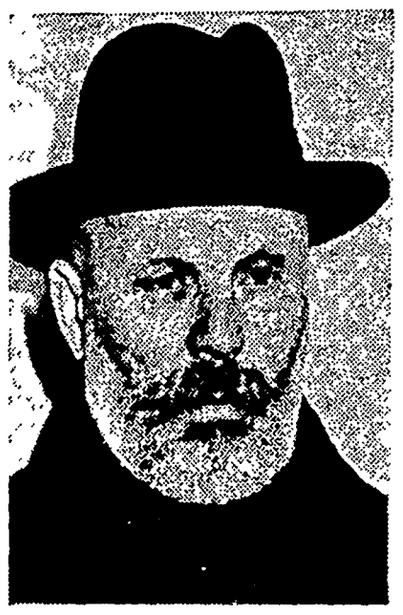
Made shortly after the tragic accident, this photo shows the telescoped carriages of the French passenger express in which 27 persons were killed when the train jumped the rails near Villeneuve St. Georges. Railroad officials attributed the accident to faulty setting of a switch.

Roosevelt Newlyweds Like the Sun

Franklin D. Roosevelt, Jr., and his bride, the former Ethel Du Pont, pictured as they enjoyed the sun on the Italian Riviera as they honeymooned in Europe. The young couple expect to return to the United States in the fall. When the newlyweds take up housekeeping, young Roosevelt is expected to complete a law course that will fit him for his business career later on. The honeymooners have traveled extensively in Europe since they sailed from America some weeks ago following their wedding at Owls Nest, the DuPont estate in Delaware. The wedding was attended by President and Mrs. Roosevelt.

Zionist Opposes Palestine Split-Up

An outstanding opponent of the British plan to partition Palestine, Menachem M. Ussishkin (above), world president of the Jewish National fund, was elected chairman of



the World Zionist congress at Geneva, Switzerland recently. Election of Ussishkin foreshadows an adverse vote on the partition plan, observers believe.

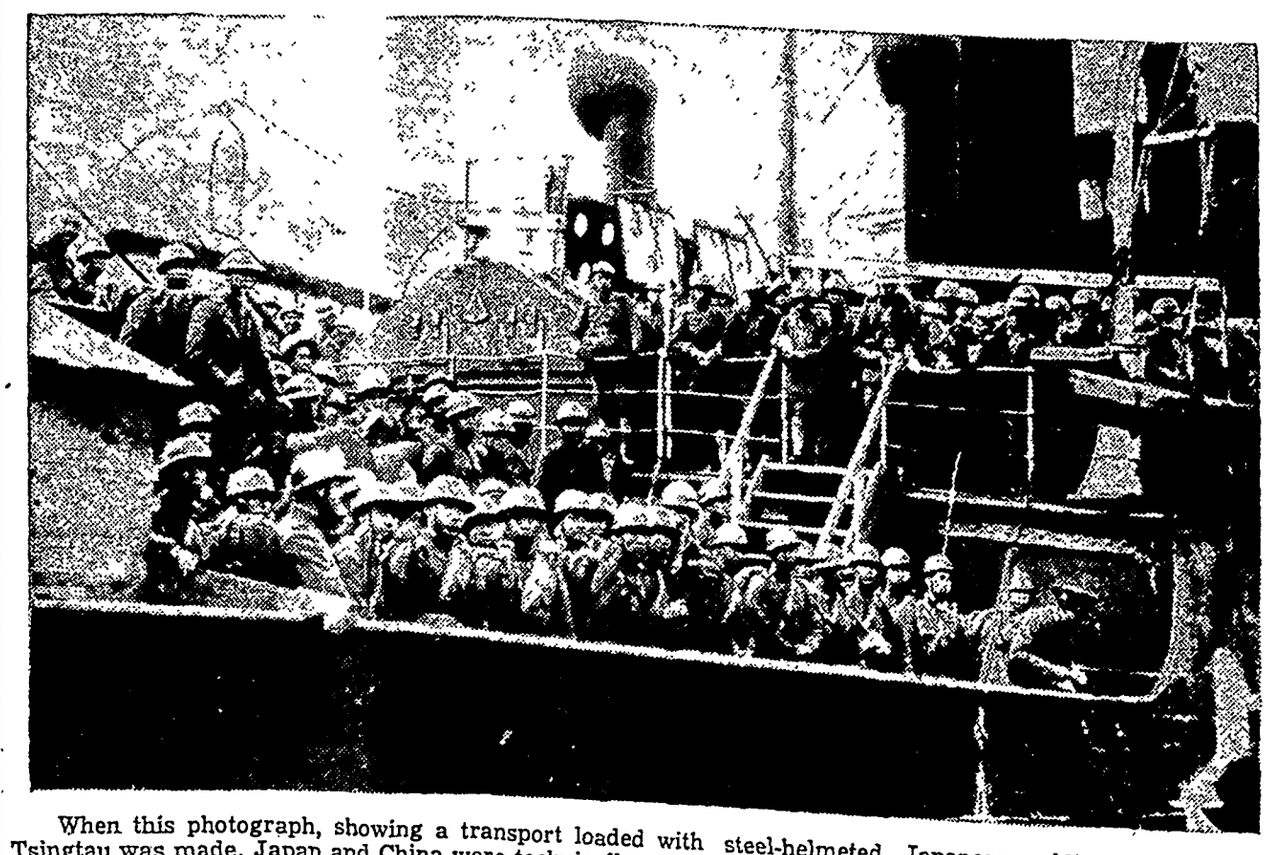
50,000 HOURS ALOFT

Captain Robert H. Fatt, the new chief pilot of Pan American Airways' eastern division of Miami, Fla. Captain Fatt has spent more than five years of working days at the controls of a clipper ship, or 50,000 hours in the air. He has flown more than a million and a half miles since he started, in 1918. Captain Fatt who learned aviation in the world war has a flying record unusually free of accidents.

Seeks Bride on 121st Birthday

Cutting a birthday cake decorated with 121 candles, Abraham Wishkovsky is pictured, as he began his one hundred twenty-second year of life, at the home of the Daughters of Jacob in the Bronx, New York. In a birthday interview, Patriarch Wishkovsky, who is Polish by birth, announced that he is ready to marry again—for the sixth time—stipulating, however, that his bride must be "young and pretty."

Even This Didn't Make the Chinese War Official



When this photograph, showing a transport loaded with steel-helmeted Japanese soldiers arriving at Tsingtau was made, Japan and China were technically at peace. Many of these men and many Chinese soldiers died, slain by each other, but still there was no "war." The undeclared war endangered the safety of Americans in Shanghai and other leading cities in the war-ridden area and caused the creation of an American emergency committee on evacuation.

art Coats for Now and Early Fall

By CHERIE NICHOLAS

W is the time of year when a midseason coat becomes a robe requisite. Much is demed of this coat. It not only o round out the summer season a perfect touch but it is exd to usher in the new fall seawith a proper style flourish. too, it must be not too heavyt for immediate wear and not ightweight for autumn com-

is with cunning awareness of ese "musts" and "must nots" midseason coat that versatile mers fell into step, cutting caous capers with tempting ds and featherweight fleeces, with soft lightweight woolens. ite and pastel wool coats, al- important dots on the summer scape, are especially good style year being as popular for wear wn as in the country. The wide ty of weaves and patterns in lightweight monotone wools dded much to the style interest ese casually correct coats. The e, buttonless, three - quarter h full swinging swagger coat ered in the illustration is the you treasure, for, accompanied matching skirt, it makes a practical and stunning cos- to wear when weather is fair, t a midseason or a warmish mn day. To add to its pracity this coat may be worn summer dresses and the skirt double with delightful contrastlightsome wool sweaters.

week-end vacation calls for one e soft, well-tailored wool tweed gger coats of three - quarter th. Casual and comfortable it t be. It should be styled with deep, roomy pockets and broad lapels, hang straight in front and have a full swing-into-folds backline. Checks, stripes and monotones are the gay themes that sing to riotous color tunes. Consciously fashioned for nonchalance, these wool tweeds are indifferent to the hard knocks of traveling and they never know the meaning of wear and tear. The model shown to the left tallies with this description of what a casual, practical travel coat should be. The tweed so expertly tailored with wide rounded lapels, deep patch pockets and wide turnback cuffs in this instance is in brown, rust and white check. It is worn over a beige featherweight knit wool frock with brown hand-knit scarf.

Lustrous fleeces are very good this season, especially in the polo coat style. No camping jaunt, motor trip or ocean voyage is complete without one of these sturdy old reliables in either white or natural shade. Cut just like those made for the men-folk with deep slash pockets, tab cuffs and vent back, a coat of this type should be included in the wardrobe of every woman who expects to run into damp winds or who will spend any time in a "don't dress for dinner" region. The double-breasted polo coat pictured to the right is a classic. Of lightweight wool fleece, it is styled with raglan shoulders, vent back, tab cuffs, stitched slash pockets, wide notched revers and wide self belt.

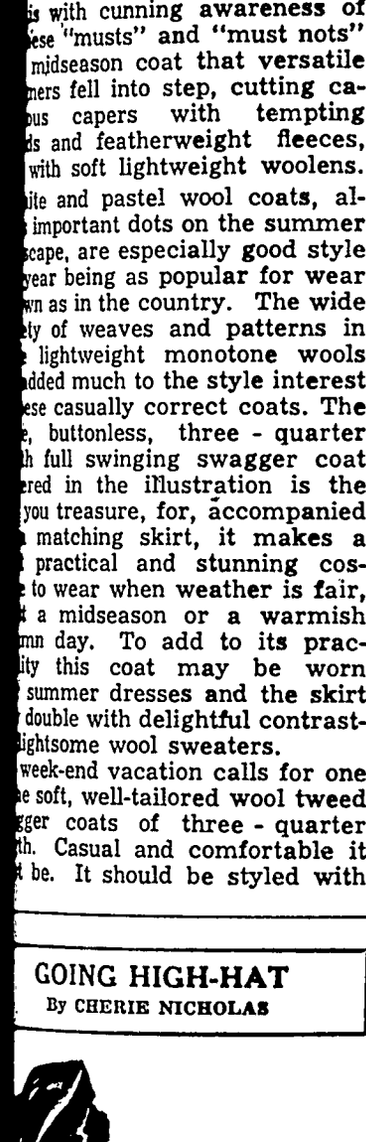
GOING HIGH-HAT

By CHERIE NICHOLAS



atch crowns! The advance fall fashions declare that height is chief aim of designers. The e types that lead the millinery cession for midseason and early are berets, toques or turbans the hat with a brim that takes abrupt turn up at one side reling half of the coiffure. There o doubt that millinery fashions tending toward the extreme, they are also very versatile. three silhouettes pictured conan idea as to important milry gestures. The high draped ue at the top is significant of future. The beret of velvet is turing as a smart midseason nber, and women who lead in hion are wearing them with their mmer frocks at this time. The hing high-side-brim hat is someg to look forward to since milrs are featuring it in various ods often with rather spectacular ther trims

FEATURE VEILS IN MODELS FOR AUTUMN

Veils which not only cover an entire hat but the face and the shoulders are the most striking feature of many advance fall models.

The large mesh veil which is dotted with chenille is the favored type for wear during the daytime, but there are some handsome lace veils to wear for more formal occasions. Most of these veils are circular in shape and are thrown over the high peaked crowns of the new hats so that their draped edges extend well over the shoulders. Sometimes they are placed over the head before the hat is put on so that the part which covers the crown of the head serves as a crown for the hat.

Another type of veil, also circular in shape, has the center cut out so that the veil fits around a crown or edges the brim of a hat. It usually is worn to give a downward sweep at the back, frequently extending halfway to the waistline.

Uneven Skirt Line Latest Style in Evening Gowns

A Paris fashion house shows a practical evening gown with a short skirt in front and a definite backward dip to a greater length. These full skirts resemble the tarleton skirts worn by ballet dancers. The material is gathered into so many folds that the skirts swing out gracefully in wide sweeps with every movement of the body.

These short skirts are far more practical than floor-length ones, which are likely to get trampled underfoot when dancing, and their width and fullness make them graceful as well as practical.

Matching Hats and Heels Are Popular for Sportswear

Matching headdresses and heels are providing a gala touch to simple summer outfits worn by attractive young spectators at smart Midwestern country clubs. Dusty pink frocks combined with beige turbans and ostrich skin pumps with beige-colored built-up heels are a popular combination. On many of the smartest white ensembles, effective accents are furnished by paisley print headbands and heels.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

Lesson for September 5

GOD REQUIRES SOCIAL JUSTICE.

LESSON TEXT—Leviticus 19:1-18, 32-37.
GOLDEN TEXT—As ye would that men should do to you, do ye also to them likewise. Luke 6:31.
PRIMARY TOPIC—At Harvest Time.
JUNIOR TOPIC—At Harvest Time
INTERMEDIATE AND SENIOR TOPIC—Championing the Rights of Others.
YOUNG PEOPLE AND ADULT TOPIC—My Resonsibility for Social Justice.

Labor Day—in this year of our Lord 1937—looks out upon a world deeply divided in opinions of what is right and what is wrong in the relationship between capital and labor. Political and economic leaders are talking much of social justice, of a planned economy in which all shall have a full share of the products of labor. Surely, we would all agree that there should be only kindness and justice in all such dealings of man with man. But how to accomplish that result in a world of selfishness and sin, that indeed is the question.

Unfortunately, many of those in the church who have greatly stressed social relationships have forgotten that the true foundation for such teaching and living is the preaching of the gospel of redemption. In reaction to their impossible position, others who have faithfully preached the necessity of regeneration have forgotten to stress the need of the expression of regenerated life in the social relationships of man. We need God-given balance, with a proper reflection of gospel truth in honest and helpful living. God wants his people to show that they belong to him by

I. Providing for the Poor and Needy (vv. 9, 10, 14, 15).

When Jesus said, "Ye have the poor always with you" (Matt. 26:11), he referred to one of the responsibilities which thoughtful and considerate men have always gladly borne, but which has been a constant problem to both individuals and nations. We have dealt with it in our day on a broad and supposedly scientific basis, but those who are closest to it are quick to admit that we have even now an imperfect solution. In the days of Israel the poor were fed by the purposeful leaving of gleanings in the field—which the needy were free to gather as their own. Thus they had the joy of helping themselves even as they were being helped by others, and, in the final analysis, by God himself.

II. Guarding Another's Reputation (vv. 16-18).

Gossip is a destructive means of breaking down the good standing of another. It is a sin all too common in our day, even within the circle of God's own people. Talebearing and evil-speaking are a blight on our social and religious life. We should put them away.

Akin to this common and awful sin is the bearing of grudges and the seeking for revenge, neither of which serves any good purpose.

III. Honoring the Aged (v. 32).

Old - age pensions undoubtedly have their place in our complicated social life, but it is evident that they would be entirely unnecessary if men and women had in the fear of God honored "the hoary head" and "the face of the old man," even as God gave command to Israel.

IV. Loving the Stranger (vv. 33, 34).

The man who knows what it is to have been a stranger, and to meet with love and protecting care, should never forget to go and do likewise. Laving, as many of us do, in great cities makes this somewhat of a problem, and yet one sometimes wonders whether the bustling city is not often kinder to the stranger than the little community, which makes him feel like an "outsider."

V. Being Honest in Business (vv. 11-13, 35, 36).

No stealing, no false swearing, no defrauding, no withholding of wages, for all these things dishonor or "profane the name of thy God."

A good motto to hang up behind the counter or over the desk in a business house is found in the words of verses 35 and 36. False bottoms, trick scales, short measure—oh, yes, they are against the city ordinance, and you will be fined if you are caught. But remember, they are also an abomination in the sight of the Lord.

The closing verse of our lesson reiterates that important truth. In carrying out the tenets of social justice we are not simply being humane and kind. We are observing the statutes and ordinances of the Eternal One, him who says, "I am Jehovah."

Being One in Faith

It is good to know that in whatever country we are found, and under whatever sky, we are, through faith in the divine Saviour, members in the same body, sheep in the same fold, children of one home.

Pay Up Our Debts

Debt comes under the eighth commandment. It hangs a millstone round the neck of the man or woman who incurs it. It corrodes honesty.

Ask Me Another?

A Quiz With Answers Offering Information on Various Subjects

1 What is the largest liner that has gone through the Panama canal?

2 How many of our Presidents owned slaves?

3 Who first discovered the principles of magnetism?

4 What are the elevations above sea level of the Great Lakes?

5 How much space does a ton of gold occupy?

6 Roman senators were appointed for a term of what duration?

7 Are all eyes of the same size?

8 How is salt secured?

Answers

1 The Panama canal office says that the Empress of Britain was the largest liner to pass through the canal. It was also the liner to pay the largest fee, which was $18,941 25.

2 Ten Presidents owned slaves: Washington, Monroe, Jefferson, Madison, Jackson, Tyler, Polk, Taylor, Johnson and Grant. Lincoln never owned slaves.

3 Discovery of the simple principles of magnetism possessed by magnetite, or loadstone, was made by Chinese in 1400 B. C., or 3,500 years before magnetism was known in Europe.

4 The Great Lakes have approximately the following elevations above sea level: Superior, 602 feet; Michigan, 581; Huron, 581; Erie, 241; and Ontario, 246 feet.

5 A 14.1 inch cube of gold weighs a ton

6. Roman senators were appointed for life unless expelled from office for some dishonorable cause.

7. Contrary to general opinion, says a specialist, there is no small eye or large eye. All eyes are approximately of the same size. The reason for the apparent difference depends upon the orifice or aperture through which the eyes are seen. It is the variable diameter of this opening that creates the erroneous impression of different sizes of eyes.

8. There are three ways in which salt may be secured: First, by mining; second, by evaporation of sea water; and third, by digging wells until a salt vein is struck and then pouring water and pumping it up again as brine.

He Was Done

"I gave the referee ten bucks to see I won my big fight the other night."

"But the papers say that you lost."

"Yes—the referee was crooked."

Cruelty

"Madam, your confounded dog has torn my trousers!"

"Naughty, naughty Fido! I shall punish him severely. I shall take his pink ribbon away from him for a whole week."

Beyond Him

She did not understand the thermometer, but she took her husband's temperature with it and then held a match under it to read it properly. She sent a frantic message to the doctor: "Come at once: temperature 156 degrees."

To which the doctor replied: "I can do nothing. Send for the fire brigade!"

RECREATE!

THE leisure time period contributes most to the development of the individual. It has been said, "What we earn while at work we put into our pockets, and what we spend during our leisure time we put into our character." Our occupations are tending to become more and more specialized and one-sided. So much of the time we are using only one part of our body or mind, allowing the other parts to deteriorate through disuse. There is great need, therefore, for our leisure-time activities to provide opportunities for developing those faculties which remain inactive during the working period and thus build a more all-around individual.

Active recreation, such as sports, games, dramatics and singing, develops powers of self-expression, of individuality, of initiative and of decision which many occupations tend to stifle. They provide a beneficial outlet for our natural demand for play and help to form certain desirable habits of perseverance, pluck, quick thinking, self-restraint and co-operation.

Fair play learned in games makes it easier to live a clean, courageous and generous life. Group activities also render service to the individual by promoting his happiness and decreasing his loneliness.

Life's Tenderness

What seems to grow fairer to me as life goes by is the love and grace and tenderness of it; not its wit and cleverness and grandeur of knowledge (grand as knowledge is), but just the laughter of little children and the friendship of friends; the cozy talk by the fireside; the sight of flowers and the sound of music.—John Green.

TESTED AND PROVED ON THE FARM

THE AMAZING NEW Firestone GROUND GRIP TIRE

PROVIDES GREATER DRAWBAR PULL, GREATER TRACTION AND SAVES MORE TIME AND FUEL

NEWS of the amazing performance of the NEW Firestone Ground Grip Tire is sweeping rural America. Farmers everywhere who have seen this new tire are so enthusiastic about it that sales have been climbing steadily upward and production has been greatly increased to meet the demand.

Why all this enthusiasm? Those of you who have seen the new Firestone Ground Grip Tire in action know the answer. Tests show that it will pull a *three-bottom plow* under soil conditions where other makes of tires can pull only a *two-bottom plow*. The re-designed tread gives greater traction and better self-cleaning action. It will not pack the soil — in fact, it leaves a mulch on the surface of the tread track that prevents rapid evaporation of moisture in the soil. These tests also show up to 30% more available drawbar pull on dry sod, up to 40% more on dry plowed ground, up to 50% more on wet plowed ground than with any other tire tested.

Only in Firestone Tires do you get so many *patented* extra-quality features. The Ground Grip Tread is *patented* and is made of specially compounded rubber which resists the action of sun, rain and snow. Gum-Dipping is a *patented* Firestone Process, by which every fiber of every cord in every ply is saturated with liquid rubber which gives added strength to resist the strain of heavy pulling. The Two Extra Layers of Gum-Dipped Cords under the tread are *patented*. This Firestone construction feature binds the tread and cord body into one inseparable unit.

You want and need ALL these features. Only Firestone has them! See this new tire at your nearest Firestone Implement Dealer, Tire Dealer or Auto Supply & Service Store today.

If you have not received a copy of the new Firestone Farm Tire Catalog, please send your name and address to The Firestone Tire & Rubber Company, Akron, Ohio, or Los Angeles, California, and a copy will be mailed to you promptly.

GREATER DRAWBAR PULL
Increased height of the new Ground Grip tread and the improved design and spacing of the heavy traction lugs result in much greater drawbar pull.

GREATER TRACTION
The increased penetration of the improved Ground Grip tread gives a deeper "bite" resulting in greater traction.

GREATER FUEL SAVINGS
Tests show savings of as much as 50% in fuel as compared with steel-lugged wheels.

GREATER TIME SAVINGS
The increased traction enables you to cover much greater acreage in a day.

WEATHER-PROOFED
The Ground Grip Tread is made of special weather-resisting rubber which is unaffected by hot sun, rain or snow.

Listen to the Voice of Firestone, Monday evenings over Nationwide N. B. C. Red Network

MORE FARM TRACTORS ARE EQUIPPED WITH FIRESTONE TRACTOR TIRES THAN ALL OTHER MAKES OF TIRES COMBINED

The only day I have for sheer pleasure odd jobs, is Sunday but the only day for worship is Sun[illegible]. Which is the more important? Remember the Sabbath day to k[illegible] holy. Six days shalt thou [illegible] all thy work, bu[illegible] the seventh is the Sabbath of the Lord thy God.

The public [illegible] invited to worsh[illegible] with us.

KILLING FROST WILL CHECK SLEEPING SICKNESS PLAGUE

After the first killing frosts th[illegible]ing sickness plague which ha[illegible] been attacking horses in wester[illegible] Iowa will subside rapidly say[illegible] Dr. K. W. Stouder, extension vet[illegible]narian at Iowa State College[illegible]. "Killing [illegible]ings [illegible] of horses [illegible]halonencephalitis as it is known [illegible]ong veterinarians is believed [illegible] be mosquito transmitted from an[illegible]ted animal by blood suckin[illegible]ects. Both mosquitoes and bi[illegible]hes are believed to be carri[illegible]rs. The first killing frosts will destroy these insects and prevent further spread of the plague.

Vaccination with encephalomy[illegible]litis vaccine is the most depend[illegible]able preventive measure, Dr. Stou[illegible]der says. The vaccination is give[illegible] in two injections, about 10 days o[illegible] 2 weeks apart. A serum which has been developed has proved valuable in promoting recovery of in[illegible]fected animals.

EDITOR'S SON AND PARTY TO RETURN THIS WEEK FROM EXTENSIVE TOUR

Traveled Through Sixteen States And Two Foreign Countries On Trip

Ray Jorgenson, Jr. in company with his cousins, Bob Liebendor[illegible] of Mason City, Sheldon Mendell Lincoln Nebraska and David Chapman Merriman Kansas, and Titus Davis Merriman, grandfather of all the boys are expected to return home this week from their trip through the Western States.

The [illegible]s and their grandfather, have toured through sixteen states and visited two foreign countries Canada and Mexico. The states which they have traveled through include Iowa, Nebraska, Kansas, Missouri, Colorado, Wyoming, Montana, Idaho, Washington, Oregon, California, Nevada, Arizona, New Mexico, Texas and Oklahoma. They drove along the entire West Coast from Canada to Mexico and have been away seven weeks.

Intresting points along the route of travel included the Rocky Mountains and Estes Park in Colorado, the Yellowstone Park, the sights around Seattle and Portland, Mt. Ranier National Park, Columbia River Drive, Oakland-San Francisco bridge; Yosemite National Park, Los Angeles and vicinity, Catalina Islands, Mexico, Boulder Dam, Grand Canyon, Carlsbad Caves in New Mexico and many other places of interest along the way.

Grandpa Davis has completed a plan that he has had in mind for several years that of taking his grandsons on a long trip to the West Coast and there spend some time with his other grandson Donn Davis and thus be with all of his grandsons at the same time.

The grandsons say that Grandpa Davis is a real sport and that it is hard to say who was the most thrilled Grandpa or the grandsons.

The Bible has been translated in whole or in part, into 991 languages and dialects.

ADVENTURE IS COMING IN THE AMERICAN BOY

Readers who like adventure and the lure of far places will find plenty to please them in [illegible] issues of THE AMERICAN BOY Magazine. They'll read for [illegible]stance of seamen and sea [illegible] San Francisco water [illegible] trouble of daring adventure [illegible] world of pseudo-science, and [illegible] feud aboard a plunging, [illegible]-ship.

They'll read tales of excite[illegible] aboard a transport plane [illegible] the jungled American mount[illegible] and of passenger planes that are not bound to earth but swing the[illegible] the voicelessness of space. Read[illegible]ers can follow a young ex-Mou[illegible]ie as he searches for clues [illegible] and northlands and Tierney [illegible] sleuthing detective on the tra[illegible] of criminals.

A new feature in THE AM[illegible]CAN BOY is picture pages [illegible] real stories. Pictures, for ins[illegible] that vividly sh[illegible] a day in th[illegible] a coast guardsman and h[illegible] Eskimo husky sled dog do[illegible] work. They transmit the thr[illegible] battling a hundred pound[illegible] charming tarpon. Tips on ho[illegible] dogie are also given pictor[illegible]ally, ranging from how to run a b[illegible] field to how to be correct [illegible]ter.

NOTE: Subscription price[illegible] THE AMERICAN BOY w[illegible] raised in the near future. S[illegible] your subscription order at or[illegible] take advantage of the be[illegible] rates now in effect: one yea[illegible] $1.00 or three years at $2.00. [illegible]eign subscriptions are 50c a ye[illegible] extra. Send your name, ad[illegible]ss and remittance to THE AMERI[illegible]CAN BOY, 7430 Second Blvd., D[illegible]troit, Mich. On newsstands th[illegible] price is 15c a copy.

The present market price o[illegible]dium is $20,000 a gram whi[illegible] said to be an all time low.

IMPORTANT NEWS
From Carl W. Bohn!

September 1, 1937
Garner, Iowa

Dear Friends,

It is with sincere gratitude and great pleasure that I wish to announce that I have bought out the interest of Rex Shannon and will continue to operate the firm which has been known since 1933 as Shannon-Bohn, Incorporated.

Without the generous support of so many friends in northern Iowa, I would have hesitated about my new venture of assuming complete ownership of the firm. But the splendid thoughtfulness, cooperation and friendly spirit that you have expressed to me in so many ways have guided me in deciding to assume the responsibility of continuing to serve you.

During the 12 years I have been associated in business in Garner I have tried to serve you squarely and to accomodate you whenever I have had an opportunity to do so. I pledge to you that I will exert every effort to continue to maintain our service on the same high plane and to keep our furniture store one of the best stocked in northern Iowa. The business policies we have maintained in the past will be continued.

In closing, I wish to express for both Mr. Shannon and myself our sincere thanks to all for your kindliness in the past. May we hope that our friendly relationship will continue?

Sincerely Yours,
Carl W. Bohn

HOW LONG CAN RUSSIA LAST?

Halliburton Wonders; Tyranny Supposed to Save Citizens' Souls — Children Are Taught Only Communism.

Above: The military parade rolled through the Red Square for four hours to salute Stalin, who stands on a corner of Lenin's tomb. The Kremlin is at the left, St. Basil's church in the background. The stands to either side of the tomb are holding 50,000 spectators.

Right: St. Basil's cathedral, at the end of the Red Square in Moscow, is one of the world's strangest, but most beautiful buildings.

By RICHARD HALLIBURTON
Author of "The Royal Road to Romance," etc.

MOSCOW, U. S. S. R.—Russia! I've seen Russia, and now I can believe in miracles, for there is no word to describe the picture of Russia today, other than miraculous.

And I do not mean that the picture is miraculously beautiful. In many ways it is unbelievably ugly.

I stand and look at it with fascinated and astonished eyes, but for nothing on earth would I personally, under the present scheme of things, endure the enslavement and tyranny which its citizens must suffer who have been saved according to the gospel of Karl Marx.

The old czarist government gained the detestation of its subjects because of its notorious despotism. But compared to the government of today, life under the czar was free as a spring breeze.

The wonder of wonders is the ease and power with which this new system of super-despotism works. A handful of labor-leaders consumed with communistic theory and fanatical zeal, sit on high within the Kremlin walls, their eyes fixed on a book of political and social notions, and proceed to experiment on the lives and souls of 16,000,000 human beings with as much impersonal detachment as a bacteriologist experiments with germs.

Center Attack on Czar.

In the beginning of 1917 the proletarian leaders who had seized control of Russia, said:

"The czar has proved himself the greatest obstacle in the way of our lifting the masses of workers out of their slough of ignorance and misery.

"First of all, then, if we are to improve our lot, we must exterminate the czar, his wife, his four daughters, and his young son. Perhaps a bit brutal, but you've got to be tough to get anywhere."

And so the czar and his entire family were shot.

"And the aristocrats and intelligentsia must go next. They'll never take to our ideas about exalting the factory workers and moujiks to the throne. That means about a million murders, imprisonments, exiles, of our nobility and gentle people, of our educators, religious leaders, scientists, professors, merchants, architects, diplomats — in fact of all civilized Russian citizens."

So this million was murdered, imprisoned, or exiled.

"Now," said the leaders," we can accomplish something for the masses. Now, rid of the bourgeoisie, we will give the masses the great privilege of being made over to conform with our sacred theories.

Russians "Locked In."

"Of course, some of the stubborn ones may not like their new medicine. But we know what's good for them—they don't. So we'll lock them in. From now on, no Russian can leave Russia. If he escapes we will persecute his mother and father and brother and sister, and send them to Siberian prisons. We will declare him a public enemy and sentence him to be shot when he comes home. All this will teach the rebel a lesson."

So the frontier was enclosed by a steel ring of bullets and bayonets. No Russian, however desperate, can run away from the social experiment.

"Now we've got 'em," said the leaders. "What is our first vivisection operation to be? First we'll amputate the church."

A labor-leader waved his hand and abolished the church.

"The family must go next. Family unity is a capitalistic and bourgeois custom dangerous to communism. Our men and women must be able to love whom they please, when they please—marry and divorce on impulse. Our state will care for the children, and do it better than their parents."

So the family was abolished too.

"Money," they said, "is the source of all evil. Money was the support of the gentry and intelligentsia. We must destroy all private wealth and all means of accumulating it, lest these old antisocial classes come back."

Seize Peasants' Supplies.

Money went next. Everybody was, and still is, allowed to share the same poverty together.

"But we must have industry and commerce to keep our people employed. We must sell our wheat and buy machinery. We haven't enough wheat for our own needs, but we've nothing else to export, so we must seize the peasants' private food supplies."

The supplies were seized. Five million people starved to death from 1929 to 1931. There was no mourning for them—mourning would be only sentimentality, a cardinal sin among Bolsheviks. The sacrifice had to be made for political expediency. The wheat was sold and machinery secured to make guns and tanks with which to defend the dictatorship.

"There is one last and very important gap to be closed to complete our despotism," said the leaders. "We must use every means in our power to protect our new theories and our new liberated masses, from foreign capitalistic influences. No information, no counter-revolutionary enlightenment, from the world outside must come in. Russia must be a sealed box. Only then can we be complete masters. No foreign books not of a communistic character shall cross the borders, no newspapers or magazines that might reveal the false happiness of other people living under the enemy's system will be tolerated The movies, the theater, school books, must be rigorously censored. Nothing must be allowed to emerge that does not glorify the working man and damn the other classes."

That is exactly what the Bolshevik leaders have done. After 17 years of communism not a single movie can be shown that is not political propaganda, that does not sermonize. The entire industry has become merely a stick with which to beat the capitalists. The results are so appallingly dull that even the most wild-eyed communists attend only from a sense of duty.

Newspapers Echo Rulers.

The newspapers are only echoes of the dictatorship, mouthing proletarian slogans.

Even the great National library, the last bulwark of intellectual liberty, was gagged.

The same warping of education, the same blinding of all else but proletarian prejudices and principles, goes straight down to the kindergarten.

I asked a fifteen-year-old schoolboy what they were taught in school about America and western Europe.

"We are taught the history of the communistic revolutionary movement in American and England," he said.

"No other history?" I asked.

Geography Is "Out."

"History is just the lives of kings and capitalists and generals. There is nothing in it about the working classes."

"Do you learn geography in your school? Do you know where Argentine is?"

He had never heard of Argentine. Nor was any other foreign country more than a vague name. Such worldly knowledge as foreign geography is not allowed even to the working classes.

The working classes—Forward, the working classes! That is the battlecry—the only cry—heard in Russia. One of the great Soviet leaders recently exclaimed: "I have given 15 years of my life to the working classes." And so he had. But not, be it understood, to the society as a whole. Only the working class.

Once I witnessed a gigantic demonstration of this political patriotism, on Moscow's magnificent Red square. It was to celebrate the anniversary of the Soviet regime.

2,500,000 Workers March.

Two and one half million workers marched through Red square that day—a river, a tidal wave, of humanity. Every factory, every trade, every school, every bureau, turned out with all its members, with banners, floats, placards, music, of a thousand kinds to prove their loyalty to the sacred cause.

I left the Red square after the first million civilians had passed. I was too dizzy to endure more; dizzy from the numbers of moving legs and heads, dizzy from standing seven hours; dizzy from the waves of enthusiasm and energy that had engulfed me.

I tottered home, asking myself how such a tyranny could achieve so much, how the workers' leaders, so utterly indifferent to the lives and hearts of the marching millions, were able to win such a magnificent response. I knew the answer: Universal education, complete emancipation of women, elimination of crime, prisons, unemployment, physical misery. Surely, I said, there is great good and great power in this scheme of things.

The intolerance, the bigotry, the constraint, the intellectual gagging, which at present cut Russia off from the good will of the world, sooner or later must weaken and pass. (It is already weakening at a rate alarming to Bolshevik fundamentalists). Russia will emerge—say in 25 years—from a bath of blood and despotism, into a really civilized and progressive nation, with a number of social institutions so far ahead of ours that, to her, we will seem in some ways as backward as she once seemed to us.

Many of these new ideas, born with such travail, we must accept, and the sooner the better. Thus is America going to develop, perforce, in the direction of new Russia's enlightened attitude toward the masses; while Russia at the same time develops towards America's ideals of personal and intellectual liberty. The two greatest nations in the world must some day meet on the common ground of friendship and understanding, for both will have contributed something vital and enduring, each to the other.

Keeping Up With Science

By Science Service

© Science Service.—WNU Service.

Maybe Mediums Do Hear 'Voices,' After All, Says Science

Delusions Are Hangovers From Childhood Phantasies

Lewisburg, Pa.—Those mediums who are not frauds, but genuinely believe that they hear the voices of spirits, may be the victims of the common childish phantasy of an imaginary companion, Dr. Philip L. Harriman, of Bucknell university, here, suggests in a report to the American Journal of Orthopsychiatry.

About a third of the children between three and eight or nine years of age enjoy the company of such imaginary companions, excellent descriptions of which appear in the novel "Anthony Adverse" and Milne's "Binker," Dr. Harriman says. More older persons indulge in this phantasy than has hitherto been suspected.

Real playmates usually cause the gradual disappearance of these phantom associates, but occasionally they go with the child through high school and even into adult life.

Student's Romantic "Companion."

Among college students who reported long continuation of the phantasy companion, some had created an individual of the hero type with whom they competed in athletic sports or in class or extra-curricular activity.

"Another man student reports that his imaginary companion came into existence when he was twelve or thirteen," said Dr. Harriman. "The companion was a beautiful girl with a romantic name of Marie Van Arsdale. At fourteen years of age he saw Sari Maritza in the motion pictures and then forsook Marie for her. He made believe that he rescued Sari from savages, and then he built a stone fortress for her. This edifice still stands on a wooded knoll behind his home, a monument to an adolescent phantasy.

May Indicate Creative Ability.

"Somewhat concerned by teachers' reports of inattention in high school, his parents presented him with an automobile. This new possession opened up interests in the world of reality, and he ceased to divert himself with an imaginary loved one."

Since the students who reported clinging to such imaginary companions were all superior in college English, it is tempting to conjecture a relationship between such imaginative play and creative ability in writing, Dr. Harriman suggests

Smoke Two at Once If You Would Cut Cigarette Nicotine!

Washington.—For people who still worry about the amount of nicotine present in the smoke of the cigarettes they use, science suggests that they use two at once. One to smoke and the other to filter the smoke from the first.

Smoking cigarettes in tandem with special holders removes 54 per cent of the nicotine when a small puff is drawn, states a report to the American Chemical society here.

The report does not come from cigarette companies, as one might suspect at first, but from Scientists R. B. Derr, A. H. Reismeyer and R. B. Unangst of the research laboratory of an aluminum company.

The cigarette holders used in the study need not be excessively long, state the scientists.

Extra mildness is imparted to the smoke by the cigarette filter, it was found. Yet the characteristic taste blends of the tobacco remain distinguishable. The test was also made with pipe where the cigarette filtering system worked even better.

Meteorite on Ice Served to Smithsonian Institution

Washington.—A stone from the sky, found on the ice near Great Bear lake in northern Canada, has been added to the Smithsonian institution collection of meteorites. An Indian picked it up, wondering at its peculiar form and the fact that it was lying there on top of the ice, and brought it to the nearest mission.

The meteorite is about the size of a walnut, and aside from the peculiar circumstances of its discovery is not remarkable. It is thought to be a fragment of a much larger celestial projectile now probably at the bottom of the water. Search for the parent body will be made next summer.

Men! Doctors Give Rules for Smooth, Scientific Shave

Use Sharp Blades, Reduce Angle, Lather Twice

Chicago.—Does shaving make your face sore, sir?

Here are some tips for men with sensitive skins, as enumerated in the Journal of the American Medical Association:

1. Use sharper razor blades.

2. Reduce the shaving angle, that is, the angle formed between the central plane of the blade near its edge and a plane that passes through the edge and is tangent to the guard bar on the safety razor.

3. After washing and lathering the face with soap and hot water—operations that should consume from two and one-half to three minutes to be effective—use cold water for the final lathering procedure.

4. Employ a shaving soap or cream in which menthol is incorporated.

Operate Shaving Clinic.

The doctors of the land are being given a lesson in shaving in the leading article of their official journal.

At a shaving clinic that has been in operation at Mellon institute since 1931, 31 men—20 of them blonds and 11 brunettes—are being studied before, during and after their daily shave.

Preparation, it seems, is more than half the secret of a successful shave. The procedure for the average male, as outlined in the medical journal, is as follows:

Wash the face first with soap and water, using hot water and some toilet soap that has been found not to irritate the skin.

Three Minutes of Scrubbing.

Carry on this operation for about one-half minute and then rinse the face thoroughly. This removes the grit from the face, which might damage the blade, and also removes the external layer of sweat and sebum from the skin and hair, as well as other extraneous material.

After the soap has been thoroughly rinsed off with hot water, a second layer of soap should be applied. This may be one's favorite shaving soap. It is to be thoroughly rubbed into the surface of the skin with the hand, copious amounts of water being used. These two operations should be made to consume from two and one-half to three minutes.

Shaving should be begun by wetting the razor with hot water and keeping the face well lathered; both the razor and the face should be kept wet during the entire operation. It is good practice to shave the less difficult portions of the face first, in order that the more difficult portions shall have the benefit of a still longer contact with water.

Now Doctors Can Measure the Scope of Your 'Jitters'

Denver.—The nervous patient, unduly tense and excited when his physician begins an examination, can now have the exact state of his nervousness measured by a new instrument, the neurovoltmeter, described by Dr. Edmund Jacobson of the Chicago Laboratory for Clinical Physiology, before the meeting here of the American Association for the Advancement of Science.

The neurovoltmeter is a simple instrument using a string galvanometer and fine, sharpened wire electrodes that are inserted into nerve or muscle tissue without undue discomfort. It will measure variations in electrical nervousness amounting to fractions of millionths of a volt.

The new instrument will permit the physician to keep track of effects of even the most delicate treatment upon the nervous and muscular system, Dr. Jacobson predicted.

Evolution in man, other animals, and plants was laid to changes in the chromosomes, the larger units of heredity within the cell nuclei, instead of mutations or changes in the smaller genes usually credited with the major role in passing on the characteristics of life from one generation to another. This new idea in evolution was presented by Prof. E. B. Babcock of the University of California.

"Schmidt, North Pole" Is Address for Scientist

Washington. — "Schmidt. North Pole."

That was all the address there was, on one letter in the small mountain of fan mail addressed to Academician O. J. Schmidt, leader of the Soviet Polar expedition, Tass has informed Science Service.

Uncountable letters have been mailed by American children to Santa Claus at the same address, but this is the first time one has been mailed to the North Pole for a mortal man.

Doctor Schmidt's mail is being held in Moscow, pending his return.

King in Shorts Forgets State Cares

Garbed in shorts and stockings and sweater to enjoy a day of fun, King George VI is shown on a recent visit to the duke of York's camp for underprivileged boys at Southwold, England.

STAR DUST

Movie • Radio

★★★ By VIRGINIA VALE ★★★

IT IS children's day in Hollywood, with contracts being signed in carload lots to exploit youngsters in films. The five tough young lads whom Sam Goldwyn imported to play in "Dead End" made such a hit at the preview that he promptly put all of them under contract to make more pictures.

Their next for him will be "Street Corners" after which Mervyn Le Roy would like to borrow them for a series Metro-Goldwyn-Mayer's favorite is fourteen-year-old Judy Garland They have lined up three stories for her. Universal intends to keep Deanna Durbin very busy for the next year, and Paramount plan to star the youngest of all, four-year-old Kitty Clancy, in "Call Back Love."

—★—

Rubinoff does not like to expose his priceless Stradivarius violin to brilliant studio lights any longer than is necessary, so during rehearsals and whenever he was not playing for the sound track of "You Can't Have Everything," he used a double. The husky virtuoso carries a big insurance policy on the violin and would feel lost if anything happened to it. He had it with him when he played at an open air concert on Chicago's lake front recently when more than 100,000 people listened to him.

Rubinoff

—★—

When Frances Farmer arrived in New York, instead of pausing politely to let all the news photographers take pictures of her, she rushed off to Mount Kisco upstate to go in rehearsal for her first stage engagement. Four nights later I saw her performance and suddenly found myself wanting to burst into cheers. Playing a role quite unlike any she has done on the screen, a role simply made to order for Lupe Velez, she displayed a cat-like grace of movement, a voice musically rich, and great variety of moods.

—★—

Ozzie Nelson and his popular radio orchestra are currently appearing at the Astor roof in New York, but soon he will move his activities to Hollywood so as to be near his wife, Harriet Hilliard, who is under long-term contract at the RKO studios. Ozzie is the hero of all boy scouts who want to make a name for themselves. At fourteen he was honored at a jamboree in London as the youngest Eagle scout.

—★—

Youngsters who were the original fans of "The Lone Ranger" are getting pretty grown up now, but they confess that they still follow the adventures with bated breath. The popular three-times-a-week serial recently celebrated its seven hundred and twenty-fifth broadcast. Fran Striker, who has written this series even since it started in January, 1933, estimates that more than 3,500 characters have appeared in the adventures.

—★—

All the summer radio surveys reported that Edgar Bergen and Charlie McCarthy were miles ahead of every other performer in popularity. Their salary is said to have sky-rocketed from $300 to $3,500 per week

"High, Wide, and Handsome," a story of the early oil rush in Pennsylvania, is attracting attention. It more than lives up to the promise of its title, for it is spectacular, melodious and frenzied. Irene Dunne and Dorothy Lamour provide the beauty and melody; Randolph Scott, pitted against as tough a lot of villains as you ever hissed—including that incomparable Akim Tamiroff—provides the rough and ready drama.

Irene Dunne

—★—

ODDS AND ENDS—Randolph Scott attended his first film premiere in July, 1928, standing on an orange crate watching the crowds arrive to see Colleen Moore and Gary Cooper in "Lilac Time." His most recent premiere found him in a choice aisle seat watching himself as star of "High, Wide and Handsome" . . . Jack Haley has bowed out of the "Show Boat" program but he will have one of his own very soon . . . Adolphe Menjou and Kathrine Hepburn are bitter rivals on the golf course . . . Dorothy Gish, whom film fans have never forgotten, will play the lead in a Mutual broadcasting system serial called "The Couple Next Door" . . . When John Barrymore returns to radio, it won't be in Shakespeare, but in "The Animal Kingdom" and "Accent on Youth," some time in September. Meanwhile he is making a picture at RKO with Irene Dunne.

Fine Feathers for Three

SEW-YOUR-OWN wouldn't be your weather prophet for the world, but you know, Milady, and so does S-Y-O, that it's always fair weather when good fashions get together. Which brings us to today's three sparkling new frocks—a whole crowd of style for the pretty part of any man's family.

A Fun Frock.

Rain, nor gloom, nor a flat tire (either kind), can dampen the spirits of the girl who wears this buoyant, young sports frock (above left) on her daily rounds—be they on the fairway, the campus, behind the counter, or merely from pillar to post.

Here's to Mothers.

Sew-Your-Own loves nothing more than catering to mother's wardrobe needs. The frock above (center) is for all mothers: old sweet ones, young darling ones, yes, even for mothers-to-be. It is easy to run up, easy to do up, and best of all, easy to look at. Smart simple lines make it a favorite of women who demand more than a passable appearance when they're "just at home."

Little Brown Girl.

An all-over suntan is her forte, and many sunny days are ahead for young Miss Fortunate whose mommy chooses to interpret the fetching model at the right. A scallop-edged waist front accentuated by frou-frou trim is right down her avenue, and a gored skirt, that's second to none for class, fits into her scheme of things to a T. Mother, why not make one dressy version, as pictured, another finished differently for school? (Perhaps with a simple braid trim) Rayon prints, gingham, or sheer wool, will do nicely as the material.

The Patterns.

Pattern 1249 is designed for sizes 14 to 20 (32 to 42 bust). Size 16 requires 4½ yards of 39 inch material.

Pattern 1207 is designed for sizes 34 to 50. Size 36 requires 4½ yards of 35 inch material. With long sleeves 4¾ yards of 39 inch material.

Pattern 1366 is designed for sizes 6 to 14 years. Size 8 requires 2⅜ yards of 39-inch material plus 1¾ yards of machine pleating.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

© Bell Syndicate.—WNU Service.

Uncle Phil Says:

Leisure Is a Stimulant

Efficiency whets the appetite for leisure. And the latter stimulates the former.

Folks who hit the high spots are presently going so fast that the high spots hit them.

He who borrows and never repays is too great a coward to steal.

To remain young in thought doesn't mean to turn handsprings.

That, Too, Can Hurt

Many a man is liable to think his character has been defamed, when it has only been defined.

Change the daily schedule of your life if you want to break annoying habits.

One may make a great mistake "looking on the bright side of things" in the presence of people who want to mourn.

The American Spirit

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

[illegible] It believes a [illegible] and that [illegible] not so [illegible] It believes [illegible] living with [illegible] an' self-confidence will [illegible] swe[illegible] is did, for [illegible] and Luther Burbank in their [illegible] and important field.

During the same period have appeared other writings, either emanating from Europe or inspired by foreign pessimism. These take a different point of view

They despair of the capacity of men and women, as such, to solve their problems. They urge that all initiative, all responsibility be surrendered to those who hold the reins of government —as in many foreign lands today—and that youth trade its hopes, its energies, its self-reliance, for a problematical and dull future of state care and state guidance

Here are two divergent viewpoints.

The first is American in approach and in method.

The second is foreign. It is the antithesis of the spirit which conquered our raw frontiers, and converted them into some of the most fruitful and pleasant home-sites on earth.

The new frontiers to be conquered are no longer geographical But the spirit which will tame them and build thereon a fuller and happier life for men, is the same spirit of personal courage and confident enterprise that actuated our earlier pioneers.

It is the American spirit.

Season Opens October 9 In Iowa On Water Fow

KLEMME SCHOOL OPENED MONDAY SEPTEMBER 6

(By Supt W H Galbreth)

School opened in Klemme Monday and classes are now in full swing in all departments Some late enrollments are still expected, but the number that have signed up in the various grades now stands as follows

High School—73, Grades 7 and 8 23, Grades 5 and 6 - 19 Grades 3 and 4 21, Grades 1 and 2 21

Large Freshman Class

One of the largest freshman classes in the history of the high school started out Monday when twenty-five new students took up work in the ninth grade Twelve of these young people came from our own grade school, and thirteen were graduated last year from country schools in nearby districts Two or three other high school students will enroll later

New Members In Faculty

The teaching staff, completed shortly before the start of school shows three new names this year The staff complete is as follows

Superintendent, W H Galbreth Principal and Coach, A L. Kingery: Science and Music, M K Elstad: Home Economics, Florence Wallace: Commercial, Margaret Brakel: Grades 7 and 8, Irma Merritt: Grades 5 and 6, Marion Irvine: Grades 3 and 4, Ruby Azeltine; Grades 1 and 2, Estelle Hansen

Baseball Boys Ready

The high school baseball boys who have been keeping in practice all summer on the Legion team will open the fall season Thursday when they play at Ventura Kluckhohn and Schuldt will probably form the battery for Klemme with the following other players likely to see action: Schoenwetter Trampel, Grange, Grosshuesch, Buseman, Trees, Rockow, Lemke and Greimann

NEW HOUSES GOING UP RAPIDLY THE PAST WEEK

The basement for the Fred J. Arnold home has been completed and the concrete walls have been run in

The new home for Mrs. John Bock east of the Park has now been closed in.

The new house for Mr. and Mrs "Pete" Josten on East Main Street is about completed.

STATE LAWS ON DUCKS NOW SAME AS FEDERAL

The State Conservation Commission, by authority granted by the legislature, has issued an administrative order which makes the federal regulations and state laws for the taking of migratory game birds conform.

The Commission, after an investigation indicated that the population of migratory game birds was at a variance with the conditions which existed at the time the state law took effect, issued the order which changes the state law

The final laws now provide that ducks geese, brant, coot and jacksnipe may be taken from October 9th to November 7th, both dates inclusive Ducks, except wood ducks, canvasback ducks, redhead ducks, ruddy ducks and bufflehead ducks may be taken from 7 00 a m. to 4:00 p. m, each day during the open season. The daily bag limit on ducks for any one person in any one day is 10 in the aggregate of all kinds The possession limit is 10

Geese and brant, except Ross's geese and swans may be shot only between 7:00 a. m. and 4:00 p m. each day The daily bag limit is 5 and the possession limit 5.

Coot or mudhen must be taken only during the hours from 7:00 a m to 4:00 p. m each day during the open season The daily bag limit and possession limit is fixed at 25

Wilson or jacksnipe may be taken from 7:00 a m. to sunset each day during the open season

There is no open season on any other species of migratory game birds in Iowa.

A duck stamp is required of all persons over 16 years of age to hunt ducks, geese and brant. This is in addition to the state hunting license Duck stamps may be purchased at post offices Hunting licenses are sold by County Recorders and Conservation Officers

GAME LAWS BEING PRINTED

Printed summaries of the hunting and trapping laws are now being printed by the Conservation Commission and will be available at County Recorder's offices within a short time.

4-H MEMBERSHIP GROWS

One of the most hopeful signs for the future of agriculture, the Michigan Farmer points out, is that the enrollment in 4-H clubs passed the million mark for the first time, in 1936. Membership continues to increase

The young men and women who join the 4-H will be the producers of tomorrow. In their club work, they are instructed in new methods and techniques that make it possible for the farmer to raise larger crops and earn a greater return They are given an opportunity to develop qualities of leadership that will prove invaluable to them in the future—for example, in the agricultural cooperative movement which is constantly growing in size and economic and social signifigance In brief, they are wisely making careers of farming.

One of he largest wheat farms in Kansas contains 1700 acres. This year the crop brought $54.000. The farm is handled by power equipment and the wheat was harvested by three twenty-foot combines drawn by caterpillar tractors.

Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington.—The Supreme court of the United States has a new member, and to that extent, President Roosevelt has succeeded in reorganizing the highest court in the land. With the nomination by the President of Sen. Hugo L. Black, Alabama Democrat, and confirmation of that nomination by the senate, we find a Supreme court that stands for liberal interpretations of the Constitution by a vote of six to three on most questions.

Court Now Liberal

While it is important, of course, to know that Senator Black, the new justice, is nearly 100 per cent New Dealer, it is much more important to the country as a whole to think of Mr. Black hereafter as being fully aware of the reasons why he was selected to the lifetime job at $20,000 per year. It is likewise important to remember the reasons why Mr. Black was selected when one examines the so-called balance of power in the Supreme court.

It seems to me that Mr. Black will enter upon his duties next October under one of the gravest handicaps that ever was set upon the shoulders of a Supreme court justice. Because of this handicap, and because of the reasons lying back of his appointment, I greatly fear that Senator Black can never be a great member of a great tribunal.

In the first instance, his record in the senate, covering a period of ten years, has demonstrated to most everyone that he has a keen mind, but the fact remains, and I think it cannot be disputed, the new justice lacks the poise which always has been an attribute of outstanding judges. I hope he has the qualities that will enable him to grow and become a good justice from the legal standpoint; I hope this for the sake of the country as a whole and for the sake of the judicial structure of our government. But after observing him as an independent writer over the last ten years I think I would be unfair to those who read these lines if I did not characterize Mr. Black's as a decidedly mediocre appointment.

Again, the fact that nearly all Washington observers and a very great number of officials do not expect much legal wisdom from the new justice is traceable more to the conditions under which Mr. Black received the honor than to Mr. Black himself.

* * *

Let us examine the reasons that lie back of Mr. Roosevelt's selection of Mr. Black. In this case, as in the case of many lesser appointments, the motives, the politics, the underlying objectives have not been stressed anywhere. In order to understand the situation, it is necessary to review several years of history on one line and it is likewise necessary to examine various incidents marking Mr. Black's career in the senate. Out of this maze of detail, certain significant and more or less definite conclusions appear.

Along the one side of the examination we find Senator Black consistently supporting President Roosevelt's New Deal programs wherever and whenever he found them. We note as well intolerance on his part for those persons and those arguments running counter to New Deal policies. Thirdly, we cannot overlook various senate investigations conducted by Senator Black for we know that in most of these he was carrying out orders from the White House. That is, Senator Black was engaged in expeditions of smear, of muckraking, and in needless exposure by way of senate investigations, in order that if there were flashbacks someone other than the President would be in the white light of criticism.

Casting aside many of the assaults on Mr. Black's personal record, and turning to the other phase of the situation that culminated in his selection for the court, it must be plain to anyone knowing all the facts that President Roosevelt had a definite purpose in selecting the Alabaman. This phase also requires a bit of review.

* * *

When the President suddenly demanded that congress reorganize the Supreme court and make provision for the appointment of six new justices of his own choosing, he created an enormous split in the Democratic party. He alienated many sections of the South and at the same time provided many old-line southern Democrats with ammunition which they could use to justify their positions in opposing Mr. Roosevelt on many other phases of legislation.

Court Split Party

I do not mean to say that all of the southern Democrats turned against the President because that is untrue. There were possibly a half dozen senators from the South and an equal proportion of representatives who are sticking by the President and will continue to support him. That fact, however, does not alleviate the condition.

Senator Black was among those who stayed with the President through thick and thin. He never was an exceedingly popular man among his colleagues. Add to this the capacity of using harsh language in the extreme and one finds that he was not the most popular choice among the senators for the job to which he has been elevated. From various quarters, therefore, I have heard observations to the effect that Mr. Roosevelt appointed Senator Black with full knowledge of the facts I have related. He could and did slap at some members of his own party for failing to go along with him on the court packing plan and some other New Deal legislation like the wages and hours program. He showed certain groups and cliques in the senate and house that he is boss.

Then, in selecting a man from the deep South undoubtedly the President figured it would be influential in pulling back to him some of the support which he certainly has lost among local politicians in the southern states. Views of this test of political strategy differ greatly, but whether he gains or whether he loses on that score, there certainly is ground for belief that the reasons were as I have given them.

There is also another reason for the appointment of Mr. Black. Of course, everyone realized that Mr. Roosevelt would name a man of New Deal leaning. Moreoever, everyone recognized that it would be strictly a personal appointment as far as the President was concerned. So the stage was set for appointment of a man of more or less radical tendencies—but no one expected the choice that was made.

Now, the senate long has operated almost as a high class group. Every senator considers his colleagues with great deference and respect. This is senatorial courtesy. Does it not seem quite reasonable then, to consider that Mr. Roosevelt went into the senate to pick a new justice with the full realization that the nomination would be debated in gentlemanly fashion; that senatorial courtesy would tone down the barbs and the darts and the personal attacks that would probably obtain if the name of a private citizen were submitted? I cannot know the President's mind, obviously, yet I have heard these conclusions stated so many times that they cannot be wholly disregarded. New Dealers consider the appointment clever from the standpoint of senate debate, and those opposed to the New Deal called it a smart trick. So there is very little disagreement.

* * *

I called attention earlier to the effect of the conditions under which Mr. Black enters the court. I think examination of them is vital. They are important for the reasons I have set down and they are important from another standpoint.

May Solidify Court

It is pure conjecture, of course, but I am going to mention the possibility that Senator Black's entry into the court membership may possibly create resentment among the other justices. Each of them will certainly know about all of the various undercurrents, the gossip, and the more or less obvious facts involved in the appointment.

I have been wondering then whether the other members of the court, even liberal members like Justices Stone, Brandeis, and Cardozo, may not feel that Mr. Roosevelt has subjected them to undignified terms. I mean by that, is there not a possibility of them feeling that the President is seeking to gain decisions along his own line of reasoning rather than on the basis of justice and law?

As I said, this is pure conjecture. Nevertheless, I think it will be agreed that it is a logical thought, because the Supreme court justices, after all, are just as human as you and anyone else.

Carrying this thought a little further, what will be the effect upon the old conservative members of the court like Justices McReynolds and Butler and Sutherland? Will they regard the Black appointment as a direct thrust at them personally? If they do, it seems to me the logical result would be to make them more conservative than they now are.

I do not mean to imply dishonesty or unfairness to any member of the court. I know some of them personally and I respect every one of them. I merely call attention to these things as among the possible results in the appointment of a man to the Supreme court who may have been not the worst appointment possible but surely, all conditions considered, it was far from the best.

Politically, the Black appointment is likely to enter into the 1938 congressional elections. There seems no way by which the matter can be avoided as an issue. It is only through those elections of senators and representatives that the people can express themselves, and nearly everyone agrees now that the name of Justice Black will enter into numerous state and district political battles.

Western Farm Sinks 200 Feet Into the Earth

H. A. Robertson is shown viewing the destruction wrought on the land he is farming near Buhl, Idaho, by the sinking of thousands of square feet of rich soil into the bowels of the earth. More than five acres has already sunk 125 to 200 feet below its normal level, forming a canyon. This phenomenon of nature, experts say, is due to a great fissure beneath much of southern Idaho and may doom a considerable area.

Devout Immersed in Mass Baptism

By ones, twos, threes—even by entire families—87 believers were baptized in a mass immersion at the non-denominational Immanuel temple at Los Angeles. An elderly convert, wringing wet but happy in her religious fervor, is pictured above. The believers were baptized by Rev. A. Earl Lee (right), pastor of the church.

Nathaniel Rubin Is Checker Champ

ASTOR KIN BANKRUPT

Francis Ormond French, father-in-law of John Jacob Astor III, who filed a bill of bankruptcy. One of the liabilities was a bill to a Chinese laundryman totaling $1.48. Mr. French refused an offer of his daughter, Ellen Tuck French, to get him out of his financial difficulties, saying: "I'll always stand on my own feet."

Royal Family Visits Crathie Church

King George VI and Queen Elizabeth, with their two daughters, Princess Elizabeth and Princess Margaret Rose, are shown in a carriage drawn by the famous Windsor grays on their way to attend services in the Crathie church in Aberdeenshire, Scotland.

This Unique Bridge Has World's Shortest Life

Swinging a steel beam into place to close the last gap in one of the most unique bridges ever built. Three thousand feet long, one hundred seventy-five feet high, this half-million dollar structure will be swallowed up in six months by the rising concrete of Grand Coulee dam, being built by the bureau of reclamation on the Columbia river in Washington. The bridge was constructed as the most economical means of moving concrete from two great mixing plants, one at either side of the river, over the foundation area of the dam, 500 feet wide by 3,000 feet long. A part of the west section of the dam can be seen in the background.

Tune to School Girl Needs

By CHERIE NICHOLAS

S of gay little print wending their way is the picture fashion is he screen for fall. There o danger of overdoing llection for little daugh- e are so many varieties and design in the realm le prints this season n assemble a wardrobe anging from playtime om frocks to pretty-pret- sses, and then not have or occasions that may

other's standpoint the collections should and all that they should be fabrics which will in- child the joy of being whatsoever the occa- se fabricists are bring- ttons and rayons and have the "looks" of allis and fine crepes.

that intrigues the little gard to prints is that e nicest, prettiest prints especially designed for pictorial motifs that t appeal to childhood. re the patterns charm- ld but they are in many nstructive and entertain- . For smaller children prints with the letters abet scattered designful- er patterning. Mother es too, and boats and ords and animals, fruits s done in a way to cap- ncy of a child.

hable prints developed are unique and lovely. s of perfectly charming we have in mind—ar- ions each of which has ed by a song There are gns in this collection nine ave been adapted to cot- and six to rayon. The of it is that these theme song designs use titles of copyrighted songs. What a grand chorus of prints there will be in classroom, at home and in the highways and byways that little girls tread during the coming tangy autumn days! Not that children have a monopoly on these intriguing musical prints for designers are making them up into the smartest-ever housecoats, pajamas and daytime dresses for grown-ups.

Does your little girl love music? If so she'll adore the beruffled frock of new chintz-type print (centered in the illustration) the motif of which is based on "I'm Forever Blowing Bubbles," a song children know and love. Clever little girl and boy figures holding balloons and other bubble motifs following the position of the notes on the scale with tiny clef signs make the design of this print which is fascinating for young and older folk. The crisp white organdy ruffles and buttons add winsome accents.

The dress to the left is also made of a theme-song "bubble" print. It is a pleasing type for the growing girl. Three narrow ribbon bows positioned on ribbon crossbars set row and row march soldier-like down the front of the bodice. Pleated skirt and demure Peter Pan collar complete this smart style.

The dress to the right reflects a quaint spirit in the lacings up the front, the close-fitting bodice, and the now-so-fashionable "swing skirt." Any girl would love to wear this dress "first day of school." The scattered daisies is a patterning inspired by that familiar song, "Daisy, Daisy, Tell Me Your Answer True"—enough to inspire any little girl wearing this dress to become a prima donna.

PLAID TAILLEUR

By CHERIE NICHOLAS

Plaid's the thing for your new fall suit if you are seeking the smartest. The one pictured is of heavy plaid linen. It's a real Scotch tartan plaid done in dark green, dark blue lined with white, red and yellow. Black velvet binds the edges, pocket flaps and cuffs. This makes a stunning costume for early fall and later on you will be wanting to copy it in plaid wool. We are quite sure you will for these stunning plaid jacket suits are the "last word" in chic.

Black and Sand

Black velveteen is worn with a tailored coat of sand-colored wool.

FARM TOPICS

GRASSES, LEGUMES USED AS ENSILAGE

Can Be Kept in Condition by Adding Molasses.

By A. C. Kimrey, Extension Dairy Specialist, North Carolina State College. WNU Service

With molasses as a preservative, any green crop that will make hay can be stored in a silo without any appreciable loss of feed value.

Corn silage contains substances that act as a preservative, but legumes and grasses do not have enough sugar to ferment properly. By adding molasses to legumes and grasses, the material can be kept in good condition.

The crop can be cut at any stage of maturity and in any kind of weather However, greater feeding value is obtained if the crop is cut as early in the season as possible without injuring the stand Cereal crops should be cut when the grain is in the milk stage

Start cutting early in the morning. If the crop is wet with dew or rain, so much the better. The crop should be put in the silo within a few hours after cutting.

If the crop must remain in the field more than a few hours on a dry day, water should be added as it is blown into the silo.

Around 40 to 45 pounds of molasses should be added to each ton of cereal and grass crops, while 75 to 80 pounds should be added to a ton of legume silage.

The molasses can be added from an elevated barrel by allowing the proper amount to flow through a spigot onto the green material as it is fed into the cutter.

Egg Producers, Handlers Can Stop Summer Losses

Producers and handlers of eggs are losing hundreds of dollars every week of warm weather from highly perishable fertile eggs, according to O. C. Ufford, extension poultryman for Colorado State college, Fort Collins.

Suggestions for preventing this loss are outlined as follows:

Roosters should be marketed or confined during the summer so that infertile eggs may be produced.

Provide one nest for each four hens.

Gather eggs more than once a day.

Cool eggs before packing them in cases.

Eggs may be cooled and water evaporation from the eggs may be prevented by keeping them in the cellar or by keeping a damp sack over the case.

Market eggs as often as possible during warm weather, preferably about every three or four days.

Keep clean straw in nests.

Handlers of eggs will find it more profitable to keep eggs stored in a cool place until they are sold.

Mowing Weeds Aids Grass

Mowing weeds and removing brush and other tall vegetation encourages the spread of more beneficial grasses, clover, and lespedeza, eliminates the competition for moisture and plant food, and results in a turf more resistant to soil erosion, the Soil Conservation Service has found. In the past 2 years mowing has been extended over more than 100,000 previously unmowed acres of grassland on Soil Conservation Service erosion control areas. Fairly high mowing—from 4 to 6 inches when weeds are about in full bloom —is recommended.

Marketing Milk

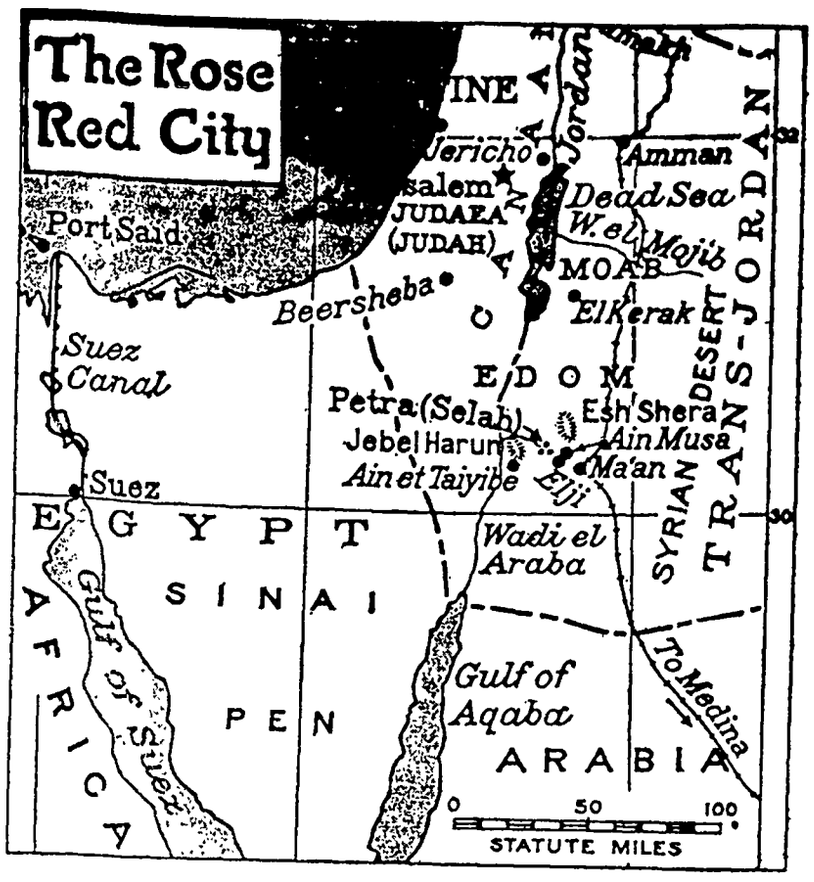
Three major adjustments in milk transportation and production practices would save farmers thousands of dollars annually, according to agricultural economists of the University of Illinois. More dollars in the pockets of producers and better service to consumers could be brought about by rearrangement of hauling routes so as to reduce mileage and increase load volume, by marketing more milk through country plants and by narrowing the seasonal variation in milk production.

Protein Feeds for Cattle

High protein feeds have given faster gains, better finish, and lower costs in cattle fattening than rations with less protein, according to observations made by the University of Illinois. Linseed meal, soybean oil meal and cottonseed meal are the protein feeds generally used. It is profitable to give one pound of one of these feeds to each seven to ten pounds of corn, depending upon the age of the cattle and the kind of roughage.

Saving Poultry From Heat

Good ventilation in the poultry flock is the vest way to prevent heat prostration. The north side of the house should be opened to allow free circulation of the air. Windows or doors on the east or west side of the building should be opened to allow free air movement. If there is a room ventilator it should be opened because this too increases air movements. Insulation of the roof, of course, helps materially to reduce the temperature in the room.



Petra Is Off the Beaten Path.

Old Petra Now Accessible to Travelers After Many Centuries of Oblivion

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

PETRA, silent city of the forgotten past, halfway between the Dead Sea and the Gulf of Aqaba, exerts a magic spell upon the minds of those fortunate enough to know it. Its single and weird approach, through a deep rock cleft more than a mile long; its temples, numbering nearly a thousand, cut into the living rock of stupendous cliffs and showing Babylonian, Egyptian, Greek and Roman influence; its high places, courts, libation basins and altars where the ancients worshiped; its amazing color, the work of Nature lavish with ocher and all shades of red—all these are mysterious, enthralling.

"The rose-red city, half as old as time," has a history that began long before histories were written. Near it have been found worked flints of the Late Chellean period, millenniums before recorded dates.

It's first written history is found in the Bible; for the land about it was Mount Seir of old (now Esh Shera), home of the Horites, cave dwellers whose progenitor was Hori, the grandson of Seir. These Horites are first mentioned at the time of Abraham in connection with the subjugation of the land by Chedorlaomer.

For centuries Petra was a rich caravan city, a veritable crossroads of the ancient world. The Arabian peninsula was a network of caravan routes, over which passed the products of Africa, Arabia, and India to the valley of the Nile, Palestine, Phoenicia, and the Euphrates-Tigris valley.

Deserted When Rome Fell.

Goods were brought to Petra for storage and for trans-shipment in every direction. So important was the city that the Romans built two roads to tap its wealth. When Rome fell, however, its doom was sealed.

Abandoned save for a few desert tribesmen, who lived miserably in its caves, as some of them still live, Petra passed from the notice of the outside world, remaining in oblivion for more than a thousand years.

In 1812 the Swiss traveler, John Lewis Burckhardt, disguised as a Bedouin sheik, reached it and returned to tell of its mysteries. It had then become sacred ground to the Arabs, and danger menaced any infidel who approached it.

In the century after Burckhardt few explorers attempted to visit it. Not, indeed, until after the World war was it accessible to any save the most intrepid; and even now visitors cannot enter it save under protection of armed guards. With a comfortable camp for accommodation of guests during the summer months, Petra at last is open to serious travelers.

The trip from Jerusalem to Petra and back once required about a month of arduous caravan travel through country infested with lawless Bedouins. Construction of the Mecca railway from Damascus to the sacred city of Medina was a first step toward opening the country, and later a highway from Jerusalem to Ma'an and a smooth dirt road from Ma'an to Elji brought motor vehicles within two miles of the ancient city. Airplanes, too, now carry passengers to Ma'an, bound for Petra.

When the British cleared the way for automobiles between Ma'an and Elji, the Bedouins rose in open revolt, complaining that the road would deprive them of their income from renting saddle animals to Petra visitors.

Warfare ensued, several persons of both sides losing their lives. After the government had crushed the rebellion by armed force, the Bedouins received assurance that the road would not be extended beyond Elji, and that their horses and mules would be hired under government supervision for the last part of the journey.

Thus the Bedouins have kept modern transportation from actually infringing on the silence of long ago and preserved for Petra a measure of its isolation.

How to Reach the Ruins.

However you travel to Petra, whether by railroad from Damascus, a method almost disused; or by car from Jerusalem, the most practical way; or by air, the latest innovation, all routes converge on Ma'an, a thriving abode village girdled with walled gardens of palms, figs, and vegetables, and surrounded by flat, chalky white desert. There is an English school here, and visitors are often amazed to find that many of the Arab youths understand and speak English.

From Ma'an you drive northwest by car, passing the spring of Ain Musa, to Elji. Here a happy crowd of Bedouins, with emaciated riding horses and pack mules, await your arrival.

Descending first by slippery trails over limestone rock, you follow the bed of Wadi Musa to a mighty barrier, the eastern range of the red sandstone mountains that enclose Petra. Wadi Musa deepens. It seems that you are entering a culde-sac, but here Nature has rent the range asunder, cutting a narrow opening. For this long slit the Arabs have coined the name Es Siq (a cleft).

Through it the fountain and flood waters flow in winter, and after traversing the precincts of Petra city, find their way into Wadi el Araba by another greater gorge, the Wadi es Siyagh.

Through Bab es Siq.

Approaching the gateway, Bab es Siq, you pass through a small suburb of Petra, without the precincts of the fortified city. This was a city of the dead, as was most of what is left of Petra. Objects of interest are tombs of the pylon type, cut from the solid rock, but, unlike the facade monuments of Petra proper, blocked out to stand apart as buildings.

Here, too, are scattered white sandstone hummocks, rock domes into which large numbers of small chambers have been cut without faces.

Many of like character are found on the less accessible mountain tops. They are believed to be the troglodyte homes of ancient people who lived on Mount Seir before the descendants of Esau made Edom of it.

The Siq is 6,000 feet long as the crow flies and considerably longer as it winds. Once it was all paved, and channels were cut into its precipitous sides to lead the spring water into the city. It is 20 feet wide in its narrowest parts and expands to not more than two or three times this dimension. Its sides are stupendous, making men mere ants by comparison.

In no place may you see far ahead, crooks and corners preventing. A streak of blue sky like a twisted ribbon is all that is visible of the heavens.

Your horses slip over the great boulders that choke this ancient avenue, your Bedouins chanting their weary and melancholy notes.

After 20 minutes of this bewitching seclusion, you strain your eyes for a first glimpse of the vision you know awaits you. Even though you watch, it bursts upon you as a surprise.

The Siq ends abruptly in a cross-gorge. From the face of the cliff opposite the Siq mouth El Khazna has been cameoed out, a temple to an unknown deity. It peeps at you at first, you see a little more, and then it bursts upon you in all its beauty.

This cross-canyon has been called the "Outer Siq." The name "Lower Siq" may fit it better. Its walls are equally precipitous. To the south its valley floor rises abruptly to the mountain top on which the Great High Place of Sacrifice is located. Steps have been cut at no little expenditure of energy to make easy the ascent of the worshiper. To the north the Outer Siq expands, opening into the Petra basin.

STAR DUST

Movie • Radio

★★★By VIRGINIA VALE★★★

SAMUEL GOLDWYN is taking bows again for succeeding where many other motion picture producers have failed. He has made a new version of an old picture that is even better than the old one—and the first "Stella Dallas" was the best picture of its year, some twelve years ago.

This picture is frankly a tear-jerker, the story of a millhand's daughter who married a gentleman, but could never become a lady. But "Stella Dallas" was fine and courageous enough to see to it that her daughter had a chance to become one of her father's set rather than hers. Barbara Stanwyck gives a sincere and gripping performance as Stella.

—★—

If you would rather laugh than cry, Paramount and Twentieth Century-Fox are all ready for you with two mad musical extravaganzas. Paramount's contribution is "Artists and Models" and it stars Jack Benny. Twentieth Century's new one is "You Can't Have Everything," and in it the Ritz Brothers are madder and merrier than ever, Alice Faye sings sad songs and Don Ameche is a pleasant hero. Funny part about this picture is that you will adore Phyllis Brooks who plays one of the most unpleasant parts you have ever seen—a soubrette whom everybody in the cast loathes with good reason.

Alice Faye

—★—

Gene Autrey sets a pace that it is tough for other cowboys to maintain. Now producers expect them all to sing. Buck Jones hasn't fallen for vocal lessons yet, but he has hired a heavy for his new picture, "Sudden Bill Dorn," who can warble Western ballads with the best of them. His name is Harold Hodge.

—★—

Anna May Wong, who will return to the screen this fall under the auspices of Paramount, playing a sort of female Charlie Chan, spent her time meanwhile playing summer theaters in the East. At Mount Kisco, where Frances Farmer had made a tremendous hit, Anna Mae made a decorative and charming "Princess Turandot" in a play adapted from the opera of that name.

—★—

Dorothy Day, one of the famous clothes models who worked in Walter Wanger's "Vogues of 1938" came to New York for a brief vacation, and when she returned to Hollywood, she learned that she had a brand new name. Mervyn Le Roy, who gave her a contract to make pictures for him decided that Dorothy Day was not a good name because there are several actresses and two authors already using it. He is going to bill her as Vicki Lester, the name of the character that Janet Gaynor played in "A Star Is Born."

—★—

When you saw "I Met Him in Paris" you must have wondered why Robert Young fled from such an attractive wife as the one played by Mona Barrie. Well, she explained all when she arrived in New York recently to rehearse for a stage engagement. It seems that there were long scenes that explained their differences, but the picture was too long, and Mona landed on the cutting room floor. She hopes for better luck in the picture that she just finished, James Cagney's "Something to Sing About." She plays a comedy role, a sort of female Mischa Auer, and she had so much fun doing it that she doesn't see why Grand National had to pay her a salary.

Robert Young

—★—

ODDS AND ENDS—Everybody wonders if Frances Farmer's costumes in "The Toast of New York" were responsible for the revival of bustles in the big Paris fashions showings . . . Benay Venuta, whose songs are so popular on the air, got her start dancing in the same ballet with Myrna Loy . . . Burgess Meredith used to sing in the same church choir with Lanny Ross . . . Eddie Cantor eats his lunch between scenes on the set these days, because he uses his regular lunch hour to dash over to the antique store he has bought to see how business is going . . . Ina Claire's Sunday night radio dramas on NBC's blue network are growing so popular that maybe she won't come back to make motion pictures, after all . . . Gary Cooper has bought a ranch for the old cowboys who used to work with him in Western dramas . . . Because she loves sun-bathing Bette Davis will have to stay away from the Warner studio for a month, most of the time in a darkened room.

YOURS FOR "BETTER LIVING"

Central States Electric Co.

STOP feeding the rabbits, rats and cro
STOP sore thumbs, cracked hands, lame ba
with an OLIVER CORN MASTE

Every day that your ripe corn stands in the field means loss—loss to rabbits, rats, blackbirds and crows—loss to wind, rain, snow and weather. Get an Oliver Corn Master. Harvest 12 to 20 acres of corn per day. Save your corn, big ears and small ears, and the nubbins that the hand husker often passes up, picked and husked, cleaner than hand husking.

One man on the tractor handles the entire rig—tractor, Corn Master and wagon—without stopping. The roller bearing Corn Master rolls along, on its air-tired wheels, and you a load of corn, picked and h almost as soon as you'd think it. Get an Oliver Corn Master, on those cold, raw mornings wh lame back, sore thumbs, cra hands and aching arms would it "hard to get going" for a back-breaking day of hand husk you will appreciate the way Corn Master saves your health, time and your valuable crop.

Come in now and see us a your Corn Master.

IOWA FARMERS MAKE PLANS FOR SILO-FILLING

Dairyman Discusses Some Problems Connected With Storing Ensilage

Silo-filling Iowa's biggest "canning" enterprise is rapidly getting underway in many sections of the state, reports A R Porter Iowa State College extension dairyman And with the growth less of a problem than last year in most localities, farmers are paying special attention to the maturity of the corn they are using

"Where corn is neither immature nor too old and dry, the chance of producing a palatable nourishing and well preserved feed is much greater," Porter says "For that reason, the ensilage this year should be much superior to that of 1936"

Cut In Soft Dough Stage

Usually the best time to cut corn for ensilage is when the kernels are in the late dough or early glazing stage But unusual weather conditions, especially drouths, often modify this rule Other factors such as variety of corn and moisture content also affect the cutting time

In case of drouth or frost, it is desirable to ensile the crop as soon as growth has been checked." Porter says "Drouth-stunted corn ordinarily will need the addition of water to pack well in the silo In a trench silo or shallow silo a greater amount of moisture is needed"

Porter points out that the two biggest problems with ensilage are preventing putrefaction and excessive acidity

Can Prevent Putrefaction

Putrefaction can be prevented largely by using an airtight walled silo and by keeping the silage moist and well packed Excessive acidity can be avoided by cutting corn which is relatively mature Immature corn is high in sugars which ferment and make the ensilage sour and unpalatable

When green corn or sorghum is cut and packed into a silo, several things happen, Porter explains First the still active plant cells continue to "breathe," exhausting the supply of oxygen and giving off carbon dioxide The carbon dioxide inhibits the growth of molds, but does not stop the action of acid-forming bacteria

Unspoiled For Years

Second the acid forming bacteria prevent growth of putrefying bacteria, which cannot live in acid conditions Later this acid-production stops, but the ensilage contains enough acid to remain unspoiled for years if properly handled

"Sorghum crops, such as hegari should have ripe, hard seed before ensiling," says the Ames dairymen "The mistake is often made that a cane crop will produce sweet silage, whereas actually, the opposite can be expected because of the transformation of sugar into acids"

In one generation this country has gone from red flannels to red fingernails We claim that is going some

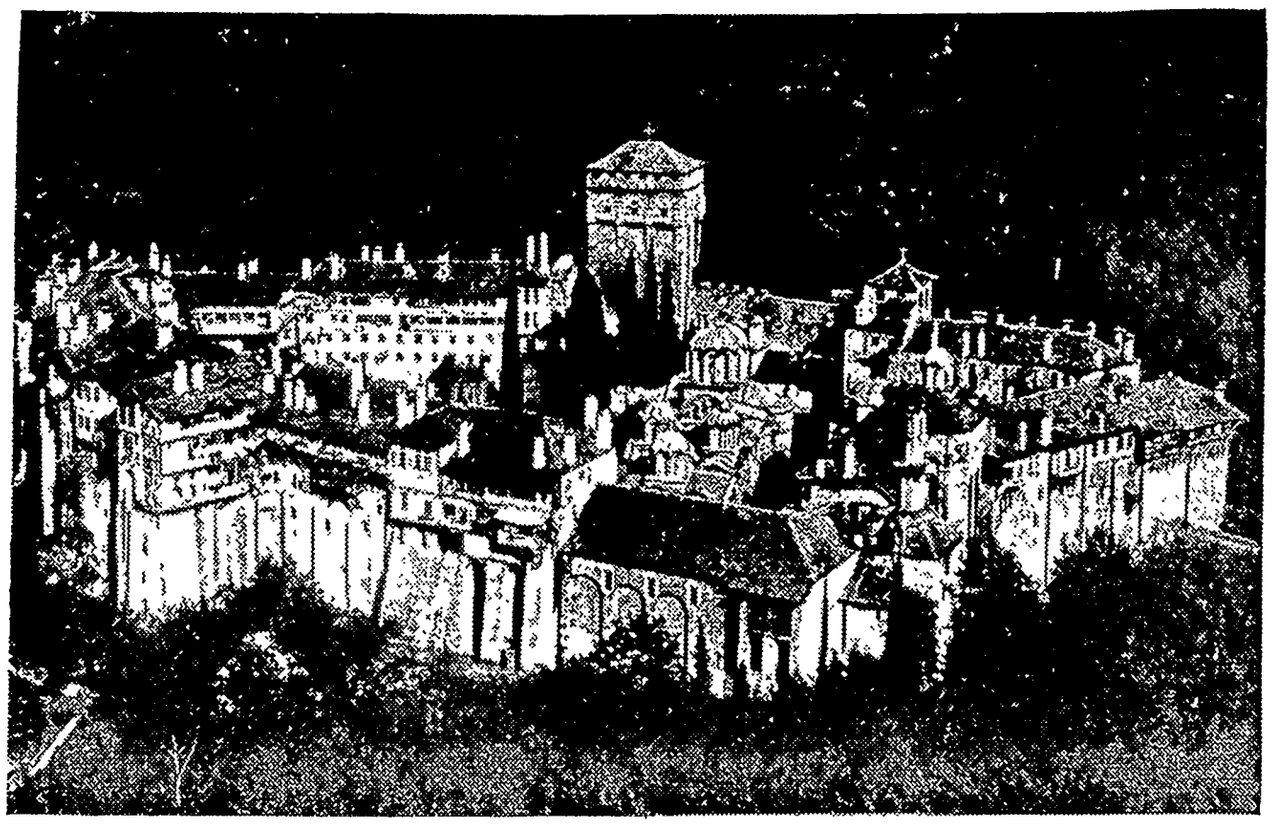
ATHOS—LAND OF MEN ONLY

Special Police Bar Women, Wolves from Holy Community —Capital Called Karyes, Meaning "Nuts to You" in English—Halliburton Explores It



Some of the monasteries are as big as small villages. This one is a third of a mile around the walls. Life is lived there exactly as it was a thousand years ago.

By RICHARD HALLIBURTON
Author of "The Royal Road to Romance," etc.

THERE exists today in southeastern Europe a little country, washed by the Aegean sea, so fantastically different from all other countries in the world that in writing about it I am aware I shall be straining the credulity of my readers to the utmost. So let me assure you at the outset that every word of this story is strictly true, and can be authenticated in any reference book on the subject.

This country is almost a thousand years old, and has a government which has functioned uninterruptedly over a longer span of time than any other government on earth. But in all this time it has never introduced a single new idea in politics, education, or science. The four thousand people who inhabit it occupy the same venerable buildings, read the same parchment books, wear the same style of clothes, lead the same kind of lives to the minutest detail, as their country's founders in the Tenth century. In the midst of progress and evolution it has remained a medieval world.

When we examine it we find, to our astonishment, that every inhabitant is a male—has always been a male since the beginning.

Upon its soil only one woman in all its long history has ever set foot. And she remained just fifteen minutes

No child has ever been born within this country's boundaries. Baby boys may have been brought here and have grown up here, but never once a baby girl.

This country is located entirely on a narrow peninsula. At the point where the peninsula joins the mainland the inhabitants have placed special police whose sole duty is to keep wolves and women from crossing the frontier.

Rams But No Ewes.

Not only are all females of the human race rigorously barred—females of any other sort are barred as well There are large flocks of roosters in the country, but not one single hen—plenty of rams but no ewes—herds of steers and bulls but not a cow can be found There are thousands and thousands of cats—all tom; innumerable dogs, all male. Only female birds and female insects have been able to fly or crawl—to the state's great annoyance—across the border.

All the four thousand inhabitants wear long black beards and long black robes. Hair-cutting is not allowed. Instead, hair is gathered into a big knot at the back of the neck and secured with hairpins Baldness is unknown.

The people drink quantities of liquor, but singing is strictly prohibited.

The capital is called Karyes, which, when translated into English, gives it the lovely and mellifluous name of Nuts.

This community is the Holy Community of Mount Athos. On maps it is included in Greek territory, but actually it is as independent as the moon.

East of Salonika the map of Greece shows three long narrow mountainous peninsulas extending like three infuriated sausages into the Aegean sea. Of these Athos is the easternmost—thirty miles long and five wide. Its base, however, is so flat and narrow that King Xerxes of ancient Persia, bringing his fleet to Athens for a conquest of Greece, easily cut a canal across the isthmus to save his ships having to round the stormy point. Rising above the point is an abrupt and spectacular peak 6,000 feet high, of pure white marble.

And on the rugged sea-slopes and shores of this peninsula, placed four or five miles apart, are twenty lonely and isolated communities. Each is enclosed within a huge medieval stone building, walled and battlemented, and built around a court. These communities are monasteries. Several of them were founded between the years 900 and 1000. Several more in the 1100's.

The monasteries are giants in size. The largest measures nearly one-third of a mile around its walls. Another is ten stories high. Fortress, castle, college, church, all in one, they were all built in beauty and in grandeur by the outpourings of riches from the emperors of old Byzantium.

It is in these vast religious refuges that the entirely masculine population of Athos lives. . . four thousand monks. And it has been their abbots who have passed the unique laws forbidding any creature of the female sex from profaning the holiness of this long-bearded heaven.

Noted for Size, Splendor.

Byzantium—now Istanbul—in the year 900 was the most zealously Christian city ever known. The Eastern Orthodox church dominated it completely. But for numbers of citizens in this excessively religious metropolis, Byzantium was not half pious enough. These fanatics, protected and supported by the state, retreated to the wild and uninhabited—and dramatically beautiful—peninsula of Athos. Here, as monks, they turned their zeal into the construction of monasteries.

In the center of each monastic court the monks built a church in the form of a Greek cross. Into these churches were poured the gold and silver and jewels which Byzantium, then mistress of the western world, had wrested from a hundred subject nations. Not pounds, but tons of gold were spread across the ikons and the altars. Huge gold chandeliers hung from the domes; huge gold candelabra, higher than a man, lit the holy treasuries.

Once these churches were finished, the monks held gorgeous services, conforming rigidly to the ritual fixed by the Patriarch.

That was in the year 950. And what remains today of all this glory?

Everything!

Ever fleck of gold, every jewel, every ikon, every slightest detail in the services, exist in 1937 exactly as 1,000 years ago.

The first generations of Athonian monks rendered an incalculable service to humanity, for they possessed cultural as well as spiritual strength. Into their monasteries they brought all the previously written books they could lay their hands on. Sixth, Fifth, even Fourth century manuscripts, collected from Egypt and Arabia, Syria and the East, found their way to Mount Athos.

And what has happened to these thousands of scholarly books? Have they been saved?

Nearly every one!

But the monks themselves who have preserved all these ancient treasures—what sort of people are they after thirty generations without women and without children?

They're Done With Women.

To answer that question we must first understand what sort of men come here and why they come. They come mostly because the Eastern Orthodox church in Greece, Russia, Serbia and Bulgaria, has so emphasized the literal bliss of a physical heaven and literal torments of a physical hell, that simple-and-susceptible minded youths (particularly in times past) have fled to Athos believing that only by a life of abstinence and self-mortification can they hope to escape from eternal frying in the fires of hell. With a lot of women around, self-mortification would be much harder.

There are other monks, with romantically-inclined natures, who have had their souls slain by the infidelity and inconstancy of some woman. With broken hearts, seeking refuge in religion and solitude, they come to Athos. They are through with women and never want to see one again.

One "diabolical demon" who broke the law happened to be (so the story goes) a famous European queen (the late Queen Elizabeth of Roumania, who died in 1916), whose country had contributed so generously to the support of the monks that she was given a special permit to approach the front door of one of the biggest monasteries—a favor unique in history.

All went well, up to a certain point. The queen gazed for several moments into the forbidden area where for one thousand years no woman had ever set foot. Then, to the horror of the assembled monks, she suddenly walked resolutely and quickly on through the doorway—just because she wanted to—and into the courtyard. . . . straight toward the entrance of the church itself—the church where the unspeakably holy relics lay—pieces of the True Cross, girdle of the Virgin Mary, foot of a saint that lived on top a column for fifty years. The monks were almost paralyzed. They couldn't seize the woman bodily—she was a queen and their benefactress. But every step she took, further wrecked the accumulated holiness of the centuries. The monastery would be cheapened and desanctified in the eyes of all the other monasteries. While the poor abbot, in despair, was wondering what to do, the queen, having seen all she cared to see, camly left.

Male or Female?

The most disconcerting female intrusion of all happened one recent summer.

In June, two young Danes, accompanied by a third young person wearing man's attire and proclaiming to be a male, came with proper passports to the peninsula to make a tour of the monasteries. At the first night's stop the monks looked scrutinizingly and suspiciously at the third member of the party. Was it really a boy—or a girl in man's clothes? As the suspected visitor walked about, into the church and library and every sacred corner, the monks' alarm grew. Most of them had not seen a woman in five—ten—twenty—years, and couldn't be sure whether this was one or not. The "boy" had short hair, but it was strangely soft and fine. His voice was like a girl's, and there was no sign of a beard. . . and yet the figure was a boy's figure.

The poor puzzled monks did not wish to humiliate their visitor if he were a boy by expelling him for being a girl. But neither did they wish to be made fools of, or to have their monastery lose caste, by sheltering what seemed to be a female. They tried every possible ruse, every trick, that might reveal the sex of their guest. They even set spies to watch the most intimate manners of the troublesome visitor. But the visitor was on the alert, remained as enigmatic as ever, and left the monastery before the distracted monks could come to any decision.

The excitement continued from one night's loding to the next. It even began to precede the arrival of the three Danes. The boy-girl became the scandal, the sensation, the consternation of the entire peninsula. The battle over the sex of the boy-girl raged up and down the slopes of the peak of Athos. The monasteries where the disturbing visitor had set foot, in self defense swore it was a boy. The monasteries not so honored, in a holier-than-thou mood, swore it was a girl in disguise.

To this day nobody knows the truth, but Mount Athos still smokes with the controversy.

Keeping Up With Science

By Science Service

© Science Service.—WNU Service.

How Long Will Our Fuel Supply Last? Here's the Answer

There's Plenty of Coal, but Oil's Running Short

New York.—Unless new methods of obtaining and processing petroleum are developed, America may begin to feel the cramping hand of an oncoming oil shortage in from 10 to 20 years. This is the verdict of Dr. Arno C. Fieldner, chief of the technologic division of the United States Bureau of Mines.

Dr. Fieldner outlined the present resources of the nation's fuels.

Of coal America has plenty, said Dr Fieldner. Enough to last hundreds and perhaps a thousand or more years. But natural gas and oil obtained by present methods may be exhausted in less than a century, he warned.

Trend Favors Coal.

Here is the significant forecas of Dr. Fieldner on America's future fuels:

Coal will continue to be the chief fuel for the generation of public-utility and major industrial power. While improved burning of coal might tend to decrease consumption and the further development of water power may be expected to increase, Dr. Fieldner sees an increasing demand for total energy needed by the country so that coal's relative position should be favorable. Moreover, after 10 or 15 years oil resources will become more difficult to exploit, so that the trend will be the increased consumption of coal.

"Tomorrow's power and central heating plants will burn any kind of coal completely and efficiently," said Dr. Fieldner. "There will be no smoke, no dust, and no sulphurous gases emitted to the atmosphere."

Heating Costs Remain Steady.

No substitute for metallurgical coke has appeared, continued Dr. Fieldner. The coke-oven industry should expand. Regulations prohibiting the waste of natural gas and the urge for additional markets will lead to the construction of more long-distance pipe lines which already go from Texas to Chicago and to Detroit. Gas will find industrial and domestic use and will displace oil as well as coal for fuel in some places. As natural gas approaches exhaustion gas from coal will take its place.

Dr. Fieldner sees a further use of automatic coal and gas heating of homes and believes improved insulation will permit heating at about the present costs, despite the inevitable advances in the price of the fuel.

While oil-fuel Diesel engines on railroads may be expected to increase, Dr. Fieldner foresees coal retaining its predominance as the fuel for freight traffic throughout the age of oil and natural gas.

Three-fourths of the world's shipping is now powered by oil fuel. Oil, in fact, has energized marine transport.

On the crucial question of gasoline supplies for automobiles Dr. Fieldner regards present pessimistic fears of a shortage by 1945 as unjustified. Such warnings, he points out, have been issued regularly since the automobile came into use. Scientific research, both in cracking heavy oils to yield more gasoline and the reverse process of polymerization where gasoline is created out of lighter gaseous vapors, should hold the production to levels of demand, states Dr. Fieldner.

Maybe There's Something to Scotch Way After All

Minneapolis, Minn.—Maybe there's something in the thrifty habits of the old Scotchman after all, at least in the case of soap. A little soap and lots of water makes a weak solution, is better than a strong soap solution for washing away dirt.

In the American Chemical society's Fourteenth Annual Colloid Symposium held at the University of Minnesota here scientists were at last able to explain why.

Studies of Prof. Ernst A. Hauser, H. E. Edgerton and W. B. Tucker of Massachusetts Institute of Technology with a high speed camera showed that the basis of the better cleaning was the formation of drops of a liquid and the accompanying phenomenon of surface tension. Ingenious silhouette pictures of falling drops were shown by the MIT scientists which reveal knowledge having applications in dyeing, tanning and other practical matters beside the washing behavior of soap in solution.

Here's How to Find Out if Dentifrice Hurts Your Teeth

Uncle Sam Tests 25 Brands in Placing Order

Atlantic City.—With a nickel and a piece of glass you can make a simple test that will tell you whether your favorite toothpaste will scratch the enamel of your teeth.

The test is one that the United States government requires for all toothpaste purchased and it was described at the meeting of the American Dental association here by Drs. Wilmer Souder, physicist, and Irl C. Schoonover, chemist, of the national bureau of standards.

Uncle Sam buys large quantities of toothpaste. When an order for some 14,000 dozen tubes was contemplated, a committee was appointed to write specifications for a safe and effective cleanser for the teeth. These specifications, now adopted for use, were reported here.

Must Not Contain Poison!

Safety for the tissues of the mouth and the teeth was the first consideration of these men when they met to decide what must be contained in Uncle Sam's toothpaste. Next came the question of efficiency in removing foreign materials from the teeth. Last in importance was the matter of flavor or perfume.

A toothpaste must not be excessively either alkaline or acid, it was decided. It must not be caustic. It must not contain arsenic or other poisons. It must have a preservative that will insure that it keeps in good condition until used.

Twenty-five popular brands of toothpaste were tested against the specifications as adopted for use in government purchasing. More than half failed to meet the requirements, Drs. Souder and Schoonover said. Hardening, separation of ingredients, and fermentation or spoiling were the most common faults. Some showed signs of chemical attack upon the tube container, and that was considered undesirable.

How to Make Test.

Ten toothpastes among those tested failed on the test for scratching. This test, as developed at the national bureau of standards, can be used by anyone who wants to be sure his dentifrice is not scratching the enamel of his teeth. A piece of glass and a piece of alloy metal of the size and hardness of a five-cent piece are all that are needed for the experiment. First test the glass for hardness by rubbing the edge of the metal piece over it to be sure that the metal alone does not scratch the glass. Human enamel and glass both vary in hardness. The grade of soda-lime glass used in a non-corrosive microscope slide was found to be harder than any of the enamel tested.

Place some of the toothpaste to be tested on the glass and rub again with the coin. If scratches result, then you may expect scratches on your teeth.

Ventilating Experts Seek Way to Ban Odors From Rooms

Swampscott, Mass. — Engineers may discuss ventilating and air conditioning and use their layman-baffling "cfm's" to describe the flow of air, but what most people want to know is what to do about odors when they think of ventilating.

In the meeting of the American Society of Heating and Ventilating Engineers here, two scientists from Harvard's school of public health disclosed their studies about odor removal from rooms and auditoriums.

Prof. C. P. Yaglou and W. N. Witheridge showed that there is a characteristic human smell which can be detected in a room after the occupants have left it. This human odor is apparently highly complex, unstable and rapidly breaks down, but there is a certain minimum amount of the odor left in a room which will last for days until it is thoroughly ventilated. The findings show that where numbers of people gather large rooms should be used, for great size acts as a sort of reservoir of odor which allows the initial decrease in intensity of odor to occur harmlessly.

High Heels for Glamor? Cleo, Helen Wore Sandals

Kansas City, Mo.—Outstanding glamor ladies of history, Cleopatra and Helen of Troy, wore sandals, not high heels.

This thought on shoe psychology was presented here to the American Home Economics association by Miss Ruth Kerr of the Calf-Tanners' association.

Declaring that it is a task for the engineer and the physicist, to adapt the facts known about foot balance to shoe design, Miss Kerr said:

"No positive findings have yet been made to establish exactly what happens to the static shoe when it is united with the dynamic foot in action."

Bit of String and But One Square

Luxurious lace of undreamed beauty is this for tea or dinner table! A crochet hook, some string and the clearly stated directions of this easy-to-memorize pattern are all you need to get started. Though the finished piece gives the effect of two squares, it ta

but one 5¾ inch "key" square repeated, to give this rich effect. Here's loveliness with durability for years to come whether your choice is a cloth, spread, scarf, buffet set or other accessory. In pattern 5845 you will find complete instructions for making the square shown; an illustration of it and all stitches used; material requirements.

Send 15 cents in stamps or coin (coins preferred) for this pattern to The Sewing Circle Household Arts Dept., 259 W. Fourteenth St., New York, N. Y.

Please write your name, address and pattern number plainly.

Favorite Recipe of the Week

PREPARE apple sauce by your favorite method and then try this delicious summer recipe.

Frozen Apple Pudding.

2 cups unsweetened apple sauce
4 tablespoons sugar
⅓ cup orange marmalade.
½ cup cream, whipped

Combine apple sauce, sugar and marmalade. If apple sauce has already been sweetened, omit sugar. Fold in whipped cream. Turn into freezing tray of automatic refrigerator and freeze without stirring until firm (about 2 hours), using low cold control for freezing.

Yield: 1½ pints or 6 servings.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By REV HAROLD L. LUNDQUIST.
Dean of the Moody Bible Institute of Chicago
© Western Newspaper Union.

Lesson for September 12

A NATION NEEDS RELIGIOUS HOMES.

LESSON TEXT — Deuteronomy 6:4, 5; 11 18-25

GOLDEN TEXT—Train up a child in the way he should go: and when he is old, he will not depart from it. Prov. 22 6.

PRIMARY TOPIC—At Our House.

JUNIOR TOPIC—At Our House.

INTERMEDIATE AND SENIOR TOPIC—What Makes a Home Christian?

YOUNG PEOPLE AND ADULT TOPIC—The Influence of Christian Homes in a Nation's Life.

Home! The very word stirs our hearts and quickens the most precious of memories. Toward its comforting threshold turns the one who has borne the heat and the labor of the day. Within its portals are those who gladly give themselves in sacrificial service that it may indeed be a haven of rest and comfort.

The inroads of modern life and of our so-called civilization are doing much to break down home life. All too frequently home has become the place to which one goes when there is nowhere else to go; a place to sleep, and sometimes to eat; an address for mail; a telephone number.

Shall we then abandon the effort really to maintain a true home—one that is in touch with God, and therefore ready to serve man? No; for now as never before we need the influence of a home life empowered by the worship of the true God and guided by his Word. None of us, who are engaged in the determined effort to maintain such a home in the midst of the driving intensity of present day living, speaks too easily on this subject. We know the difficulties; we have heavy-heartedly tasted failure; but we also know the sweetness of victory. By God's grace we press on.

In his dealings with Israel God presents to us an example of what a godly home may be, and what it will accomplish for the community and for the nation. Such a home—

I. Worships the True God (vv. 4, 5).

This is "the first and great commandment" of the law, according to our Lord Jesus. (Matt. 22:36,37.) It is an important part of the Scripture repeated twice daily by all orthodox Jews. In its context, in Deuteronomy 6, it is clearly associated with the home. It is there that he who is the "one Lord" is to be loved, which means far more than that he is vaguely recognized or distantly respected.

II. Honors God's Word (vv. 18, 19).

Loving God and his Word is not a matter for theological speculation or for sanctimonious discussion in some dark cloister. Thank God the Christian faith is at its best in the ordinary affairs of life. It finds its proper place in the tender relationship of parent and child. Its teachings are pure, delightful, simple, and entirely appropriate to any occasion, whether one sits or rises, walks, or lies down. God's words are the words to be laid up in the heart and in the soul, to be taught to our children, to be the constant and normal subject of conversation.

III. Testifies to the Community (vv. 20, 21).

We may not, as did the pious Jew, fasten a little container bearing God's word on our doorpost, but we may make the home itself and the life of its inhabitants an effective testimony for God before our neighbors. It is obvious that the home either speaks for or against God. A profession of faith in him, an outward reputation for adherence to religious principles which does not vitally touch our dealings with one another and with the community in which we live—these clearly testify not for God but against him.

IV. Serves the Nation (vv. 22-25).

God promised that if Israel diligently kept his commandments, loved him and walked in his ways, they would be a nation that would overcome and dispossess their enemies, and prosper in every good purpose.

Statesmen clearly see that the home is the unit of society. It was established upon the earth before the nation, in fact, before the church. No nation can ever really prosper without homes of the highest type.

But a house without God is not really a home, even though it stand in the midst of a garden. Neither the school teacher, nor the pastor of a church can take the place of a God-fearing father, and of a mother who not only knows God but who can tenderly lead the steps of trusting childhood in the paths of righteousness. Our lesson title is right: "A Nation Needs Religious Homes," or, better, "America Needs Christian Homes."

Faith that Overcometh

There is no more enviable condition than that of him who has made the pressure of adverse things the means of a deep faith.

A Divine Mission

Know that life is a divine mission, for which you have received and shall receive divine power.

A Mother's Love

No language can express the power and beauty and heroism and majesty of a mother's love.

They're Cinches to Sew

YES, the sewing bug will get you, if you don't watch out, young lady! And when it does there will be a hum in your life (and we don't mean head noises). Right now is the time to begin; right here is the place to get your inspiration. So all together, girls: it's sew, sew, sew-your-own!

Inspiration Number 1.

The vivacious model at the left is the number 1 piece for your new autumn advance. It calls for taffeta, embellished, as you might expect, with grosgrain. You may use vivid colors too, Milady, for Fashion has gone color mad this fall. Reds of every hue, bright blues, lavender, warm browns, all are being featured in smart avenue shops along the Rue de la Paix.

Morning Frock.

For most of us, each day demands that a little work be done Sew-Your-Own appreciates this and the need for frocks that are practical, pretty, and easy to keep that way, hence the new utility frock in the center. Five pieces are its sum and total; seven mornings a week its cycle. Any tubwell fabric will do nicely as the material — try one version in printed rayon.

Tailored Charm.

The waistcoat used to be a gentleman's identification, but, alas, like many another smart idea, womankind has copped it. Here you see an attractive example of this modern contraband. Not only does it have suavity, but it is entirely feminine, as well. The exquisite waist line, sweet little collar, and puff sleeves, make this a number you can't afford to pass up.

The Patterns.

Pattern 1363 is designed for sizes 12 to 20 (30 to 40 bust). Size 14 requires 3⅞ yards of 39-inch material, plus 18 yards of ribbon for trimming, as pictured.

Pattern 1354 is designed for sizes 34 to 46. Size 36 requires 4⅝ yards of 35-inch material.

Pattern 1252 is designed for sizes 12 to 20 (30 to 38 bust). Size 14 requires 3⅞ yards of 39-inch material.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

© Bell Syndicate.—WNU Service.

A Drop of Rain

WHAT if a drop of rain should plead—
"So small a drop as I
Can ne'er refresh the thirsty mead;
I'll tarry in the sky."

What if the shining beam of noon
Should in its fountain stay;
Because its feeble light alone
Cannot create a day?

Does not each rain-drop help to form
The cool refreshing shower?
And every ray of light, to warm
And beautify the flower?

HOW LONG CAN A THREE-QUARTER WIFE HOLD HER HUSBAND?

YOU have to work at marriage to make a success of it. Men may be selfish, unsympathetic, but that's the way they're made and you might as well realize it.

When your backaches and your nerves scream, don't take it out on your husband. He can't possibly know how you feel.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

Lasting Victories

GARNER THEATRE TO INSTALL NEW SOUND SYSTEM THIS MONTH

Avery Manager Announces New Suprise; Will Install "Magic Voice" System

(Garner Leader)

Details of a surprise which ha been promised the last few week by Charles Marks, manager of th Avery Theatre in Garner, ha been made public

Arrangements for the instal tion of a remarkable new motio picture sound reproducing sy tem have been completed Mr Marks said, and the new machin ery will be installed shortly at the middle of this month The chosen is the famous RCA Vi system which has been name the "magic voice of the scree

Rpresenting a radical improve ment over earlier movie sou apparatus and inorporating number of recent technical im provements of far-reaching im portance, the new magic voic sound system gives most realis sound reprodution, Mr Marks said

This system is used in the fam ed theatre at Radio City N Y and in many of the country' fo est theatres

"When the new equipment is installed Avery patrons will be quick to notice the great improve ment," Mr Marks promised "There is a perceptible lift to th sound Instruments in the orch tra take on new life and delive tion Spoken words lose their m tallic quality and take on intimate human timbre"

Patrons of the Avery Thea tre have enjoyed the best sound that was available when the thea tre was built, the manager said and with the installation of the new system will again be rated to the latest and most successful system

One thing about a college education, it teaches a fellow to be thrifty by going without hat and garters

"We the People" And Our Constitution

By RAYMOND PECARIN

Sent in Iowa to Republic

"WE THE PEOPLE of the United States, in order to form a more perfect union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America"

That, as everyone knows, is the Preamble of our Constitution whose 150th anniversary America now celebrates

To a world accustomed to rule by kings or favored classes the American Constitution has seemed both startling and impractical when signed at Philadelphia's historic Independence Hall, on September 17, 1787

But today we know its worth. History, and the unprecedented development of the United States in area, in prestige, and in the progress of all its people, has demonstrated how effective a form of government was established on that first foundation.

Today it stands an object of reverence by all Americans, a model of freedom to the oppressed of all nations.

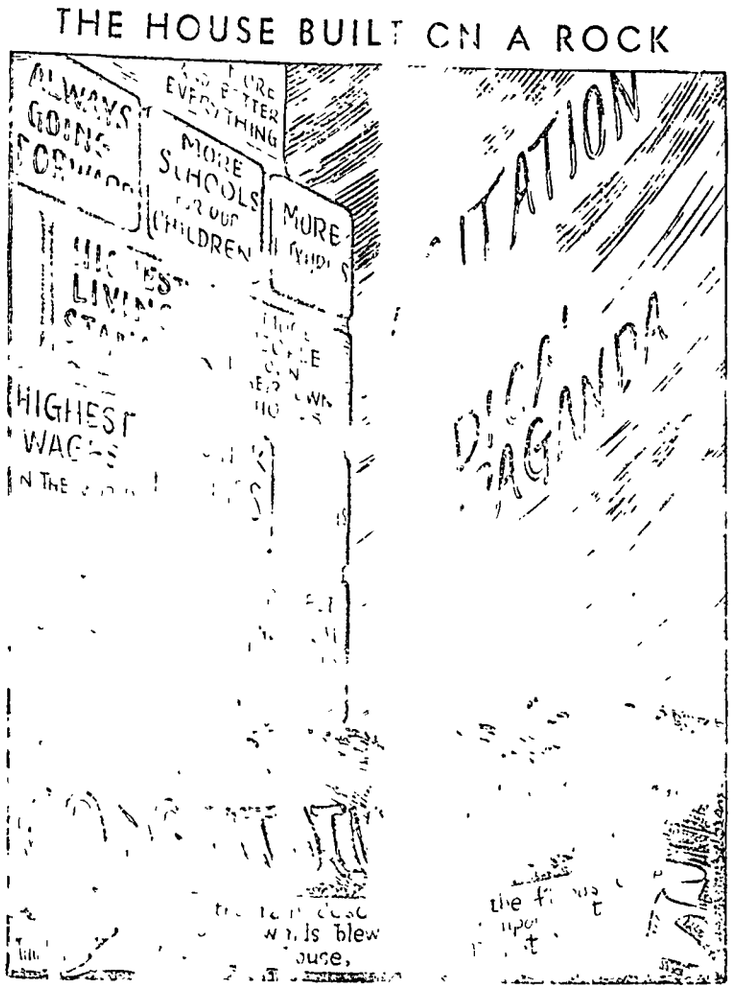
At this time of nation-wide celebration, America's thoughts turn to the Constitution and to the men who cut of their experience and their aspirations for a free and happy nation wrote that famous Charter of Liberty

But such tribute, however sincere, is not enough. **The strength and power of the Constitution depend on the support of every successive generation to which it guarantees liberty and opportunity.**

Only by that support have we remained in the past and can we remain in the future, a government of the people, by the people and for the people.

Only by that support can We the People continue to rule

That is the message and the spirit of the Constitution Day Celebration.



Hence And Help Put Out Fires; Buy A Ticket For Good Cause

KLEMME'S ANNUAL FALL FESTIVAL CELEBRATION PASSES INTO HISTORY

Annual Celebration This Year Was Bigger And Better Than Year Ago

Klemme's Annual Fall Festival is now history Jay Gould and his Million Dollar Shows, and Thomas' rides and concessions have moved on into Minnesota

It was really a "big-time" show in every way and was even better than that presented last year. The afternoon circus program was especially pleasing to the children, and the gorgeous night show presented on the big stage was of the very best type and was high class in every way

Iowa's Own Elephant Here

One of the outstanding attractions this year was the appearance, both afternoon and evening, of Iowa's own elephant, "Baby Mine" which was purchased a few years ago by Iowa boys and girls who sent their pennies and nickels to Des Moines to buy the elephant "Baby Mine" put on quite a show

The two day celebration drew an immense crowd to town and nearly everyone agreed that it certainly was North Iowa's Biggest Free Show.

Large Crowd Both Days

There was a large crowd for each of the afternoon and evening performances each day Mr Gould estimated the crowd Monday night at four thousand people. As a whole, the crowd was quite orderly

Kanawha Man Gets $50

The dance went over bigger than a year ago and a capacity crowd was on the floor both nights of the celebration Tuesday night the free ten day all expense trip or $50 in cash was given away and went to Mr Louis Steffen, of Kanawha We understand Mr Steffen chose the cash award instead of the trip

Was Clean Celebration

An outstanding feature of the Fall Festival was the array of clean, wholesome shows, acts and midway attractions This was a feature that seemed to be appreciated by he majority of the people attending the celebration

Left For California To Join Husband

Mrs Walter Drake, nee Gladys Bridges, left last Wednesday evening for San Diego, California, where she will join her husband who is stationed at the U. S. Naval base, there

Motorist Must Obey Signs Placed At Local Schoo

AGRONOMIST DISCUSSES SEED CORN HARVESTING

Warns Farmers Not To Pick Ears From Plants Which Are Dead; Hanging Ears Undesirable

Considering the old, old "science" by which three-quarters of the seed to plant Iowa's corn acreage in 1938 will be selected. J B Wentz, Iowa State College Agronomist, this week indicated two comparatively new, but important, factors essential to careful field selection of corn

"Don't pick ears from plants which are dead," he warned "While early maturity is to be desired, maturity should be based on yet green plants If a farmer picks ears from a dead appearing plant the chances are he is picking corn from a diseased plant"

Pick Strong-Shanked Ears

Farmers formerly picked only those ears which hung down, and many continue to do so, Wentz continued But now experimental results show that ears usually do not hang down because of excessive weight, but beause they have weak or diseased shanks A desirable seed ear is one perpendicular to the stalk or hanging slightly

Corn which is to be picked with a corn picker may have heavier than average shanks, as the strong shanks facilitate picking and prevent excessive field losses

Buy Certified Seed

It is estimated that at least 25 per cent of Iowa's corn acreage next year will be planted to hybrid corn, but, cautions Wentz there is no magic in the word hybrid and farmers should buy only certified hybrid seed.

Since a killing frost is injurious and practically fatal to seed corn it is esential that seed be selected within the next two or three weeks The average date of the first killing frost is approximately October 3rd

Ear Height Important

In picking seed, Wentz urges farmers to observe all parts of the plant from which they harvest seed ears Stalks should be strong, standing up well and showing no indication of disease It is also well to observe the ear is from the ground, and choose ears from one desirable height.

After corn is picked, it still must be protected from frost as a hard freezing before it is dried out is just as harmful as one in the field

Wentz advises putting corn in a well ventilated, cool place where it will dry out as rapidly as possible, but protected from freezing temperatures

TWO SENTENCED ON LIQUOR CHARGES

Garner, Forest City Men Plead Guilty; Taken Before Kepler

GARNER—George Woker, Garner, drew a 90 day jail sentence when he pleaded guilty to illegal possession of alcohol and John Hopkins, Forest City, was given the same sentence for the same charge They were taken before Judge M H Kepler at Forest City Friday. Fines of $300 were not paid and they began to serve their sentences Saturday. Sheriff L. M Brouwer arrested Woker Patrolman Lloyd L. Meyers, Mason City, picked up Hopkins on Highway No 18

THE TIMES IS A BIT LATE THIS WEEK

Celebration days that come the first of the week rather interfere with the publishing of a weekly paper, so the Times is a bit late this week With the rush of extra work, getting out the Times was a slow job this week.

TRAFFIC SIGNS INSTALLED AT SCHOOL APPROACHI

Motorists Must Stop Between Hr of 8:30 a. m. and 4:30 p. m.

(By Supt W. H. Galbreth)

A new combination traffic sig has been installed at every ap- proach to the school ground, an the town and school officials ar asking everyone's cooperation in seeing that these signs are observed From eight-thirty in the morning until four-thirty in the afternoon, the signs will read STOP, and all motorists will be required to come to a complete stop at the approach to the school ground From four-thirty in the afternoon until eight-thirty the following morning, the signs will read SLOW

There is almost a constant danger of an accident here from the time the children start coming to school in the morning until they have all left for home at night There are two different recess periods dmuring both the morning and afternoon, and the primary children are excused at eleven-thirty and three-thirty; so withdrawal of the restriction any time during the day would not be practical

Two school patrol boys from the seventh and eighth grade room will be responsible for the operation of the signs Last week Edwin Tiggeman and Billy Grosshuesch did the work This week Eugene Haberkamp and Elwyn Jacobs are on the job

High School News

The Klemme High School baseball team dropped its first game of the fall season last Thursday when Ventura nosed out the Shamrocks by the close score of 3 to 2 One bad inning in which Ventura sluggers got at Genie Kluckhohn and his mates for all their runs proved to be the downfall of Coach Kingery's nine, but the Klemme boys are confident that they can even the count in a return game

School started at eight o'clock and ended at noon on the days of the celebration All classes met, but the periods were shorter

Mr Kingery gave out a new seating arrangement for the assembly desks Monday morning. The permanent seating arrangement will make possible a fire drill soon

School news from now on will be under the direction of Miss Brakel The freshman class will be largely responsible for the news-gathering in high school.

The Family Pew

The pastor of the Methodist church at the town of Agency revived the old custom of "the family pew" on a recent Sunday. On that day he requested evry family belonging to the church to sit together It was a remarkable success. It is a small church, but 60 families responded to the request and sat together In all there were 180 persons seated,

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington. — Political students and observers in Washington find themselves in a quandary concerning the objectives of the New Deal administration because of a series of late developments. Frankly, most students of politics have to confess their inability to fathom the various developments of recent weeks or to measure their significance.

Has 'Em Guessing

I have written, heretofore, about the wide open split in the Democratic party and about the presidential moves to heal that split but, instead of the new developments being of a kind designed to heal wounds, they appear superficially at least to be doing directly the opposite thing. Confessing my own inability to understand the political strategy, if there be strategy, let me merely call attention to such things as:

The recent radio speech by Senator Guffey, Pennsylvania, Democrat, which thoroughly read out of the party such able men as Senators Wheeler of Montana, Burke of Nebraska and O'Mahoney of Wyoming.

The speech of Postmaster General Farley before the Young Democrats at their Indiana meeting, stating that there will be no reprisals against those Democrats who have seen fit or now see fit to object to parts of President Roosevelt's New Deal program.

The so-called harmony dinner of Democratic senators at a Washington hotel after the election of Senator Barkley of Kentucky as Democratic leader of the senate, and the absence of President Roosevelt from that meeting.

The renewal by President Roosevelt of his criticism of "Economic Royalists" in his speech in celebration of the birth of Virginia Dare, the first white child born in America, at Manteo, N. C.

The speech of Senator Guffey in New York declaring without equivocation that the Committee for Industrial Organization, headed by John L. Lewis, should provide a nucleus for an American Labor party. This party should have among its objectives the political destruction of any one who fails to carry through the New Deal policies or who opposes a program designed to make the court structure of the United States subservient to the President.

There are other phases, other circumstances that might be included in this list, but those enumerated serve to show the confusion that prevails. They present to me a wholly nonunderstandable and unexplainable hauling and filling—breathing hot and cold without a change of face.

* * *

Guffey Causes Stir

There has been nothing of a purely political nature create quite so much of a stir in a long time as did the radio speech of Senator Guffey in which he called for defeat of all those who opposed the President's plan to reorganize the Supreme court of the United States by adding to it six justices of the President's own choosing. It was in this speech that Senator Guffey singled out Senators Wheeler, Burke and O'Mahoney for destruction. He did this because these three senators led the fight against the President's plan to pack the Supreme court. Senator Wheeler and Senator Burke conducted the fight on the floor of the senate; Senator O'Mahoney wrote the devastating report by which the senate judiciary committee advised the senate to kill the court packing bill.

Senator Guffey's speech was made at night. When the senate convened at noon the following day, Senator Wheeler took the floor and delivered one of the most vicious speeches of which he is known to be capable. It was excelled in bitterness only by the attack which came from Senator Burke. Senator O'Mahoney likewise made sure that the senate record revealed the feeling of those who were convinced the President had made a vital mistake in proposing the court reorganization.

* * *

What's the Answer?

I have heard these questions asked many times: What can the President gain by making Senator Guffey or any man of his type a spokesman for the administration? Further, can the President afford politically to strike at the very heart of the Democratic party by permitting even secretly the political destruction of such brilliant men as Wheeler, Burke and O'Mahoney?

The answer to those questions, as far as I can see it, or as far as I have been able to gather opinions on the point, must inevitably lead in the direction of a party purge. By that I mean, the President and his closest New Deal advisers must be seeking to drive out of the Democratic party, the machinery of which he controls, any and all Democrats who are unwilling to be one hundred per cent for the theories of economics and social reform which the New Dealers countenance. If that be true, and I repeat it is only an assumption, then the President evidently is hoping to create a class party, a radical party which can be made to include such outfits as the John L. Lewis following, the communists and half-baked nitwits who are opposed to the principle of individual employment, the accumulation of personal belongings and even the idea of owning homes by individuals, free from debt.

On the other hand I cannot convince myself that Mr. Roosevelt would make a political mistake of this gravity. For it would be a mistake in two ways, namely, a virtual destruction of the Democratic party and the blighting of any hope the President may have for being elected a third time. It is these combinations that make the whole situation so difficult to understand.

It may be that one result will be that Senator Wheeler or Senator Burke may find himself in a political situation where one or the other will be forced to seek the Democratic Presidential nomination in 1940. It is quite apparent now that the split in the party is going to cause a violent explosion in the next Democratic national convention. There is no way to avoid it. It may be added in the same breath that Mr. Roosevelt can go into that convention and force his own renomination because surely the Farley political machine cannot be dislodged unless the factional dispute spreads to the rank and file of Democrats throughout the country. This is to say that, having control of the party machine, Mr. Farley can muster the election of enough delegates to the party's national convention to assure the Roosevelt nomination, especially since Mr. Roosevelt demanded and obtained the repeal of the age-old Democratic rule that required a vote of two-thirds of all the sitting delegates before the convention nominates a candidate.

With further reference to Senator Guffey, Senator Barkley told the senate during the violent Wheeler-Burke-O'Mahoney attack that Senator Guffey had tendered his resignation as chairman of the Democratic senatorial committee a week previously. Senator Barkley's statement, however, was not accepted generally; it did not have the ring to make it convincing, nor did it appear to be anything more than an attempt by Senator Barkley to save Senator Guffey's face.

* * *

May Be Big Issue

It may well be that the rupture in Democratic harmony will turn out to be a great issue as early as the 1938 congressional and senatorial elections. There are a number of senators who opposed the court packing bill and, therefore, fall within the Guffey castigation, who will be up for re-election next year. If the Guffey attack is followed up at all in the state organizations, those Democrats who opposed the President's will necessarily must defend themselves. The only way they can defend their course of action is by a counter attack on the President and those policies of his which the candidate for the senate opposed. I predicate my prediction of continuation of the row in 1938 on the statement made by Senator O'Mahoney in answer to the Guffey radio tirade. In that statement of position, Senator O'Mahoney stated, to quote a single paragraph:

"I would rather walk out of the door of this chamber and never return, than to surrender any honest convictions I have. I say to you, senators of the United States, so long as I am in this body I shall raise my voice and cast my vote as my conscience dictates and nobody, whether he comes from Pennsylvania or from New York or any other state, can tell me or the people of my state what I should or should not do."

Contrast that statement with the following declaration by Senator Guffey in his radio speech:

"I was elected to the United States senate in 1934 because I assured the voters of Pennsylvania that it was my intention to support loyally and without wavering the program of the Chief Executive."

And in calling attention to that statement of subservience, Senator Burke of Nebraska declared:

"Pennsylvania may want that kind of representation in the senate, and, if they do, God bless them, let them have it; but to me it would seem that if the senate is to have that kind of representation, it might as well have a parrot in a cage in the secretary's office and bring it in when the senator's name is called and have him say, 'Yes, Mr. Roosevelt, count me for that, too.' That is not my idea of what a senator should do."

Chinese Youngsters Fraternize With Invaders

Two small Chinese boys seen pleasantly associating with officers at the Japanese headquarters at Fengtai, China, during a lull in the fighting with the Chinese troops in that area of the North.

Budge Wins Another Tennis Crown

William J. Clothier of Philadelphia presents the Casino Challenge cup to Don Budge and the consolation cup to Bobby Riggs, whom the red-headed giant defeated in the final round of the Newport Casino Invitation Tennis tournament at Newport, R. I., 6-4, 6-8, 6-1, 6-2.

EGYPT'S NEXT QUEEN

Sixteen-year-old Mlle. Sasi Naz, beautiful Egyptian girl who will become formally engaged to eighteen-year-old King Farouk I of Egypt in an ancient ceremony at Alhar mosque, it was announced recently. Mlle. Naz is a commoner whose name means "the pure rose."

WOUNDED BY JAPS

Sir Hugh Knatchbull-Hugessen, British ambassador to China, victim of an attack by Japanese aviators while he was riding in a car flying the union jack. The attack caused grave international complications and aroused British public opinion to the fighting pitch. The ambassador was struck by machine gun bullets and wounded in the abdomen, one of the bullets penetrating as far as his spine.

G. O. P. Leaders See Better Days Ahead

Groundwork for the 1938 congressional elections was laid at a meeting of Republican party leaders in Washington recently. Leaders from 15 states met with National Chairman John Hamilton to map strategy and predicted better days ahead for the G. O. P. Photograph shows, left to right, seated, John Tyrrel of Illinois, John Hamilton, chairman, and James F. Thompson of Michigan. Back row: Ed D. Schoor of Ohio, and William S. Murray of New York.

Stop-Watch Checks Precision of French Ballet

Precision leg work of the famous "Fetes Francaise" ballet troupe is timed by Gene Snyder, co-director of the group. The revue, which was one of the hits of the Paris International exposition, arrived in New York recently for an engagement at a leading night club.

Household Questions

Use for Old Shaving Brush—A discarded shaving brush makes a splendid blacklead brush. It penetrates parts which are difficult to reach with an ordinary stove-brush.

* * *

Rhubarb Charlotte—Wash and stew rhubarb but not to a pulp point. Fill dish alternately with rhubarb and sponge cake and cover with lemon jelly. Leave to set and serve with whipped cream.

* * *

Eggs and Mushrooms—Put two ounces of fresh butter into a frying pan; break over it 4 fresh eggs and add 3 spoonfuls of chopped mushrooms, ½ teaspoonful of salt, saltspoonful ground white pepper. Stir the mixture with a wooden spoon over a clear fire until it has a thickish consistency, and serve very hot on buttered toast.

* * *

Laundry Hint—Transfer pattern left after a piece of embroidery is completed may be taken off before the article is sponged through in warm water by sponging gently with a piece of soft wool moistened with methylated spirit.

* * *

When Dressmaking—Keep a bottle of eucalyptus oil handy as it removes grease and machine oil from any fabric.

* * *

Picnic Steaks—Mince finely one pound tender steak, add ½ a teaspoonful finely-chopped onion, 1 tablespoonful breadcrumbs, 1 beaten egg, ½ teaspoonful salt, ¼ teaspoonful pepper. Knead the ingredients well together, form into rounds about 1 inch thick, place on a greased baking tin with dabs of margarine on top and bake in a moderate oven for about 20 minutes. When cold wrap each in a lettuce leaf and pack in carton.

* * *

Improving Cauliflower—Cauliflower is improved by being soaked in water to which a little lemon juice or vinegar has been added.

* * *

For Boiled Ham—When boiling ham add a small teacupful of vinegar and a few cloves to the water. This will improve the flavor. If the ham is allowed to cool in the water in which it was boiled it will be moist and sweet.

WNU Service.

Mother's Loving Heart

WHAT memories we have in faithful hearts,
Who thought "the world was lost," and gave the best;
Who saw the hidden virtues in each child,
Whose love was comfort, peace and perfect rest.
Dear mothers of the world, all of today,
Your path in life may seem a humble part,
But ask each man to cherish life's purest gift,
I know he'll say—"A mother's loving heart."

It takes a strong, deep nature
To feel so nice and sad.

R. T. Cann

...othes Due for a College Course

By CHERIE NICHOLAS

...OR going-away-to-school daughters the hectic days have come ...t are tense with the excitement ...assembling a voguish, and as ...ctical as voguish, wardrobe that ... carry them through with sar...ial honors on campus, in class...m and at college "prom."

...hinking in terms of the college ... who must rank high in swank ... at the same time look to the ...ctical in clothes, we are remind... of the stunning costume suits ... the smart sports outfits and the ...morous evening gowns displayed ...ently at the jubilee fashion pag...nt presented in the open-air la...on theater on the lake front by ... Apparel Style Creators of the ...olesale district of Chicago. A ...l-length cape costume was fea...ed that represents exactly what ...ollege girl should have in the way ... an outfit that will serve faith...ly and dramatically through the ...nths to come.

...See this goodlooking cape cos...me pictured to the left in the ...ustration. The newest thing in ...its or in costume ensemble is the ...g-cape model. Very practical ...e these types since the long cape ...ay be worn all through the ...tumn as a separate wrap with ...cks. The ensemble here shown ... fashioned of handsome black ...olen with deep yoke collar of ...ack Persian on the cape and a ...cket of matching fur on the ...ess. So well thought of are long ...pe types many jacket suits add ...ll-length capes, thus achieving ... interchangeable outfit that will ...ry the dress program according ... the mood of its wearer. The ...stume ensemble that can be ...ven varied personality via acces...ries and interchangeable items is ...ll worth considering when as...mbling a college wardrobe.

If there is one item more than another that proves to be the college girl's delight it is a suede jacket in one of the glorified autumn colorings. Buy it separate or let it be a component part of a suit, for great importance is given to suits that are part suede and part tweed. The costume pictured was entered in the pageant under the title "accent on youth" which goes a long way in describing it. Circularly stitched pockets decorate the rich autumn green suede jacket which tops a skirt of black woolen. The scarf is of matching wool. The cap is a Scotch type with a high feather to give it dash.

Again referring to the great importance attached to suede this season, you can find in the shops most anything you may happen to want in suede—jacket capes, suits all of suede or only partly so. Shoes, hats, bags and belts of suede for suede accessories are ever so smart with either cloth or knitted suits. Any college girl will appreciate the chic a halter front vestee of suede is sure to acquire for her new autumn suit. For evening a hiplength jacket of white suede will prove a treasure in a college wardrobe. All advance fall collections emphasize the fact that suede has undoubtedly come into its own this season.

And here's another hint on fashion trends that leads to style supremacy for the college girl. It pertains to the lavish use of fur on the new fall suits and coats. Full-length plastron or tuxedo fronts of fur will immediately class your coat as being distinctly of this year's vintage. The same applies to suits. See the model centered in the group. It is indicative of the new fur opulence decreed for winter.

...PICES LEND HUES FOR FALL WARDROBE

...For years feminine fashions have ...etermined what women would eat, ...r style has determined the figure ...and the diet. Now at last has ...me a great reversal. Out of the ...pice jars with which our food is ...ade flavorful and fragrant has ...me the range of tans and browns ...ith which the well-dressed woman ...ill make herself alluring in the ...te summer and early fall season. ...or once, therefore, foods will de...rmine what we wear, according ... the edicts of the nation's stylists.

...Spice shades, ranging from the ...ellow-tan of ground ginger to the ...ch brown of whole cloves, are be...g shown in light and medium ...eight fabrics. Cosmetics are be...g tinted to harmonize with these ...ice colors and also, incidentally, ... make the transition from sun...nning to normal skin tones more ...radual and more charming.

Fall Hats Go Low in Back Is Latest Word From Paris

The first fall hats shown by Patou ...ndorse the new down-in-back move...ent, covering the hair and firmly ...nchored without benefit of elastic. ...he long back-to-front line is ob...ained by the forward draping and ...rimming of toques, while larger ...hapes emphasize the profile by ...rims curved sharply up on one ...ide and swooping low on the other.

Multi-Colored Accent

White shantung makes a summer costume with a front yoke of multicolored striped applications. The same bright stripes — reds, greens, blues and yellows — are used on the pockets of the short white shantung jacket.

Belting Ribbon Hats

A little hat of belting ribbon, whether black or colored, will add new life to a costume.

SISTER DRESSES

By CHERIE NICHOLAS

Matching sister dresses are the trend of the hour. Little friends are taking advantage of the matching idea too, and are wearing dresses of same material made alike. The cunning frocks pictured are fashioned of a theme-song print. "In the Shade of the Old Apple Tree" is the song from which this particular allover patterning of rosy-cheeked apples drew inspiration.

STAR DUST

Movie • Radio

★★★By VIRGINIA VALE★★★

ONCE more Rudy Vallee has shown that he is the greatest talent scout in the radio business. Tommy Riggs, the two-voiced personality who has been appearing on his program the last few weeks has made an outstanding success and will soon have a program of his own.

The brash little girl that Mr. Riggs plays with such devastating humor promises to be as popular one of these days as is Charlie McCarthy, the famous ventriloquist's dummy. Incidentally, the people whom Vallee started on the road to radio success ought to get together and put on a gala program as a tribute to him. It would include such headliners as Walter O'Keefe, Bob Burns, Edgar Bergen and Charlie McCarthy, and Tommy Riggs. And what a program that would be!

—★—

Mona Barrie is the latest screen belle to seek a change from Hollywood on the New York stage. While rehearsing for "Virginia," a great musical spectacle that will open the Center Theater in Radio City, she told me about her last—and she thinks best—picture. It is Jimmie Cagney's "Something to Sing About," in which Mona plays her first real comedy role. She plays a foreign actress with a heavy accent and has a glorious time swooping through scenes in the grand manner. She says that Jimmy is just tops to work with, which makes the verdict practically unanimous.

James Cagney

—★—

The greatest picture of the year, perhaps of many years, has received a chorus of critical acclaim such as has never been heard before. It is "The Life of Emile Zola" with Paul Muni. As crusader for the oppressed, as the most eloquent and forceful man of his time, Paul Muni gives an inspired performance. Don't let the praise of this picture drive you away from it with a faint suspicion that it may be educational, but dull. It offers the most exciting and thrilling evening you could spend in a theater.

—★—

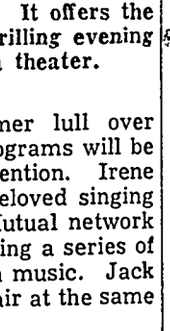
With radio's summer lull over soon dozens of big programs will be angling for your attention. Irene Wicker, the greatly-beloved singing lady, moves to the Mutual network early in October offering a series of original sketches with music. Jack Benny returns to the air at the same time.

—★—

Margaret Tallichet, who abandoned a newspaper job in Texas to break into the movies, has found that even after a career is well started, it still has as many downs as ups. You may recall that she appealed to Carole Lombard for help and through her got a small contract with Selznick-International. Well, Miss Tallichet played small roles in "A Star Is Born" and then the studio decided to gamble on her to the extent of sending her east to dramatic school for further training. She appeared at the Mt. Kisco theater opposite no less a personage than Henry Fonda and proved conclusively that she needs a lot more training before she can play big roles.

—★—

Up in Dennis, Massachusetts, Gertrude Michael appeared on the stage in a play of early Colonial days and made a big hit. A regular parade of automobiles made the long trip from New York to see her, and when she came out on the stage the rafters rung with applause from her Broadway friends. They were saluting her courage in winning a two-year battle with serious illness as well as her fine skill as an actress.



Gertrude Michael

—★—

ODDS AND ENDS—After trying to borrow Kenny Baker, or John Payne, or Jimmy Stewart, or Cary Grant, or Dick Arlen, the producer of Lily Pons' next picture has finally given up the search for a new leading man and given the role to Gene Raymond who played in her last picture . . . Jack Benny's friends are saving all the reviews of "Artists and Models" which rave about his performance to show him when he returns from Europe. All through the making of the picture he quarreled with the director and objected to his lines and felt utterly dismal over what he expected would be the flop of the year . . . Joan Crawford likes to run her pictures at home for her young niece to see. The child howls every time she sees Auntie Joan on the screen . . . John Barrymore is working up a hilarious imitation of Edgar Bergen and Charlie McCarthy to amuse his friends between scenes at the studio.

Curbstone Cafe in the Near East.

Wells and "Hair Houses" of the Bedouins of Trans-Jordan

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

TRANS-JORDAN is a little country. Separated from Palestine by the great valley of the Jordan, the Dead sea, and Wadi el Araba on the west, it is hemmed in by the Levant states, Iraq and Arabia. It is a British protectorate ruled by his highness the Emir Abdullah Ibn Hussein, son of the late King Hussein of Hejaz and brother of the late King Feisal of Iraq.

A little fringe along the Jordan and Dead sea depression is fertile because of perennial streams. Otherwise all is waste. It is a rolling plateau desert, mostly composed of white chalk and sandy soil. Flint chips and lumps of basalt are widely scattered.

There are no rivers. The Bedouin gets his water from ancient rock-cut water cisterns, from pools that collect in the wadi beds in winter, or from deep wells.

After winters of abundant rains and snows, the valleys and wadies may be lush with vegetation and aglow with wild flowers. In summer the whole desert is parched and dry. Scorching hot during the day, it is often bitterly cold at night.

Camel herders and shepherds who pass the night in the open, with only an old coat to sleep in, complain of the temperature changes. So did Jacob when he said, 'In the day the drought consumed me, and the frost by night." (Genesis 31:40).

The Bedouin inhabitants of Trans-Jordan are divided into three classes: the peasant farmers who live in villages and cultivate the soil; the seminomads who live in tents and have flocks and farm lands; and, lastly, the true Bedouin nomads, who live off their flocks and herds and migrate over long distances, even into the depths of Arabia proper.

Wells Are Valuable Possessions.

All three classes look like true Bedouins and speak the same dialects, wear the same style of clothing, eat the same food, and share the same traditions. But the nomad Bedouins look down on the other classes and call them fellahin (farmers). It is this wandering tribe which is told about here.

Most vital in a desert country is the preservation of water sources. Wells are prized possessions. None but the owner tribe may draw water from them. Disputes over the use of wells have led to many a tribal war.

When Abraham's wells were seized by enemies, he had to protect himself with a covenant of possession. "And Abraham reproved Abimelech because of a well of water, which Abimelech's servants had violently taken away" (Genesis 21:25).

Around the wells at watering time scenes are enacted which take one back thousands of years to the life of Bible days. Youths and men lead up their herds of camels. Sometimes hundreds of animals that have gone without water for days will be waiting in line for a drink.

With leather buckets and long ropes, two almost naked men draw water, chanting their weird, monotonous melodies and calling to the camels to drink. Herders keep the animals back, allowing only one or two at a trough at a time.

In the deserts where camels are the chief wealth, girls tend the goats. Shepherdesses often have a hard time watering their flocks. Camels are always favored. And when the camel herders come in from their waterless five-day grazing periods, the girls and their flocks get particularly inconsiderate treatment.

Digging of a New Well.

Not long ago a traveler observed an unusual event—the digging of a new well. He greeted the patriarch who was supervising the work with "Gowak" (the Bedouin salutation befitting such an occasion), which means "Strength may Allah give thee."

"Gweet," was the prompt reply, meaning, "Strong have I become."

Two stout youths were digging in the well bottom, which was not yet very deep. They kept filling a basket with the dirt they excavated. A camel, hitched to a rope and pulley and driven by a frail, over-grown boy, pulled the basket out of the wellhole. Each time a load of dirt reached the top, the old man seized it, swung it to the surface, and dumped it, while the camel walked back for another haul.

Work ceased while the traveler stopped to chat. Bedouins never hurry. With pride the old man surveyed his three sons and the new wellhole. They "digged the well only that man and beast might drink."

The traveler asked whether he would charge for the right of watering to repay him for his labors. His slight form unbent. Lifting his head, he pointed to his sons with a majestic sweep of his hand.

He said, "Allah has requited me mercifully. In addition to these, I have other children and from His bounty we have yearly a sufficiency in our tents, besides flocks and camels. Should I pile up gold like yonder hill? What would it satisfy? Better we leave behind something whereby our fellows are benefited."

Bedouin's House of Hair.

The black goat's-hair tent is the Bedouin's home, but he never speaks of it as a tent. To him, it is the beit sha'ar (house of hair). Most flexible of all abodes, it keeps out sun, sands, and winter winds. During hot days the sides can be lifted or removed at will. Then the tent is little more than a sunshade. In winter the coarse, heavy fabric cuts off icy blasts.

With few exceptions, the goats of these lands are black. From their shearings the Bedouin makes his tents. Thousands of years have brought little change in their construction.

The house of hair is oblong and has a long pitched roof with drooping ends. The smallest tents have nine poles altogether, with a row running lengthwise down the center, and shorter, lighter rows in front and back. Guy ropes extend outward from both sides and from the center of each end.

Detachable goat's-hair curtains form the sides and ends of the tent. They are fastened to the edge of the roof with wooden pins and fixed to the ground with pegs driven through rope loops.

The tent is pitched with its back to prevailing winds and storms. A curtain at the central pole usually divides it into two parts. One end is called the mahram section (belonging to the harem). Here lives the family, and here are stored bedding, rugs, copper cooking pots, and saddlery.

The other end, usually left more open, is called es-shigg and is the guest section where male visitors are received.

Sheik's Tent Often Large.

The average Bedouin tent is 8 or 10 yards long and half as wide. But there is extreme variation in size. Poor herdsmen's tents are frequently much smaller, while those of sheiks and richer tribesmen may be as much as 100 or 120 feet long.

In more elaborate tents, additional tent poles support the center. These tents are referred to by the number of central (or wasit) poles. A 4-, 6-, or 10-wasit house of hair means the same to a Bedouin as a 4-, 6-, or 10-room house to us.

There are sheik's tents that have nine wasits, or ten sections. Three sections at one end are curtained off with sahas for wives and their families.

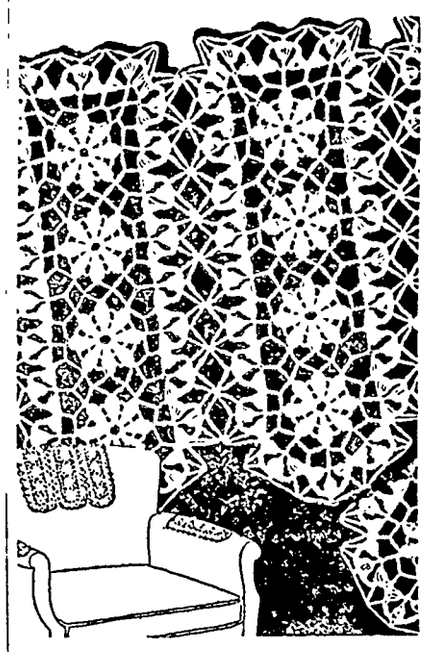
The chief wife has a double section to herself. But her apartment is also the storehouse for rugs, bedding, and food supplies for guests. Half the tent forms the shigg, or guest section.

If a Bedouin keeps no goats, he buys his goat's-hair cloth. But most families can provide their own goat's hair, and the women spin the yarn, weave the cloth, and sew the tent together. Pitching and striking the tents are also women's work.

The only time a new tent is made is when a youth leaves his parents' home and sets up housekeeping by himself, usually with a wife or two to do the work.

Making Chair Set Is Really Pleasure

Something different in crochet—a chair or davenport set crocheted in strips! One strip makes an arm rest, three a chair back, five a davenport back. Once you've made one, just keep repeating—join them together and you're ready to work a transformation on



your furniture! String works up quickly, and is durable. Pattern 1470 contains directions for making a strip 5¼ by 12½ inches; illustrations of it and of all stitches used; photograph of section of strip; material requirements; suggestions for a variety of uses.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Uncle Phil Says:

And Often It Burns

Everyone rakes the embers under his own cake.

Credit human society with one virtue: If you had a famous ancestor, human society will remember it.

It's difficult for a man to collect himself when his wits are scattered.

When you wonder how some people get by, it may be because they do not care whether they do or not.

YOU CAN THROW CARDS IN HIS FACE ONCE TOO OFTEN

WHEN you have those awful cramps; when your nerves are all on edge—don't take it out on the man you love.

Your husband can't possibly know how you feel for the simple reason that he is a man.

A three-quarter wife may be no wife at all if she nags her husband seven days out of every month.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife; take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder may be burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. *Doan's* have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

EDUCATION NEVER ENDS

One of the wisest remarks we have read in a long time was made by a New York judge the other day "Only a clod speaks of his education in the past tense" In ruling that a trust fund established to "complete" the education of a boy should be continuous throughout the beneficiary's life. Surrogate Delehanty pointed out that education is an unending lifelong process of development

Education does not consist in filling a child's mind with knowledge The disipline of formal study is merely laying the foundation of an education The intelligent student brings away from school little more, at best, than an understanding of how knowledge may be acquired and from what sources If he has been forunate in his teachers, he will also have some comprehension of the relation of each kind of knowledge to all others.

So equipped, one's education may be said to begin after he has finished school or college and tries to apply the knowledge and methods he has been taught, to the practical affairs of life and the art of living He finds in his contact with his fellowmen new problems every day that were never mentioned in his text books How well educated he finally becomes depends upon how well he succeeds in learning from his day-by-day experiences.

WHEN 111,000 AMERICANS DIED

A generation has passed since the sinking of the Titanic, yet that great disaster is still well remembered Fifteen hundred persons died

The Johnstown flood will never be forgotten—the world was aghast when the death total of 2,209 was tabulated

The World War was the most sanguinary conflict in history In it 50,000 Americans lost their lives and they are still mourned

The recent Texas school explosion, which killed 294 children, brought universal sympathy and horror

Yet last year 111,000 Americans met accidental death—more than twice as many as were killed in the great war—and it caused hardly a ripple in the flow of news We read of some of those accidents in our paper—"John Jones, aged 45, died in emergency hospital after being struck by an automobile" turned the page, and forgot them This astounding callousness—this attitude of "Accidents always happen to the other fellow, not to me or mine"—is death's greatest ally.

Among men, heart disease is the only thing which kills more men than accidents Such plagues as cancer, tubmerulosis, pneumonia plagues which are being fought by all the resources of science—are down the list. Recklessly driven automobile,s burns, falls, drownings, and so on—these are the great killers.

Practically every accident is preventable—and this is especially true of the motor car, greatest of all the great killers. Care, competence, courtesy—these make up the accident prevention triumvirate. It's up to you—to all of us.—Industrial News Review.

Scientists are still puzzling over the fact that in a box of berries, a basket or barrel of apples, or a sack of potatoes, the heaviest specimens always rise to the top, in direct contradiction of a well-known law of nature

It is said that the sale of electric fans hit an all time high this year, surpassing previous best records by 5 to 10 per cent.

NOTICE OF APPLICATION FOR TAX DEED

TO: Chas L. Wilkins, the person to whom the land hereinafter described is taxed.

You are hereby notified that on the 7th day of December. A. D. 1936 at the regular tax sale begun and publicly held on the first Monday of December, A D. 1936, the following described real estate situated in the Town of Goodell, Hancock County, Iowa, to-wit

Lot 30. Block 1 in Cline's Add to the Town of Goodell, Hancock County, Iowa was sold at tax sale under the provisions of Section 7255 of the 1935 Code of Iowa to Hancock County, Iowa by the Treasurer of Hancock County Iowa and the tax certificate No. 1784 was duly signed to Lula Wilkins, who is now the lawful holder of said certificate of purchase; that the right of redemption will expire and a Treasurer's Deed for said above described real estate be made unless redemption from such sale be made within 90 days from the completed service of this notice.

Dated this 7th day of September, A D 1937

Lula Wilkins.
Owner of said certificate of purchase of tax sale.

1,679 HOMESTEADS IN HANCOCK VALUED AT OVER $2,000,000

Tax Exemption Will Be Distributed Later, But Taxes Are Now Due

There are 1,679 homesteads in Hancock County on which refunds have been asked, it was announced by Co Treas Roy L. McMillin, who said that these homesteads are valued for the refund at $2,670,570.

"If the state board of assessment and review remit as planned the 25 mills on this number of homesteads will amount to $66-764 25," Mr. McMillin said.

He explained that his office will then remit to each homestead owner a check for his share of this amount.

The tax is due now, but the refunds will not be available until a check is received from the state department Mr. McMillin said that residents of Hancock County should pay their taxes now to avoid any penalty that may be added after October 1st regardless of the refund.

Tax collections for the month included $16,645.09 in current tax; and $588.63 in delinquent tax

Seed Corn Production

Gathering seed corn used to be just a matter of going through the field, by the farmer, and selecting the best looking ears and picking them before frost, but now it has become a business of itself and gives employment to many men. In Marshall county 700 acres of hybrid corn was produced this year for seed and when the time came for detasseling 200 men were employed at the work. One farmer in that county raised corn for seed on a 400-acre tract and during the busiest part of the season had 75 men in his fields.

Tenancy increased in every type of farming area of the state from 1925 to 1934.

TOTAL IOWA FARM INCOME SAME AS OF 1936 PERIOD

Situation In Iowa Is Typical Of States Suffering Drouth; Increase Expected

Iowa's farm income during the first 6 months of the year has been practically the same as for the same period in 1936, according to Iowa State College extension agricultural economists Total cash sales and government payments into the state for the state for the 1937 periods was $251,000,000, the same as for 1936.

"The situation in Iowa was typical of the other drouth suffering west north central states," the economists asserted "They all suffered declines in cash farm income while all other regions of the United States were obtaining larger returns for their more nearly normal yields of 1936."

Some Increase Expected

Some increase in receipts from the sale of farm products is expected throughout all of the major farming areas during the last half of the year, the economists report

Farm income during the first 3 months of the year showed an increase in Iowa, but it was all wiped out by decreases during the next three months. The June cash income from marketings was 12 per cent lower than for the same month in 1936 Government payments were slightly larger.

Receipts from farm products and government payments for the entire United States during the first half of the year was more than $500,000,000 larger than in 1936.

Current Market Prospects

Here are the economists' view of current market prospects·

Cattle—well-finished kinds are likely to remain at present levels during late summer and fall "Warmed up" kinds are likely to suffer during the next few months. However, the seasonal decline in lower grades of cattle may be much less than usual and may not occur at all

Hogs—Storage demand from October through December will be weak Consequently, it seems probable that the decline in hog prices during the fall and early winter will be about normal, despite the light receipts

Lambs—Little fluctuation anticipated between now and Dec. 1.

Poultry and Eggs—Prospects will be more favorable in the late fall and winter when the effects of this spring's light hatch become more evident. The seasonal decline in poultry is expected to be less than usual An advance is possible.

Dairy—Butterfat prices have started their normal seasonal rise and should hit their peak in midwinter.

SPREADING OF MANURE PREVENTS STORAGE LOSSES

Because manure may lose 20 to 40 per cent in organic matter during storage, it is important that it be spread as rapidly as produced. Under ordinary conditions losses through animal digestion and handling and storage waste are such that no more than 25 per cent of the organic, 30 percent of the nitrogen, 50 per cent of the phosphorus and 30 per cent of the potassium of the original crop will reach the land, explains F B Smith, of the Soils Department, Iowa State College.

Decomposition and leaching account for losses in the barn and feedlot, while tight floors and plenty of litter prevent losses of liquid manure, direct hauling saves labor and allows the soluble portion of the manure to be carried directly into the soil. One-half of the nitrogen and three-fifths of the potassium of ordinary farm manure are in a soluble condition.

When it is necessary to store manure and the amount produced is large it may be profitable to construct a rectangular concrete manure pit with a shed roof Such a pit will prevent leaching and if the manure is kept carefully spread and well moistured, decomposition will proceed with a minimum loss of nitrogen.

Manure storage is also possible in covered barnyard sheds or sheds where cattle may keep it packed and moistened. If manure must be stored outside, fully exposed to the weather, Smith advises locating the pile on a level area where it will receive no extra water.

Plowing of the manure covered soil soon after application insures a saving in the readily soluble nitrogen compounds Limited supplies of manure usually are more effective thinly spread to cover a greater acreage than if applied at the usual rate to a small area, Smith declares.

STRAWBERRY PLANTS THICK IN ROW HAMPER OPTIMUM GROWTH

"Next to getting a stand of strawberries of the right variety, the most important consideration in berry culture is to make sure that the plants aren't too thick in the row," explains C. V. Holsinger, Iowa State College extension horticulturist.

Emphasizing that around Sept. 1 is the ideal time for thinning strawberry beds, Holsinger described a desirable bed as one having wide, matted rows but having the plants spaced 6-8 inches apart in every direction. This condition results in maximum yields and quality fruit.

While most people neglect to do it, the best method of getting proper spacing is to place the runners by hand. To thin beds, Holsinger says, take a garden rake and rake across the rows. This will pull out all the runners just forming and will leave the permanent plants to continue growth and make larger plants until freezing weather.

STOP feeding the rabbits, rats and crows
STOP sore thumbs, cracked hands, lame backs
with an OLIVER CORN MASTER

Every day that your ripe corn stands in the field means loss—loss to rabbits, rats, blackbirds and crows—loss to wind, rain, snow and weather. Get an Oliver Corn Master. Harvest 12 to 20 acres of corn per day. Save your corn, big ears and small ears, and the nubbins that the hand husker often passes up, picked and husked, cleaner than hand husking.

One man on the tractor handles the entire rig—tractor, Corn Master and wagon—without stopping. The roller bearing Corn Master rolls along, on its air-tired wheels, and you have a load of corn, picked and husked, almost as soon as you'd think about it. Get an Oliver Corn Master, and on those cold, raw mornings when a lame back, sore thumbs, cracked hands and aching arms would make it "hard to get going" for another back-breaking day of hand husking, you will appreciate the way your Corn Master saves your health, your time and your valuable crop.

Come in now and see us about your Corn Master.

LIME MAY BE APPPLIED TO SOIL UNTIL NOV. 1

By aplying lime on acid soils before Nov 1, Iowa farmers cooperating with the 1937 agricultural plan conservation program can still earn their maximum soil building allowances, says W. F. Watkins, extension soil conservationist at Iowa State College

Watkins, who strongly urges the application of lime to remedy "sourness" of land, asserts that "over a period of ten years, a single application of lime on acid soil will pay for itself nearly three times over"

"With the government now offering to pay what amounts to at least half of the purchase price of the lime (up to the maximum soil building allowance) the farmer stands to earn 5 to 6 times his net original investment."

Watkins points out that the government payment is $1.25 per ton; cost is less than $2 50 per ton. An application of 3 tons per acre at $2.50 would cost $7.50, but the government payment would cut it to $3 75

"Data compiled by the Iowa Agricultural Experiment Station shows that on an average application of lime increases the yearly crop income $2.23 per acre for corn, $1 39 for oats and $2.26 for hay in a 4-year rotation. For the complete rotation 4 years of corn, corn, oats, and clover, this increase totals $8.21 per acre; for the adjusted 10-year period, $20.-54 per acre."

These crop values are figured on the basis of 1926-35 Dec. 1 average farm price which includes the low prices during the depression.

WORLD'S HAPPIEST CHILDREN

Halliburton Tells of Russia's Schools Where Students So Love Their Work That It's Almost Impossible for Directors to Drive Them From It

By RICHARD HALLIBURTON
Author of "The Royal Road to Romance," etc.

WRITING home about Russia is one of the most difficult assignments I've ever had To write forcefully and well about this infuriating but astounding country, one should have definite convictions and opinions. But, in keeping with the experience of most other foreigners, my convictions suffer such violent and such frequent changes that I hardly know myself from day to day what my convictions are.

Each morning I swear anew that the rule of the Soviets is the cruelest, most brutal, and most colossal racket ever rammed at pistol point down the throats of a helpless nation. But before night I will have seen some isolated feature of Bolshevism that is so enlightened, so advanced, and so inspiring, that for the moment I forgive and forget the tyranny that has produced it.

The Soviet system of persecuting and imprisoning the mother, sister, children of any Russian citizen who tries to escape from this gangland's grip, seems to me as inhuman and barbaric a custom as ever existed in the most savage ages of history.

But just when I am exploding with indignation because of it, I visit one of the model prisons—and immediately feel that it is we Americans, with our dismal and degrading prison system, who are the savages.

Schools Appease Wrath.

The ruthlessness and mercilessness with which the Bolsheviks go about exterminating all classes of Russian society except the third-class — themselves — outrages my sense of justice, and sends me off on the warpath in defense of human liberties.

But again, my hostility against this crucifixion of the civilized minority cools when I enter one of the special Soviet schools, and see the protection and sympathy and spiritual stimulation being poured out to young people who before the revolution would have been — in some cases actually were — beggars, thieves, or illiterate and bestial peasants.

I've just come from two days spent in such schools and prisons. Let me tell about them quickly before I hear the crack of the racketeers' whip lashing out again from the Kremlin's towers, and before I put my fist through every complimentary word I've written about the Bolsheviks.

Here in Moscow is a school that is unique in the world—a state school for boys and girls who want to run away and join the circus!

Want to Join the Circus?

The circus school is advertised far and wide—from Vladivostok to Samarkand. The advertisement reads: Soviet Boys! Soviet Girls! Do you want to join the circus as an artist? Are you over fourteen and under eighteen? Come to us and learn clowning, juggling, tightrope walking, acrobatics, horsemanship. We send you a ticket and pay for everything. The Soviet state needs you!

What boy—or for that matter, what girl—could resist such a truly wonderful, magical, invitation?

Thousands of applications pour in. At present the school directors can choose only a small fraction of those who plead to be admitted, accepting, preferably, the orphans and the homeless.

The freshman class numbers forty — the forty most fortunate children in the whole world, if we are to accept the opinion of the others who must just look on from the outside, and yearn.

All freshmen must take the same courses—acrobatic dancing, tumbling, bare-back and bicycle riding, gymnastics, tight-rope walking, flying trapeze. They also have three hours each day of academic study.

Soviet State Circus School.

The classes of freshmen, gawkish and clumsy, are followed by the second year students (numbering thirty - five) who, now having a chance to specialize, are already excellent performers. When the seniors appear (reduced to twenty-five) one sees marvels of muscle and agility with barrel chests and bulging legs.

But no matter what the class, everybody goes through his tricks with the utmost joyousness and enthusiasm. The acrobats have to be pulled out of the ring to make way for the next performers. They retreat into the street and carry on with their hand-springs there. The clowns, having gone through their daily half hour of routine clowning, continue to fall down and paddle each other all over the school. The bare-back riders, both boys and girls, drive the poor old practice horse almost to death, pleading to

Lessons in toe dancing begin at six. At ten the muscles in their fee and legs are like iron. The regime is so strict and so severe that of every ten who enter the school only two graduate.

be allowed just one more time around the ring, just one more dive through the paper hoops. The jugglers hide behind the scenery to steal another period of rehearsal. The whole school has to be driven home to the dormitories at night by means of angry threats of punishment from the director.

The day I visited the school the young aerial acrobats, flying and swinging high over the head of the instructor, positively refused to come down, and only shouted defiance back at him as they continued to sail through the air with the greatest of ease. The instructor finally had to turn the lights off in order to get his over-zealous flying trapezers home to supper.

In no other school on earth, I'm sure, are the students so profoundly in love with their "studies" as in this school. Here, for once, a sport-loving child gets all the sport his heart desires, accompanied by spangled costumes, and colored lights, and music, and white horses, and applause—all the glory of the circus.

In Russia the Soviets may be exiling thousands, tears may be flowing in oceans, and no man may be able to call his soul his own, but right in the midst of it are the one hundred happiest boys and girls on earth.

Ballet School in Russia.

Perhaps not quite so happy but certainly as absorbed in their work are the students in the Moscow state ballet school.

Here they begin not at fourteen but at four. Almost as soon as they can walk, physically perfect children are placed beside the exercise bar and trained to stand on their toes. Not only dancing, but expression, gestures and rhythm are taught the boys as well as the girls. The average American boy would die of shame if he were caught taking lessons in looking ethereal and imitating a swan. But in Russia, ballet instruction is a deadly serious business, and one must be hard as nails to keep pace. Dancing is the students' whole world. They eat, sleep, and live to dance. And the results are marvelous. By twelve years old, the children have conquered the most intricate and difficult steps. At the 125th anniversary performance of the Moscow ballet school, with Stalin and all his ministers on hand, a fifteen-year-old boy, inspired by the presence of such divinities and by the crash of the hundred - piece orchestra, leaped and whirled about the stage with such winged toes and such incredible skill that he brought the dance-blase audience to its feet, and completely "stopped the show."

Out of every ten babies who enter the ballet school, perhaps only two finally graduate. No one can tell, when the child is four, what it will look like at fourteen. Often the boys grow up to be six feet, three, and too tall to imitate a swan. Or the girl, because of her ruthless exercising, may develop into such a husky half-back that it would take two dance partners instead of one to stagger with her on their shoulders across the stage. The discharges, therefore, are frequent. But the child meanwhile has had the finest education possible in Russia, and is always provided with a sufficient livelihood elsewhere.

Such institutions as these would help melt anybody's wrath against the Bolsheviks. But it is in their penal system where the Soviets completely win one's sympathy and admiration.

Russia's Penal System.

About twenty miles outside Moscow is the world's perfect prison—perfect in that it turns out self-respecting, skilled, responsible citizens, and not furtive, embittered, broken men as in America. In the first place the word "prison" is not used, nor the word "prisoner." There are no cells, no bars, no guards, not even a wall. But the 3,500 boys and young men who live here have all been thorough-going criminals, and are serving sentences for every known crime from petty thieving to assassination.

The Soviets are implacable environmentalists. They insist that environment alone is to blame if young people take to crime. If the environment is improved, character will likewise improve.

So when offenders come to Bolshevo they are kept busy going to school, learning to be skilled workmen, learning to swim and dance and to govern themselves. Their labor in the institute factories is paid for on the same scale as work done by free men. Half their salary goes toward their clothes and board and keep. They can spend the other half in Moscow if they choose and on anything they like.

Marriage Encouraged.

A self - sufficient commune has grown up about the place. The older boys with good records are allowed to mate or marry with wives from outside. Such mating is in fact encouraged, and each couple is provided with private living quarters. There is a splendid school for the children of these menages. The result of this enlightened policy is that over eight hundred members of this commune are married, and eighteen hundred children laugh and sing around the "prison" grounds.

There is a hospital, excellently equipped. A movie and theater play to packed houses every night. So ideal and so carefree is life at Bolshevo that the director's problem, as at the circus school, is to persuade his men to leave when their sentence is up.

During the monster celebration on November 7th, members of all the state schools and labor unions in Moscow marched by Stalin's reviewing stand on Red square. He saluted them all, proudly, as they passed. But when a regiment of one thousand Bolshevo boys—one thousand ex-criminals—marched before him with their eyes shining, banners waving, and bands playing, Stalin and all his ministers cheered and cheered and cheered and the tears streamed unrestrained down their leather cheeks.

And as these thousand "convicts" passed, I thought of Sing-Sing, and San Quentin, and Blackwell's island —and I almost wept myself—from shame!

High Rail Speeds Facing Big Problem of Safe Stopping

Best of Modern Brakes Are Not Sufficient

New York.—Top speeds on railroads have been raised in the last three years from 80 and 90 miles an hour to 100 and 120 miles an hour. Locomotives capable of keeping sustained speeds at the latter figures are not at hand but present few technical difficulties. Major problem that must be solved if the public is ever to attain this swiftness in actual travel is what to do about stopping such speeding masses of metal.

On applying the most modern brakes yet developed, a train speeding 100 miles an hour would have moved 1,300 feet at the end of ten seconds and would still be traveling 72 miles an hour! It will go another 1,300 feet before coming to a full stop, or about a half mile in all. With conventional brakes, as used widely, the picture is even worse It would take 22 seconds to cut the 100 miles an hour speed to 72 miles an hour, and 4,800 feet in all would be required to achieve a complete stop.

Solution a Necessity.

All of which makes discussions of running trains at such speeds for ordinary passenger and freight traffic a sizable waste of time at present, unless adequate measures are taken to govern the train movements in the faster schedules

Chief responsibility for a gradual increase in average speed lies in the train dispatcher's office, where tighter running schedules must be watched closely and swifter movements ordered so that the crack trains of the line will not run the slower ones into sidings too frequently.

A gradual rise in average speed on schedules is the way the railroads are starting to solve the problem. Already many of the major railroads have their roadbeds so improved that trains are more safe while traveling at 80 miles an hour than they were previously at 60.

'Ghost' Comet Seen Near Mars Claimed to Be Real Thing

London.—When reports were received in April of the discovery of a new comet in the southern skies by W. F. Gale, an Australian astronomer, and great observatories in Europe and America were unable to locate it, the assumption was made that it was a "ghost." It was near the brilliant planet Mars, and often reflections from such a bright object, inside the eyepiece of a telescope, cause these ghosts, which look like comets.

The comet was real after all, according to a claim in a letter from Mr. Gale to Dr. A. C. D. Crommelin, published in the Journal of the British Astronomical Association. Mr. Gale states that he fully recognized the likelihood of its being a ghost, and made careful tests to determine its reality.

Was Best Viewed in Australia.

The telescope, he says, never showed such ghosts before, and the comet was seen best when Mars was completely out of the field. It was observed by several others, and through other telescopes, over a period of nearly a month, during which it moved as a comet should.

As he found the comet to vary considerably in brightness, it may be that it happened to be very faint when the northern observers looked for it. Also, it was much better placed for viewing in Australia, for there it was nearly overhead, while in Europe and North America it was low in the south.

Even Famous Brains Give Indications of 'Inferiority'

Washington. — Examining hundreds of human brains, famous and otherwise, a Soviet anatomist, Gregoire Levin of the Bekhterev Institute for Brain Research in Leningrad, has discovered that supposed "signs of inferiority" exist in brains of prominent civilized personalities just as frequently as in brains of benighted savages.

His verdict, which deals a blow to the hope of science to find visible reasons for inferiority in human brains, is reported here in the Journal of Physical Anthropology.

Earliest Traces of Man's Existence in Palestine Dug Up

Bone Beds of Bethlehem Yield Ancient Specimens

By E. N. FALLAIZE, Royal Anthropological Institute of London

London.—The earliest known traces of man's existence in Palestine, and it may be, almost the earliest evidence of man in the whole world, have been discovered in deposits now known as the Bone Beds of Bethlehem.

The discovery was made by Miss E. Gardiner and Miss D. Bate excavating the deposits, in what appears to be a swallow hole near Bethlehem, on behalf of the Wellcome Marston archeological research expedition to the Near East.

The discovery of the swallow hole was made some few years ago when excavations were being made for a water supply. On the nature of the deposits becoming apparent, a concession to excavate was granted to J L. Starkey on behalf of the Wellcome expedition. The actual examination of the deposits was entrusted to Miss Bate, the well-known authority of the British Museum of Natural History on paleontology, and Miss E. Gardiner, lecturer on geology of London university.

Important Animal Specimens.

The most striking specimen among the animal remains is the hinder part of the shell of a gigantic tortoise of a species not yet identified. With it were several detached plates of the shell and a huge leg bone. Although only the tail part of the shell was found whole, it measures well over two feet across, as compared with a little over two inches for the same part in a tortoise of about a foot in diameter. There is also part of the tooth of an elephant—the elephant was first identified in Palestine in evidence from the Bethlehem bone beds—and cheek teeth of the rhinoceros. Most important, however, from the view of the paleontologist and geologist is what appears to be part of a leg bone of a very small form of horse, possibly hipparion, the three-toed horse of Tertiary geological epoch.

Very Early Human Artifacts.

In the same beds, and associated with these animal remains, were a number of worked flints of which a selection has been brought to England and is now available for examination by expert judges of man's earliest handiwork. There can, however, hardly be any doubt as to the human origin of these specimens. One of them appears to be a core, from which flakes have been struck, while the others show the characteristic forms and chipping found in eolithic or pre-palaeolithic implements. Of those who have seen them, J. Reid Moir, the great authority in Great Britain on pre-palaeolithic implements, is confident as to their human origin and their early form.

There is every reason to say that at least the deposits are not later than Early Pleistocene, and it may be that they are Pliocene. This is certainly nearly as early as the earliest date assigned to the earliest implements found by Reid Moir in England, and approximately contemporary with Peking Man.

Fungus Found That Traps and Eats Small Worms

Chapel Hill, N. C.—A fungus, a sort of fifth cousin to the common bread mold, that captures and eats small worms, was recently described by Dr. J. N. Couch of the University of North Carolina. While insect-eating plants such as the Venus fly trap and the pitcher plant are quite well known, animal-catching fungi are rare.

The fungus grows in a thread-like form. Loops are spaced at intervals along the thread. These are the traps. When a worm sticks its head or tail into one of these loops it contracts, tightening up on the worm and holding it fast. At times a worm may be caught by two of the loops.

When the worm is firmly held, small threads grow out from the main thread. They penetrate the body of the worm and digest it. Dr. Couch was able to watch the capture and digestion of the prey.

Big Fish Eat Little Ones and Latter Tiny Things

Washington.—The bass or trout or pike that you triumphantly bear home, or the more prosaic halibut or salmon you buy in the store of a Friday, is the end and culmination of a long line of complicated devourings. Few fish eat primary foods directly, as a cow eats grass or a pig eats corn. They eat smaller fish and other animal forms like shrimp and crayfish.

These in turn have eaten still smaller creatures—and so ad infinitum, or almost that far. For the end (or rather the beginning) of the chain consists of plants too small to see, which the first and smallest of the tiny animal forms devour, to get the food which this "water pasture" has made with the help of the sun.

Lesson for September 19

CHOICES AND THEIR CONSEQUENCES IN A NATION'S LIFE

LESSON TEXT—Deuteronomy 11:8-12, 26-32

GOLDEN TEXT—Choose you this day whom ye will serve.—Joshua 24:15.

PRIMARY TOPIC—Our Country.

JUNIOR TOPIC—Choosing Sides

INTERMEDIATE AND SENIOR TOPIC—The Importance of Our Choices.

YOUNG PEOPLE AND ADULT TOPIC—My Part in Making Up the Nation's Mind.

Nations as well as individuals are responsible before God for the manner in which they live. They enjoy the blessings of right living and suffer the penalty of wrong moral choices. While it is true that national leaders may not always reflect the true character of the people, it is generally true that there is a sort of national character which over a longer period of time accurately represents the moral condition of the people as a whole.

Many earnest men and women believe that the United States of America stands today at the crossroads of national moral decision. There has been an unquestionable decadence of true religion, of home life, of social purity, and a growth of moral indifference and outright wickedness which causes men who think to cry out for a revival of old-fashioned spiritual and moral standards ere it be too late. The most effective, and in fact the only really effective way to bring that about, is a revival within the church of Christ, and a resultant renewal of its service in winning men to Jesus Christ as their Saviour and Lord. A 24-page booklet "Lessons in Soul-Winning," by Dr. Will H. Houghton, will be sent by the writer without charge to those requesting it. If possible enclose a 3 cent stamp.

I. Right Choices Result in Blessing (vv. 8, 9).

Making the right choice is in fact a simple matter, for it means only obedience to God's commandments. God is the author of the moral law. He alone can and does determine what is right and wrong. Man need not determine, nor is he equipped to decide that question. He can and must relate the details of his life to the law of God. How important it is then that he properly understand that law, and what folly it is to neglect the study of God's Word, where the commandments of God are made known unto men.

Choosing God's way means for both men and the nations which they make up (for my country is in the final analysis myself, and other individuals like me) the assurance of God's blessing and prosperity.

II. God Encourages Right Choices (vv. 10-12).

Our God is the great and untiring "giver of every good and perfect gift." We need but to lift up our eyes and look at His handiwork, or stir up our memories to recall his goodness, and we know that he and all his blessed works encourage us to do right—to live right.

But, alas, all too often God's choicest gifts are perverted and are used to bring the very opposite result. The most beautiful lakes and naturally delightful surroundings are used for resorts and clubs which all too often lead men to moral destruction. Parents almost fear that their daughters may be too attractive, for the world, the flesh, and the devil are constantly out "scouting" for beautiful women whose very God-given beauty may be used to glorify sin and lead others into disobedience to God.

III. Right and Wrong Are Fundamental and Eternal (vv. 26-32).

It needs to be repeated over and over again in these callous and indifferent days that there is laid down in the very constitution of the entire universe a moral distinction between right and wrong. Right is always right, and wrong is definitely and eternally wrong. There is no moral twilight zone, where things are neither white nor black, but a neutral gray.

Note that the difference between right and wrong was to be the same "on the other side of the Jordan." Time and place have no power to change moral law. What was right or wrong for your great-grandfather is right or wrong for you. What was right in your home on the farm is right in the city where you now live, or vice-versa. The passing of the years or a change of residence does not alter that law of God.

May God help the people of our nation, and all the countries of the earth, to remember that it is still true that "righteousness exalteth a nation: but sin is a reproach to any people" (Prov. 14:34).

A Season

To everything there is a season, and a time to every purpose under the heaven; a time to be born, and a time to die.—Ecclesiastes 3:1, 2.

In the Silent Watches

While alone and in silence, man can commune with himself.—Van Amburgh.

Flood of Ambition

Ambition, like a torrent never looks back.

Three Maids A-Sewing Go

LITTLE lady, it's time to say adieu, so long, good-by to that flimsy but faithful friend—your summer wardrobe. But don't fret, Milady, Sew-Your-Own is right on the job with sparkling new fashions for you; fashions that will make you forget the past and be remembered in the future. So let's not tarry: let's choose the style that's got the most sock for our particular figure and join this group that's going a-sewing!

Stadium Model.

Picture yourself in the trim-waisted little model at the left, if you would have an optimistic viewpoint and a head start on style this season. There's nothing younger than this topper with its dainty collar and cuffs, its snappy row of buttons and fetching peplum. The way it takes to the weightier fall fabrics is news, and equally intriguing is this fact: it's easy to sew!

Young 'n' Pretty.

Long slender lines of the princess variety make this the lucky number for your first autumn days. Of course you see it's a style to cut in at least two fabrics because it boasts utility plus beauty. If you're going to school you'll want it in acetate jersey or light-weight wool. Neat contrast is here, too, if you wish, in the collar, pocket flaps and buttons. (This is a simple eight-piece pattern.)

A Lift for You.

There's much ado about bodices this fall and unless you have a frock that carries a stylish one you won't feel right. Sew-Your-Own caters to this vogue in its new creation at the right. It is pencil slim and carefully styled to give you that chic young silhouette that distinguishes the lady of fashion. Make this handsome model of silk crepe, sheer wool or jersey and be fit for business or pleasure in town or country.

The Patterns.

Pattern 1376 is designed for sizes 12 to 20 (30 to 40 bust). Size 14 requires 4⅛ yards of 35-inch material.

Pattern 1347 is designed for sizes 14 to 20 (32 to 42 bust). Size 16 requires 4¾ yards of 35 or 39-inch material. With long sleeves 5⅛ yards plus ⅜ yard contrasting.

Pattern 1258 is designed for sizes 12 to 20 (30 to 38 bust). Size 14 requires 4 yards of 39-inch material, with long sleeves, plus 4½ yards of braid to finish as pictured.

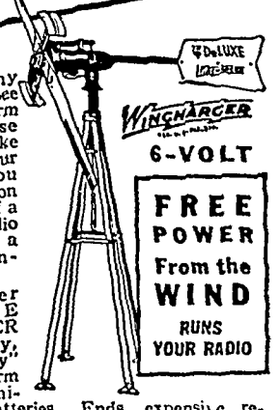
Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

© Bell Syndicate.—WNU Service.

Conceited Beau Brummell

Beau Brummell (1778-1840), the master dandy of all time, was so idolized by the aristocracy of London as an arbiter of dress and manners that, eventually, he became unbearably conceited. One night he even ordered a duchess out of his house, during a reception, because her "dress was cut too low in the back." The gentleman's taste was so offended that he had to cover his eyes while she humbly backed out of the ballroom.—Collier's Weekly.

CLIP THIS AD! Worth $7.50



Take it to any radio dealer! See the new 1938 farm radios. Choose the radio you like best, and ask your dealer how you can save $7.50 on the purchase of a new battery radio equipped with a genuine Wincharger.

STANDARD BEARERS HAD SHOWER IN HONOR OF MRS. DURHAM

The Stadnard Bearers held a linen shower last Wednesday evening at the home of Mrs E. G. Schaeffer in honor of Mrs Oscar Durham, a recent bride

The young ladies spent the evening in a social way and a nice lunch was served.

Vegetable Storage Involves Many Precautionary Steps

"Proper moisture, temperature, fresh air and a good product with which to begin are essential for successful storage of vegetables," says E S Haber, Iowa State College vegetable crop specialist Rapid changes in temperature and moisture must be avoided in order to keep vegetables for any length of time

The common practice of storing vegetables in the basement is not advisable if the basement contains a furnace, he says. A separate room well insulated from the furnace, may be partitioned off—preferably under an unheated room A special vegetable cellar or cave may also be constructed

Unless a temperature of 40 degrees Fahrenheit can be obtained for most of the storage period, it is not wise to try to store many vegetables, Haber explains

Avery THE THEATRE BEAUTIFUL Garner Iowa

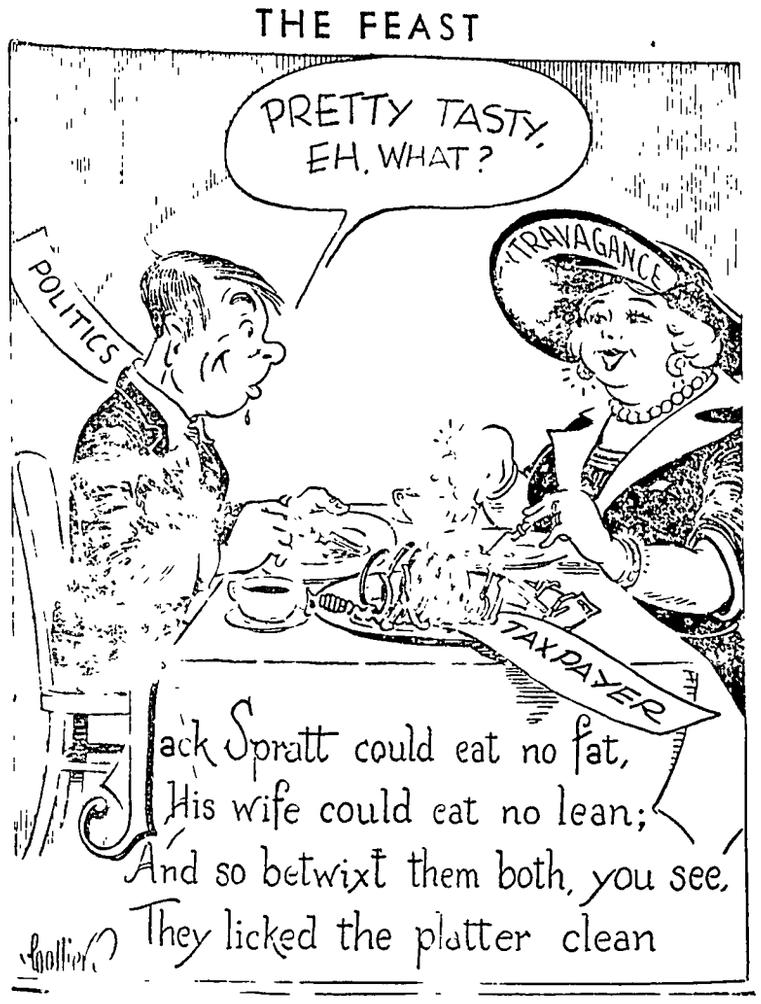
METHODIST EPISCOPAL CHURCH

William Zabilka, Pastor

Klemme Church:
Worship Service 10:00 a. m.
Sabbath School 11:00 a m
Epworth League 7:30 p. m. at Liberty.
(Ruth Abele, Leader)

Liberty Church:
Sabbath School 10:15 a. m
Worship Service 11:20 a. m.
Epworth League 7:30 p. m.
(Ruth Abele, Leader)

Next Sunday is the last Sunday of the Conference and Church year and we shall be glad to have a fine "turn-out" at both churches



Klemme Well Represented In Colleges And Universities

MANY KLEMME YOUNG PEOPLE ARE ATTENDING COLLEGES THIS YEAR

There are quite a numb r of Klemme young folks who are attending college again this year Some have already entered college while others will leave with in a few days to take up studies

Miss Gladys Zabilka is enrolled at Cornell College this year

Byrnes Missman Bessie Larson Marie Stile are attending Iowa University

LaVohn Larsen Thelma and Wayne Chambers and Bob Schneider are at Iowa State at Ames

Dolorys Cook attends Morningside College at Sioux City

LaVohn Sherwood is attending college at Waldorf at Forest City

Marjorie Wicks and Harriet Gibbs are pursuing a commercial course at Hamilton's at Mason City

MARIE MEINDERS AND ERWIN NUEHRING WED

Church Wedding And Reception Attended By Relatives And Friends

Miss Marie Meinders, daughter of Mr and Mrs John Meinders of Garner, became the bride of Erwin Nuehring, son of Mr and Mrs Fred Neuhring of Kanawha Wednesday Sept 8, at high noon at the Klemme Reformed Church The Rev Calvin Grosshuesch performed the double ring ceremony

The bride was attired in a floor length gown of white taffeta and carried a bouquet of asters and carnations The groom wore the conventional blue

The attendants were the bride's sister, Gladys Meinders who wore pink taffeta and Earl Neuhring brother of the groom who wore a blue suit Miss Clara and Walter Aukes, of Woden, friends of the couple, sang "O Promise Me," "I Love You Truly," and "At Dawning" acompanied at the piano by Mrs C Scnucker Miss Viola Thiemann played the wedding march Raymond Barz, cousin of the groom and Alfred Jurgemeyer friend of the couple, acted as ushers.

After the wedding ceremony about 60 relatives and friends gathered at the home of the bride's parents for a dinner

Dinner and lunch were prepared by Mrs Will Jurgemeyer and Ruth.

In the evening a reception was given in honor of the couple at the Garner Opera House to which all friends and relatives were invited

After March 1st they will live on a farm west of Klemme.

REV W. HUENEMANN WEDS MRS. GREIMANN AT ELLTOWN CHURCH

Wedding Dinner Served 35 Relatives At Home Of Bride After Ceremony

In the presence of a large number of relatives and friends at 4 o'clock Sunday afternoon, Sept 12, the Rev. William Huenemann, pastor of the Zion and Peace Reformed Churches, and Mrs Anna Greimann were united in marriage

The ceremony was performed t the Peace Reformed Church in Ell township by a brothr-in-law of the bride, the Rev Mr Buisma of Baxter, assisted by the Rev Calvin Grosshuesch, pastor of the Klemme Reformed Church.

During the wedding Edward Huenemann, a son of the bridegroom, sang suitable selections.

Mrs Greimann wore a dress of black velvet, and Rev Huenemann also wore a dark suit

A wedding dinner was served to 35 close relatives of the couple at the bride's home immediately following the ceremony at the church A yellow and white color scheme was carried out in appointments After the dinner the couple left on a wedding trip.

Mrs Greimann has lived in the Garner vicinity for a number of years She is a graduate nurse and practiced her profession for many years before coming here

Rev Huenemann accepted a call to the pastorates of the Garner and Ell township churchs in Dec., 1935 He came here from South Dakota The couple will reside in the Ell township parsonage near the Peace Reformed Church

CLIVE RUKA, GOODELL, LOSES FOREFINGER IN BUZZ SAW

Had Planned To Leave Following Day For College

GOODELL — Clive Ruka, Goodell youth, was injured late Monday when his hand was caught in a buzz saw as he was sawing wood. His forefinger was cut off and his thumb and two other fingers were badly cut

Ruka, who had planned to leave Tuesday to enter Iowa State College at Ames, was taken to Steele hospital at Belmond

Last Winter he was injured when he fell from an upstairs window while walking in his sleep.

In 1935 there were 63,000,000 life insurance policy holders in the United States

Government And State To Co-operate On Projects

SHAMROCKS DROP TWO GAMES THE PAST WEEK

Lost To Swaledale 5 to 3 In An Extra-Inning Game

Playing with a badly crippled lineup, Coach A L. Kingrey's Klemme High School baseball team lost a close extra-inning game to the fast Swaledale nine, last Friday at Goodell. The score was 5 to 3

Klemme started strong and grabbed a 3 to 0 lead in the third inning, when Grosshuesch singled, Schuldt got on on a two-base error, and Grange rapped out a long homerun

Swaledale came back to tie the score by the end of the regular seven-inning game and then scored twice on timely hits in the eighth to win the game

Kluckhohn and Schuldt formed the battery for Klemme, while L. Eddy and Polsdofer worked for Swaledale.

Lose To Goodell

Wednesday afternoon the Shamrocks journeyed to Goodell and lost a rather one-sided game to their southern neighbors, by a scre of 8 to 1

Kluckhohn and Schoenwetter did the hurling for the Shamrocks. Kluckhohn fanning eight in five innings Schuldt performed behind the bat

Klemme's lone score came when with a man on base, "Giant" Genie Kluckhohn pounded out a double, to account for his share of the three Shamrock hits

Johnson and Hofer formed the battery for the Goodell nine, with Johnson retiring thirteen via the strike out route and allowing only three hits Hofer was the main gun for the Goodell offensive, rapping out three hits in four trips to the plate.

People of the United States own one-half of all the telephones and telegraph communication systems of the world

Our Bill of Rights

By RAYMOND PITCAIRN
National Chairman
Sentinels of the Republic

Recently America observed with nation-wide ceremonies the 150th anniversary of the signing of our Constitution on September 17, 1787.

During the same month occurs a similarly significant, though less widely observed anniversary, commemorating the adoption by Congress, on September 25, 1789, of our American Bill of Rights

Ratified by the States, and proclaimed in force by December of 1791, this group of ten amendments constitutes one of the greatest bulwarks of personal liberty in all history

Why?

Because it is the Bill of Rights that assures to all Americans their treasured freedom of religion, of speech and of the press.

It is the Bill of Rights which guarantees them the right to trial by jury, the right to own property, and protection against such forms of oppression as imprisonment without legal process, cruel and unusual punishment, or unreasonable search and seizure.

It is the Bill of Rights which retains to the people all other rights not delegated to government.

Check these rights and privileges against the few permitted those peoples now oppressed by the new tyrannies over-seas.

There, news dispatches report a growing record of deprivation of the right to worship, to speak, to assemble, to labor or to live as the conscience and the spirit of the individual citizen impels him.

There, unjust imprisonment, trials that are mere mockery, blood purges and the like, continue to make a travesty of freedom.

Such things don't happen in the United States. And they will not happen here so long as the Constitution and the Bill of Rights prevail, with an independent judiciary to sustain them.

That is what makes the anniversaries of our Constitution and our Bill of Rights such significant celebrations, not only to Americans but to all who believe in the liberty of man.

HAVE HIGH HOPES FOR WILDLIFE UNDER NEW U. S.—STATE PROGRAM

President iRoosevelt has approved an act providing that the United States shall aid the State in wildlife-restoration projecs. The act is to take effect July 1, 1938 The new law, sponsored by the General Wildlife Federation and other conservation groups, authorizes appropriations equal to revenue derived frm Federal taxes on firearms, shells, and cartridges, for a Federal-State willdife program Tax receipts in previous years indicate that the funds may total about $3,000,000 annually. Wildlife-restoration projects to be financed by the new funds will include the selection, acquisition and development of areas for wildlife and also research on wildlife-management problems.

Benefits Of Act Pointed Out

Describing the act as "epoch making in the history of wildlife conservation" officials of the U. S. Biological Survey pointed out the following outstanding features of the new set-up:

.Funds from Federal taxes on firearms and ammunition will for the first time be available for improving wildlife conditons Hunting license fees of participating States will be used solely for wildlife purposes. Money for the improvement of wildlife conditions will be spent in accordance with a carefully planned program. Federal participation in wildlife-conservation measures is extended to those involving resident and upland species, as well as migrants

Cooperation between Federal and State wildlife officials will be furthered. The new program also follows a recent movement advanced by Ira N Gabrielson, Chief of the Biological Survey, and approved by Secretary Wallace, for increased cooperation between Federal and State officials in matters affecting migratory-bird conservation. Outstanding and ultimate benefit of the new program will be the restoration of land and water areas to the uses of wildlife Land, "The basis of all things," is essential to any program for the improvement of wildlife conditions.

METHODIST LADIES AID SOCIETY ELECTED OFFICERS FOR THE COMING YEAR

Mrs. Herman Paul Will Again Head Society As President

At the regular meeting of the Ladies Aid Society of the Methodist Church held last Thursday, the following officers were elected for the coming year:

President, Mrs. Herman Paul; Vice President, Mrs. R. A. Jorgenson; Secretary, Mrs. A J. Kudje; Assistant Secretary, Mrs. C C Kilgore; Treasurer, Mrs. W. H Galbreth; Assistant Treasurer, Mrs. C G Waterman.

Each member of the Society was requested to enlist one new member for the coming year.

All church members are requested to come and help clean the church on September 29th in the afternoon.

KLEMME REFORMED CHURCH

The Confirmation Class will meet Tuesday and Saturday forencon.

Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington. — More and more newspapers throughout the country are demanding that the President invoke the terms of the American Neutrality act with respect to the war—undeclared though it is—that is raging on Chinese soil. These editorial expressions obviously will have considerable weight and will convince a very great number of American citizens that President Roosevelt ought to invoke the neutrality act and, by so doing, proclaim that Japan is the aggressor. That, in simple terms, is what a presidential announcement of application of the neutrality act would mean.

Brutal Japan

There probably has never been a brutality comparable to the unspeakable outrage which Japan is committing in China; certainly, never in modern times. It is a stain upon the name of the Japanese people and the smooth working of the Japanese military machine will never be able to offset the hostility which the subjects of the Rising Sun are creating by this display of brutality.

Although the Tokyo government has yet to say it is fighting a war, the Japanese aggression in China is just as much a war as though the United States and Canada had taken up arms against each other and had proclaimed to the world that they were belligerents The very fact that there has been no declaration of war, however, complicates the situation as regards the United States and Great Britain. Unless these nations, along with some others which have interests in China, are willing to shoulder the responsibility that comes when an outside nation says publicly that two powers are at war, neither nation can afford to endanger its neutral position by saying to the world that Japan is trying to subjugate portions of China.

That is exactly what is happening In spite of the declaration of the Japanese statesmen that their military machine is only protecting Japanese nationals, the whole affair may be treated as pure hypocrisy—as a movement by the Japanese to gain control of new resources, new land, over which the teeming millions from Japan may run as the hordes of Chinese are displaced. The whole thing shows how long we have been fooled by the persuasiveness of the Japanese statesmen.

You may ask: What can we do about it? The answer is exceedingly difficult. I have a fear that we can do nothing because of the international policies that the United States pursued during the administrations of Presidents Coolidge and Hoover and those that are continuing under President Roosevelt.

Only once in all of those years did the American government speak out firmly concerning the apparent Japanese plans and on that occasion the assistance given the United States by Great Britain and France amounted to little more than a whisper.

So now the patience of a great many people is wearing rather thin. I think also, from what I hear in diplomatic circles, that the British lion has begun to bare his teeth and unsheath his claws. Again, to what purpose I do not know, because the United States and Great Britain thus far have discussed no plan for acting in unison. Certainly, without concerted action between them and including France, little can be accomplished. It does seem that they could get together because of the community of interests but either the United States lacks leadership in the circumstance, or there are some bugs under the British and French chips about which we do not know. I repeat that in the face of Japan's devastating actions and the ever-growing threat of her overlordship in the Far East, these three powers ought to work out an understanding by which they can trim the wings of the Japanese war birds.

* * *

As the fighting continues on Chinese soil and as one disturbing act after another is committed by the Japanese, I imagine many persons are going to inquire why the United States does not brave world diplomacy and invoke the neutrality act. In that eventuality, there ought to be a clear understanding of the various implications and results that would flow from such an American action In the first instance, Japan is now virtually self-sufficient in the matter of munitions If we declare an embargo against shipment of war materials to the fighting nations, I believe it is generally agreed the action would hurt China more than it would hurt Japan. It would result in cutting off supplies which the Chinese sorely need. Americans are wholly willing to sell supplies to them because, generally speaking, it is apparent that the sympathies of American individuals are with the Chinese even though the government officially remains neutral.

Tough Problem

Further, if our President declared that war existed between Japan and China, doubtless Japan would be encouraged to declare war on China formally. In that event the Japanese immediately would establish a naval blockade of the Chinese coast.

* * *

In some quarters in Washington, one will hear arguments that the United States ought to continue to keep its hands off the Far East situation. That school of thought takes the position that the United States is not obligated either from a moral standpoint or from the necessity of protecting American interests, to use force in putting Japan back within its own borders.

Some Say Hands Off

The basic reason why these thinkers argue against a firm American attitude, however, is that China never has been subjugated. China has been attacked; it has been overrun from many quarters and it is now being overrun again; but it has never been conquered. That sounds like a broad statement but history proves its truth. The Chinese through all of their thousands of years of history have managed to survive and maintain their racial characteristics and traditions They never have sought additional territory. They have been content to do things in their own way and to absorb Western civilization slowly. In other words, the Chinese have generally allowed human nature to change only as human nature does change through the years.

* * *

But what of other world powers? Lately, the Chinese have entered into a treaty with Soviet Russia by which that nation promises not to participate in war against China. The treaty is simple enough and yet what is written there is only a shadow of what it all means. The Soviet, while apparently not desiring to engage Japan in hostilities, is unwilling to see Japan go too far in extending her frontier. It is only a short while since Japan set up the puppet state of Manchukuo. It borders on Russian territory and the feeling along that border has been none too harmonious. It seems quite logical then that the Soviet was desirous of showing to Japan the possibility of an attack from two sides if Japan forces her tentacles too far inland in continental Asia.

What of Other Powers?

Also, it ought to be mentioned that the treaty between the Soviet and China may be influential in Europe. The general understanding is that Hitler has committed Germany to the aid of Japan if the Soviet moves against the island power. Besides this circumstance, the Soviet is unwilling, if one may judge circumstances of the last two years, to encourage the ill will of Great Britain. Dictator Stalin does not want to have Great Britain and France arrayed against him and he can see obviously that Great Britain and France, as well as the United States, must favor China.

* * *

Word comes by cable from Paris that the French government has nationalized all of the railroads within the borders of that nation. It may be that this news item will be passed over by many persons with the remark that the condition is several thousand miles across the Atlantic. It is, however, a most significant step because France, along with the United States and Great Britain, long has held to the idea that private initiative and private brains always are better than government initiative and government brains.

Takes Over Railroads

I call attention to this development for another reason. It happens that about three years ago members of President Roosevelt's so-called Brain Trust were planning exactly the same thing for the United States.

Strangely, the terms by which the French government, which is now completely socialistic, took over the railroads of France are identical with those which were under consideration by the Roosevelt Brain Trust.

It may be news to many persons to learn that the bunch of theorists who infest our government once actually drafted a bill for action by congress to nationalize the American railroads That bill would have taken over the rail lines for their bonded indebtedness and would have left nothing at all for the stockholders. The French radicals have done exactly that thing in nationalizing the French railroads.

It may be that "It can't happen here," but I must confess a very deep fear. It seems to me the time has arrived for those who believe in ownership of their own homes, possession of their own money—whether the sum be small or large—to awaken to the trend of world events.

Lesson for Septem[ber]

GOD IN THE MA[king] OF A NATION

LESSON TEXT—Deuteronomy [illegible]
GOLDEN TEXT—Beware tha[t] not the Lord thy God, in not [keeping] commandments, and his judgments, and his statutes, which I command thee this day. Deuteronomy 8 11
PRIMARY TOPIC—To Help [illegible] ber
JUNIOR TOPIC—The Giver [illegible]
INTERMEDIATE AND SENIOR TOPIC—God in the Making of a Nation.
YOUNG PEOPLE AND ADULT TOPIC—God in the Making of a Nation.

God in the making of the [nation] Israel—this has been our subject for a number of months this concluding lesson we [close] with a solemn warning that though God's mighty works have been revealed on behalf of [Israel] it is possible for them to [become] proud and self-confident, forgetful him whose they are and whom they should serve, and perishing in rebellion and sin.

I. "Beware That Thou Forget the Lord" (v. 11).

How could this people [ever] come up out of slavery and be led "through that great and terrible wilderness" (v 15), who had been fed by God's hand, who had received "water out of the rock of flint," who had become a great nation by his grace and blessing, forget God? It would seem unbelievable, did we not know our own hearts. We need this warning as [much as] Israel So [we] at a stirring "[Revival]" from coast to coast as thus [we are] taught, for America is forgetting God. Space does not permit a review of the appalling facts but they are enough to make one sick with sorrow and fear for the future of our nation.

II. "Lest . . . Thou Say, My Power" (vv 12-17).

How trenchant and altogether fitting are the words of Scripture! Nothing could describe our nation more succinctly and accurately than v. 17 Men are glorying in their ability to do things. Science has made mighty strides forward. Industry has brought forth such striking developments that a single company is able to present as a reflection of its own work a whole "House of Magic."

We honor those who by their hand and brilliant brain produce excellent and thrilling results. But the question is, "How many are there who say, 'God has done this for me. He gave the strength and the power. His is the honor'?" Some there are who thus recognize him, but they are few indeed Their name is legion who say in their heart, "By the power and the might of mine own hand hath gotten me this wealth" (v 17).

God, forgive us, cleanse us, and give us grace to walk humbly before Thee!

III. "Remember the Lord . . . Giveth Thee Power." (v. [illegible])

Joseph Parker points out the deep conviction of the fact stated in v. 18 "would turn human history to a sacrament" He says, "Such a blow this text strikes at one of the most popular and mischievous fallacies in common life—namely that man is the maker of his money!" He makes a stirring [illegible] (see People's Bible Vol. IV p[age]) for bringing God, who has been "crushed like a rose leaf by the Bible," out into the market place, into the office and the warehouse, for if man will make "his house into a church" he will also turn the church into a warehouse.

Would that we could once and for all do away with all "Sunday religion," and bring the gospel of grace and the laws of God into the office, the factory, the school, and the home, for every day and every incident and transaction of life.

IV. "If Thou . . . Forget . . . Shall . . . Perish" (vv 19, 20).

Reading this passage in the light of our knowledge of what did happen to Israel, we agree that the warning was needed, even though it was not heeded Shall we dismiss the matter with perhaps an expression of regret that they disobeyed God and missed his blessing? If we do we miss the most important point in our lesson, for the fact is that our nation is as dependent on God, and in just as much danger of forgetting him and perishing.

God punished even his chosen people in the day that they forgot him. Let not America think that she will escape if she goes on her way, forgetting God. We pray again, as we did last Sunday, for a deep going revival among God's people, and a renewed zeal for the salvation of lost men and women.

Every Day

Happy and strong and brave should we be—able to endure all things and to do all things—if we believe that every day, every hour, every moment of our life is in His hands. —Van Dyke.

Monuments of the Great

Monuments! what are they? The very pyramids have forgotten their builders, or to whom they were dedicated. Deeds, not stones, are the true monuments of the great.—Wheeley.

Tientsin is "on the way" from sea to Peiping, it has long been y to the old capital.

ghting in the Peiping area has n thrown a world spotlight on frequently fought-over city, for- capital of China and always a er of international interests.

any foreigners are residents of ping, where embassies to China retained, although offices must be established also in Nanking, the official capital of the central government. Such an arrangement has been adopted by the United States, which retains an embassy in Peiping guarded by a detachment of United States Marines. Other foreign embassies with armed guards are the British, French, Italian and Japanese.

Peiping the Focus of Affairs.

Peiping was the focus of perhaps the most widespread international tension on Chinese record during the anti-foreign Boxer uprising in 1900, when troops of several nations, including the United States, were landed and marched inland to rescue all Peiping's foreign residents, who had been besieged for two months in the British embassy.

As commercial and cultural mistress of China's northern plain, Peiping is the country's second largest city, being surpassed only by Shanghai. Its geographic location brings it into contact with Japanese-controlled Manchukuo on the northeast, semi-independent Tibetan provinces on the west, and Russian-controlled Mongolian republics on the northwest. The foreign embassies and branch offices of foreign business firms in Peiping give it the greatest international importance north of the Yangtze river. As center of the Hopei-Chahar council, it is a focus for the independence movement which has weakened ties between North China and the central government at Nanking.

Having lost the name of Peking, "northern capital," in 1928 when China's administrative center was moved south to Nanking, Peiping now finds its present title, "city of northern peace," threatened.

In national affairs Peiping is a stronghold of tradition. Contrasting with the present Chinese capital, the northern metropolis has had many reincarnations as seat of China's government under such romance-freighted names as Peking, Cambulac, and Purple Imperial City. Its Mandarin dialect, the "Parisian French" of Chinese speech, comes closer than any other to being generally understood throughout the nation.

Famous Marco Polo Bridge.

When the boom and rattle of heavy guns and rifles disturbed the calm of Peiping recently, newspaper men sent back word that the first clashes were in the neighborhood of the Marco Polo bridge, nine miles southwest of the city. Many foreigners make excursions from Peiping to this ancient many-arched stone bridge, one of the most picturesque in northern China, which spans the muddy Yung-ting river.

Marco Polo bridge was named by foreigners in honor of the Venetian adventurer who first described it—albeit inaccurately—to the western world when he came to the Orient to call upon the fabulous Kublai Khan. The Chinese call it Lu Kou Chiao. Marco Polo praised the magnificent solid stone span of twenty-four arches on almost the same page with such Chinese novelties as beauty contests, daily baths, and black rock which was burned as a cheap substitute for wood. Europeans found the twenty-four arches the most credible part of the story, but it was actually the one inaccuracy. The arches numbered no more than thirteen, but countless loads of coal passed over them from western mines to supply Peiping with "black stone" fuel. The treacherous Yungting river in a Seventeenth-century flood clipped off two arches. Now the bridge has only eleven stone arches, mossy with age.

The Marco Polo bridge has played a significant role in the history of Peiping, to which it was once the main portal from the southwest. For centuries, when Peiping was the political as well as the cultural center of China's ancient civilization, the bridge played a dramatic part in invasions. It still bears its share of motor, caravan, and foot traffic.

STAR DUST
Movie • Radio
By VIRGINIA VALE

NO ONE could blame Robert Taylor if he decided to avoid New York City on his return from Europe. The reception his fans gave him was so frenzied a demonstration that several stalwart policemen are still nursing bruises.

It was bad enough at the railroad station, where screeching women broke through police lines and shoved each other around in an effort to shake his hand But that was nothing to what occurred on the Berengaria just as the ship was about to sail with him on board. Girls in their teens simply swarmed all over the boat, climbing over railings, breaking through guard ropes, hiding themselves under life boats.

Sailing was delayed half an hour because a steward found two youngsters hiding under the bed in Taylor's stateroom, and it was thought wise to search the rest of the ship.

Taylor was wearing a three-year old battered brown felt hat, a brown sports coat, gray slacks and shirt and sturdy brown sports shoes and looked as wholesome and modest as a powerful farmhand.

Before "Vogues of 1938" opened in New York, the professional dress models association gave a party for Joan Bennett, and gave her a plaque to commemorate the occasion. They say she has given new dignity to the modeling profession by appearing in this picture. Joan is the most modest and inconspicuous guest of honor you ever saw at a party. She drifted in so quietly that few even saw her. She has many charming traits.

Joan Bennett

Columbia Pictures have entered the competition to see who can crowd the most radio, stage, and night club celebritics in one picture and at the moment it looks as if they are well in the lead. Their "Freshman Follies" will include Gertrude Neisen, Jimmy Durante, Hal Le Roy, the sensational tap dancer, and Johnny Breen, who has grown so popular as bandmaster on that Tuesday night automobile hour.

—*—

Several of the radio stars around N. B. C. headquarters are dashing through second-hand stores and Chinatown curio shops these days and studying books on Chinese ceramics at odd moments. It is all the fault of John Gambling, commentator on the Monday night "Melody Revue" He recently sold eight rare vases for five thousand dollars after buying them for eight hundred.

—*—

Ramon Novarro went to Reading and Harrisburg, Pennsylvania, a few days ago to attend the first showings of his Republic picture, "The Sheik Steps Out," and came back quite dazed and deeply touched by the warmth of his receptions. Crowds came from far and near to meet him at the station, escort him to his hotel and then on to the theater. He appeared four times a day and sang encore after encore and still the audience shouted for more.

—*—

Smilin' Ed McConnell, radio's well loved singer, humorist and philosopher has returned to the air for his sixth consecutive year as dispenser of good cheer on Sunday afternoons. With the new series of thirty-nine weeks comes a change of outlet to N. B. C.'s Blue Network, giving the Acme singer-sage a coast-to-coast hookup. Genial and corpulent Ed returned from "the little place in the North woods" after a summer of fishing, swimming and "jes' loafin' around." He is being supported in his half-hour broadcast by a distinguished group of musicians.

Ed McConnell

—*—

ODDS AND ENDS—Ida Lupino is going to be pretty cautious after this when she invites guests to dinner. W. C. Fields liked the cooking so well that he persuaded the cook to come to work for him . . . Hollace Shaw, the C. B. S. soprano, has been in New York for six months and has never been inside a night club. Says she likes symphony concerts better, but how does she know? . . . Marlene Deitrich is having a lot of peasant blouses made up in Budapest to bring home to her Hollywood friends . . The most widely-quoted joke in motion-picture circles concerns the wild leopard which is being tamed to act with Katherine Hepburn in "Bringing Up Baby." Everyone says, "But who is going to tame Katie so she won't frighten the leopard?" . . . Eddie Cantor wears a blonde wig and impersonates a harem dancer in a sequence of "Ali Baba Goes to Town" and his daughters are enjoying it immensely. They pursue him calling him "Mama."

Anakatabats May Get You When You Are Up in the Air

Up and Down Currents Are Avoided by Pilots

By DR. FRANK THONE

Washington. —Anakatabats — are you acquainted with them? There's likely to be one in the air in your vicinity right now. So without much question you know anakatabats in a general sort of way at least, though probably not by that name.

Anakatabat is a newish word, not used much yet even in the profession for which it was invented, which is meteorology, the weather man's "ology" But because it rather neatly expresses a scientific idea and a material reality, anakatabat is likely to become more familiar in time—perhaps even to become street English.

Despite its Eskimoid appearance and sound, anakatabat is good Greek—indeed, very simple Greek. Put into equivalent simple English, it is 'up-down-go"

What Goes Up, Comes Down.

The idea of an anakatabat is built on the ancient truism that what goes up must come down, or at any rate that if something goes up its equivalent must come down. We see this simply exemplified in the ordinary passenger elevator, where the weight of the cage is offset by the heavy counterweights that slide down the sides of the shaft when the cage goes up, and up when the cage comes down.

The same kind of thing happens in the air When a strong current of air rises very fast, as it does when thunderhead clouds are piling up on the horizon, somewhere else an equivalent vertical wind is blowing the same amount of air downward, thus preserving atmospheric equilibrium Such an up-down-going of air constitutes an anakatabat.

An anakatabat can be very dangerous to aircraft. Planes avoid them. They have wrecked three fine airships for the United States navy: Shenandoah, Akron, Macon. When you're up among the clouds, it's decidedly not a good thing to meet an anakatabat.

Cosmic Ray Balloon Tracked to Earth by an Airplane

Washington.—A star fell on a tobacco row at a farm near the little town of Aquasco, Md., some 30 miles from Washington. Moreover an airplane chased the star to earth.

Or at least that is what Franklyn Irvin Gibbons thought as he stopped hoeing his tobacco recently and watched a plane following a shining object coming down from the sky into his nearby cornfield.

"The "star" was a radio balloon sent aloft by Dr. L. F. Curtiss of the national bureau of standards, which ascended some 17 miles and transmitted, back to earth, cosmic ray data. The zooming airplane was from the United States naval air station, flown by W. B. Fuller, radioman first class, and O. T. Cooper, chief radioman. They noted the shining bag of the radio balloon falling at the rate of about 150 miles an hour at an altitude of 8,000 feet and dove to follow it to its landing. The coincidence is the first ever known to occur in the new field of radio meteorography by which scientists are now probing the upper air to learn its weather and cosmic ray secrets.

Tiny radio transmitting sets carried aloft in small, unmanned balloons are reaching far beyond the limits of human flight in either airplanes or balloons.

Too Much Drainage Plays Hob With German Land

Berlin.—Drainage of areas better left as lake or swamp is proving a difficulty in Germany no less than in the United States.

For every area thus recovered and put to agricultural use, there is a neighboring area that is damaged through the lowering of its water table and the consequent disturbance of its biotic balance, declares Alwin Seifert in the German conservation journal, Naturschutz.

Digging drainage ditches is a principal occupation of the German Arbeitsdienst, which is the equivalent of the American C. C. C. Herr Seifert is convinced that they are turning a good thing into a bad, by carrying it too far.

Lack of Vitamin C Found a Probable Cause of Pyorrhea

Your Dentist Can Supply the Deficiency Safely

Cambridge, Mass.—A link between pyorrhea and scurvy has been forged at the laboratories of the Harvard dental school here. Drs. Paul Boyle and David Weisberger have under way research which indicates that a lack of vitamin C in the diet may be the cause of —or at least a contributing factor to—pyorrhea just as this vitamin C has long been known to cause scurvy.

While the findings are yet incomplete they indicate, say the scientists, that as far as the general practitioner is concerned vitamin C treatment for pyorrhea "can be adopted with safety and it probably should be adopted as a routine measure in addition to, but not in place of, other recognized forms of therapy."

Humans and Guinea Pigs.

The Harvard dentists have been working with both animals and humans in their studies. Guinea pigs were fed diets varying in their vitamin C content and later checked to see the degree of pyorrhea which they developed. X-ray and microscopic examinations of these animals showed all the characteristics of the true pyorrhea in reproducible form.

Forty-eight human patients were studied in the dental school where their degree of pyorrhea symptoms were compared with the content of vitamin C in their blood. Twenty-three patients with a low vitamin C blood content had marked evidence of the disease. Ten patients with a reduced vitamin C blood content showed the gum disease but to a lesser extent than the first group. Among fifteen patients with normal vitamin C blood content only one case had the disease.

These human findings, it is emphasized, are not conclusive but they do offer a most consistently positive finding in cases of the advanced disease, Dr. Weisberger indicated.

Use of Vitamin C Relatively Safe.

To the layman and the average dental practitioner the research has three significant points: (1) The new test of vitamin C in the blood as employed is not practical for a dental office and will probably largely be confined to hospitals. (2) The suggested use of vitamin C is a relatively safe procedure, for most experts agree the body can handle an overdose easily. This is not true with vitamin D. (3) The improvement in the mouth tissues, around the teeth, which occurs when vitamin C is administered indicates the practical value of the treatment.

Vitamin C, found naturally in limes and lemons principally, is also available in tablet form as ascorbic acid or cevitamic acid. To maintain the normal amount of vitamin C in the blood a daily intake of 50 milligrams is sufficient.

Only 84 Wisent, or European Bison, Are Known to Be Alive

Berlin. — In striking contrast to the now seemingly assured survival of American buffalo, or bison, is the still precarious status of the European bison, or wisent. There are only 84 head of pure-blooded animals left, a summarizing study of the International Society for the Preservation of Wisent shows.

Yet scientists interested in the great shaggy animals are not discouraged, for recent years have shown at least a slight gain in numbers.

In addition to the pure-bloods, there are a good many hybrid wisent, results of crosses with American bison. By a process called "elimination breeding," in which only pure-blooded bulls are used with hybrid cows, the proportion of bison blood is being reduced in the hybrid stock, so that eventually these will be almost full-blooded wisent also.

Before the World war there used to be a large herd in the Russian Caucasus and another in Poland. During the war and the confused period afterwards, these animals were all killed by distressed populations needing food at any terms.

Rayon From Rice Husks New Industry for Japan

Tokyo.—A $2,900,000 industry is being promoted in Tokyo with the object of producing rayon-making pulp from rice-husks, of which a practically unlimited supply is assured in Japan.

The process which forms the basis of the new industry has been developed by the Tokyo industrial laboratory, a division of the department of commerce and industry, in collaboration with the research institute of the South Manchuria Railway company.

'Way Back When
By JEANNE

FROM LUMBER YARD WORKER TO VICE PRESIDENT OF U. S.

TO KNOW whether you have chosen the right vocation for success in return for your efforts is sometimes difficult to decide. But, once it begins to dawn upon you that you could go further in another occupation, it is time to change. The greatest advancement lies where your talents and interests are greatest. Charles Dawes, who made the under-slung pipe famous when he became Vice President of the United States, might have been relatively unknown if he had not changed his mind about the occupation he would follow.

He was born in Marietta, Ohio, in 1865. He attended the public schools there and entered Marietta college, graduating at the age of nineteen. During the summer months he worked in a lumber yard, shifting lumber. It is easy to imagine that without vision and analysis, he might have set the proprietorship of a lumber yard as his goal. Dawes was always fond of music. He played both the violin and the piano, and music has been his chief diversion. He composed "Melody in A Minor" which Fritz Kreisler, famous violinist, included in his repertoire.

After college, Charles Dawes went to work in the engineering department of the Toledo and Ohio Central Extension railroad, working up to chief engineer in charge of construction. He decided to study law, or he might have been simply a good civil engineer. Graduating from the Cincinnati School of Law, he practiced for some years and became interested in politics. President McKinley appointed him comptroller of currency and, after four years of service, Dawes organized the Central Trust company of Chicago. He was general purchasing agent for the A. E. F. during the World war, and director of the budget bureau under President Harding. In 1924, he was elected Vice President of the United States under Coolidge.

FAMOUS AVIATRIX ONCE DROVE A TRUCK

THIS is a note of encouragement for "tom-boys" and particularly for parents who may not understand them. Girls who fall into the classification of "tom-boys" usually simply have a stronger spirit of competition or a greater streak of adventure than other little girls. Their greater activity may be early expression of a sense of leadership which may later lead to fame.

Amelia Earhart, queen of aviation, was a tom-boy. Born in Atchison, Kan., in 1898, she was an unusually active little girl. She loved

rough and tumble games, and she could beat most of the boys her age in sports and contests. She graduated from Hyde Park high school in Chicago and went on to a girl's school in Rydal, Pa. From school she went to Canada where she worked as a nurse's aide in a Toronto war hospital. Stories of World war pilots appealed to her sense of adventure and daring; and Amelia made her way to California, determined to learn to fly.

Here her self-reliance and "tom-boy" courage was helpful, for she had to earn the money for her instruction. Amelia Earhart worked for the telephone company and even drove a sand and gravel truck Later, she attended Columbia university. She held 28 different jobs while perfecting herself in the art of flying. In 1928, she won the plaudits of the world by being the first woman to fly the Atlantic. As a result of this flight she gained recognition as the foremost woman flyer, became aviation editor of Cosmopolitan Magazine, and vice president of two important commercial airlines.

NEWS FROM GOODELL AND VICINITY

Gordon Buchanan is the new clerk at Cashman's store

Francis Cashman and sister, Gertrude, were in Forest City Tuesday on business.

Mr and Mrs Walter Neuberger of Rockford were callers at the A C Carpente home Sunday afternoon. They brought Mr and Mrs Audrey Griggs home, as they had been doing chores for the Neubergers while they were in Missouri

Jay Griggs and E. J Nelson left early Wednesday morning for Longville, Minn, where they expect to fish.

Brummond's grading gang have been putting in some fine grades in Avery township.

Mrs. Earl Ruka and Mother, Mrs Cena Neilson were Belmond business callers Thurday

Mr. and Mrs Kissinger and son Kay, of Superior, Iowa, spent the week end visiting friends here.

Wilmer Burke and family, accompanied by Mr and Mrs. Gerald Burke, were Mason City business callers Saturday

Mrs Gerald Burke and her mother, Mrs Jay Griggs, were calling at the home of Mrs. E J Nelson, Friday

Gertrude Cashman left for Iowa City where she takes up her second year College work at the State University

Mr and Mrs Audrey Griggs are staying at the home of the former's sister, Mrs Neuberger, at Rockford while the latter has gone to a hospital for treatment

The chicken supper held at the U B. Church parlors Thursday evening was very well patronized and about $73 was realized

Those who attended the dance here Friday night had an enjoyable time

Mr and Mrs Chas Halfpop are rejoicing over the arrival of a grandson at the home of their daughter, Mrs Emmet Hoyt, of near Ventura.

Mr and Mrs O Evenson and Eva Marie were callers at the Franklin home Sunday afternoon

Some of our young folks were Klemme callers Sunday and went roller skating

The Wesenberg family entertained a group of friends at a card party one evening recently

Miss Dalia Stromer spent Saturday at the Jay Griggs home

There will be no services at the U B Church next Sunday as Rev and Mrs Dye will leave for Des Moines to attend Conference this week

Henry Nolte was elected as delegate to the U B Conference held in Des Moines

Game Conservation Old

Game conservation is an ancient practice in America, according to Dr W. C. MacLeod of New York, writing in the Scientific Monthly. He says. The Choctaw of the Southeastern United States had laws governing the amount of game which might be killed by each family. Every month each band chief had to report to the head chief just how much had been killed by each family under his control. The more northern Algonquins practically farmed the beavers. Censuses were taken every year, and only the young or very old animals were slain for use Disregard for conservation principles is believed to have been the cause of the war in which the Iroquois exterminated the Eries. The latter trespassed on Iroquois territory and acted contrary to the customs of all Indians, for they left none of the beavers alive to continue the stock.

Early Printed Books

Oswald's "History of Printing" begins by stating that Fifteenth-century books printed from movable type are considered to be of sufficient importance to justify their designation by a special title, that of "incunabula," "cradle books" or books produced in the infancy of the art. During the fifty years comprising the latter half of the Fifteenth century, probably 30,000 editions under various titles were printed, of which about 25,000 editions have been identified and described. These early editions appear to have numbered not more than a few hundred copies.

Kangaroo a Broad Jumper

A kangaroo is a broad jumper, rather than a high jumper. Some of the biggest ones are said to cover from 10 to 20 feet at a leap, while claims have been made of leaps of 30 feet and more He does not jump high from the ground. The largest kangaroos weigh nearly two hundred pounds. The long tail aids the animal in leaping and helps it keep its balance.

The Symphony Orchestra

The four choirs which comprise the symphony orchestra are the strings (violas, violins, violoncellos and contrabasses); the woodwinds (bassoons, clarinets, flutes, English horn and occasionally the French horn, oboes); the brasses (French horns, trombones, tuba, trumpets); the battery (instruments of percussion such as drums, triangles, bells and tympani).

Amphioxus First Known to Have Had a Backbone

About 400,000,000 years or more ago Nature created the Amphioxus —the first animal that is known to have had a semblance of a backbone. Nature was a good craftsman in this work, for the Amphioxus has come down to us, through all these millions of years, in almost unchanged condition. It is found throughout temperate and tropical regions in just as primitive a form as it was eons ago, according to a scientist in the New York Herald Tribune. In American waters it is found as a slender, wormlike creature about two inches long, but in Japanese waters it reaches a length of ten inches.

Out of the Amphioxus came the sharks, the fishes, the reptiles, the quadrupeds, the mammals, the primates and finally man. If Amphioxus had failed in its duty as a link in the chain of evolution or had differentiated itself in some other fashion, the human race might never have eventuated out of its primal protoplasm. Some other animal form might today be reigning as lords of this terrestrial ball.

Amphioxus, therefore, holds a key position in the evolutionary process of vertebrates and in the early days carried heavy responsibility for starting the whole group of beings with bones toward their ultimate destiny.

Although the Amphioxus is classed with the vertebrates, it has neither backbone nor cranium. Where these bony structures are found in the more advanced types of animals, the Amphioxus has only a cartilage rod. It is but a routine step from the cartilage to the bony structure.

Did Not Know "America" Tune Same as "Save King"

When Samuel F. Smith wrote "America" in 1832, he did not know that he was writing a song to the same tune as "God Save the King." He found the tune in a German music book brought to this country by William C. Woodridge and turned over by him to Lowell Mason, states a writer in the Detroit News. Mason had asked Smith to translate the verses or to write a few original poems to go with the music. As he glanced through the collection, he was struck by one tune which seemed to him simple and spirited and he noticed that the German words were patriotic. This gave him the inspiration to write a hymn for this country.

The origin of the words of "God Save the King" as well as of the tune is in doubt. Henry Carey and John Bull are both mentioned in this connection. The Encyclopedia Britannica says that 1745 is the earliest date assignable and that both words and music had been evolved out of earlier forms; also that Bull's is the earliest form of the air. Prussia, Denmark and other countries used this tune, but whether they took it from England or from older sources cannot be determined.

Naming Days and Months

Religion and romance, as well as considerable ingenuity, entered into the first naming of the days and the months. Although in more modern times we accepted the Roman names for the months, the names of the days of the week are, with one exception, directly derived from our Saxon ancestors, observes a writer in London Answers Magazine Their days were dedicated to leading gods of the time. For sheer poetic descriptive titling of the months it is impossible to do better than those old Anglo-Saxons. Translated their month names meant, beginning with January: Chilly month, vegetation month, spring month, grass month, flower month, summer month, hay month, harvest month, autumn month, wine month, slaughter month (when cattle were killed and dried for winter larders), and winter month.

Two Things Certain

Benjamin Franklin is credited with being the first to make the statement that only two things are certain—death and taxes Franklin mentioned this certainty in a letter to his friend, M. Leroy of the French Academy of Sciences, in 1789. He stated: "Our Constitution is in actual operation. Everything appears to promise that it will last, but in this world nothing is certain but death and taxes." Whether the expression was original with Franklin is unknown but it was natural for him to contrast the uncertainties of the newly adopted Constitution with these two certainties. Charles Dickens in his "David Copperfield," written 60 years later, has Barkis say: "It was as true as taxes is. And nothing's truer than them."

Our Ancestors

You have billions of ancestors. First you had a father and mother. Each of them had a father and mother. That makes six ancestors already. Again, each of them must have had a father and mother, and that makes 12. So we go on, back to the time of Christ, which works out at about 58 generations of 33 years each. The calculation shows, asserts a writer in Pearson's London Weekly, that 144,207,695,790,946,939 births must have taken place to bring you into the world. And all this since the birth of Christ only, not since the beginning of time.

"Loan Sharks" Got 100% From Egyptians 109 B. C.

That ancient Egypt was afflicted with the equivalent of "loan sharks" is revealed by a papyrus in the Egyptian archeological exhibits at Field Museum of Natural History, on which is written a promissory note. The specimen, which dates from 109 B. C., is the oldest promissory note of its type known, and is known as one of the most important of such papyri because of its elaborate legal formulae, which are strikingly similar to those found in many modern legal documents.

Quite startling is the usurious rate of interest, 100 per cent, specified in the note, while other harsh terms specified in it make their own commentary on the social conditions of the time.

From a literal translation the following interpretation is made:

"I, the peasant-slave Ensnakkomnoy, belonging to the Zemi cemetery, have borrowed from the woman Nokhutes 22½ artabas of wheat. I promise to repay this loan with 100 per cent interest, making the total due 45 artabas of wheat. Further, I promise to repay this loan with good, undulterated, chaffless seed-wheat, measured by the same standard as was used in making me this loan; and I further promise to deliver the said wheat to the house of the woman Nokhutes in the Zemi cemetery without transportation charges, by the last day of the ninth month of the year 9 with no extensions of time to be granted. Further, whatever I do not repay in wheat by the aforesaid date I will repay within the following month at the rate of 60 pieces of silver per artaba. Further, as long as this note is in Nokhutes' possession I cannot claim, unless I can show a receipt, to have made full or partial payment. Further, everything that I now possess or shall acquire is herewith pledged to Nokhutes until I shall have discharged my debt in full Further, if Nokhutes brings suit against me for failing to meet my obligation, I admit additional liability for my damages Further, the agent of Nokhutes is hereby authorized to deal with me and I promise to follow his instructions unreservedly and promptly at all times."

Left-Hand Superstition Prevails in Many Lands

Because of a superstition that anything seen or done on the left foreboded ill, was to be shunned as unlucky, the left hand has been in disrepute for centuries.

A deep-rooted prejudice, use of this hand is confined by South African natives, for example, to all degrading acts. The Maori tribe of New Zealand considers it profane, uses it as little as possible. Romans had a word for it in the evil-sounding "sinister."

Conscious of an "ugly duckling" embarrassment in consequence of this perverse heritage, from 4 to 8 per cent of the world's population have, willy-nilly, served out their appointed days, often with no small shame to their right-handed betters Far from being maladroit, balmy or queer, some have been great personages, states a writer in Literary Digest

Many of Egypt's Pharaohs were left-handed So were most of Rome's Caesars, the Biblical Benjamin, Alexander the Great, Charlemagne, Michelangelo. Leonardo da Vinci was so completely left-handed he wrote a backward stroke readable only with a mirror.

Virginia's Capital

Richmond, capital of Virginia, was once also capital of the Confederacy, and many things associated with the war between the states are to be found there The White House of the confederacy is now a fascinating museum. The Capitol, the main unit of which was designed by Thomas Jefferson, is the meeting place of the oldest representative legislative assembly in the new world Old St John's church is famous as the place where Patrick Henry fired the flames of the American Revolution with his stirring oration ending, "Give me liberty or give me death!" Near the city are many battlefields of the war, which have been preserved as park areas.

Use for Spiders' Webs

Spiders' webs have a commercial value, and are used by a number of firms of scientific instrument makers. The strongest and finest thread comes from the webs spun by the species known as the "Eperira Dradematata," found usually on gorse bushes The thickness varies from 0.00015 of an inch to 0 000075, and often the thicker threads are split in half, says London Tit-Bits Magazine The insect that spins these threads can easily be distinguished from any other of the eighty odd varieties in Britain as it has a beautiful cross on its back and spins webs of the "wheel" type.

Golden Apples

Spain was once the Mexico and Peru of Mediterranean exploitation, yielding gold, silver, tin, and copper for the greater glory of Greece and the grandeur of ancient Rome. It was believed to be fabulously rich when Greek myth-makers wrote legends of Hercules venturing Spain-ward for the golden apples of Hesperides. To Tarshish, around Cadiz, King Solomon sent for gold for his temple.

A NATION OF SMOKERS

All world's records of cigarette production were broken in July of this year, the Internal Revenue Bureau reports. In that one month the facories of the United states turned out 15 and a quarter billion cigarettes. That is almost seven packs a month for every man, woman and child in the United States.

On this one month's output of cigarettes the manufacturers paid a tax of six cents for each package of 20, or $3 a thousand. The tax, of course, is included in the price of cigarettes Each time a smoker breaks the revenue stamp with which each pack of cigarettes is sealed, he is paying six cents in taxes direct to the Federal Government.

On the cigarettes made in July, allowing one smoker to each family of four, the tax paid by the average family will come to somewhat more than $1 60. The smoker who consumes the fairly moderate amount of a cigarettes a day, pays $21.9 into the Federal coffers privelege of indulging in

The Government's revenue cigarettes at the July rate duction to 45½ million month, or at the rate of lion dollars a year The tax, next to the income ta largest single source of revenue The revenue fro and pipe tobacco is steadily ping, also that from chewing co and snuff but the cons of cigarettes is steadily in

IMPROVEMENTS IN THE ASSEMBLY ROOM

A bright yellow library file, new leather covers for the magazine and a new picture are among some of the changes in our High School assembly room this year

A new yellow library file has added to the appearance of the assembly Every book has a card which goes into the file when the book is taken out When the book is brought back it is checked in by removing the card from the file and putting it back into the book

The long table which was in the assembly has been removed and a new smaller one has taken its place.

New leather covers have been placed on the magazines in the magazine rack

We also have a new picture in our assembly which adds a great deal of color to the room The title of the picture is "The Indian Weaver" by Vanek Vanek is a famous Indian painter

Grade School News

Grades 1 and 2

When we came to school Thursday morning we had a surprise. There were three boxes of building blocks We have a good time building houses and towers

The first graders have finished their Science Books The second graders wanted to make some Scrap Books too, so each child chose a certain kind of picture to put in his book They began working on them Thursday.

Grades 3 and 4

Carol and Roger Bock and Ronald Brinkman made a cage for our toads We have put dirt, rocks and a pan of water in the cage Some of the boys and girls have been bringing food for the toads

We have some shelves for our rock collection Phyllis brought a large rock from Colorado Willis brought some from West Bend Others have brought rocks that they found at home

The third graders are studying about Indians They are keeping a list of Indian words

Mary Lou brought two Tussocks Moth cocoons Evelyn Lewis brought us another cocoon We are going to keep them to find out if they will hatch out in the spring

Roger Ridder brough a large pine cone from Louisiana, some different kinds of soil from the southern states a coconut shell and a large sea shell Mary Lou brought some acorns Mavis brought a butternut We are going to put them in the museum.

Grades 5 and 6

Those who had perfect spelling records last Friday were Junior Buntenbach Edward Barz, Patricia Kudje in the fifth grade and Corrine Merkel and Lawrence Bock in the sixth grade

In the fifth grade we are studying about the earliest inhabitants of America Corrine brought us some Indian souvenirs that she got in the Black Hills. Junior brought us two pictures of Indians that he had taken on his trip out West this summer Miss Irvine also had some pictures of an Indian Pow Wow

Eunice Larsen's side is ahead in our health contest

The boys in our room have a traffic cop to see that we do not run in the building, make too much noise or waste time in the halls We are taking turns being cop for a week at a time

Grades 7 and 8

The new copies of the American Girl and Boy's Life are on our reading table Library books have been checked out for the first time this week

Charles Bock was the only pupil to receive 100 in spelling last week

BUSSE IS RESPONSIBLE FOR HANCOCK FAIR BOOTH RECORD

Stilson Blacksmith Begins Work In Fall Preceeding Exposition

STILSON--Albert Busse, Stilson blacksmith, who engages in gardening during his spare time, is the man who is responsible for Hancock county's remarkable showing at the Iowa State fair during the past five years with its horticultural booth

Hancock county won first again this year in the Northern district and Mr Busse also placed first on his individual farm exhibit at the state fair The booth also placed third in the state on the exposition feature, which was a map of Iowa made of oats and clover seed, with the oats pouring out of Hancock county into the exhibit below.

Mr Busse, who furnishes all the vegetables for the exhibit, received more blue ribbons than any other person in the state this year. He won 38 first prize ribbons at Algona, Spencer and Des Moines.

The Hancock county exhibit, which Mr Busse builds from grains collected from various farms in the county, placed second the first year the county entered the state fair It has won first each year since that for four straight years Mr Busse furnished some of the fruit and also exhibit apples from the Greimann farm at Garner and the Rydson farm of Britt Mr Busse expressed his gratitude to many others who helped with the exhibit this year.

Success in the Hancock county exhibits Mr Busse credits largely to an early start Each year he makes his plans the fall before the fair He plants the winter rye, wheat, etc. and gathers the grains during the proper season. A winning booth cannot be prepared a few days in advance of the fair, according to Busse.

Wonders of an Unseen World! Atsonishing Things We Would See if We Had Eyes Like a Microscope, Explaned in a Double Page Illustrated Feature in the American Weekly, the Magazine Distributed With NEXT SUNDAY'S CHICAGO HERALD AND EXAMINER.

The United States consumes two-thirds of all the crude oil produced in the world.

American Legion Auxiliary Notes

The Klemme Unit will entertain the county organizations of the American Legion Auxiliary Tuesday afternoon, Sept 28th, in the basement of the M E. Church

All members are urged to be present as there will be a prize given to the unit having the largest per cent of members present when hostess to the other units. This prize will be given at the end of the Auxiliary year

The names of 31 members were sent in before Sept 15th This is one more than the quota Several ladies have signified their desire to join, so the number will be increased

All financial requirements of the county, state and national organizations have been met 500 poppies have been ordered for future delivery

The next regular meeting will be at the home of Grace Blank, Oct 14

There will be carpet rags to sew at this meeting, for the veterans hospital at Knoxville

CHRISTMAS SEAL WORKERS TO MEET

A large delegation from Hancock County is expected to attend a district meeting of Christmas seal workers of 11 north Iowa counties to be held from 10 to 3 o'clock today, Wednesday, Sept 22, in the Methodist church at Eagle Grove Arrangements for the meeting, which will feature talks by several prominent state officers, are in charge of the state Tuberculosis association

Officers expected to attend the meeting are Mrs C E. Barnes, Garner, president, Mrs John Hammil, Britt vice president, William Baggs, Garner, treasurer, Dr W. F Missman. Klemme, executive secretary; Mrs. R. R Roberts, Britt, secretary, Miss Christyna Callison, Garner, director, and members of the publicity committee Mrs W G Williams, Garner, chairman, and Mrs E. P Healy, of Britt, and Mrs V. A Blemgren, of Kanawha

Since the winning of the yacht racing cup by the schooner America in the race about the isle of Wight in 1851, British sportsmen have made fifteen unsuccessful attempts to regain it and have spent over $10,000,000 in the effort.

AVERY THEATRE DEDICATES NEW SOUND SYSTEM TONIGHT

With the showing of "Between Two Women," as the opening vehicle, Mr Marks, manager of the Avery Theatre at Garner, announces the public inauguration tonight of the revolutionary new RCA Victor sound reproducing system, the Magic Voice of the Screen which has been installed in the last few days by working in the early hours of the morning so as not to interfere with the regular showings

With the installation of this remarkable new sound aparatus in the Avery Theatre, patrons can enjoy sound of the same high standard as that in the two finest theatres in he world, the Center Theatre and Radio City Music Hall, of Rockefeller Center, New York, for the sound systems are practically identical in operation and quality of reproduction.

HORSE JUDGING WORKOUT AT EMERY SCHAEFER FARM

Seventeen 4-H club boys and vocational agriculture students participated in the horse judging workout held on the farm of Emery Schaefer of Liberty Township, Saturday, Sept. 18th Those in charge of the meeting were· Paul Henderson, club agent; T C Peterson, county agent; Aaron Bowman, Vocational Agriculture Instructor, Britt The six boys with the highest score were. Robert Rasmussen, Madison, Wiley Weaver, Ell, George Boehnke, Concord; Duane Rasmussen, Forest City; Wayne Greimann, Ell and James Cooper, Amsterdam Of this group, a team of four will represent Hancock County in the First 4-H club Horse Judging Contest to be held at the National Belgian Show in connection with the Waterloo Dairy Cattle Cngress

A new idea in mirrors is to make them from pink tinted glass. Mirrors of this kind are said to give flattering reflections.

HALLIBURTON AT MARTINIQUE

Visits Home of Aimee Dubuc de Rivery, Veiled Empress of Turkish Empire and Cousin of Josephine, Who Caused Fall of Napoleon

By RICHARD HALLIBURTON
Author of "The Royal Road to Romance," etc.

ST. PIERRE, MARTINIQUE.—For months I had been looking forward to my visit to Martinique. A dozen things about this West Indian island fascinated me but in this article I shall have to confine myself to one. It concerns beautiful Aimee Dubuc de Rivery, the veiled empress of the Turkish empire, cousin of Empress Josephine of France, and a native daughter of this romantic French colony.

As a child, Aimee's dearest friend and confidant was her cousin, Josephine, born the same year on a nearby plantation. Together they grew up in the happy, idle, comfortable society of colonial Martinique where they were born.

When Aimee was thirteen she was separated from Josephine, and sent off to France to complete her education in a convent at Nantes. For eight long years she remained there, prevented from visiting her native island by the wars raging between France and England.

But at last, in 1784, when Aimee was twenty-one—now a strikingly beautiful girl with pale gold hair—she started for home.

Aimee never reached Martinique.

Captured by Pirates.

Her ship was set upon by Algerian Corsairs, as fierce and daring a race of pirates as ever lived. Her ship was easily captured, and all the passengers and crew taken prisoner.

Among the captives Aimee stood out. She was more beautiful. She had extraordinary charm and a distinguished manner as well. At once the Corsair captain delivered this very appealing prize over to the Dey of Algiers himself.

But not even here did Aimee's story-book adventure end. The Dey was under great obligation to the Turkish sultan, his overlord, for money and munitions. In this beautiful Christian captive he saw a chance to pay back.

So Aimee was bundled up again and put on a Corsair ship that sailed east through the Mediterranean, past Greece, into the Aegean, past Troy, through the Hellespont, landing at Constantinople.

Here the sultan took one look at her—and his heart stood still. He had a score of wives already—Greeks, Armenians, Caucasians. But they were mostly untutored slaves. This girl could read and write. In fact, she was by far the most intelligent wife he had ever had.

Aimee immediately became the Sultan's favorite, and in due time bore him a blond son.

Josephine Weds Bonaparte.

She had long since given up all hope of escape. No woman of the Seraglio ever had before. So, since she was doomed to reside the rest of her life "in a vast and magnificent palace" she decided "she would have command."

Meanwhile, cousin Josephine was having a few adventures of her own. She had married Vicomte de Beauharnais and borne him two children. But during the French revolution her husband lost his head under the guillotine. Not long after she married again—this time to a wild young genius from Corsica named Napoleon Bonaparte, six years her junior.

Life became very exciting for Madame Bonaparte. Her husband was winning one military victory after another for France, and as his wife she was receiving honor equally with him.

But Aimee, a queen in Constantinople, was even more occupied. There the question of royal succession had arisen. She and her son, Mahmoud, who was the third in line, were becoming involved in the deadly intrigues that seemed to be the natural order of things in Turkish seraglios. The first and second princes were sworn enemies, and their respective mothers even more hostile. Each mother tried to poison her rival's child, to undermine each the position of the other by fair means or foul. Aimee had the best wits of the three. Consequently she managed to keep her son away from the poison cups being handed around.

Selim, the rightful heir, succeeded to the throne on the death of the sultan. But the mother of Mustapha, the next in line, never wavered from her ambitious designs. And so persistent was she that she actually succeeded in having Selim dethroned, and Mustapha crowned.

But this high-handed business infuriated a certain faction of Turks. They stormed the palace, meaning to murder Mustapha and replace Selim.

The palace gates were hurriedly closed As the rebels pounded upon them, Mustapha's mother rushed assassins to slay both Selim and Aimee's son Mahmoud That would settle the question of succession!

The assassins, spurred on by the shouts and fighting at the gates, found Selim first, and stabbed him to death. But the defense he put up gave Mahmoud time to escape up the chimney and onto the roof. And before the murderers could reach him, the palace gates crashed down, and a mob of Mahmoud's friends ran in to save him.

Aimee Shares Turkish Rule.

Mustapha was in turn executed, and Mahmoud—and Aimee—ruled the Turkish empire from the Indian ocean to the Adriatic sea.

At last, in her vast and magnificent palace, "she had command."

Mahmoud, from childhood, had more than loved his mother. His regard had amounted to worship. She had been his wise and devoted counselor throughout all the dangerous days of his youth. Now that he was sultan she became his entire ministry.

Consequently, because Aimee, the real head of the government, was thoroughly French, and because her beloved cousin Josephine had become the empress of Napoleon's empire, Mahmoud threw all his political weight toward France in that country's wars against the rest of Europe. French officers came to train his army, French seamen helped man his warships, French

Aimee Dubuc de Rivery

guns drove off the British fleet from Constantinople. French fashions, French language, French schools, took possession of the Turks. Napoleon himself could not understand why "Mahmoud" was such an extraordinarily devoted ally. England was completely baffled. Even the Turks thought it strange. Everybody had forgotten that Mahmoud's mother, the veiled empress, who sat quietly and unobtrusively behind the curtain of the Seraglio, was a French woman—a patriotic French woman—still dreaming, despite her twenty years in exile, of Josephine and Martinique.

This curious situation lasted until 1809 when Aimee was forty-six, and Mahmoud twenty-four.

Then, suddenly, dramatic news came from Paris—news that caused an explosion in the Seraglio.

Napoleon had divorced Josephine!

An Aroused Aimee.

Aimee's lovely eyes grew hard. She clenched her hands together. Such injustice! Such ingratitude!—and to the most lovable and unresentful of women—Josephine! Napoleon would pay for this. Aimee had supported him and encouraged him, had bowed down before his glory. Well, that was ended. She would face about, instantly. All she had done for him she would now do against him She would destroy him if she could—that demon from Corsica—and revenge her cousin Josephine.

Had it been Aimee herself who was scorned she could not have released a more calculated fury against the French emperor.

For three years she bided her time She waited until 1812—probably the most eventful year in modern history, except 1914. She now perceived with a far-seeing vision that was inspired, that her opportunity to destroy Napoleon was at hand.

For some months Russia had been at war with Turkey, and had sent the major part of its army into Turkish territory. Napoleon, well aware of this fact, chose this time to make his celebrated invasion of Russia.

For this undertaking he assembled the largest and the best equipped army ever known up to that time. It numbered nearly 700,000 men The entire population of France was only 18,000,000. Consequently, considering the long years of slaughter that had gone before, nearly every sound-bodied Frenchman left alive was enrolled in this vast military juggernaut that was to roll relentlessly to Moscow, and make Russia one more subject nation. France strained all her resources to back up her emperor. What horses, money, energy, that still remained from Napoleon's previous wars she flung into Russia for this one great gamble.

Planning Napoleon's Downfall.

For Napoleon it was no gamble. Who could withstand his might?

Anyway, the main Russian army was far to the south in the Turkish province of Rumania—well occupied with Sultan Mahmoud. But Napoleon wanted to be sure that this army would be kept occupied. He offered Mahmoud extravagant promises in return for even more vigorous action against the Russians—offered him Russian territory, military honors, money.

Mahmoud, instructed by Aimee, agreed—apparently. And Napoleon, satisfied, moved ever deeper into Russia—as the summer waned and winter approached.

And just as Napoleon anticipated, the second-rate Russian army opposing him was ineffectual He seized Moscow, and had reason to feel that his campaign had triumphed.

But even as he congratulated himself, and settled down to spend the winter comfortably in the captured capital, a courier dashed into his headquarters, bearing a death warrant for more than half a million French soldiers. The first Russian army, supposedly 600 miles to the south, supposedly engaged with Sultan Mahmoud, had miraculously returned—not to Moscow, but to a point squarely across Napoleon's line of communication, 500 miles to the west.

Napoleon seeing instantly the death trap he was in, to quote Morton, "burst into a savage rage, and then sank into despair." He knew he was beaten, that Mahmoud had betrayed him, had secretly made peace—peace at any price—with Russia, so secretly that not one French spy even knew the Russian army had been released, or had marched 600 miles north, until it had cut the single French artery of life. Winter was well advanced—Russian winter; and the entire country roused, and determined to destroy him. His food and munitions could not last a week without provisioning from the west—and the west was blocked. He saw disaster rushing to meet him. There was nothing to do but run for his life.

Retreat of the Doomed.

Helpless, starving, freezing, Napoleon and his invincible army limped out of Moscow, to get back home if they could. The French soldiers struggled westward knowing it was they who were doomed.

And doomed they were. No food—no shoes—no horses. They threw away their guns, abandoned their artillery. And every step of the way, now deep in snow, the Russian Cossacks harried their flanks and rear, killing those who could not keep up.

A great many perished before the fleeing rabble even reached the point where the main Russian army stood across their path—on the west bank of the Beresina river. There, as the French tried to cross the swollen, icy stream, the final slaughter took place.

Napoleon himself narrowly escaped capture on his headlong rush to Paris.

Only a small fraction of the once great tidalwave of soldiers ever got back to their own country.

Safe in the Tuileries palace, with Moscow nearly 2,000 miles away, Napoleon sat, bewildered and despairing—How had it happened—what diabolical mind had directed this annihilating blow? He thought of every possible explanation except the right one—Aimee Dubuc de Rivery, veiled and secluded in Constantinople, hating him, loving Josephine, watching the French plow deeper into Russia and exposing their single line of communication more and more recklessly.

As for Aimee, never for a moment was she bewildered She knew exactly when to strike She directed Mahmoud to make peace with the Russian army—give them anything they asked in return for their promise (easily granted) to march north quickly before Napoleon learned of their coming.

The maneuver succeeded beyond Aimee's wildest hopes.

True, Napoleon escaped capture, but not for long. From that terrible disaster in Russia neither he nor France ever recovered. The year following his return the Allies overwhelmed him, and he was sent to Elba as a prisoner. He escaped, only to go down again in utter and irrevocable defeat at Waterloo.

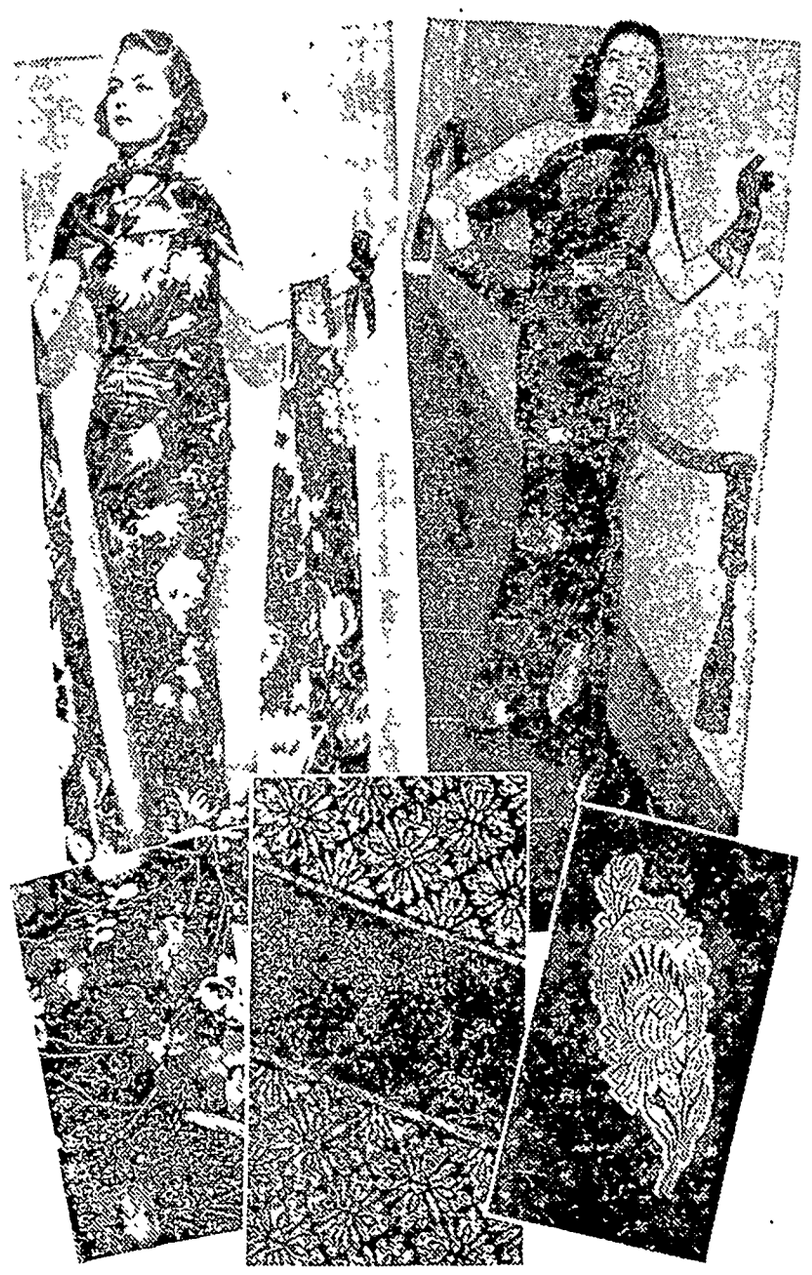
Silks Are Most Sumptuous This Fall

By CHERIE NICHOLAS



THE fourth at... on in country-wide pageantry and during this time your favorite stores will have an unusually wide selection of silk merchandise and the smartest new silk fabrics. Plan to do your shopping for your fall wardrobe at that time when the highlights of the season will be available.

For the important evening wrap, silk and metal brocades in quaintly beautiful colorings or exotic tones are in high favor. These are often elaborate in texture and include self and metal faconne as well as exquisitely colorful metal brocaded flowers. For a floating full-skirted frock, silk and metal marquisette that reminds of oriental sheers that veiled harem beauties, is new this season.

The queenly figure descending the stairs to the right in the picture is gowned in one of the opulent new silks. It is a black satin with self and metal faconne in a leaf pattern. Here is a perfect demonstration of the new trend toward styling the gown with that utmost simplicity that ignores any suggestion of trimming in order the more to play up the superbness of the fabric. It is interesting to note the gloves milady wears in that the cuffs are finished with bands of glittering sequins that match perfectly.

For evening there is nothing more breath taking than the colorful lacquer-printed silk satins. These feature flowers, geometrics, Indian and Persian designs, and they are very new and important. See to the left in the picture how dramatically printed satin of the glamorous type drapes to the figure.

Describing the swatches of handsome silks shown in the insets below, the one to the left is a multicolor stamp printed silk satin for evening. It will prove charming for a short-skirted young dance frock. It is also the type of silk that makes a fetching deep girdle for a black velvet dress—which is one thing about these more elegant silks: if your allowance does not permit buying yards and yards just a mere dash of them used in a trimming way on a monotone frock will give it an aristocratic air.

To the right is a black silk satin with self and metal faconne richly interwoven into a leaf pattern. It ranks high among silks that are done in a grand manner.

Centered in the trio of insets is a black faille with silver metal bandings, suitable for trimmings, blouses, dinner gown or evening jackets.

© Western Newspaper Union.

LEATHER TIE-BELT

By CHERIE NICHOLAS

This very good looking fall coat in bold herringbone patterned soft wool in natural beige has a notched collar of beaver and a wide crush belt of brown leather with fringed ends, each of which is a distinctive feature. The collaring of cloth coats with handsome fur is one of fashion's most notable styling features this fall, while the use of leather in numberless trimming ways, especially for smart girdles, is one of the highest highlights of the mode this season. You can vision for yourself the swank that a leather tie girdle as pictured will give to coats made of cloth. The broad shoulders are also good points in the styling of the coat pictured.

SMART FROCKS USE LAVISH EMBROIDERY

A craze for embroidery is on. Some of the smartest newest woolens for daytime frocks and for the stylish little separate jackets and boleros and for waistcoats and blouses are embroidered with an allover scattering of tiny motifs or perhaps with florals arranged in the popular striped effects.

Knitted fashions also reflect the flair for embroidery in that they carry flowers and designs done in bright yarns showing peasant influence.

The black dress that has a gorgeous bouquet embroidered like a corsage at either the waistline or shoulder is a winsome number. Any woman who can embroider could be the happy possessor of a fetching dress like this for to "embroider your own" requires but little effort.

Evening fashions fairly scintillate with dazzling embroideries. Short sleeves, allover sequin-embroidered, enrich black velvet dinner gowns. Embroidery is done on lace on tulle, on velvet ribbons that girdle the waist and so on and so on the story of embroidery is endless this season. Even the simplest linen, cotton or wool day dress is apt to yield to the present urge for hand stitchery of some fanciful sort.

Youthful Effect Stressed in New Wedding Clothes

The extremely youthful trend of this season's clothes has had its effect on wedding gowns. The most recent Paris brides have been dressed in demure creations of white mousseline or organdie which greatly resemble the frocks worn by French children for their first communion.

Instead of the halo head veils or the conventional wreaths of orange blossoms, lilies of the valley or camelias, the dressmakers are using little round caps of tulle with a long floating veil attached just in back.

Roomy Jackets

A gray velveteen jacket with fullness at the front is smart over a pencil-slim wool dress in matching gray.

HOT WEATHER ADDS TO DAIRY TROUBLE

Rations, Heat, Flys Check an Even Milk Flow.

By John A Arey, Extension Dairy Specialist, North Carolina State College. WNU Service.

Faulty rations, heat and flies are blamed for the difficulty of getting cows to produce a full, even flow of milk through the summer. Grazing in most permanent pastures gets short and tough, and the grass contains less protein than earlier in the season

Temporary grazing crops such as lespedeza and sudan grass are needed to supplement the permanent pasture, or the cows should be fed silage, with the protein content of the grain mixture being increased to 20 per cent.

As the grazing in the pasture decreases the quantity of grain fed should be increased.

Cows suffer from heat, and if possible the place where they are kept during the hot part of the day should be provided with a shade and an ample supply of fresh water.

Flies will irritate cows and keep them from producing a full milk flow As far as possible, fly breeding places should be eliminated. Stalls and manure pits should be cleaned as often as possible, at least once a week, and the manure hauled to the fields. Fly traps and sprays will also help protect the animals from this annoyance.

Sanitation Will Prevent or Check Turkey Disease

Sanitary measures will prevent or check the development of the blackhead disease of turkeys which is killing many poults, according to Dr. E N Stout, State college at Fort Collins, Colo

Some turkey growers are being victimized by irresponsible people who are selling vaccines and medicines as cures for blackhead, Dr. Stout is informed.

No drug or vaccine has been developed that has any value in curing or preventing this disease, he declares. There are, however, he adds, certain sanitary measures which are valuable in preventing or checking this disease.

Turkeys should not be raised with chickens because chickens often are infested with worms which may carry microscopic parasites that cause blackhead after turkeys eat contaminated food or drink polluted water.

It is dangerous to allow turkeys to drink ditch water because of the danger of blackhead infection from chickens on other farms through which the ditch water flows.

"Climacteric" of an Apple

Did you ever hear of the "climacteric" of an apple? It is a new English term, likely to be used in this country, says the Rural New-Yorker It denotes the stage of development of fruit in which all source of food supply from the parent tree is cut off and it no longer has the capacity to build up and repair itself In this stage the fruit takes up oxygen, gives off carbon dioxide, gives off heat, loses cell turgor, and fails to maintain the wear and tear on itself. Speaking loosely this might be called the ripening stage. Most fruit is harvested just before the onset of climacteric.

Age Limit on Pullets

There is a good deal of latitude in the classification of fowls according to size, weight and age, there being no exact limits which may be called into use to designate the birds at their different stages of growth, according to a writer in the Rural New-Yorker. In ordinary usage, a pullet is a female fowl under one year of age, after which age the pullet becomes a hen. As a marketing term for young birds, however, a pullet is an immature female from 8 to 20 weeks of age from three-fourths pound to 3½ pounds in weight.

Pre-Salted Celery

Pre-salted celery may become a new market feature if tests to be made in Dare county, N C., this season bear out present indications. County agent C. W. Overman found celery making excellent growth in waste places near Manteo although the plants were at times covered by tide waters. Those who tasted the celery said the tide water gave the celery just enough salt to make it highly palatable. At any rate, a number of growers are trying plants.

Avian Paralysis in Poultry

In studies at Massachusetts State college avian paralysis is believed to be due to cell or filterable virus which affects the nervous system. It has been transmitted through the egg, though the manner of transmission is not fully understood. Birds with resistance and with susceptibility to the disease have been found The question remains open and much additional study is necessary to clear up many of the important points.

Here's What to Sew

THIS is not a wishing-page, Milady, even though it is from a book of exclusive fashions by Sew-Your-Own! You can run any one of these frocks through your machine in short order. The patterns are so easy to follow (even the simon-pure will say they're simple) and the finished article so exciting you'll be apt to ask yourself, "Why have I waited so long to Sew, sew, sew my own?"

All-Occasion Dress.

Here is one frock that belongs in every woman's wardrobe. You'll look prettier in the kitchen, more comfortable at work—and in your silk crepe version—prettier in afternoon leisure or shopping on the avenue. The shoulder-sleeve-in-one construction makes easy sewing, and the full cut skirt with two kick-pleats serves well when one's in action.

Simple 'n' Charming.

A lusciously feminine frock for you, young but knowing ladies of fashion, is the model looking right at you from above center. You probably can't remember when you've seen one you've liked as much. That vivacious charm plus striking simplicity are the things about it that will make you remembered as the lady in red, or the lady in black, or the lady in what-color-have-you! It is especially easy to sew, too, thank you.

You cute, little lady of fashion, this is your lucky day. You and Mommy will agree on this dress just like two pals should agree. It buttons down the front, the way you want it to; its waist is snug as big sister's, and all in all it will make you feel the best-dressed girl in the whole assembly. This pattern makes up attractively in either cotton, silk, or light-weight wool.

The Patterns.

Pattern 1267 is designed for sizes 34 to 48. Size 36 requires 4 yards of 35-inch material, plus 1⅛ yards contrasting.

Pattern 1362 is designed for sizes 12 to 20 (30 to 38 bust). Size 14 requires 4½ yards of 39-inch material—with short sleeves 4⅜ yards.

Pattern 1213 is designed for sizes 8, 10, 12, 14, and 16 years. Size 10 requires 2½ yards of 35 or 39-inch material, plus ⅝ yard contrasting with 1½ yards of 1-inch bias binding.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

GRASSHOPPER SURVEY INDICATES LIGHT, WIDE-SPREAD INFESTATION

With the Iowa grasshopper survey more than three-quarters completed. Carl J Drake, state entomologist, reveals that the infestation, as measured by the count of adult hoppers, is more widespread but lighter than that found over the state by a similar survey last year.

Complete results of the survey, however, will not be ready for several weeks. According to present data, spots of heaviest infestation are being found in the souhern and western parts of the state This was also true last year.

One of the mot important purposes of the survey, which is conducted by the Entomology Department, Iowa State College, in cooperation with the United States Department of Agriculture, is to gather sufficient information on which to base an estimate of the needs for the 1938 'hopper campaign

"Preparedness," says Drake, "is the secret for success in preventing crop damage by grasshoppers

Galbreth Elected Secretary Of Hancock Schoolmasters Club

At a meeting of the Hancock County Schoolmasters Club held last week at Britt, W Henry Galbreth of Klemme was elected secretary and treasurer; E. G McGreevey of Crystal Lake, president, and Ted Bode of Woden, vice president.

TIMES EDITOR HAS HIS "INNARDS" LOOKED OVER

The Times Editor has been sort of "under the weather" for the past couple of weeks and has been more or less off duty so that Pete Kilgore is practically getting out the paper this week.

Tuesday the Editor went to a Mason City hospital for examination and X-Ray and will go back again this Thursday for another round-up with the "Docs" over there. When they get all through with us they will probably find out what makes us so cussed "honory" at times.

We are in hopes that they will prescribe a vacation in Canada, but it seems that a milk diet will be about all we will get in the way of a change of scenery. Not so good!

So, if the paper is late just remember Pete is doing his best to keep the wheels turning.

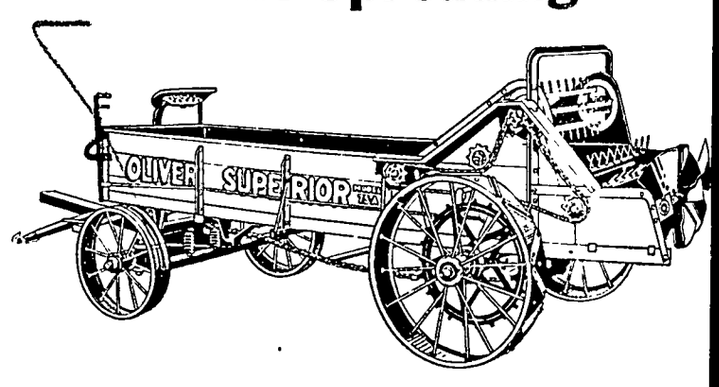
The Spreader with Seven Different Spreading Rates



4 to 28 loads per acre—that's the wide range you have with the *Oliver Superior Spreader!* You can change the rate of spread instantly from the driver's seat—from the lightest top dressing to the heaviest. And the manure will be finely cut and distributed evenly.

A 2-horse team pulls the 75-A Spreader easily, it turns in a 14½-foot circle, and it's built low. It is handy to get in and out of barns or sheds, close to manure piles, and to make sharp turns through gates.

An Oliver will do your spreading job more handily and at a smaller cost. It's long-lived too, because it is spring hung and straight steel sills keep all parts properly aligned.

You'll want to know more about this roller bearing Oliver Spreader. Come in and let us show you its improvements part by part.

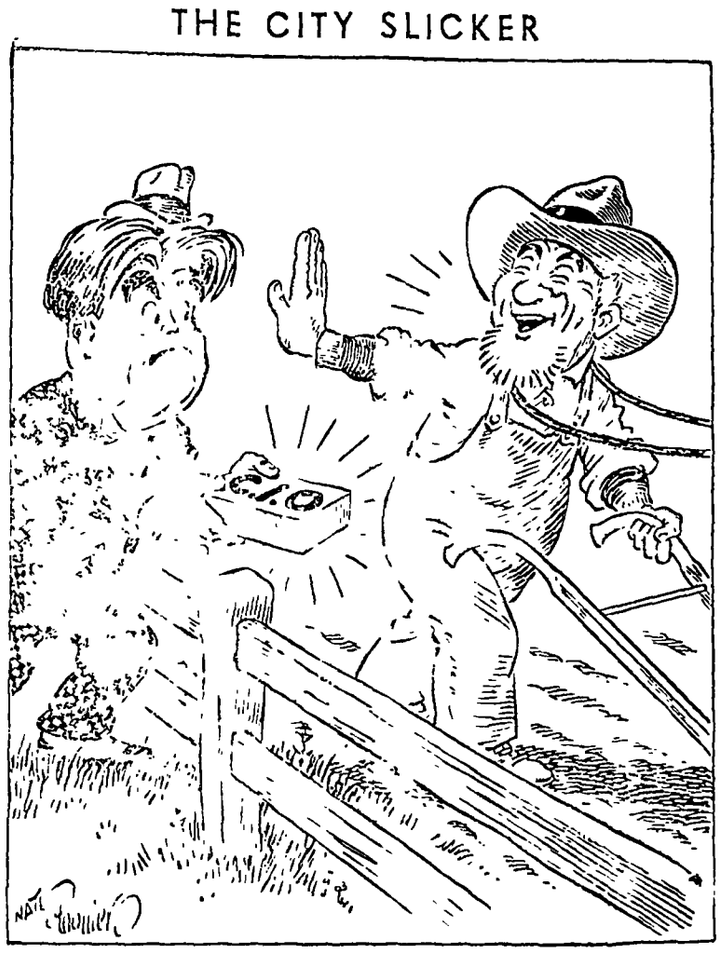
THE CITY SLICKER



Auto Accident Fatal To Mrs. Jay Buchanan Of Near Goodell

GOODELL WOMAN KILLED THURSDAY AS CAR PLUNGES FROM BRIDGE

Daughter, Evelyn, 17, Seriously Injured

GOODELL Mrs Jay Buchanan, of Goodell, about 40 was dead and her 17 year old daughter, Evelyn, lay seriously injured in a Bel- mond hospital Thursday night af ter their car plunged 15 feet off the Old Town bridge one mile east of Goodell about 4 o'clock in the afternoon

Mrs Buchanan and her daugh- ter had spent the day with Mr William Allaben, in Goodell and were on the way to their home a- bout four and a half miles north- east of town when the accident occurred

Students Offer Help

Two Goodell high school stu- dents, Willard and Boyd Nelson reached the bridge shortly after the mishap and were able to ex tricate the girl who was badly hurt and unconcious. They hur- ried toward town with her but on the way she regained conciousness enough to tell the boys that her mother was in the car They re- turned to the scene of the accident and found sufficient help gathered so that the car could be turned ov- er and the body of Mrs. Buchanan removed She had a skull fracture but it is not known for sure whether she died instantly or drowned before help came.

Physicians at the Belmond hos- pital stated Thursday night that Miss Buchanan would likely re- cover from her injuries.

Wrong Approach

Those arriving an the scene shortly after the accident stated that the car, a light coupe belong- ing to Mrs Buchanan's son, Gor- don, apparently had not squarely approached the paralell planking recently placed on the bridge flooring and had got out of con- trol.

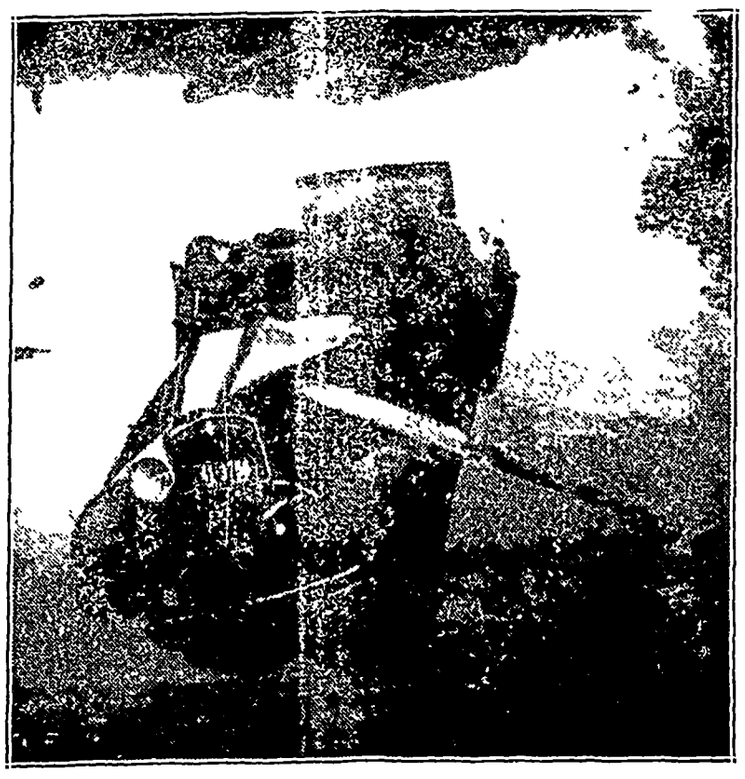
Mrs Buchanan's husband was in Mason City at the time the ac- cident occurred She has another son, Courtland, who is employed in Mason City.

Similar Accident

Other survivors are two broth- ers, Hamblin Allaben, of Tracr and Vincent of Chicago; two sis- ters, Mrs. Robert McNutt of Goo- dell, and Mrs Dorothy Genes of Rock Island, Ill

Thirteen months ago Henry Van Osten of Meservey was kille1 in a similar accident at the same bridge.

Where Goodell Woman Drowned



Mrs. Jay Buchanan, 40, was drowned when she was pinned be- neath this car after it plunged from a bridge a mile east of Goodell. Her daughter, Evelyn, was extricated from the wreckage. A year be- fore another Iowan was killed when his auto plunged from this same bridge. (Iowa Daily Press photo.)

Prehistoric Elephant Found Near Klemme

SHAMROCKS DOWN CRYSTAL LAKE NINE

Kluckhohn Struck Out Nineteen

Schuldt, Grosshuesch, and Kluckhohn were the heroes of Klemme High School's 6 to 5 vic- tory over Crystal Lake in a base- ball game played at Garner last Thursday Schuldt belted a right field home run that was just being picked up as he crossed the plate, Grosshuesch slammed out a time- ly three-bagger to bring in a much-needed run, and Kluckhohn struck out eighteen opposing ba- ters to set what is probably a **Kluckhohn Struck Out Eighteen** north Iowa record for the fall season in seven innings of base- ball

It was a peculiar game in many ways Klemme was limited to three hits by Monson, the visiting pitcher. Trampel beat out an in- field single for the only Shamrock hit other than the long ones On the other hand, the Lakers col- lected six hits in the times at bat when they weren't faaning Mon- son was able to strike out only seven Klemme batters, and Swan who took the mound in the last inning lost the game by hitting Wicks with a pitched ball and then walking Grosshuesch, Buse- man, and Schuldt in succession

HANCOCK COUNTY MAY HAVE HUSKING CONTEST

With the corn husking season near the possibilities of a contest in Hancock County are being dis- cussed, accordng to T C Petersen, county agent With the good corn crop this year it will be com- paratively easy to find a field suitable for a contest Anyone in Hancock County who is interested in husking at a contest this year please leave word at the Farm Bureau office at once Whether or not we will try to hold a husking contest will depend on the num- ber interested in competing

Attends Business College

Miss Ada Wille is attending the Hamilton College at Mason City again this year.

Guarding Our Guarantee of Liberty

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

Since our inception as a nation, the proudest boast of our American Republic has been its guarantee of civil and religious liberty.

That guarantee is written into our Constitution. It is the first article in our Bill of Rights It is the lodestone that has attracted to our shores, through successive decades, men of faith and character

It is inextricably woven into the whole American tradition.

Above all things, it is that guarantee which differentiates life in America from life under the new European dic- tatorships, whether of individual men or of favored groups. It remains a keystone of the structure which pro- tects free democracy from the assaults of intolerance and oppression.

The citizens of our young Republic recognized all this when they wrote into the Federal Constitution a dictum that

"Congress shall make no law respect- ing an establishment of religion, or pro- hibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of griev- ances."

Modern Americans must recognize it too, and continue—as did their fathers —the defence of this national tradition from threats in any form, or from any source

Eternal vigilance remains today, as in the era of the Founders, the inexor- able price of liberty.

And to that high ideal of liberty— both of action and of spirit—America still is dedicated.

WELL PRESERVED BONES FOUND ON ART KNOKE FARM IN LIBERTY

Quentin Stille And C. L. Blani Found Bones In Tile Ditch

Last week Wednesday when Quentin Stille and C. L. Blank were digging a tile ditch in a swamp on the Art Knoke farm four and one half miles west of Klemme, they found several sec- tions of a very large bone which, when assembled, appeared to be the fore leg of some large animal

The men brought their speci- men's to Klemme and were ad vised to notify the State Histori- cal Society of their find. Mr. J. R. Harlan, museum director of the Society drove up Friday to ex- amine the bones and to look over the location of the discovery.

The bones were found about four and a half feet in the ground and were in a deposit of clay in a swamp which was being drained. Mr Harlan identified the bones already found as belonging to a prehistoric elephant

Further excavations were made and a large tooth was soon found and by this means Mr. Harlan was agle to identify the animal as a Mammoth The tooth, a molar, was approximately twelve inches long, about six inches wide and eight inches deep. The top surface had corrugations similar to the corru- gations on a wash board and it was this formation which enabled him to identify the elephant as a Mammoth The teeth on the Mas- odon are cupped, rather than cor- rugated The tooth was taken to Des Moines by Mr. Harlan where it will be put on display together with information as to the location and the name of the finder.

Lived Here 25,000 Years Ago

The Mammoth, a species of el- ephant, scientifically known as "Elephas Columbi," once roamed this part of the country during the Pleistocene period, before the glaciers leveled this part of the country into its present terraine. Climatic and other changes caus- ed their extermination and they are not found in Iowa only from their remains which are found in excavating.

In Siberia Mammoths have been found that have fallen into crev- ices in the ice thousands of years ago and were frozen solid. These animals are so perfectly preserved that people have actually eaten the flesh of these animals that have been dead for over twenty thousand years.

Were Large Animals

The Mammoth was a gigantic beast, generally nine or ten feet at the shoulders. The body was covered with thick hair, shaggy and long on the outside and woolv underneath The tusks were long and slender and were curved up- ward and outward, sometimes in a complete spiral.

The specimens found by Stille and Blank were in the territory where the Wisconsin and Iowa glaciers overlapped Estimating on that basis Mr Harlan said the specimen here was between 25,000 and 50,000 years old, probably ev- en older.

LARGE CROWD ATTENDED KLEMME FIREMEN'S DANCE

The dance staged by the Klem- me Fire Department last Wednes- day night drew a capacity crowd and the general reports are that everyone had a good time. Both old time and modern music was provided.

After paying all expenses the Firemen cleared $100, which will be used for buying needed fire fighting equipment.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington.—It always comes about that when a nation or an individual acts without thinking a problem through all of its angles, there is a fine mess at the end. There can be no surprise, therefore, in the mess confronting this nation over the policies and laws affecting the relations between labor and capital. The condition probably constitutes the worst mess of any we have seen in the last five years—and the end is not yet.

What a Mess!

At the present time we find not only bitter strife between the old established American Federation of Labor and the Committee for Industrial Organization headed by John L. Lewis; a national labor relations board that cannot be described by any stretch of the imagination as being unbiased, and political leaders from President Roosevelt down the line are quite unable to determine what their position should be between the warring factions of labor. Meanwhile, we find employers wholly unable to deal with either faction successfully because of the interference of the labor relations board and the instability of responsible officials.

The case in point and the incident that brings the situation immediately before the American people involves a comparatively small number of workers but it exposes all of the fallacies that have been allowed to become part of the law of the land through the labor relations act which was forced through congress by Senator Wagner, New York New Dealer, with Presidential support.

Let us review the picture:

Late in August, the United States district court in Pennsylvania issued a decree that the National Electric Products corporation of Ambridge, Pa., must sign a wage contract with the International Brotherhood of Electrical Workers, an organization affiliated with the American Federation of Labor. The court ordered the action as a result of difficulties between the American Federation of Labor and the United Electrical Workers which is connected with the Committee for Industrial Organization. The manufacturing corporation had no alternative but to comply with the court order. If it did not do so, its officials faced jail sentences for contempt.

Within a week thereafter, along comes the national labor relations board with a ruling that the manufacturing corporation must sign a wage contract with the Committee for Industrial Organization union or be subjected to the penalties and punishment provided in the Wagner labor relations act. The board took this position with full knowledge of the federal court decree. It went so far, even, as to say that "the decree (of the court) is no bar to the instant proceeding under the national labor relations act or to the making of an order by the board under the terms of that act, that the respondent shall cease and desist from discriminating against the employees because they decline to join the brotherhood." In other words, the board took the position that the Wagner labor relations act was the supreme law of the land and the board, therefore, was the sole arbiter regardless of the court action.

I do not know anything about the merits of the workers' claim that the manufacturing company had mistreated workers, had fired men for union activities or had engaged in attempts to break up union organization. Those claims may be fully justified; indeed, the chances are that there was anti-union activity on the part of the corporation and that it should receive a legal kick in the pants for these things. But whatever that situation is, the fact remains that the national labor relations board consistently has horned into every controversy and, whether it means to be that way or not, its actions have been favorable to the Lewis Committee for Industrial Organization.

Further, among the most extreme of the New Dealers themselves, one frequently hears the observation that the labor relations board has given no consideration at all to the rights of the employer.

Of course, the board claims it is acting under strict construction of the law. Then it holds that congress intended it to take the place of the courts in deciding as between labor groups. It is to be remembered, however, that all members of the board are appointees of President Roosevelt and the presumption naturally follows that Mr. Roosevelt must approve of the board's policies. It is too much to suppose that the board would act against the wishes of the man who named its individual members.

All of these facts make it appear that instead of having a labor policy, we have on the statute books a law that has led us straight into the mess that I described at the beginning of this discussion. I am wondering when it can be or will be corrected. Superficially, the facts of the labor relations board history thus far make it appear that the members of that board are aligned with John L. Lewis and the tactics he has employed. If they are, and if President Roosevelt wants to protect trade unionism in this country, it seems to me he ought to get rid of the members of that board and name commissioners who can be fair between the two labor groups whether they want to consider the rights of those who pay the wages or not.

* * *

On top of the situation I have described comes a fresh outburst from John L. Lewis in the shape of a threat against those officially responsible for administration of federal affairs. In fact, few persons could have heard the Lewis Labor day radio speech without realizing that the shaggy haired C. I. O. leader was telling Mr. Roosevelt to refrain from placing any obstacle in the C. I. O. pathway. Some commentators went so far as to say that Mr. Lewis had slapped the President's face in that speech.

Lewis' Outburst

It will be recalled how some time ago the President told the newspaper correspondent in a press conference that he was taking no sides between the A. F. of L. and the C. I. O. The expression he used was a line from Shakespeare: "A plague on both your houses." I quote Mr. Lewis' reply to that remark:

"It ill behooves one who has supped at labor's table and who has been sheltered in labor's house to curse with equal fervor and fine impartiality both labor and its adversaries when they become locked in deadly embrace."

Thus it becomes plain, I believe, that Mr. Lewis is determined to go forward with his labor problems into the depths of politics. From his $25,000 home in Alexandria, Va., Labor Leader Lewis directs the hundreds of subordinates, the reds and pinks, the whites and blacks, from which he apparently expects to develop a political organization strong enough to control this nation.

* * *

President Roosevelt is on another "inspection trip" of the nation. Before he left, he told the press that he wanted to see for himself what the New Deal had accomplished, explaining that there would be a few speeches, but that there would be more "intake than outgo" on the trip.

President on Tour

Washington political observers almost unanimously agreed, however, that the inspection trip had a much deeper purpose. They noted that the President was visiting various states from which there were members of the United States senate who had opposed the President's plan to increase the Supreme court by six appointees of his own choosing. Among these senators were Wheeler of Montana, Burke of Nebraska, Clark of Missouri, and O'Mahoney of Wyoming. They noted further that some representatives who had been outspoken in opposition to the court bill were privileged to have the President visit their home districts.

These political students arrived at the conclusion I have mentioned despite the declaration of Postmaster General Farley who, as chairman of the Democratic National committee, said that there would be no reprisals against senators and representatives who had opposed the court bill. Mr. Farley's promise of no reprisals came, however, after the now famous radio speech by Senator Guffey of Pennsylvania. Mr. Guffey is chairman of the Democratic senatorial committee which has the job of promoting election of Democratic candidates for the senate. When he said, therefore, that opponents of the court bill ought to be defeated and listed the names of a number of senators who should not be re-elected, it does seem that there may be a connection between the Guffey speech and Mr. Roosevelt's inspection trip. Some commentators have been uncouth enough to assert that the inspection trip by the President was for the purpose of determining whether it would be possible for the New Deal to obtain destruction of those Democrats who had disagreed with the White House.

Aside from the court bill, it seems entirely reasonable to suppose that Mr. Roosevelt desires to gain knowledge of the country's general temper. He has refrained from announcing whether he will call a special session of congress this fall to take up agricultural legislation, saying only that he will decide later. Secretary Wallace is very anxious that this shall happen. Officials of his department have been traveling by plane, train and motor through the country during the last two months in an effort to build up sentiment for the secretary's kind of farm legislation. They have been making these trips at taxpayers' expense, too.

king Wools for Town, Campus

By CHERIE NICHOLAS

ART clothes are alive with fabric interest this . The woolens that tailor lown and campus needs especially intriguing and ing that the first requisite a perfect autumn ward-be is a tailored outfit that ll prove "first aid" no atter what apparel emer-ncy may arise, here's telling you out the fascinating weaves that ad in fashion this season.

Tweeds especially have a lot of exture interest. They are nubbed nd flecked in decorative weavings hat capture your fancy at first ight. When you go tweed shopping, nd of course you will if you are ssembling a school-faring clothes ollection, ask to see some of the ew-this-season candlewick tweed, he latest herringbone weaves, mart diagonals, the houndstooth, attersall, ropey plaid and sugar-af patternings, and you will feel, aving seen these, that you have ad a liberal education on the sub-ect of tweeds at the very start.

The next thing is to decide on which tweed is the tweed you want most. To help you out we are suggesting a nubby beige tweed flecked with white such as makes the smart three-piece costume as shown to the left in the picture. Here is an outfit that is ideal for fall wear on campus or in town. It pretty near comes to being a whole wardrobe in itself. A suit that has a topcoat as has this is an economical buy no matter what it costs, for it takes care of the problem of an early fall coat since it can be worn as a separate wrap. Note its button-back revers, also the unpressed pleats running down from the slash pocket lines The matching suit has a chic high lapel collar, triangular pockets and narrow leather belt. The skirt is cut straight and slim as a fashionable daytime skirt must be this season.

And we are not through talking about tweeds for we just must mention the especially lovely "winter pastels" that belong to the tweed family. More than likely you won't be able to resist them because of the fine shetland and other fine yarns used in the spinning. You can get novelty open weaves if you wish.

Very youthful and attractive for campus wear is the two-piece frock of sheer rabbit woolen centered in the group. The pleated-all-around skirt bespeaks "last word" vogue. You really must have a pleated wool skirt if you are going away to school to wear with your sweater, with your suede jacket, and with blouses galore. The wide shoulder line, high lapel collar and front-buttoned jacket closing are nice points but we've saved the nicest point to the last—those cunning little bows on the pockets! Now there's an idea that's going to send you right to the head of the class. Made of the very self-same material as the suit itself these bows add infinitely to the chic of this most attractive outfit and make it outstanding.

A luxurious natural wolf tuxedo collar runs the length of the topcoat of this stunning three-piece costume shown to the right. The tout ensemble is made of novelty woolen with a diagonal rib weave in deep brown flecked with beige. This outfit is entirely in line with the vogue this season that calls for lavishment of fur on suits and coats. The tuxedo effects are especially good this season. Handsome furs will be used unsparingly with care taken in achieving color blends that unify the costume.

Citing other fashionable wool weaves, there are the new coating fabrics that have long hair interspersed and tightly embedded in the texture, their sheen contrasting against the soft surface of the fabric. Tightly twisted boucle nubs are also decorative and colorful. Persian lamb cloth is a new fabric this season. For children's coats, a new chinchilla fabric in soft colors is important. Fleeces, both woven and knitted, are in demand. Suedes, velours and duvetynes are outstanding for dressy wear. For formal type costumes broadcloth is a leader.

DRAPE AND SHIRR

By CHERIE NICHOLAS

A perfect afternoon frock for the young girl is this style in spongy texture lightweight wool. The draped button-over neckline and the shirring at the bodice are very new and attractive. A narrow gold-colored belt accents the fitted waistline. The skirt is softly flared.

Double-Duty Capes

Enter the double-duty shoulder cape, which may be looped up over the wearer's head and used as a hood.

DAYTIME SKIRTS TO BE SHORT AND SLIM

By CHERIE NICHOLAS

Short, slim and pencil-like is the dictum for daytime skirts. The accepted length for the suit skirt is from twelve to fifteen inches from the ground. Depends on how conservative you may be. Of a necessity these narrow skirts often have slashed hemlines. Daytime dresses hover about twelve to fourteen inches from floor.

For evening dresses the newest thing is the short-in-front hemline In fact uneven hemlines are a most important styling detail. A few designers continue to favor the short full ballerina skirts for dance frocks. There are dinner gowns galore that are ankle length and sheathlike, for the most part in sleek black, many of which are enlivened with glittering touches.

The majority have high necklines with flattering short sleeves. However, in the practical daytime dresses long sleeves perfectly fitted, also bracelet sleeve lengths are featured.

Slide Fasteners Used

The Schiaparelli type of housecoat developed in flannel and fastening at the front with a patent slide fastener is popular.

Flaring Youth

For college girls and the very young, important collections include gored, flaring skirts and some which are pleated all around.

'Way Back When

By JEANNE

FAMOUS SONG WRITER WAS NEWSBOY

PEOPLE who are able to help others express happiness and those who amuse us always have a chance for success far out of proportion to circumstances of birth or environment. So, rightly, the world sees to it that persons who can drive away care have no financial worries.

Irving Berlin was born in Russia in 1888, the youngest of eight children His father, a cantor or psalm-singer in the village synagogue, brought the family to New York's East Side tenement district when Irving was four years old The boy loved to sing, but his first jobs were as a newsboy, and a telegraph delivery boy His was the depressing life of the slums child, street-fighting, swimming in the dirty East river, dodging traffic in the streets at play At fourteen, he left home to sing in saloons for pennies the patrons tossed to him. He was in the chorus of a musical show, was a waiter in a Chinese restaurant, and a singing waiter in a couple of night clubs.

Up to this time, the happiness Irving Berlin brought to others was limited to the few people who could see and hear him. His voice was not unusual enough to bring him to the top rank of entertainers. Then, he started writing songs The first one brought him only 37 cents, the next, $25; but thereafter he advanced rapidly. He worked often until two or three o'clock in the morning, and by the time he was thirty-six, 300 songs had been published under his name, including such world-known hits as "Down on the Farm," "Everybody's Doin' It," "My Wife Has Gone to the Country," and "Alexander's Rag time Band."

* * *

PRESIDENT WAS LAUNDRYMAN

WORK is a habit, and to those who acquire it it becomes fun, relaxation coming through the kind of work done. In analyzing the lives of successful men and women, we usually find that they got the work habit early in life and never lost it.

Herbert Hoover was a worker. He was born in 1874, in West Branch, Iowa, the son of a blacksmith. His father died when he was six years old, his mother when he was nine; and he went to live with an uncle who operated a Quaker academy in Oregon. Herbert earned his board by doing odd chores, feeding and currying the horses, milking cows, and tending the furnace. All of this was in addition to his regular school work and, as if this were not enough work for a young boy, he studied English literature and history outside of school hours Later

in Salem, Oregon, Herbert worked as an office boy for his uncle, and went to night school until he had enough credits to enter Leland Stanford university. He worked his way through by acting as clerk for the registrar, and handling and delivering the San Francisco News on the campus. Later he started a laundry agency, calling for the bags of soiled laundry and delivering the bundles himself.

In 1893, Herbert Hoover got a job with the United States Geological society. He had natural ability at engineering. That together with the habit of work, gained rapid progress for him. He became nationally known as a successful engineer and a business man. In 1928 he became President of the United States.

Herbert Hoover was born with no silver spoon. Orphaned early, he had to fight for every bit of knowledge, for every opportunity. But Herbert Hoover was born with the habit of work, and he had the good luck to keep that habit. His reward was success.

When King George Received the Big News from America

Samuel Morse, inventor of the electric telegraph, had only one ambition as a young man and that was to become an artist. He studied under Washington Allston, then the greatest painter in the United States, and with Allston went to London in 1811. There he met Benjamin West who, although an American, was president of the Royal academy, and a great favorite with the king, who later made him Sir Benjamin West.

West was actually at work on a portrait of the king when the latter was handed the Declaration of Independence. Morse heard the piquant story from West himself, says Ernest Greenwood in "From Amber to Amperes." Here it is—as related by Morse:

Turning to the picture of the king, Sir Benjamin West said:

"Do you see that picture, Mr. Morse? Well, sir, the king was sitting for me when the box containing the American Declaration of Independence was handed to him."

"Indeed!" I answered, "and what appeared to be the emotion of the king? What did he say?"

"Well, sir," said West, "he made a reply characteristic of the goodness of his heart," or words to that effect. "'Well,' he said, 'if they can be happier under the government they have chosen, then under mine, I shall be happy!'"

Morse stayed four years in England where he achieved considerable success as a portrait painter. Then returning to his native country, he afterwards became president of the national academy and an eminently successful painter, his sitters becoming so numerous that he was unable to meet and fill all of his orders. It was during his return voyage to America in 1832, following a second visit to Europe, that Morse got his conception of the telegraph. Twelve years later—May 24, 1844—he gave a public demonstration of his invention, sending a message from Washington to Baltimore.

The rest is well known history. —Kansas City Star.

A Worthy Object

WILL power is the mental experience exercised in bringing about a desired end. Therefore, I say that a man must necessarily have a worthy object in view to bring out the best in him—that a man must see more than a salary to be more than a salaried man A man must see the position of ownership, partnership, management, or increased award, in order to awaken his will power.

The man who does good to another does even more good to himself.

Funster Ought to Have Recognized His Fellow

Jones de Vere Jones decided it would be fun to spend a day in the country. Back to Nature, and all that.

Meeting a farmer in a field he thought to have some fun with him.

"Good-morning," he started. "I must say I admire your part of the country."

Then he noticed a scarecrow in the middle of the field.

"And is that one of the oldest inhabitants?" he went on, pointing to the scarecrow.

"Naw, zur," came the slow reply. "That be no oldest 'habitant. Just a visitor like yourself."

The Scales

WHAT goes up must come down. Or if you wish to put it in more scientific language: Action is equal to reaction and in the contrary direction.

This is the law of compensation. It is the one fixed, immutable law of life and it applies to everything, everywhere. It cannot be evaded or avoided. The working of it may be immediate or it may be a matter of centuries, but if we keep ourselves aware of it we may be saved disappointment and disillusion.

The extent to which we try to restrict that law is absurd. We speak of balanced budgets, balanced rations, and the balance of trade; but we quite ignore balanced lives and balanced sociology; so, in the end, Nature takes the job off our hands, with the consequent upheavals and disturbances.

We work or play to excess, we indulge our appetites and our senses to repletion, perhaps to gluttony, and when we suffer during Nature's work of restoring balance, we rail at fate.

In monarchy and republic we allow our thirst for power and for money to overbalance our lives, both individually and socially, then blame God and man for the chaos which attends the restoration of balance.

In all the affairs of life we may evolve philosophies and devise systems; but just so long as they are out of balance, individually, socially, industrially or governmentally, just so long will the scale teeter up and down to our discomfort.

If as individuals our lives are out of balance, the structure as a whole must also be out of balance; and in time that balance must be restored—by us or by THOSE WHO FOLLOW.—Ray S. Ayers in Detroit News.

First Choice OF FARMERS

FARMERS everywhere are saying that the amazing Firestone Ground Grip Tire is FIRST in performance and FIRST in economy. So many thousands of farmers are changing over to this wonderful tire that production has been greatly increased to meet the demand.

FIRST IN DRAWBAR PULL. The greater drawbar pull of this amazing tire accounts for its ability to do more work in a given time.

FIRST IN TRACTION. The patented Ground Grip Tread takes a deeper bite into the soil. Added strength to resist the strain of heavy pulling is provided by Gum-Dipping the cord body. Every fiber of every cotton cord is saturated with liquid rubber by this patented Firestone process. Two extra layers of Gum-Dipped cords under the tread bind the tread and cord body so solidly together that we guarantee they will not separate.

FIRST IN ECONOMY. Saves up to 50% in fuel over steel-lugged wheels. Covers more acres per day. Low-cost Firestone cut-down wheel program permits using one set of tires on several different implements.

FIRST IN SALES. Firestone Ground Grip Tires have such outstanding leadership in performance that sales are soaring. Don't wait another day—see the Firestone Ground Grip Tire today at your nearest Firestone Implement Dealer, Tire Dealer or Auto Supply and Service Store.

Listen to the Voice of Firestone featuring Margaret Speaks; Monday evenings over Nationwide N. B. C. Red Network

MORE FARM TRACTORS ARE EQUIPPED WITH FIRESTONE GROUND GRIP TIRES THAN ALL OTHER MAKES OF TIRES COMBINED!

A WELCOME TO AUTUMN

Over most of the United States the Autumn season, on which we are now entering, is the pleasant est season of the whole year Nothing like the North American Autumn is known to the people of Europe Over there the Spring is the pleasant time of long-drawn-out mildness between the chill of Winter and the heat of Summer In this country the seasons break abruptly in the spring, Summer temperatures succeeding Winter so swiftly that the interval is hardly noticed But at the end of Summer we are not plunged at once into Winter Instead, we have the long Autumn, weeks and sometimes months in which it is still enjoyable to remain out of doors most of the time, before we look for snow and ice

For country folk in the north, especially, Autumn is the best season of all The hard work of the farm is over, the crops have been harvested and stored or sold and there is a breathing spell in which the farmer and his household can relax and "go visiting," attend to a hundred things for which time could not be spared in Summer, perhaps take a long motor trip

The shooting season is open, or soon will be, almost everywhere Whether one brings back any game or not, there are few things more relaxing and invigorating than a day in the woods with a dog Nowhere is the air so clean, nowhere does nature make such a powerful appeal to the nomadic spirit which is in us all, as in the northern woods when the leaves have begun to turn from Summer green to their Autumn brilliance of red, yellow and brown

Nor is Autumn in the South without its delights for the lover of the out-of-doors The fish are still biting, the 'coons and foxes are daring the hound-dogs to catch them, "Bre'r Rabbit" is shaking his cotton tail in the clearing by the briar patch, and the fragrance of the tall pines is like incense ascending in nature's cathedral of the great out-of-doors, in which their straight trunks are the pillars supporting the high dome.

This is the best of all times of the year—Wright County Reporter

Travel to Egypt Began About the Year 900 B. C.

Commercially inspired tributes to Egypt indited by travel writers seem fulsome and weak when compared with the comments of Herodotus, who traveled through that land some 2,800 years ago, according to an authority. His plain statements were more forceful than any subtle use of adjectives.

"Of Egypt I shall make my report at length," his discourse begins, "because it has wonders more in number than any other land, and works too it has to show as much as any land, which are beyond expression great." Eminently a man of the world, the most widely traveled of his age, Herodotus nevertheless could not contain his astonishment at many of the sights in Egypt.

He called the Nile "unlike any other river." He evinced great respect for the mental attainments of the Egyptians—"the most learned in the history by far of all those of whom I have had experience." But it was on the subject of Egypt's renowned climate that the Greek philosopher-historian showed himself at his best. "The Egyptians," he wrote, "are the most healthy of all men next after the Libyans, in my opinion on account of the seasons, because the seasons do not change." That single sentence contains the gist of many dissertations on the healthfulness of Egypt's unfailing sunshine.

Bond Street of London Named After Speculator

During the Seventeenth, and Eighteenth and the first half of the Nineteenth centuries the Bond street of New York and the Bond street of London had a similar aspect—both were lined with the residences of the well-to-do. Here those of bankers and merchants, there the homes of the landed nobility. Later in both streets merchandising prevailed.

The origin of the New York name is obvious; that of the London street came from Sir Thomas Bond, a Seventeenth century courtier attached to Queen Henrietta Maria, who was always persona grata at the Court of Whitehall in the reign of Charles II, to whom she is said to have advanced large sums of money.

According to Arthur Dasent, writing in the Daily Telegraph of London, toward the end of Charles' reign Sir Thomas began to speculate in London real estate, particularly in the West End, in the Parish of St. Martin-in-the Field. His first transaction as recorded in the local Rate Book was when he acquired in 1683 Claredon House in Piccadily from General Monk's son, the second Duke of Albermarle, pulled it down and laid out both Albermarle and Bond streets through the property before he rebuilt.

Palestine Memorials

Palestine is rich in Crusader memorials. Even the Church of the Holy Sepulchre is said to represent Crusader's work, for the south facade and many parts of the sacred building, particularly the bell tower, were built by them during their occupation of the city. Both at Ramleh and Lydda, two important towns on the road between Jerusalem and Jaffa, may be seen churches built by the Crusaders. Near Arsuf there are the remains of an old castle which was occupied by Richard Coeur-de-Lion, King of England. Many of the castles and fortresses remain as safe and sound as they were when armies of Western Europe, led by pious knights, invaded Syria and Palestine from 1093 to 1291, and waged their holy wars. These "Soldiers of the Cross" left their mark in Palestine in the names of Belfort, Belvoir, Mirabel, Blanchegarde or Singil (St. Giles.)

Frost Smoke

Frost smoke is a fog which rises in wreaths from open water which is relatively warm compared to the overlying cold air. This fog usually consists of ice crystals (snow). Frost smoke forms more readily in very cold weather when the wind is calm or very light, and when the difference between the temperatures of the water and the air is large. The fog slowly drifts away from the open water over adjacent ice and gradually deposits a slight covering of snow on the ice.

Discovery of Hot Springs

Pioneer trappers who first penetrated Arkansas found a series of mineral springs at what is now Hot Springs. They bathed in the waters and praised their medicinal value. Soon their fame reached the ears of President Jefferson, who sent Lewis and Clark to investigate. Another famous series of hot springs is at Rotorua, New Zealand. The springs cover an area of 660 square miles and vary in temperature from 60 degrees to the boiling point.

Caviar Roe of Sturgeon

Caviar is the roe of the sturgeon. The fish has a long snout with which it roots in the mud for worms. It is notable for its bony armor. It ascends rivers to lay its eggs and seems to prefer the Volga, in Russia. The eggs are gathered up and shipped to all parts of the world. During the reign of England's Edward II the sturgeon was declared a royal fish and has so remained.

METHODIST EPISCOPAL CHURCH

William Zabilka, Pastor

There will be no services at either the Klemme or Liberty Methodist Churches next Sunday. October 3rd

The first Birthday pot-luck supper and social of the opening of the new Church year will be held at the Klemme Church on Tuesday evening, October 5th All members and friends of the Church are invited.

In Hospital At Iowa City

J E. Stille is in a hospital at Iowa City where he underwent a major operation last Thursday Mr Stille was taking his daughter, Marie, back to college when he became suddenly ill and was taken to a hospital We understand he is making a good recovery

Value of Guinea Pigs

The guinea pig or cavy is commonly kept as a pet, possessing the advantages of being clean, harmless and without offensive odor From a commercial point of view, his value is for laboratory and experimental purposes. The original ancestors of the domestic guinea pig are thought to have lived in the highlands of Peru, where they were domesticated by the Incas They were allowed to run freely about the homes of their owners and were probably bred for their food value

Battle of the Flowers

The battle of the flowers is a feature of carnival celebrations which originated at Nice. Vehicles are adorned with flowers and as they are driven through the streets the occupants salute their friends by throwing flowers at them. The greeting is returned in kind and the battle continues for many hours. In many continental cities the battles take place at other times.

Sea Lions Use Sense of Smell by Touching Noses

Sea lions, like dogs, use their sense of smell by touching noses to identify one another at close range, but fail to react to distant odors. They are adept at spotting moving objects from considerable distance. Except when off on fishing excursions, they are gregarious by nature, collecting in large groups on favorite rocks or rookeries and generally making a big fuss and noise over nothing. About the only time they ever become hostile is when their pet place in the sunshine is challenged.

The cows have only one pup a year. If anything happens to the mother the pup will die, because no other mother would adopt it. They are not like dogs or cats or other animals in this respect, says a writer in the Los Angeles Times. A peculiar habit of the cows approaching pupping time is to form "rafts" by lying belly-side up in the water with their flipper protruding above the surface. From a distance a string of eight or ten cows floating end to end this way resembles the charred remains of a boat that has burned to the water's edge, with only stubs of the ribs left showing. This is probably a means of absorbing beneficial rays from the sun.

Attended National Legion Convention At New York City

Ferdinand Lemke, of near Meservey, has returned from New York City where he attended the National Legion Convention. Mr. Lemke is an enthusiastic Legionaire and if we are correct, he has never missed a convention

inspection requirements for certification The names of these growers who will have certified hybrid corn for sale are being published in the booklet, "Know Your Hybrid Corn," which may be obtained free of charge from county agents or from the Iowa Agricultural Experiment Association, Ames, Iowa. In addition to these names this booklet tells briefly and effectively the real facts about hybrid corn

By always insisting that all hybrid corn seed which is purchased is CERTIFIED hybrid corn seed, the grower is assuring himself of buying a hybrid whih has been tested in the Iowa Corn Yeld Test and has yielded at least 10 per cent more than the average open pollinated strains in a given section, and has a combined superiority in both yield and stiffness of stalk of at least 25 per cent In addition, certified seed must be of good quality and germinate not less than 90 per cent strong

Seed corn which is sold as hybrid but which does not bear the blue tags of certification, may or may not give the grower the crop advantages that certified hybrid corn seed guarantees, Mr Robinson warned. With no record of performance or pedigree or of methods used in production the so-called "hybrid" seed which has not been certified may actually be inferior to the ordinary open-pollinated varieties

Grade School News

Grades 1 and 2

We have planned a Reading party for Friday We invited Miss Azeltine's boys and girls The second graders are going to read poems, riddles and stories and the first graders will say some nursery rhymes and read their charts

Next week we are going to have a vegetable fair

Mr Patet brought us some sand for our sand table

The second graders pasted pictures in their scrap books Thursday.

Grades 3 and 4

(By the Class)

This morning we took our toads, Popeye Tom-Tom and Little Bitsy over to Kudje's garden so they could find their winter home

Ronald Brinkman brought three Monarch butterflies to school Friday

Richard Tiggeman and Marilie Ridder visited in our room.

We have our rock collection started We put the name of the person who brought the rock and where he found it beside his rock.

We had a fire drill Thursday afternoon

Wednesday afternoon we all went to the park. We sat on the ground and Miss Azeltine read a chapter of "Sonny Elephant"

Phyllis Christiance is visiting in South Dakota

Walter Tanner hasn't been to school because of illness.

Grades 5 and 6

(Ewald Grosshuesch and Barbara Johnson—Reporters)

We have a news corner in our room Children bring news stories and pictures from the papers We talk about these articles

The boys and girls have been bringing many pretty flowers They make the room look nice

Duard brought a rock to school that looked like it had an eye in it Edward brought a stone that you could see through Patricia brought a pink stone

We have a new reading table in our room Every time we take a book we must put our name on a card Several people have brought some books for the library We have two new books that belong to our room called "Gold Is Where You Find It" and "Best Stories For Boys and Girls"

Grades 7 and 8

We have begun a "Home Library" in our room Members in our room have volunteered to bring books from home that they have read and are willing to lend to others Ellen Kilgore, Billy Zabilka, Billy Grosshuesch, Elwyn Jacobs, Garland Brinkman, Charles Bock, Betty Etchen, Russel Wade and Eugene Haberkamp have brought books. We have forty new books

Garland Brinkman and Robert Jahnke are the school patrolmen for this week

The eighth grade is planning to write a play from the graveyard scene in the book of "Tom Sawyer" After it is written we plan to dramatize it.

In the future will Iowa farmers demand that their hired men can yodel: especially those farmers having cows to milk? Music, certain reports make bold to assert, hath charm for bossy, and increases her milk stream many fold.

"Wholly unverified and without proof," declared D. L. Espe, Iowa State College dairy husbandryman, when asked if music, symphonic or even, perhaps jazz might increase the size of the daryman's milk check. "True, cows give a nervous reaction to music, but we have no proof of milk gains," Dr. Espe said.

STATEMENT OF OWNERSHIP, Management, Circulation, Etc., Required by the Act of Congress of March 3, 1933

Of The Klemme Times published weekly at Klemme, Iowa, for October 1, 1937

STATE OF IOWA:
County of Hancock: ss,

Before me, a Notary Public in and for the State and county aforsaid, personally appeared R A Jorgenson, who, having been duly sworn according to law, deposes and says that he is the Publisher and Owner of the Klemme Times and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc, of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 411, Postal Laws and Regulations, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are R A Jorgenson, Klemme, Iowa

2 That the owner is R A Jorgenson, Klemme, Iowa

3 That the known bondholders mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: None.

Where Charlie McCarthy Was Born

Dummies Live in PICTURE PARADE

CHARLIE McCARTHY, the sassy little dummy of the ether waves, may owe his articulation to Ventriloquist Edgar Bergen, but he owes his life to Frank Marshall of Chicago. That's a debt he owes in common with many others of his race, for Marshall is the only known manufacturer of these queer beings in America.

Frank comes by his trade through inheritance. Since 1880 his family has made dummies for ventriloquists, including the famed Voxor Walter and "the Great" Lester. Charlie McCarthy occasionally is sent back to Marshall's workshop to be "hospitalized."

Here you see the "works" of a ventriloquist's dummy: Manipulating the cords causes the mouth and eyes to open and shut

Frank Marshall often enjoys a friendly little "chat" with his children. He says they don't talk back, if they know what's good for them. Two of his marionettes can be seen here, also.

Above, Marshall is pictured with two of his favorite products, a sailor dummy and a Hindu marionette. At the right, he is seen carving a head from a block of wood.

Not Even Ventriloquist Can "Throw" His Voice

THE old idea that a ventriloquist can "throw" his voice, making it come from a shoe box, from behind a chair across the room or from the basement stairway, is a hoax in the strictest sense of the word.

To make it appear that his voice is emanating from some place other than his mouth, the performer needs a "prop," usually a dummy with movable lips and eyes. He produces sounds by taking a deep inhalation of breath and allowing it to escape slowly, the sounds of the voice being modified by the muscles of the throat and palate. The illusion that he is not speaking at all is heightened by immobility, achieved through practice, of the visible muscles concerned in speech, as well as by gestures and glances which suggest a false source of the sound.

Orchards Gassed to Produce Improved Crops Regularly

Weather Will Not Count, Say Method's Devisers

Washington.—Fruit trees are made to produce regular crops, and on time, too, regardless of the previous winter weather, it is claimed in a patent just granted here to Daniel Glenn Sorber and Marston H. Kimball, California researchers of the United States Department of Agriculture, and assigned to Henry A. Wallace as secretary of agriculture.

This is accomplished, the inventors reveal, by literally gas-attacking the trees with butylene, a hydrocarbon gas.

"There are thousands of acres of walnuts, peaches and other deciduous fruits, including apples, pears, apricots, plums, prunes, cherries and bush berries now planted in areas where in certain years winter weather conditions are unfavorable to the formation of flowers, the setting of fruit, and the production of a crop," state the inventors. "This condition results in failure of trees to produce regular crops, occasioning heavy losses and often seriously crippling the industry."

Will Produce Uniformity in Fruiting.

Such fruit trees as lemon and avocado also exhibit marked alternate bearing tendencies, say the inventors. "The result is a heavy production one year, followed by lighter producing the next, with attendant cultural and marketing difficulties which produce economic losses."

The process used by the inventors to stimulate growth and produce uniformity in fruiting is this: About two weeks before the normal or desired leafing, start of the growth cycle, or blooming time for the variety of trees being treated, the trees are enclosed in tents or gas-tight covers.

Then butylene gas is released inside the tent until the proportion of gas to the atmosphere is 1 part of butylene to 100,000 parts of air. The temperature during treatment is kept between 60 and 100 degrees Fahrenheit. The length of treatment is from one to two hours.

Gas and other chemical treatments have been used in the past to stimulate opening of cut flowers, production of roots on cuttings, etc., but this is the first time whole trees have been gassed to make them blossom at the desired time.

Longer Life for Working Classes Has Been Gained

New York.—Longer life for the working classes in this country has been gained during the past quarter of a century as a result of public health activities, a report of the Metropolitan Life Insurance company shows.

The expectation of life at birth for the industrial policyholders of this company crossed the 60 year mark for the first time in 1935. In 1911 the expectation of life at birth for this class of the population was only 46.63 years whereas now it is 60.25 years.

Expectation of life at birth for the working classes is now almost as good as for the population as a whole, it appears from comparison on the life insurance figures with those of the United States registration area. For the whole population, in 1934, life expectation at birth was 60.25 years.

The gain in life expectation of the insured wage earners appears even more striking when compared with urban dwellers rather than with the population as a whole. This is a fairer comparison, the life insurance statisticians point out, because the insured wage earners live chiefly in cities. White males af age ten in the urban area of the United States gained 3.95 years of life from 1910 to 1930, while white male industrial policyholders at the same age gained 6.77 years from 1911-12 to 1930. At the same age white females in the industrial policyholder group gained a year more than those in the urban area of the United States.

The gain in life expectatior for the industrial class is all the more striking and encouraging because it was made during a quarter century that included the World war, the devastating 1918-19 influenza epidemic and the economic depression, each of which greatly affected the lives and health of the population. Commenting on this, the life insurance officers compliment the health authorities.

Chinese Culture Not So Ancient as People Suppose

Babylonia and Egypt Are Ahead of It in Time

Ann Arbor. — Some people have claimed that the famed and ancient civilization of China grew and flourished in the isolation that occidental travelers knew when they first went there in comparatively recent times. Others hold that China's civilization and its arts were lifted "ready made" from the Near East civilization of Babylonia and Egypt.

Neither theory has any basis of fact, declared Carl Whiting Bishop of the Freer Gallery of Art, Washington, D. C., in an address before the University of Michigan Institute of Far Eastern Studies here.

New knowledge of the last few years is upsetting some long favored conceptions of China and its cultural rise. For one thing Chinese civilization is not one of the oldest in the world, as has been popularly supposed.

What China truly can claim, said Mr. Bishop, is a longer continuous history than most nations have, which helps lend an air of antiquity really unpossessed.

Actually Babylonia and Egypt were flourishing thousands of years before China. But China has changed so slowly that it has retained, almost into present times, some characteristics which have disappeared from other nations long ago. This, again, lends it an air of antiquity to probing men of modern times.

A River-Valley Civilization.

The early origins of China's civilization, said Mr. Bishop, appear to have arisen in the basin of the great Yellow river, making it another one of the well-known "river-valley civilizations" like those along the Nile, the Indus and the Euphrates rivers.

When Babylonia and Egypt had advanced well on the way to organized civilization the Chinese dwelt in a state of barbarism only a little more advanced than that of the American Indians on the Atlantic seaboard at the time of the landing of Columbus, declared Mr. Bishop.

One fact indicating that Chinese civilization was probably not of independent, isolated origin is that few, if any, of the domestic animals or food plants of either the modern or ancient Chinese were of native origin. Not only did these forms appear in the Near East long before they appeared in China but also there appear to be no wild forms native in China from which they could have come. However, the migration of these foods and plants was accomplished before the beginning of China's historical period and hence, again, their presence seems to lend another bit of evidence to great antiquity; antiquity really not possessed.

Changes Came Very Slowly.

At the earliest known historical time in China—about the middle of the second millennium B. C.—society was divided there into two great classes: land-holding feudal lords and a great mass of serf population. The former class can be said to have been in the Bronze age of civilization, while the latter were still, in effect, dwelling in the New Stone age of their ancestors.

Then, about the Eleventh century B. C., came the invasion of China by the peoples of unknown but probably related origin, the Chou. With this invasion came significant changes that occurred slowly but surely. By 200 B. C., China was finally coming into her Iron age, said Mr. Bishop.

Autocratic government in China, centered in a single emperor, did not arrive until the Third century, B. C., Mr. Bishop added, With this important change Chinese civilization took on those characteristics that marked it for the next two thousand years or until the impact of sea trade routes led to its collapse.

Briton Sees Great Advance in Battle to Defeat Cancer

New York.—A "great advance in the struggle against cancer" was reported by Dr. W. Cramer, of the Imperial Cancer Research fund, London, to the American Journal of Cancer here.

This is the fact that the increase in cancer during the last 20 years, in England at least, is almost all in the age groups over 65 years. This is true for cancer of the organs most frequently attacked by cancer, such as the tongue, esophagus, stomach, intestines, liver and pancreas in men, and the uterus in women. The only exception is in the case of breast cancer in women. Here there is found a significant increase even in the earlier age groups.

STAR DUST

Movie • Radio

★★★By VIRGINIA VALE★★★

RADIO amateurs played a big part in the preparation of the dramatization of Peary's dash to the pole, presented recently. If they had not come to the rescue of the authors, Henry Lanier and Alan Bunce, it might have been a year or more before this program could have been heard.

In dramatizing historical events it is necessary to get permission of all living participants to impersonate them on the radio, and of Peary's North Pole expedition Matt Henson, the negro who was the only one to accompany him on the final dash, Capt. Bob Bartlett and McMillen still survive.

It was easy enough to locate Matt Henson; he was right in New York. But Bartlett and McMillen were off somewhere in the Polar seas. Lanier and Bunce appealed to various clubs of radio amateurs and for days the short wave channels were filled with calls to the two polar exploration ships. Finally communication was established with the Bartlett and McMillen ships, and permission to go ahead with the program obtained.

—★—

The best picture of the week is "Dead End," the most breathtakingly-dramatic of all stories of New York. The setting is an East river street where a millionaire apartment house is surrounded by squalid, sinister tenement houses. Back to this neighborhood comes Baby Face Martin, a hunted gangster who had left ten years before and things begin to happen. Sylvia Sidney and Joel McCrea play what are supposed to be the leading roles of the picture, but Humphrey Bogart as Baby Face Martin and Claire Trevor as the sweetheart he deserted, just take possession of the picture and romp away with the honors.

Sylvia Sidney

—★—

It is nothing new for secondary players to steal a show. You may remember that it was in "Flying Down to Rio" in which Gene Raymond and Dolores del Rio were supposed to be the stars, that Fred Astaire and Ginger Rogers scored the knockout success that made them about the most popular young couple in the country.

—★—

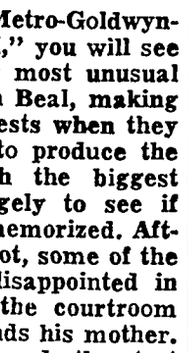
Fred Waring is getting to be an industrial magnate of such proportions that he has had to take a whole floor of an office building in New York to house his music arrangers, secretaries, contract signers, and scrap books. No sooner had he and his versatile boys worked their way East from Hollywood where they made "Varsity Show" for Warners, than he up and signed a contract to play at the Drake hotel in Chicago. There he and his frenized cohorts are working up new specialties, madder than ever.

—★—

When you see Metro-Goldwyn-Mayer's "Madame X," you will see a scene made under most unusual circumstances. John Beal, making voice and make-up tests when they were getting ready to produce the picture, ran through the biggest dramatic scene, largely to see if he had his lines all memorized. After the picture was shot, some of the staff were a little disappointed in the way he played the courtroom scene where he defends his mother. Then they remembered the test shots—dug those out of the film vaults and substituted them for the less-spontaneous performance he gave later.

—★—

Carole Lombard is going to have such fun in her next Paramount picture, "True Confessions." She plays the part of a confirmed liar, such a habitual liar that she even confesses to a murder that she did not commit. John Barrymore will support her, playing an eccentric amateur detective who falls for every false clue, and Fred MacMurray will be the patient, long-suffering hero, who is the victim of her weird falsehoods.



Carole Lombard

—★—

ODDS AND ENDS. Greta Garbo has become a Deanna Durbin fan . . . Gloria Blondell, sister of Joan, will make her screen debut in "Accidents Will Happen." For a long time Warners would not give her a job because she looks so much like Joan they thought it might be confusing, but they finally gave in lest some other company take her . . . Rudy Vallee will film "Howdy Stranger" for Warners this fall. He wanted a part that would permit him to wear a stunning uniform, but Warners convinced him that a cowboy suit would be just as becoming . . . Frank Parker, who is a big radio favorite himself, played the role on the Broadway stage.

Lesson for October 3

CHRISTIAN SONSHIP

LESSON TEXT—I John 3:1-6, 18-24.
GOLDEN TEXT—But as many as received him, to them gave he power to become the sons of God, even to them that believe on his name. John 1:12.
PRIMARY TOPIC—What John Learned from Jesus
JUNIOR TOPIC—John's Way.
INTERMEDIATE AND SENIOR TOPIC—What Makes Us Children of God?
YOUNG PEOPLE AND ADULT TOPIC—Christian Sonship.

"Studies in the Christian Life." What an attractive title, and what interesting and instructive studies we are to share during the coming three months!

When setting out on a journey we want to know just where we are going Just so when we take up a new study we need to define the limits of our subject. We are to study the Christian life—not life in general, not religious life, no, not even life in a Christian land or during the Christian era. It is therefore most appropriate that our first lesson in this series should tell us who the Christian is and how he lives

I. God's Children—Who They Are (vv. 1-6).

1. They are "Born ones" (v. 1). The Revised Version correctly translates "sons" as "children." We are sons in our position, but we are children by the new birth. A man may attain the legal relationship of a son by adoption, but he can be a child only by birth.

2. They are separated ones (v. 1). The world, that is, unregenerate man, does not belong to this family of God How hard it is for even church people to understand that fact. They do not appreciate and cannot understand God's children, because they themselves do not know God.

3. They are glorified ones (v. 2). "We shall be like him for we shall see him as he is." What a glorious hope, realized even now by faith in the hearts and lives of God's children. The present difference between God's children and the world is to become even greater, for in that day when Christ "shall appear" (for he is coming again!) God's children shall be like him. Spiritually and morally—yes, and even their bodies shall be transformed.

4. They are purified ones (vv. 3-6). The standard whereby the Christian measures his life is the purity of Christ. The question is not "How much purer am I than my friends and acquaintances?" No, the norm for the Christian life is far higher, we are to be purified as "he is pure."

All sin is a disregard of God's law (v. 4). His children do not thus defy Him. They have taken as their Saviour the one "who was manifested to take away sins." There was no sin in him, and the one who abides in him has victory and does not live in sin. He may fall into some act of sin, but in utter misery and repentance he turns from it to his Deliverer.

II. God's Children—How They Live (vv. 18-24).

Love is the supreme test of Christian profession. "We know we have passed out of death into life, because we love the brethren," says John in v. 14 (R. V.). How far should love go? "We ought to lay down our lives for the brethren" (v. 16).

Such a sacrifice is not often demanded of us, but the writer goes on to say that we may show that spirit in daily service to those in need.

1. In loving and sacrificial service (v. 18). Words may comfort and strengthen, especially when they are words of love. Love does not stop with words, however, but acts, reflecting the spirit of God, who not only is good, but does good.

2. In the assurance of faith (vv. 19-21). Assurance is the blessed privilege of the child of God. Well may we feel condemned when we measure our lives by his divine tests. But after all, even "if our heart condemn us, God is greater than our heart." Salvation does not depend on either our works or our feelings. It is of God. Does this condone sin? God forbid. We are rather so to walk that "our heart condemn us not."

3. In unquestioning obedience (vv. 22-24). The hallmark of character in a child is obedience. Scripture does not countenance the unfortunate standards of men on this point. The children of God "keep his commandments" which are beautifully summed up in v. 23 as believing in Christ and loving one another.

Divine Purpose

What is it after all which gives men the energy to do things seemingly impossible? It is, and always has been, the result of the divine purpose.

Bond of Perfectness

And above all these things put on charity, which is the bond of perfectness.

Honesty the Best Policy

Unimpaired integrity is an incomparable asset.

Vying for Your Favor

ONE, two, three smart frocks on the line ready to go—shopping, kitchenwards, to the office downtown. And as every woman knows, a well stocked wardrobe needs all three.

From Now On.

Says the jaunty model to the left, "I can tell I'm gonna feel well dressed in this little peplum frock: ready for sports, a matinee or dinner in town, and the confident high spirits my new lines give make me sure that I will be wanted at all three.

"I made my version of sheer wool with a subdued herringbone weave. It will be my number one attire for a long spell ahead."

One Who Knows.

Miss Keep-the-Home-Beautiful, in the center, expresses herself: "Even when I do housework I like to look and feel fit.

"When I dash out to the store or go across lots to the neighbor's to borrow an egg, I don't bother to change my dress because I have the feeling I'm doing all right as I am. I wouldn't think of a new season coming on without running up a generous supply of crisp, fresh dresses for myself. They seem to set one right, you know, and give you the spirit to pitch into any day's work like a champion."

The Last Word.

Miss Third Party goes in for that new kind of glamour in the simple model at the right. Says she: "I feel that Fall is really the season to step out and hob-nob with Fashion and the Joneses. This frock, which is my weakness in plum-colored wool, was as easy to make as it is to wear.

"Later on I'm going to have a velvet version with short sleeves—these slim lines and elegant shoulders were just made for this queen of all fabrics—and evidently I go for things royal."

The Patterns.

Pattern 1348 is designed in sizes 12 to 20 (30 to 38 bust). Size 14 requires 4⅛ yards of 39-inch material, plus 1⅞ yards for contrast.

Pattern 1304 is designed for sizes 34 to 46. Size 36 requires 3¾ yards of 35-inch material, plus ½ yard contrasting.

Pattern 1374 is designed for sizes 12 to 20 (30 to 38 bust). Size 14 requires 2⅝ yards of 54-inch material. With short sleeves, size 16 requires 4 yards of 39-inch material, plus ⅓ yard for collar in contrast. To trim the collar requires 4½ yards of braid.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

© Bell Syndicate.—WNU Service.

The Subconscious Mind

The expressions, conscious and subconscious mind, are well defined psychological terms. The subconscious mind may be defined as anything that is neither in the focus nor in the margin of the consciousness (that is, that does not receive attention and cannot be regarded as an actual experience of the moment) but which, nevertheless, must be assumed to be influencing the mind in some way.

Household Questions

Cleaning Brass.—Never use vinegar to clean brass. Though it cleans at first, it soon causes tarnish. The proper materials for cleaning brass are oil and rottenstone.

* * *

Removing Tobacco Stains.—Tobacco stains may be removed from washable materials by moistening with lemon juice and bleaching in the sun.

* * *

Egg as Cleanser.—The yolk of egg may be used for removing mud, chocolate or coffee stains from any kind of material except velveteen. Rub into the stain, wash off with warm soapy water, and rinse thoroughly.

* * *

Treating Dry Glue. — Vinegar added to dry glue will make the glue fit for use again.

* * *

Cheese and Tomato Salad.—Three ounces of cheese, two medium-sized tomatoes, seasoning, salad cream, lettuce leaves. Grate the cheese fine, then skin and chop up the tomatoes and mix to a paste with the cheese, adding seasoning to taste. Serve the mixture on individual plates, surrounding with lettuce leaves. Sprinkle the salads with a little finely grated cheese and decorate with small pieces of tomato.

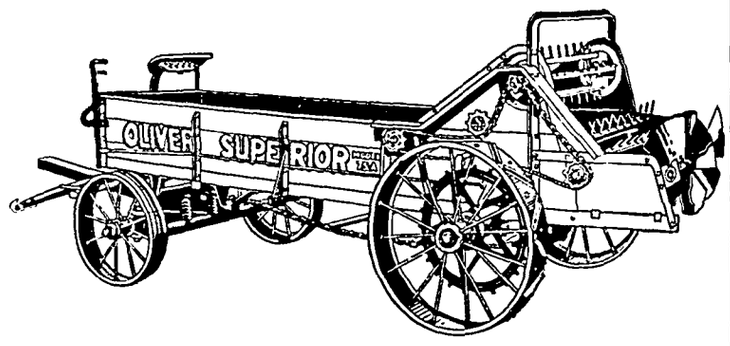
Established 1892

The Spreader with Seven Different Spreading Rates



4 to 28 loads per acre—that's the wide range you have with the *Oliver Superior Spreader!* You can change the rate of spread instantly from the driver's seat—from the lightest top dressing to the heaviest. And the manure will be finely cut and distributed evenly.

A 2-horse team pulls the 75-A Spreader easily, it turns in a 14½-foot circle, and it's built low. It is handy to get in and out of barns or sheds, close to manure piles, and to make sharp turns through gates.

An Oliver will do your spreading job more handily and at a smaller cost. It's long-lived too, because it is spring hung and straight steel sills keep all parts properly aligned.

You'll want to know more about this roller bearing Oliver Spreader. Come in and let us show you its improvements part by part.

mportant School Patron Gathering Friday Night

ENTS AND TEACHERS TO MEET AT SCHOOL FRIDAY EVENING, OCT 8TH

essor Leonard Anderson Of Waldorf College Will Be Speaker

By Subt W. Henry Galbreth

he first meeting of the year parents and teachers will be at the schoolhouse Friday evg of this week, October 8th, at ht o'clock A special speaker, fessor Leonard Anderson of ldorf College, has been secured the evening, and other features an interesting program have n arranged.

The meeting will open with oldioned community singing un- the direction of Mr. Elstad Miss Azeltine. Special musical nbers will be furnished by queline Kudje and Ray Jorson, Jr Each of the teachers l give a brief "pre-view" of the r's work planned in his or her partment, and the meeting will se with a brief business ses n in which will be determined type of organization for the ociation for this school year

Teachers will be in their rooms tween seven-thirty and eight lock to talk over individual oblems with any parents who ght wish to see them. Parents urged to take advantage of s half-hour period to get acainted with the teachers or to k over the work of the room

NCOCK COUNTY 4-H BOYS TER LAMB FEEDING PROJECT

Seven boys in Hancock County ve enrolled in the 4-H club stern market lamb feeding proct, County Agent T. C. Petersen nounces

Each boy is feeding 16 head of stern lambs, taken as a group, e 4-H lambs in Hancock County present a total invesment of proximately $800.00.

Object of the project, County gent Petersen explains, is to give rm boys a chance to gain some oroughly practical experience d training in the buying, feedg and marketing of western mbs. Each boy will be furnished mplete information on recomended methods of handling westrn lambs He will also be given a cord book in which he will keep itemized record of his feeding roject

The lambs were started on feed n Tuesday, September 28th and ill be kept on feed for approximately three months, after which ey will be brought into a cenral point in surrounding counties r a show and auction sale

From Covered Wagon Days

A rather interesting old relic was picked up one day recently by William Howell near his home n the west part of Afton. It is known as a "wagon hammer" but has not been in use much since he days of the linchpin wagon The linchpin wagon had a pin through the axle on the outside of the wheel to hold it on. The wagon hammer was used to drive these pins out When not in use it was usually used to fasten the doubletrees to the tongue, the same as a wagon wrench is used today The old hammer has an iron handle, but it is badly rusted Mr. Howell expected to display it at the meeting of the Hisorical society. It is said that the old Mormon trail went along the ridge where Mr. Howell lives and it is possible that the hammer was lost by the Mormons, but there were a great many covered wagons going through there in those days.

LAU FAMILY HELD REUNION, SUNDAY

Twenty Seven Years Ago Was Last Time Family Was All Together

A Lau reunion was held at the home of Mrs. Henry Lau. Sunday It was the first time for twenty-seven years that all the brothers and sisters had been together Mrs Steve Day of Hubbard, Oregon, a daughter of Mrs Lau, is in Klemme visiting relatives for the first time since she left twenty-seven years ago Everyone brought well filled baskets Those present were

Mr and Mrs A G Koerner and Kermit, Mr and Mrs Elmer Arnold and family. Mrs Martha Bredbenner and Novella, Mr and Mrs Wesley Lau and Marjorie Mr and Mrs Lloyd Lau, Mrs Steve Day, Hubbard Oregon. Mr and Mrs William Lau of Garner, Irwin, George and Leona, at home.

Mr. and Mrs Glen Bridges and Sharon Lee, Mr and Mrs Milvern Lau and Beverly, Mr and Mrs Leonard Lau and Aaron and Mr and Mrs Louis Henschen and William of Garner

BOY! WHAT A LINE TO BUCK!

Kluckhohn's Pitching Feature Of Shamrock Base Ball Games

SHAMROCKS PLAY ERRORLESS BALL; DOWN VENTURA

Kluckhohn Yields One Hit; Strikes Out Thirteen

Playing on the home lot for the first time this season, Coach Al Kingery's Shamrock baseball team rapped out nine hits and played errorless ball to beat Ventura 7 to 0.

One hit by the visitors, in the first inning, was all that kept Kluckhohn from pitching a perfect game After that not a single man reached first base as "Genie" struck out thirteen, walked none, and received perfect support from his mates Only twenty-two men faced him in seven innings.

Grange, with two singles, and Grosshuesch and Kluckhohn with a double apiece led the hitting for the home team Schuldt, Trees, Trampel and Buseman got the other safe blows for Klemme

SHAMROCKS LOSE TO KANAWHA IN CLOSE GAME

It was one bad inning again last Thursday that cost the Shamrock baseball team defeat at the hands of Kanawha in a game played on the latter's diamond The score was 3 to 1, and the number of hits on each side was exactly equal to the number of runs

Trainer, on the mound for Kanawha, held Klemme to one single, while his mates weren't doing much better against Kluckhohn, who allowed but three safties and whiffed thirteen batters Two of the Kanawha hits were bunched with errors in the fifth inning to account for all of the runs for the winners Kluckhohn topped a nice performance on the mound by getting his team's lone hit.

AVERY THEATRE ANNOUNCES TIME CHANGE FOR "GOOD EARTH"

Because of the length of the picture, Chas Marks announces that the first show of "The Good Earth" on Sunday will begin at 1:30 p. m The second show at 3 50, the third show at 6:30 and the last show at 9:10 p. m.

On Monday and Tuesday nights the shows start at 7:00 and 9:20 p m. This change is for "The Good Earth" only and does not apply to the balance of the weekly schedule.

A. A. A. SETS DATE FOR REQUESTS TO CHECK ON FARMS

The final date on which farmer-cooperators in the 1937 Agricultural Conservation Pogram may request inspection of their farms has been set for October 31, according to Ben V. Greimann, chairman of the Hancock County agricultural conservation committee

The Iowa State Agricultural Conservation Committee has been advised by AAA officials at Washington, he said, that the date named is the final one on which requests for inspection of cooperating farms may be filed in the county offices.

Farmers who have not sent in their requests for inspection should do so at once, Mr Greimann urged, so that they will not lose the opportunity of making application for the awards they have earned under the Agricultural Conservation Program for 1937

Completion of performance checking on farms for which requests for inspection have been filed before November 1st is expected to follow as soon as possible after that date, he said.

NOTICE

The following buildings will be sold at Public Auction on October 11th at 1 o'clock p m at the County Home five miles west of Garner

2 cottages—14 x 24- 8 ft sides
1 cottage — 18 x 24- 8 ft sides

Cottages may be seen at the County Home Farm

Terms of this sale are cash.

Published by order of the Board of Supervisors.

FRED C MISSAL, Co. Auditor

Federal marketing experts predicted recently that an increasing flow of dollars to the American farmer in the next four months would push his cash income this year to $9,000,000,000

HUNTERS AND TRAPPERS CODE

Buy a license and always carry it with you

Respect speed limits when traveling through towns Many a hunting trip has been marred by a serious accident.

Always ask for the privelege of hunting or trapping on a farm, posted or not posted

Ask the farmer or the farmer's boy to hunt with you

Prevent your dog from chasing live stock

Do not discharge firearms within 200 yards of the farm house or harnessed domestic animals.

Do not climb over fences. Crawl under or use the gate and then close the gate, if you found it closed, and securely fasten it in the same manner in which you found it.

Do not hunt in a sneaking manner or run from an approaching farmer or oofficer Everyone despises a coward

Look before you shoot. Everything that moves is not game.

Leave your car in the farmer's yard and report the amount of game taken to him. Offer him some

Be careful of fire In the fall when vegetation has dried, a grass fire can do great damage A fire can destroy not only the farmers crop and pasture for his live stock but destroy a winter home for game

Do not feel that because there is a bag limit on game you must take the limit Take only enough to use without waste and never "shoot out" an area because game is there Leave some for seed stock.

Do not kill cats on farms

Report any damage you may do or may see while hunting.

Cooperate with the Conservation Officers they are serving you.

Egg prices are likely to be much higher this winter than a year ago, economists believe

"Certain Basic American Rights"

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

In one of the most inspiring discussions that marked the writing of our Constitution, James Madison identified the people as "the fountain of all power," and insisted that by resorting to them all difficulties would be solved.

How true the statement was, subsequent history has proved. **In virtually every serious national difficulty, it has been the voice of the average citizen, rather than of the partisan politician, that spoke the constructive answer. And** within recent weeks America has seen another demonstration of this great verity.

At the National Convention of the American Legion, many resolutions were heard and adopted **But the one to strike a responsive chord in the heart of every American was that which reaffirmed "our belief in, and adherence to, and our resolve to defend, certain basic American rights and institutions . . ."**

They included personal liberty, religious freedom, home and family and "constitutional guaranty to safeguard these precious rights."

This was not the voice of political partisanship—for the American Legion includes members of all parties. It was not the voice of any economic faction—for the Legion includes employers and employees, professional men and artisans; every strata of our great productive body of workers.

It was, instead, the pronouncement of the composite American, voiced by men who had demonstrated their faith in the American ideal of democracy and were willing to demonstrate it again.

It was an expression of that spirit which the Founders invoked and foresaw when they made this a government of, by, and for the people, and knew they had placed it in firm and capable hands.

MANY CHANGES MADE THIS YEAR AT ANNUAL METHODIST CONFERENCE

There were many changes in and around his part of the country, made at Conference this past week, which will be of interest to our readers.

Klemme and Liberty, Rev. Wm. Zabilka; Belmond, J S Hutchins; Britt, C N McMillan; Buffalo Center, A. W Gauger; Clear Lake, Roy Cox; Corwith, K. W. G. YEAR'S PROGRAM FOR FARM BUREAU TO BE OUTLINED

Main features of the 1938 Farm Bureau program in Hancock County will be drawn Teusday, October 5th at the meeting of the Farm Bureau program committee and representatives of the Iowa Extension sevice at the Farm Bureau office in Garner, County Agent T. C. Petersen announced today.

Before the meeting is held, farm and home leaders in Hancock County will be interviewed and discussions will be held by township Farm Bureau groups. Suggestions regarding the 1938 program from these sources will be considered in formulating the new schedule of activities.

The county program planning committee, composed of representatives of rural home and farm inetests in Hancock County, will also consider suggestions from the county agricultural planning committee and other interested groups, Mr Petersen said.

Details of the 1938 Farm Bureau program which are not worked out at the meeting will be filled out at subsequent county meetings

"Next year's Farm Bureau program undoubtedly will include at least one or more projects in crops and soils, livestock, agricultural economics, home projects, boys' and girls' 4-H club work, agricultural conservation and community activities," Mr. Petersen said.

At the program planning meeting, representatives of the Extension Service will list the agricultural, home demonstration and 4-H club projects which may be carried on in 1938. Projects incorporated in the new program will be selected from this list. Later, Extension Service specialists will visit the county to assist the local agents with the various projects.

Death goes on parade for a lesson to reckless drivers. Birmingham puts on a pageant of horror in the hope that it will scare reckless drivers into sanity. A page feature in the AMERICAN WEEKLY, the magazine distributed with NEXT SUNDAY'S CHICAGO HERALD AND EXAMINER.

Plaids Outstanding in Fall Modes

By CHERIE NICHOLAS

PLAIDS on autumn style program? We hope to tell you! Fact is, the college-faring and the school-going (from kindergarten to high school age) girl that fails to make a right smart showing of plaid in her fall wardrobe simply is not "in it" when it comes to swank in dress. There's no doubt about it, colorful, youthful practical plaids fit into the campus, the office and the great outdoor scheme of things simply perfect.

All sorts of plaids are on the autumn fabric list from high-tone dressy plaids of silk velvet and handsome wool weaves down to the most utilitarian, practical, washable types—the kind that go bicycling along dusty roads and then come out "fresh as a daisy" after each tubbing.

Bicycling is a fad so important nowadays designers recognize they must create fashions tuned to the sport. The new sturdy washable plaids are proving most likable for outfits of this sort. The girl on the "bike" as shown in the group illustrated is fashionably and sensibly frocked in a dependable completely shrunk washable plaid that gives this rider the look of being keenly style-minded.

The schoolgirl centered in the picture is likewise alertly fashion-conscious in that she also selects plaid for her voguish blouse, and it's safe to say she will be getting a lot of wear out of it besides enjoying that feeling of confidence it brings to be appropriately clad for the occasion.

Another way to subscribe to the plaid rage that is now featuring in every phase of fashion is to wear a true clan plaid skirt and neckerchief with your new fall sweater as shown to the right in the group. This most commendable outfit is sure to prove an inspiration to the schoolgirl. It was shown at a recent fall style clinic held in the Merchandise Mart in Chicago.

Viewing the new fall fabrics one becomes fully convinced that plaids as a fashion "must" are definitely here. It is interesting to note that the more classic plaids are labeled each with its clan name. Also the many smart ways to wear plaids makes them all the more intriguing.

In enrolling as a plaid enthusiast we suggest that you line your jacket to match your plaid blouse, or wear a plaid dress matched to the lining of your coat, or top a pleated plaid skirt with a bright velveteen jacket, or enliven your fur coat or your fleece coat with a stunning plaid lining. They are showing in the stores daring coats in forest green; radiant autumn browns, and the very new deep sapphire blue with bold plaid linings in giddy contrast.

Plaid velvet dresses to wear under fur coats is another outcome of the present craze for plaids. You can also find cunning jackets of plaid velveteen. Some are bolero versions with plaid belts to match.

If it is just a touch of plaid you favor, buy a dozen or so of the new plaid composition buttons and let them go marching down the front of your dark velveteen dress or coat. You can get all sorts of plaid accessories. There are ensembles of beret, bag and belt. There are belt and triangle-scarf sets to be had in plaid.

FASHION STRESSES FABRIC ELEGANCE

By CHERIE NICHOLAS

Fabrics play a most important part this year, and by their richness explain the apparent simplicity of the styles which are the greatest challenge to the dressmaker. Velvets, lames, brocades, laces, tulles are all in the picture.

Lace becomes a happy medium for day dresses, almost severe in their simplicity. These may be relieved by rich belts, patent trimmings, etc. Lighter laces in silk or rayon are combined with a colored fabric lining for day dresses or two tones used in combination as Worth has done. Lelong takes a heavy white wool lace for a hip-length top of a dress which ends in a simple black velvet skirt, with four rows of the velvet used at the side front from the high waistline to the hip. Patou offers rosepoint collars, cuff or bodice trim with severe dresses—but real rose point Schiaparelli makes lace of gold cord for three huge medallions on the topper of a two-piece effect black marocain. While dresses are simple in effect, fantasy goes into the headgear.

Style Sobriety Stressed for Chic Daytime Costume

At the height of the vogue for romantic fashions, mutinous murmurs are echoing from the ranks of style leaders who favor simple garments for wear before the sun goes down.

"Sobriety of the best quality" is the formula advanced by a leading French couturiere as the prime requisite of daytime chic.

"Wear tailored suits and little sweaters," she advises, "but have them fitted by a good tailor and made of the finest wool. See that each accessory is equally first grade, for one inappropriate gadget can spoil the entire costume."

BE PENCIL-SLIM

By CHERIE NICHOLAS

This afternoon frock of purple silk jacquard was worn in a fashion preview for the silk parade held in New York which presented outstanding advance fashions created by the foremost designers of the world. To be right up to the mark your new frock must feature the pencil-slim silhouette that fashion demands this season, such as this gown so correctly defines. The handsome firm silks of quality kind that are so characteristically a product of this season's looms have been found ideal for achieving the new pencil-slim styling.

Keeping Up With Science

By Science Service

© Science Service.—WNU Service.

Wide Usefulness of Bags Despite the Tin Can's Rise

Paper Lining Prevents Sifting of Contents

By ROBERT D. POTTER

New York.—The tale of the tin can's rise to a well-earned niche on America's family cupboard shelves is well known, but the advances in another packaging method—the bag—are little noted. This is because the bag is seldom used by the average family except as a temporary container from the grocery store and possibly for sugar, salt and flour.

But bags are not "dead" in any sense, for they still help build the homes of America and its highways, as only two examples.

Burlap, commonest fabric for rough bags, was first imported in volume from India just before the turn of the century. With the present 1-cent-a-pound import tax, burlap still is considerably lower in cost than domestic cotton fabric.

Some Modern Improvements.

Bags have now been so improved that manufacturers can claim to offer any degree of protection from air, acid, dust, oil, moisture, odors or vermin.

The crinkled paper linings for bags allow them to offer serious competition with rigid containers. Materials that formerly sifted through cloth bags can now be shipped satisfactorily and cheaply. These linings permit shipment without contamination of the contents from foreign materials or outside odors.

Multiwalled bags, first introduced only a little over a decade ago, have taken over the greater part of the world's cement output and virtually all the packaging of hydrated lime and gypsum plaster.

Ocean Currents Play Tricks for Mariners

Washington.—Queer pranks and conditions played by localized ocean current rips have been reported to the hydrographic office of the United States navy.

While on a voyage from Balboa, C. Z., to San Diego, Calif., recently, the American steamer Jefferson Myers reported a current rip directly across its path that had water with a temperature of 84 degrees Fahrenheit and deep blue in color, on its south side. On the north side, however, the water was dark green and had a temperature of only 68 degrees. Similarly when the ship passed over the rip the air temperature changed from 84 to 68 degrees.

The British steamer Pentridge Hill reports, while on a voyage from Rotterdam to Rio de la Plata, South America, a current rip in the South Atlantic that, for five miles of length, had the appearance of breakers in very shallow water.

A current rip was described near the equator in the South Atlantic by the American vessel Charles Pratt, which turned the ship's course off five degrees.

Moon Mountain Changes Call for Explanation

Washington.—While astronomical findings indicate that the moon is lifeless and, indeed, probably without an atmosphere, there are some matters of lunar topography that need more explanation. Appearing in the magazine Popular Astronomy, published by Goodell Observatory of Carleton college, are drawings made of mountains on the moon which show changed markings from time to time that must be attributed to something—haze, melting snow, or jets of steam.

Pico, an 8,000 foot peak on the moon, was the mountain chosen for study by G. W. Rawstron, amateur astronomer of Liverpool, England. Some 48 drawings of the mountain, made with a four-inch diameter telescope, show that light and dark areas on the lunar mountains vary from time to time.

Penguins Qualify as Old Southern Family

Washington.—Penguins can easily qualify as an Old Southern Family—very much so, since the place they apparently like best is the chill-watered region surrounding the icebound continent of Antarctica. Little land is theirs, and that mostly stones; but after all penguins need only enough dry space for their family-rearing activities. Outside of that, the more sea the better, from the penquin's point of view. For the sea means fish, and fish is what penguins live on.

Babylonians Were Fathers of Science, Says Orientalist

Knew Much of Medicine and About Astronomy

By DR. WALDO H. DUBBERSTEIN
The Oriental Institute,
University of Chicago

Chicago.—Assuredly the ancient Babylonians deserve the title "Fathers of Science."

Through 3,000 years of documented history we can trace their slow steps toward modern science. We today have no reason to feel smugly superior in our advanced knowledge. The really hard steps in progress are the first ones. Those were taken for us thousands of years ago.

Four thousand years ago, Babylonian surgeons set broken bones, made major and minor body incisions, and even attempted eye operations. A pictorial representation shows the physician with his inevitable case and bandages.

Sicknesses were known by specific names, and symptoms were recorded. Magical and religious elements of Babylonian medicine are easily over-emphasized, while honest medical prescriptions are overlooked. There is a reasonable purpose in Babylonian magic. Once gods and demons had been accepted, then charms and incantations for their control were also necessary Had magic been omitted, the patient would certainly have lacked confidence in his physician. It was part of his professional "bedside" technique. But scores of simple medical prescriptions have no magic in them. Some even have real medicinal value.

Mathematics and Astronomy.

Mathematics was obviously practical in a complicated business development such as Babylonia experienced almost 5,000 years ago. Ancient textbooks offer simple and complex problems.

In the oldest texts are found addition, subtraction, division, multiplication, and fractional numbers. Square and cube root tables, as well as multiplication tables, were also compiled. Even the theorems commonly ascribed to the Greek Pythagoras and Thales, who lived in the Sixth century B. C., seem to have been known, empirically at least, in Babylonia 4,000 years ago.

Astronomy began its climb toward a respectable science as an assistant to that pseudo-science, astrology. Yet by 2000 B. C. Babylonian astronomy had assumed much of its later form as a practical science. The necessary adjustment between the lunar and the solar year was made by inserting extra months. All this demanded specific astronomical information. The path of the sun through the heavens had been charted through the 12 constellations, whose names still survive in our zodiac.

It was their practical compilation of observed phenomena, as well as their discovery of general truths, that made the Babylonians pioneering scientists.

New York and Los Angeles Centers for Television

Hollywood, Calif. — New York and Los Angeles are the two most logical choices for the beginnings of commercial television broadcasting in America, reports the scientific committee of the research council of the Academy of Motion Picture Arts & Sciences here.

The great need for talented actors is a primary reason for this decision. On the New York stage and radio and in Hollywood's motion picture studios are the best actors in the country.

Geographically Los Angeles excels New York in its facility for television broadcasts on the "line of sight" properties of the television waves, also reports the committee. While New York and its surrounding area can be covered from towering Manhattan skyscrapers the city of Los Angeles has its own, natural high landmarks.

Rattles More Used by Adults Than by Babies

Chicago.—Almost 5,000 years ago babies in the old city of Kish in Mesopotamia were kept happy with rattles, says Richard A. Martin, archeologist, of the Field Museum of Natural History, here. Yet, rattles have been used more by adults than by children in most lands explored by science.

Soldiers in ancient China were stirred by music of bronze rattles in military orchestras. African tribes devised many kinds of rattles for use in magical rites. Egyptians had a kind of rattle called a sistrum, made of a staff with metal rings dangling at the end, and used in solemn religious ceremonies. American Indians used rattles in religion and magic.

Rattles unearthed at Kish include some shaped like goats and hedgehogs, to catch the babies' eyes, as well as amusing them with the jingle of pebbles inside the hollow toys.

A Little Bit Humorous

NEEDED MORE LIGHT

The film star's chauffeur was driving him home from Shepperton. They were only a few hundred yards from the studios when the majestic figure of the law darted out nimbly in front of the car. Reclining in the deep back seat, the actor listened to the following dialogue between his chauffeur and the constable:

"Knock, knock."

"Eh?" said the puzzled driver.

"Knock, knock," persisted the constable.

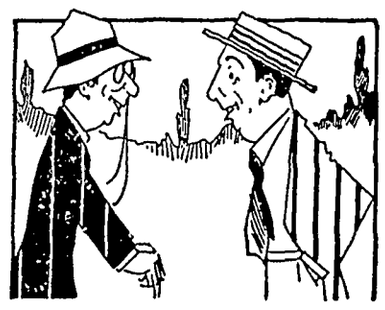
"Who's there," asked the chauffeur, feeling that the law must be humored.

"Butcher."

"Butcher who?"

"Butcher lights on."—Montreal Herald.

IN THE PROFESH



"In my business it's a virtue to steal—I always have the base at heart."

"I don't believe it—you can't be so corrupt."

"Yep, I'm a baseball player."

Seemed Surer of Results

Dorothy had been praying for a baby sister. Her mother, while reading the paper, exclaimed: "I see Mrs. Smith has a little daughter."

"How do you know that, mammy?"

"It says so in the paper, dear. 'Born on June 7 to Mr. and Mrs. Smith, a daughter'."

Dorothy thought a moment and then said: "I know what I'm going to do. I'm going to stop praying and start advertising."—Stray Stories Magazine.

Turkey Trot

"When you asked her to dance did she accept quickly?"

"Did she? Why, she was on my feet in an instant."—Columbia Jester.

Excusable

"But this officer says that while you were in a drunken state you tried to climb a lamp-post."

"Yes, I did, your worship, but three crocodiles had been following me about all night, and they were getting on my nerves."—Philadelphia Bulletin.

Here, Here

Mistress—You know, I suspect that my husband has a love affair with his stenographer.

Maid—Oh, I don't believe it. You are only saying it to make me jealous.—U. of P. Punch Bowl.

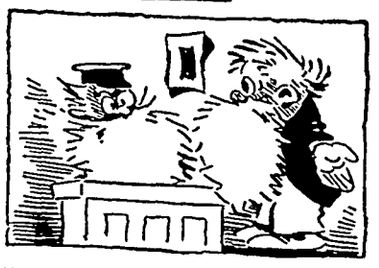
One Similarity

Binks (referring to violinist)—He reminds me of Paderewski.

Jinks—But Paderewski isn't a violinist.

Binks—Neither is this chap.—Stray Stories Magazine.

HIS HOPE



"Declare yourself, comrade. The Soviet is disposing of all idlers who have no useful employment."

"I'm safe. I'm a barber."

An Investigator

"Your boy Josh doing anything?"

"Only intellectual labor," answered Farmer Corntossel. "He has decided to study the unemployment problem from personal experience."

First Consideration

Would-be Writer—What do you consider the most important qualification for a beginner in literature?

Old Hand—Small appetite.

Giving Up

"Doesn't this tax riddle sometimes make you feel like giving up?"

"No," answered Senator Sorghum. "My feelings don't matter. What I want to see is a cordial willingness on the part of our citizens to give up."

A Slight Omission

"The lady whom I am going to marry is two heads taller than I am."

"Oh, but you must overlook that.'

Cutwork That Is Anything but W

"Cutwork without bars?" actly—and that's the very this lovely Wild Rose desig doilies or buffet set is so ea do. So encouraging, too, fo beginner who'd like to try hand at it. Aren't they life- these roses? Delicate shad pink would be most realisti

Pattern 5503.

Resolve every morning that y will make a red-letter day of th day, for if you are going to ma your whole life a masterpie each day must be a masterpiec

HOW LONG CAN A THREE-QUARTER WIFE HOLD HER HUSBAND?

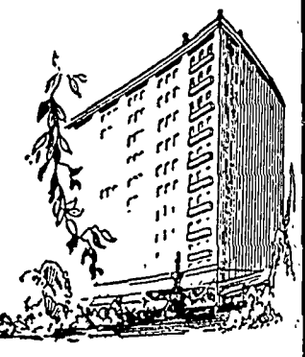
YOU have to work at marriage to make a success of it. Men may be selfish, unsympathetic, but that's the way they're made and you might as well realize it.

When your back aches and your nerves scream, don't take it out on your husband. He can't possibly know how you feel.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

COMFORT



New HOTEL CLARK in Downtown LOS ANGELES

Convenience is another offering of this hotel. Whether on business or pleasure bent, the Hotel Clark makes an ideal "base of operations" as well as a restful "billet" at the end of the day's "campaign." Good Food, naturally. And moderate charges, as well as for room accommodations, give final significance to assuring word—COMFORT.

Single from $2.50
Double from $3.50

Lesson for October 10

THE CHRISTIAN IN GOD'S KEEPING

LESSON TEXT—Jude 1-4, 17-25.

GOLDEN TEXT—Keep yourselves in the love of God, looking for the mercy of our Lord Jesus Christ unto eternal life.—Jude 21

PRIMARY TOPIC—Why David Sang.

JUNIOR TOPIC—In God's Keeping.

INTERMEDIATE AND SENIOR TOPIC—Keeping Oneself Christian.

YOUNG PEOPLE AND ADULT TOPIC—Safe in God's Keeping

To be born is only to begin life. The years which stretch out before with their growth, their struggles, their joys, call for courageous living.

So it is with the Christian. He is a "born one," as we saw in our lesson of last Sunday. But when he is born again he is just ready to begin the Christian life.

The Epistle of Jude sheds much light on the dangers which beset the Christian's pathway and exhorts him to holy living and sacrificial service. It opens with a description of the Christian and closes with an ascription of praise to God. It reveals the Christian as one who is

I. Called in Christ (vv. 1, 2).

The entire Trinity is seen to be active in our redemption (See Revised Version). Jude writes "to them that are"

1. "Called"—The Holy Spirit calls men unto salvation.

2. "Beloved in God the Father"—for God is love.

3 "Kept for Jesus Christ"—until he appears.

II. Living for Christ (vv. 3, 4, 17-23).

As Jude began to write of the "salvation" which he had in "common" with his readers, the Holy Spirit moved him to deal with a very urgent and vital problem—the hostility of wicked men toward the gospel of Christ, and their efforts to destroy "the faith." The Christian life includes

1. Contending for the faith (vv. 3, 4). "The Faith" is the body of revealed truth, the gospel, the good news of redemption in Jesus Christ.

The world hates the gospel, and attacks upon it are to be expected, but the most insidious assault is that of those within the church (v. 4) who profess to believe in Christ. Against them and their destructive work Christians must "contend earnestly," at the same time praying that they may be delivered from their sin and its terrible judgment (vv. 15-16).

2. Observing the times in which they live (vv. 17-19). Some folk seem to think that being a Christian means entering into a place of security and rest and promptly going sound asleep. Far from it. The Christian, knowing God's Word, is keenly alert to the dangers of this ungodly world.

3. Keeping their own souls (vv. 20,21). The best defense is a vigorous offense. The way to contend against error is to build up one's own faith by the study of God's Word, by communion with his children, but above all by prayer "in the Holy Ghost." And above all there will be an abiding in the love of God and a looking for the fulfillment of the mercy of Christ at his coming again.

4. Saving the souls of others (vv. 22,23). Soul-winning is (or should be) the normal expression of the Christian's life. It is his crowning joy. It most effectively counteracts error and worldliness. It builds up the church. Why not do it?

Note that there are two types of sinners to be rescued. Some are "in doubt" (R. V.), needing tender and careful instruction. Others are in grave danger, and must be rescued by drastic reproof and decisive action. Soul-winning is urgent business.

III. Kept by Christ (vv. 24, 25).

The doxology at the close of Jude has been a haven of comfort and assurance for God's children throughout the centuries. Hither have come the strong in faith to rejoice and praise God. Here has been found the strengthening of faith by the fearful and trembling soul who had not yet learned that he may fully trust God. These verses present two truths.

1. Assurance. Our Saviour is able to keep us from falling, yes, even from "stumbling" (R. V.), and to present us "faultless" "without blemish" (R. V.), with exceeding joy, before the glorious presence of God.

2. Worship. Such a God and Saviour is indeed worthy of the outgoing of every Christian heart in adoration and worship.

Work and Wait

Haste is not always speed. We must learn to work and wait. This is like God, who perfects his works through beautiful gradations.

Greatness of Trifles

"Commit thy trifles unto God, for to Him nothing is trivial; and it is but the littleness of man that seeth no greatness in a trifle."

Sabbath Days

Sabbath days are quiet islands on the tossing sea of life.

The Happiness Trio

PRIDE goeth with Fall and glamor, too, Milady, when you wear distinguished fashions by Sew-Your-Own! Today's trio gives youth a chance to express itself in an individual manner; gives the adult figure an opportunity to display a new high in chic, and last—but we wouldn't say least—a utility model that's as right for daughter as for mother, as attractive on cousin Emma as it is on Aunt Grace.

Swank 'n' Sweet.

Young and inspired is the little two piecer that just stepped into the picture at the left. The topper is one that will set a vogue in this woman's town and make you the swankiest of the whole lot of Lafa-Lots. If you're asked to picnic in the colorful Autumn woods, wear this number in henna-colored wool for real satisfaction and that perfect harmony that makes picnicking a picnic.

For Kitchen Capers.

And before you go, there'll be sandwiches to make, potatoes to peel, and lemons to squeeze—that's where and when the gingham gown in the center comes in. Of course, its novel yoke-and-sleeve-in-one construction makes it a most attractive model to sew as well as to wear. The skirt has flare enough for cutting those kitchen capers one has to when minutes are few and work plentiful. Make this simple five-piece frock in two versions and be sure of everyday chic at minimum cost.

Style Success.

While we go picnicking and places, don't think Mommy isn't going to swing out in style, too. She's certain of success when she goes to her Club; she's sure of well-groomed elegance for Sunday best in the slenderizing frock at the right. It does wonders for the figure that needs it, and it is equally becoming to sizes 18 and 20. So, Mommy, no matter what your size or the color of your hair, you'll be young enough and slim enough in this frock to feel like the very essence of fashion.

The Patterns.

Pattern 1336 is designed for sizes 12 to 20 (30 to 38 bust). Size 14 requires 5½ yards of 35 inch material plus 4⅝ yards of 1¾ inch bias strip for fold for trimming.

Pattern 1381 is designed for sizes 14 to 44. Size 16 requires 3¼ yards of 39 inch material.

Pattern 1286 is designed for sizes 36 to 48. Size 38 requires 4⅜ yards of 39 inch material.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

© Bell Syndicate —WNU Service.

Household Questions

To Soften Sugar.—When brown sugar becomes hard or lumpy, place it in a shallow pan in the oven for a few minutes.

* * *

Shiny Windows.—A few drops of kerosene added to the water when washing windows will make them shine brightly.

* * *

For Baking Cakes.—The center of the oven usually has the most even heat and is therefore best for cake baking.

* * *

Sliding Drawers.—Laundry soap rubbed on dresser drawers that stick will make them work easy.

* * *

Discouraging Ants. — Prompt disposal of garbage and other waste materials around the home will aid in the control of ants.

Editorial Comment

SHOULD THERE BE AN OPEN SEASON ON PHEASANTS IN HANCOCK COUNTY?

It is this writer's honest opinion that it would be a grave mistake to have an open season on Pheasants in Hancock County, this year

In the winter of 1935 many Pheasants froze to death in this county, leaving scarcely enough for seed stock In 1936 the season was kept closed in order to give the few remaining birds a chance to multiply The increase was very small

This year there has been a very small hatch, due to weather conditions and heavy rains during the normal hatching season. The increase again this year was very small

If hunting is allowed in Hancock County again this year, the hunter can just as well hang up his gun and forget about Pheasants for several years to come, as what few birds we have would soon be killed off, and it would take several good years to bring them back to the fine shooting we enjoyed four or five years ago

This writer has also contacted a number of farmers in this part of the county, and every one stated that the Pheasants were scarce on his farm And, after all, the farmer has a good idea on whether or not the Pheasants on his farm could weather a barrage of hunting for three half days

The Iowa State Conservation Commission, 10th and Mulberry, Des Moines, are making a survey to determine which counties will be open for hunting on November 12 13 and 14

The Times suggests that our farmer-sportsmen friends write a card to the above address stating whether or not they think it advisable to have an open season in Hancock County No one, in our opinion, is better qualified to furnish this needed information, than the farmer.

We enjoy hunting just as well as the next fellow, but we are willing to hang up the old fowling piece for another year if it will help bring back good Pheasant shooting in this county

What do you say, farmers?

IOWA STORES NEARLY ALL IN HOME OWNED CLASS

The United States Bureau of Census has compiled figures giving the number of home owned stores and chain stores in the various states. In Iowa there are 35,314 home owned stores which do an annual business of 514 million dollars, as compared with 2,234 chain stores which did a business of 115 million dollars

Illinois has the lowest percentage of home owned stores, 61 8 per cent, while New Mexico has the highest, 82 5 per cent Iowa's per centage is 79 2 per cent.

The survey shows that the independent retailer is still the most important factor in American merchandising by a large per cent

AVOID WAR LOANS

Let us hope the United States will not lend money to Japan, China or any other country now engaged in war or apparently on the verge of hostilities. The road to war, judging from past experience, starts with war loans.

The United States might have been able to stay out of the World War if our government had not loaned heavily to the Allies, experts agree. If that is true, loans at this time would be nothing short of foolish.—Belmond Independent.

Georgia's Tobacco Road Does Not Cross Streams

Tobacco road is more than a fictional name. For more than a century before it became famous as the name of a novel it stretched its serpentine length for miles over Georgia's red-clay hilltops. It was constructed for the purpose of transporting tobacco from Georgia farms to the nearest and most accessible shipping point on the Savannah river, states a writer in the New York Times.

It is a sand-clay thoroughfare that carries a fair burden of traffic, although it is not one of the state's main highways. It extends from Northern Georgia to New Savannah, an old settlement and shipping point on the river a few miles below Augusta, which was established prior to 1803, since it is shown on maps published in that year. Its location was chosen because it is immediately below the shoals in Richmond county, which evidently were not always navigable at that time. Tobacco road was doubtless responsible in part for the settlement and certainly for its period of active existence.

Tobacco road passes through many fertile farms and wooded areas of slash pine, oaks and other native trees. One of its most striking peculiarities, which is a tribute to those who routed it and to the patience of those who used it, is that it never crosses a stream It circuitously follows the highlands, and crosses Richmond county, of which Augusta is the seat, on a ridge almost midway between two creeks. Tobacco would have been ruined had it got wet. Construction of bridges in that day was almost prohibitively difficult and the only method of crossing streams was by fording in shallow places The primitive way of transporting tobacco provided little or no protection against water. Therefore water was avoided.

Swam Strait Every Night to Visit His Sweetheart

Hero was a priestess of Venus Leander, a youth of Abydos, a famous city on the Asiatic side of the strait of the Hellespont, nearly opposite the city of Sestos on the European coast, where he first saw Hero. It appears to have been a case of love at first sight, and an intensely ardent one at that, declares a writer in the Cleveland Plain Dealer. Hero's office as priestess, and the resolute opposition of her parents stood in the way of their union, cold and strong as the swift current of the Hellespont, which at its narrowest point is swift and deep and about one and one-fourth miles wide. Undaunted by all these obstacles, Leander swam across the strait every night to visit his beloved, who directed his course by holding a torch from the upper window of a tower on the shore. After many delightful meetings, the dauntless lover was drowned one stormy night, and his body was washed ashore at the foot of the tower where Hero stood, expecting him. Heartbroken at the sight, she flung herself from the tower into the sea, and passed with her lover into the immortality of art and song.

Kit Carson's Service

On June 7, 1847, Kit Carson delivered to President Polk a letter which, with important military despatches, he had carried to Washington from California In recognition of this service, the President appointed Carson, then a private citizen, as an army lieutenant. The next year, while again en route to Washington with despatches, Carson learned that the senate had denied confirmation of his appointment. Urged by friends to refuse to proceed farther, Carson writes that he decided: "As I had been chosen as the most competent person to take the despatches through safely, I would fulfill that duty; if the service I was performing was beneficial to the public, it did not matter whether I was enjoying the rank of lieutenant."

Adirondack Park

Some of the land within the Adirondack park region has always been held by the State of New York, other areas were acquired from time to time through tax sales, especially in the years 1871 and 1877. It was not until 1885 that the state created the forest preserve by law, and the first appropriation, of $25,000, for buying land was made in 1890. Since that time, says Literary Digest, the state has constantly increased its holdings until the park area now comprises 7,500 sq. miles, or about one-seventh of the area of the state.

Oldest Monastery

The Egyptian Coptic church, the World's oldest Christian church, conducts the world's oldest monastery. It is St. Anthony's, founded in the Fourth century and located about 200 miles south of Suez near the Red Sea. From this church the "Abuna" or head of the Abyssinian church used to be chosen.

Many Land Scandals

One hundred years ago government land offices in the West were notoriously corrupt and agents sent out from Washington reported many irregularities in bookkeeping, fraudulent land purchases and defalcations among the men administering the land office.

Aardvark, First Animal Mentioned in Dictionary

Like something out of a dipsomaniac's dream is the aardvark. It is one of the strangest of extant animals—extraordinary in appearance, in structure and in habits. While not one of the animals most familiar to the average person, it enjoys, because of the spelling of its name, the unique distinction of being the first animal to be mentioned in the dictionary and its name is one of the first words of any kind to appear in lexicons. The name comes from the Dutch, means "earth pig," and refers to the creature's piglike snout and its habits.

However, in spite of its snout and its smooth, fat body, the aardvark is quite unrelated to pigs. In fact, according to Dr. Wilford H. Osgood, chief curator of the Field Museum of Natural History department of zoology, the animal has been something of a puzzle to zoologists and anatomists who have undertaken to find a logical place for it in schemes of classification of animals.

Aardvarks are common throughout much of southern and eastern Africa south of the equator. They live in relatively open, semiarid country wherever there is an abundance of the termites or so-called "white ants," upon which they feed almost exclusively. Individual aardvarks reach weights up to about 150 pounds and appear always fat and well conditioned. For such a large heavy animal to exist upon tiny termites is rather remarkable and testifies to the abundance of such food in Africa.

Osmium, Iridium, Thulium of Platinum Metal Group

Discovered in 1803, osmium is a rare, blue-white to gray metallic element, difficult to fuse, not affected by ordinary acids and insoluble in aqua regia. It is the heaviest of the elements. A member of the group of "platinum metals", it forms an alloy with iridium, labeled osmiridium, which is used in making fountain pen points.

Like osmium, iridium is a rare metallic element, conspicuously heavy, states a writer in the Kansas City Star. Silvery-white, iridium was discovered in 1804. It is important commercially for its alloys, which are used for making standard weights and parts of scientific apparatus which must withstand the action of the atmosphere and other factors; in electrical apparatus for contact points and other parts required to resist high temperatures and active substances, such as chlorine.

Among later elements found to be present in the sun, thulium is extremely rare, occurring in Nature with other metals of the rare earth's group. It forms a number of compounds, the characteristic color of which is light green. Discovered in 1879 thulium has no commercial use.

Red Honey Produced

Even reddish-brown honey can be produced, Paul Griswold Hayes writes in an article in Nature. Logwood blossoms on the island of Dominica in the Wes. Indies produce a singular tasting variety, but the color comes from the sap of the tree, that contains a coloring principle much used in dyeing. Most famous of the dark honey of Europe is that from the Scottish heather, with a cheaper type being derived from the English heather. In Southern Europe the favorite honey is probably the Romarin, derived from the rosemary, and the Mt. Hymettus variety from the wild thyme of Greece. Although most ordinary honey crystallizes in six months after bottling, the white tueplo will remain liquid after 10 years. On the other hand, the blue-curl nectar granulates almost at once in the wax cells.

Monkey Business

"The Confusion in this City, occasioned by Counterfeit Copper English Halfpence amongst us, is almost inconceivable; for notwithstanding the large Quantities of good Pence we have long had, there is now hardly any Sum offered, but there are Counterfeit Ones intermixed; and to such a Degree of Suspicion, is the Common People raised, that many good Pence, which have passed current perhaps for above 20 Years past are now refused."—From the New York Post Boy of December 3, 1753.

The Great Dipper

The great dipper only appears to revolve, owing to the revolution of the earth. It makes an apparent revolution every 24 hours, the same as the sun. It is visible throughout the entire night because it is within what is called the circle of perpetual apparition, or that part of the heavens which is always in sight to the observer. This circle enlarges as one travels from the equator, where it is nothing, to the pole, where it takes in the whole Northern Hemisphere.

Walnut in Victorian Era

During the Victorian era walnut was used almost exclusively in the construction of practical furnishings —dining room and bed room pieces especially — though handsomely carved whatnots and other living room items, settees, small tables, occasional chairs and massive hall chests were also fashioned of the light-toned wood.

ITEMS OF INTEREST FROM ELL TOWNSHIP

Mr and Mrs. W. J. Anderson and children visited at the Roy Nelson home Sunday afternoon

Mr and Mrs. Martin Barz and Maxine were entertained to dinner at the parental Herman Barz home Sunday

Bertha Johnson, Albert, Marv and Ethel Swanson and "Red" Meyers of Clear Lake were in Des Moines on business Wednesday.

Mr. and Mrs. Clarence Lemke were Sunday dinner guests at the parental Lewis Neuberger home. Mr and Mrs. George Carmen of Buffalo Center and Mr. and Mrs. Melvin Neuberger and Elaine were also visitors there in the evening

Mr and Mrs Oscar Swanson and Phyliss were Sunday evening visitors at the Ernest Helps home.

One Who Didn't Forget

Police Chief Warren Clark of Carroll, Carroll county, befriended a bum about a year ago—and made a friend The chief was accosted one night by two floaters who said they were broke and hungry One of them claimed to be an expert cook. Clark's wife happened to be away at the time so the chief took the transients to his home and let the cook prepare a meal for the three of them. The other day, about a year later, he got a letter from the cook. The fellow is now married and working in a steel mill at Reading, Pennsylvania.

The Typing Classes have a new bulletin board A chart has been posted, on which will be graphed the progress of the Typing II class during the year in writing fifteen minute timed tests. On another chart there are six pennants, each a different color Each member of the advanced typing class has a number and a color This chart shows the standing of each member on the timed basis in comparison to other members of the class

The advanced typing class has new books With the use of these books, the class will take up advanced problems and procedures in the variou kinds of offices.

Grade School News

Grades 1 and 2

Our Vegetable Fair

We had a Vegetable Fair. We brought vegetables from our gardens. We labeled them and put them on a long table.

We had many different kinds of vegetables Edward brought an egg plant. Some of us didn't know what it was Mrs Keraus fried it for us and we tasted it, too.

Ardel and Iris brought a squash Some children thought it looked like a flower. Some said it looked like a pie and some others said it looked like a hat.

Melvin brought a funny carrot and we could not decide what that looked like.

Some of the other vegetables we had are: corn, potatoes, onions, beets, celery, beans, cabbage and peppers.

On Wednesday we made vegetable soup. We invited Mr. Galbreth and Miss Wallace to our vegetable soup party.

Grades 3 and 4

By Peggy Coobs and Ruth Bell

The third graders are making a tepee. First we made some walnut dye We dyed some cloth for the covering.

The fourth graders are making a Viking boat

In art class we are making color booklets and leaf prints.

We have a new easel for our room.

As much as we can, we have Suprise Hour for children to show surprises they bring to school

We had a peanut shower on Miss Azeltine last Friday

Some children have brought plants for our room

Grades 5 and 6

Wesley Suckow and Eunice Larsen Reporters

We are working on a transportation unit Our room is divided into committees with a chairman at the head of each The names of these committees are stage coach, boat, train, bicycle and motorcycle car, and airplane We had a period to tell about the development of the different methods of transportation Each committee is making a chart showing pictures. This subject is very interesting

Our health race is becoming more and more exciting Eunice Larsen's side is two points ahead and has only three points to go After this race is finished we will choose new captains

Herbert Mueller brought some petrified wood to school It was brought to him from Wyoming Many of the children had not seen such wood before

We got a letter from Emily Johnson She likes school very well

Some of the children are bringing plants to school to make our room look nice

Perfect spelling scores were earned last week by Junior Buntenbach, Julia Bell, Lawrence Bock, Barbara Johnson, Marjorie Hartbeck, Edward Barz, Patricia Kudje and Duard Lewis

Grades 7 and 8

In the seventh grade reading class each student has chosen a book to read from our library Favorite parts of the books have been read aloud to encourage others to read the book

On our backwall we have two new bulletin boards. We have several new plants and the boys have a new football

The eighth grade English class has finished writing their play The boys in the class make up the cast Garland Brinkman is Huckleberry Finn; Melvin Coobs, Tom Sawyer, Homer Blickenderfer, Injun Joe, Billy Zabilka, Dr Robinson, and Russell Wade is Muff Potter Charles Bock is Sid in another act The girls are acting another scene

Melvin Coobs and Russell Wade are the patrolmen for this week

NEWS FROM GOODELL AND VICINITY

Mrs. Chase and family, of Mason City, visited at the home of her son, Clifford and family.

E. J Nelson and son attended the Dairy Cattle Congress Friday.

Miss Dugan spent the week end at her home in Iowa Falls.

Evelyn Buchanan is able to return to school after her illness

O. Evenson and family spent Sunday with their relatives in Fertile.

Mr. and Mrs. Gus O'Krueg visited at the J. J. Cook home Sunday evening.

Mr and Mrs. Dale Brede attended the Dairy Cattle Congress at Waterloo.

Mr. and Mrs. Tom Nelson attended church services here Sunday.

The Julius Jackson home at East Lake has a case of scarlet fever.

Jay Griggs and family were dinner guests with Mr. and Mrs. Gerald Burke, Sunday.

Mrs. Lizzie Christie is enjoying a visit from relatives from Wisconsin.

Friends are sorry to know that A C. Carpenter has been quite ill lately.

Miss Alice Sorensen was a week end guest of her cousin, Eileen Ruka.

Mr. and Mrs. John Wessel and small son spent Sunday with relatives in Mason City.

Harm Rust has gone to Rochester to receive treatment at the Mayo Hospital.

Mr and Mrs. Gerald Burke were business callers in Garner, Thursday.

W L. Wesenberg accompanied a group of men to Waterloo and attended a banquet put on by the John Deere Implement Co.

Friends are sorry to know that J J Cook has been suffering from poisoning of his hands. He suffer- with the same infection last summer

Mr and Mrs. Wallace, Mr. and Mrs. O'Krueg and Mrs. Gerald Burke and Mrs Jay Griggs were visitors at the George Ruka home Sunday afternoon.

Mr and Mrs Christensen and daughter, of Klemme, and Jay Griggs and family were visitors at the Anson Avery home Wednesday evening

Mr and Mrs. Swen Hegland, of Elsworth. Iowa, visited at the Mike Kearney home recently The Heglands formerly lived east of town. Mrs Hegland spent three months in Sweden this summer and has just returned home from her trip.

Henry Waage was taken seriously ill Tuesday evening and was rushed to the Belmond hospital where he submitted to an operation for perforated ulcer of the stomach. At this writing he is resting as well as could be expected.

KLEMME LOCAL NEWS

Mr and Mrs. Robert Risser and son, Bobbie, left Tuesday morning for Chicago, Ill, where they will look after business matters for a few days before retuning to Washington, D C. Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington.—Wall Street and the securities market generally have been undergoing a bad case of the jitters. It has been several years since those dealing in money and shares of stock have been so uncertain as to the future and this uncertainty obviously is the cause of the jitters among all people who dabble in the stock market, whether the dabbling be small or large, on margin or for cash.

Bad Case of Jitters

It seems a proper time, therefore, to examine the picture and try to see what lies beneath. And, let me hasten to say at the very outset that anyone who makes a positive statement about the securities market these days must be either a fool or a superman—and thus far the supermen who have lived on this earth number only one.

But that fact does not destroy the value of an examination of a condition which exists as a fact. Indeed, I think a review of the various factors and influences at work now can provide a clarification of general conditions even though it may fail utterly to show why men and women act as they do with respect to stock market investments.

First, it should be said that Wall Street, as the term is commonly used, is not unanimous within itself. The violent fluctuation of market securities in the last several weeks might easily be said to be due to the war crises in Europe and in the Far East. Only, those fluctuations are not traceable to war conditions. Rather, the war conditions are used by some individuals as an excuse—an alibi to themselves because they fail to fathom the various influences and factors now at work.

I said that Wall Street lacked unanimity within itself. That is true because within Wall Street there are all kinds of selfish groups operating. For example, an influence like inflation is highly pleasing to the brokers and dealers in shares while the same influence frightens bankers and likewise gives a sickening feeling to those who must buy raw products. Bankers and sound investors as well as tax payers generally would be quite happy to see the Federal Treasury's budget balanced because if that were done there would be a much greater sense of security, of safety for those investments.

* * *

A dozen other illustrations could be given to thus illustrate the point and show why Wall Street cannot agree. They do not show, however, why there is so much uncertainty and why the bulls or the bears have been unable to adjust themselves to the future probabilities. The reasons, therefore, must lie deeper. It is possible that the appointment of Hugo Black of Alabama as an associate justice of the Supreme court of the United States has had more effect on the business world than any of us realize. I have heard a number of corporation executives say that they hope they will never be involved in litigation which will carry their corporations before the court on which Mr. Black sits. If they entertained that fear before, undoubtedly the fear is deeper-seated and more widespread now that Mr. Justice Black has been publicly accused of holding a life membership in the Ku Klux Klan. Certainly the expose of the typhoon that is swirling around the head of the new associate justice cannot have any soothing effect upon the minds of those business men who, as corporation executives, are trustees of vast sums of the people's money. Undoubtedly, unless Mr. Black can prove that he is not affiliated with the Ku Klux Klan, few litigants will feel safe before the Supreme court.

Black Case Involved

Then, there comes the resignation of James M. Landis as chairman of the securities and exchange commission which regulates operations of the great stock exchanges. Mr. Landis has been regarded as rather fair, rather just, in his dealings relating to stock market operations. His retirement to return to a professorship in Harvard, of course, opens up the question as to his successor. This is to say that most of the financial world is hoping and praying that the new chairman will not go off at a tangent; that he will avoid extreme radicalism and that he will not blame the whole financial structure for the crookedness of a part of it.

Thus, it becomes easy to see how this minor factor may have weight with some individuals dealing in corporate shares and bonds. William O. Douglas, a member of the commission, has been slated to become chairman but developments in recent weeks give considerable doubt over that result. Mr. Douglas is recorded as being a radical. Bankers and investors in many parts of the country fear that if he is made chairman he will become not unlike the famous bull in a china cabinet. But, according to the undercurrent of gossip around Washington Mr. Douglas has done something to offend Postmaster General Farley, and no man can draw an appointment as important as the chairmanship of a great commission without Mr. Farley's approval.

Aside from personalities, various phases of President Roosevelt's monetary policies continue to be disturbing and in addition to these there is the certainty that new taxes must be levied That is, new taxes must be levied if we are ever going to balance the federal budget and begin paying off the gigantic national debt which now amounts to more than 38 billion. With a debt at the highest point our United States ever has known, a great many people, including bankers, have become fearful of what they might get for United States bonds that they now hold. It is obvious that this influence adds to the general uncertainty although it is difficult to measure the exact influence of this condition, or to see whether it is a major or a minor factor.

* * *

Having enumerated a few of the influences known to be at work, we come now to that condition which heretofore always has been basic. I refer to general business conditions.

Business Conditions

New Deal press agents have tried valiantly to make it appear that business is booming; that prosperity is here instead of around the corner; and that the country has nothing to fear. Careful examination of official figures, however, show the prosperity statements to be true only in parts. The official statistics disclose very definitely how some lines of business are enjoying a volume of trade or production higher even than 1929. They show on the other hand a vast number of failures, an increasing number of big businesses which are barely getting by—which can continue providing their present volume of business is maintained. If the volume of business slips, however, that category of business is going into a tailspin as sure as the sun shines. If a part of the business of the country begins to sink—well, a part of it began to sink in August, 1929, and within two years the whole structure had fallen like a house of cards.

I am not saying that we are confronted with another depression. I do say, however, that we are facing a condition that is not at all satisfactory—a condition that can lead to a depression as easily as it can lead to sound prosperity in commerce and industry.

Astute observers and business men in the larger centers decide their courses upon the outlook for the whole country, not for any particular line of business or any particular section. The number of individuals who see the picture I have attempted to outline in the above paragraph is increasing. As that number increases obviously the wave of uncertainty expands.

So, if one is compelled to make a guess why Wall Street is so concerned or so jittery, it would seem that the explanation must lie in the combination of circumstances. No one of them, except possibly the adverse business outlook, could accomplish as much doubt about the future.

Anyone talking with a hundred different individuals will hear these various factors and influences mentioned. He will hear different weight given by each individual to each factor.

* * *

We have been dealing with causes. Let us look at possible effects. It will be remembered how President Hoover was blamed for the depression. He and the Republican party were punished on that account and badly licked in the elections. It ought to be said in Mr. Hoover's behalf that the conditions which led to the depression had their beginning long before he was elected President. Indeed, they had their real beginning in the World war.

Now, as to Effects

President Roosevelt came into office as a result. He started doing things and gaining the confidence of the country to such an extent that he was re-elected last year. Probably he was re-elected largely because of the bulk of the voters feeling he was restoring prosperity. I doubt, however, that Mr. Roosevelt was any more responsible for the return of a superficial prosperity than Mr. Hoover was responsible for the depression.

But we are coming to another election. If conditions should become worse and business should decline perceptibly again, Mr. Roosevelt will be held responsible just as definitely as was Mr. Hoover. He will be charged with having made a mess of government and any attempt on his part to prove the condition was natural will be regarded as an alibi. The whole thing seems to be in the lap of the gods and no amount of political strategy or attempts to amend the law of supply and demand will alter events.

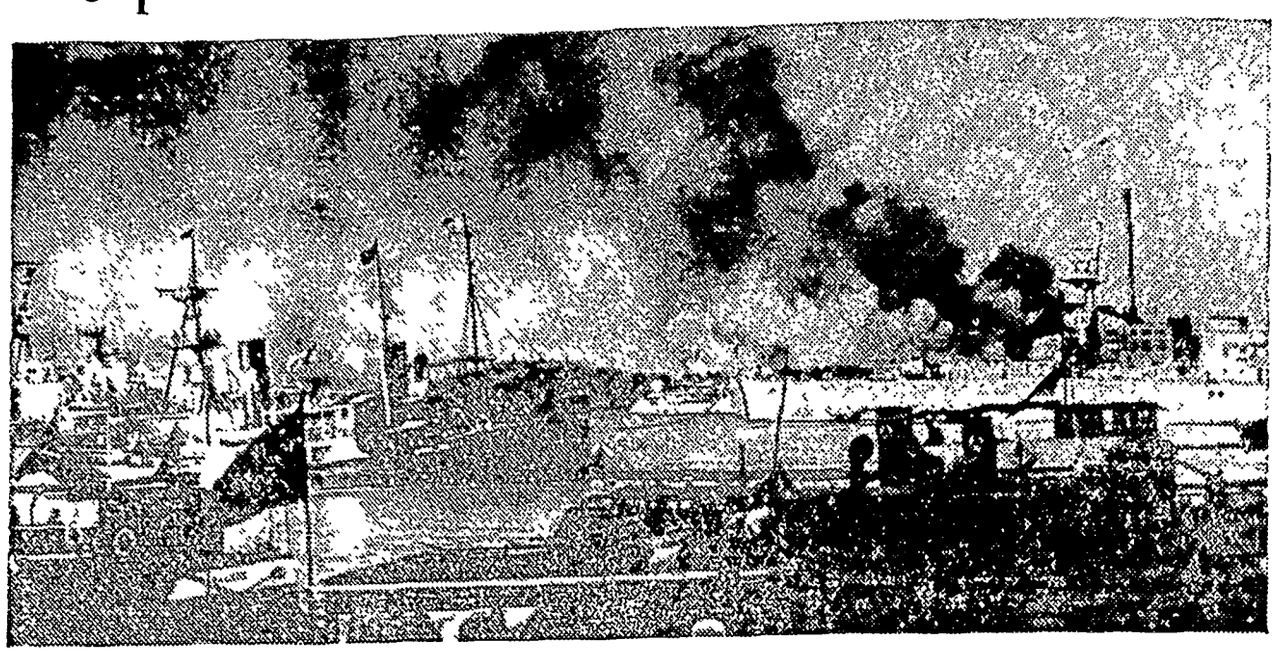
Japanese Bombard the Shanghai Waterfront



A scene of confusion on the Whangpoo river off the Bund at Shanghai as Japanese airplanes bombed Pootung. Ships and boats of all kinds scurry to safety. At the right is the United States cruiser Augusta, which, in acting as a protective barricade between the fighters and the settlement, was hit by a shell of undetermined origin that killed one of the seamen and wounded 18 others.

"Dickie" Brings Help in Nick of Time

Mrs. Christine Toth, seventy, of Lucaston, N. J., fondling her pet poodle, Dickie, after the dog had been instrumental in saving its mistress' life recently. Ill from toadstool poisoning, Mrs. Toth wrote a note, "Help, I'm dying. Mrs. Toth," tied it to the dog's collar and sent him out of her house. The dog's shrill barking awakened Rev. Harry R. Stockton, pastor of the local Methodist Episcopal church, early in the morning. Noticing the note, he telephoned for a doctor who sped to Mrs. Toth's side, reaching her just in time to save her life.

CORN IN SILO IS A GOOD WINTER FEED

Crop Makes More Succulent Roughage Per Acre.

By F. R Farnham, Dairy Specialist, North Carolina State Colege.—WNU Service.

Comparatively few farmers take full advantage of their corn crop in producing feed for winter consumption. Corn made into silage produces more succulent roughage per acre than any other known crop.

The trench silo is the very thing for small farms where large upright silos would be impractical. Trench silos, inexpensive and convenient, are also being used more and more on farms where large herds are kept.

There is a growing tendency toward silage in preference to dry hays. Unfavorable weather at harvesting time is less serious for silage than when hay is being cut and cured.

Silage is succulent and keeps cattle in good condition through the winter. Silage production requires less acreage and, therefore, permits the use of soil-building crops on land that would otherwise be needed for growing hay.

The construction of a trench silo is fairly simple. A narrow trench should be dug on farms where only a few animals are to be fed A cheap roof placed over the silo will help protect the feed from bad weather and keeps the walls from caving in.

Liberal Fall Feeding of Cows Increases Profits

Liberal feeding of early fall freshening cows and of all cows during the dry period will materially increase the dairyman's income, according to E. A. Hanson, extension dairyman, University farm, St. Paul.

Too often the early fall freshening cow is underfed because pastures are low, and to many dairymen it seems too early to start barn feeding only a few cows. All CTA records, however, show that fall freshened cows, well fed from the beginning, lead in year-round butterfat production.

During late summer and early fall months, alfalfa hay will serve as a pasture supplement if pastures are sufficiently heavy. If pastures are poor, fresh cows should receive a full feed of hay and grain twice daily in order to maintain high production. Silage may be fed to advantage immediately after the silo has been filled.

At this season of the year, fall freshening cows are being turned dry, and others are rapidly going that way because of poor pastures. Good dairymen aim to give their cows a dry period of about 6 weeks. Cows thin in flesh when turned dry should be fed a fattening ration during the dry period. Cows in good condition at freshening time will always start the lactation period giving more milk daily and continue at a higher level for a longer period than cows that have a short dry period and freshen in poor condition.

Orphan Chicks Best

Raise your day-old chicks away from home, if you want them to grow up to be healthy layers, is the advice of Ohio research poultrymen. Isolation of young chicks from older birds, but allowing them use of range on the experiment station farm, resulted in a mortality rate of 56 per cent. In an adjoining pen, other pullets, hatched from station eggs but which had been grown to laying age away from the station, had a mortality rate of only 24 per cent. This experiment caused the Ohio scientists to point out "the need for a new phase of specialization in poultry raising, the production of livable ready-to-lay pullets. The brooding of chicks and the growth of pullets in the future may largely become a commercial enterprise in the hands of specialists." —Country Home Magazine.

HINTS FOR FARMERS

There are, as a rule, ten eggs to a pound.

* * *

A total of 5,035,000 motor vehicles of various descriptions are used on the farms of the United States.

* * *

A good orchard fertilizer contains readily available nitrogen. Nitrate of soda, sulphate of ammonia, and cyanamid are common forms that meet this requirement.

* * *

Canada was the leading exporter of honey to the British Isles in 1936.

* * *

A cellar with a dirt floor is better for potato storage than one with a cement floor.

* * *

The 1937 lamb crop is estimated by the bureau of agricultural economics at nearly 31,000,000 head.

* * *

Eggs whip to a larger volume and beat more rapidly if they are at room temperature than when they are chilled.

STAR DUST

Movie • Radio

By VIRGINIA VALE

"THE Prisoner of Zenda" threatens to become everybody's favorite picture. Girls love it because it is tenderly romantic, boys are crazy about it because it is a thrilling adventure story, and the old folks like the pomp and circumstance of the court scenes. Of course, the mere fact of Ronald Colman's presence is enough to bring crowds to the box offices. He plays a dual role and the only complaint is that Madeline Carroll does not play two parts too. She is probably the most utterly charming heroine of the year—any year.

—*—

Hollywood had a lot of surprises recently that sent all the girls scurrying out to buy presents. Miriam Hopkins up and eloped with Anatol Litvak, the director, and Alice Faye and Tony Martin rushed off to Yuma, Ariz., and got married. Religious differences had caused the breaking of their engagement several times, she being Catholic, he Jewish. To make matters more complicated both had anti-marriage clauses in their contracts with Twentieth Century-Fox. The studio has forgiven them, but parents are said to be still pouting.

Miriam Hopkins

Mr Litvak, Miss Hopkins' new groom, has just finished directing Claudette Colbert in "Tonight's Our Night," at Warner Brothers'. No one over there will ever forget him. In a scene that took place in a market he insisted on having real geese, turkeys, and chickens. The hot sun got in its deadly work and players had great difficulty going through their scenes without holding their noses. Finally the studio had to replace the poultry every few hours, but all attempts to use papier mache ones failed. Mr. Litvak detected the imitations at once and refused to work until real ones were provided.

—*—

Claudette Colbert's good humor made a host of friends for her on the Warner lot and everyone is sorry that she was loaned to them for only one picture. One afternoon almost everyone's nerves were shattered by the many repetitions of a scene. While she was talking to Charles Boyer, a dog was supposed to come in carrying a shoe in its mouth. Over and over the scene was played, but the dog never came in at just the right moment. Finally Miss Colbert, serene and fresh as an April morning, suggested that the director let the dog play the scene with Boyer and she would come in on all fours carrying a shoe in her mouth!

—*—

Ever since James Cagney walked out of the Warner studio and went to work for Grand National where he is as happy as can be, there have been battles between the studio and their players. Now Joan Blondell is on strike. She thinks she has been working too hard and refuses to start on the new picture scheduled for her. Kay Francis is trying to break her contract . . . says that she signed it only because they promised to give her the leading role in "Tonight's Our Night." And after all, they gave the role to Claudette Colbert.

—*—

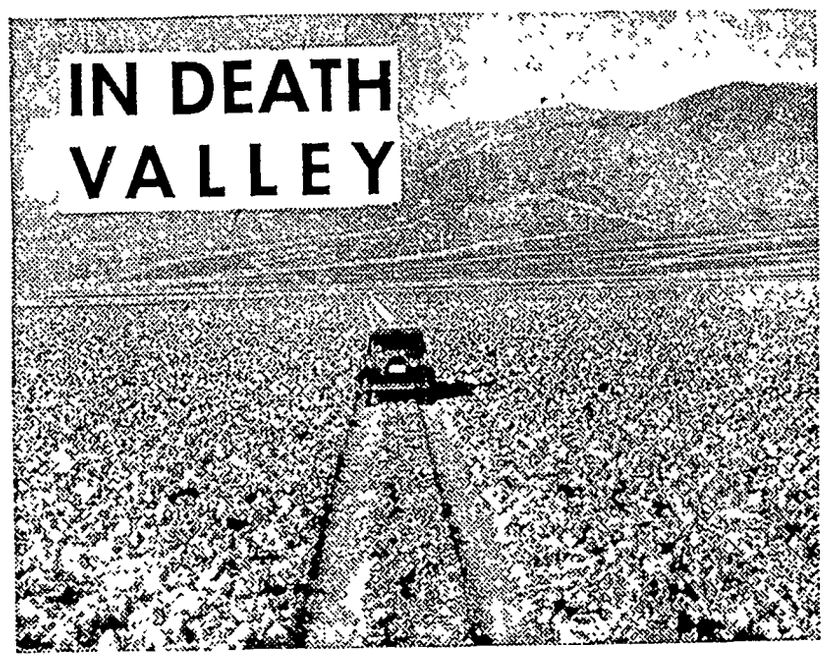
Bing Crosby's absence from his radio program still leaves a big gap in Thursday night's entertainment, but at last there is a new picture of his to be seen and heard while we wait for his return to the air waves. "Double or Nothing" is pleasant and casual and amiable, just like all Crosby pictures. Three of the songs are real hits—"It's the Natural Thing to Do," "It's On—It's Off," and "The Moon Got Into My Eyes." Martha Raye is there with her frenzied buffoonery, and Mary Carlisle makes the prettiest heroine he ever had.

Bing Crosby

—*—

ODDS AND ENDS—Ever since Nelson Eddy joined Ida Lupino and Charlie McCarthy in that goofy spy travesty on the Sunday evening coffee hour, radio and picture fans have been begging him to play in a motion-picture comedy . . . Phillips Lord is sending out Christmas presents now, because he knows he will be too busy in December with his Gang Busters and "We, the People." He sent Mark Warnow of the Hit Parade a watch with most complicated innards. Four times a day the works whizz around, gaining hours. It came with a guarantee that it would never tell the correct time.

© Western Newspaper Union.



A Death Valley Road Through Rough Earth Formations.

Once Dreaded American Desert Has Now Become the Playground of Man

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

NEWS that the Thirteen Colonies had become the United States didn't reach Pacific coast Spaniards till years later. Barriers of distance and desert were such that even after California joined the Union, in 1850, it still took weeks to get mail from Washington. No other state was ever so isolated.

Men hated the desert then and feared the horrors of death from thirst. Every trail across it was strewn with bones of men and oxen and abandoned wagons.

Now the desert is man's playground.

Planes, trains and motors, of course, have robbed the desert of its dreads. Now idlers in shorts, bright-colored pajamas, or bathing suits sprawl about these desert pleasure resorts, as in Death valley, and fret if they can't get this or that favorite brand of imported mineral water, all within a stone's throw of where dying pioneers found not even a mouthful of alkali water!

The sting has been taken out of Death valley completely by modern transport. Much of it is now a national monument, and winter visitors swarm in over new roads, lured by its astounding physical geography.

You can imagine that here a giant smashed the world to bits, baked it, then spilled seas of paint over the colossal, silent ruin. Nature's emotions range from utmost fury to moods of restful calm.

Stand on Dante's View, a peak in the Black mountains which towers high above the floor of Death valley, and you can see over more than 150 miles of this weird, incomparable region.

Far to the west is Mount Whitney, highest peak in the United States, and below you is the lowest point in North America, 276 feet below sea level. And up the valley floor there stretches what looks like vast alkali swamps; but that is an illusion, for it is merely a coloring of the desert.

All Alone With a Chipmunk.

"Do you live here all alone?" a traveler asked an old man who sat before an empty hotel in the historic ghost town of Ryan.

"Me and a chipmunk," he said. "My friend'll be out soon so you can see him. He always comes to eat at ten o'clock." And at ten he came!

Borax and a few other minerals first made Death valley a busy place. It was then that the famous 20-mule teams hauled the big freight wagons with a water-tank trailer, taking weeks on the long, rough round trip out to a railroad station on the Mojave desert.

Mining is abandoned now. The borax diggers found a richer, more convenient deposit near Kramer, on the Mojave desert, where they can bring up huge chunks of glistening, glassy borax, with a railway close at hand. So the long mule trains are no more; but you can still see the giant wagons standing along Furnace Creek Wash, where the tired, dusty mules were last unhitched. Beside these big wagons visitors pose now to be photographed. That is commonplace reality; all about is unreality, illusion.

Save one or two tiny favored spots where water comes down from the canyons, Death valley knows no cultivation. Despite sightseeing buses and private motorcars that throng its dusty trails, there is still something very significant in the warning signboards which tell how many miles it is to the next water.

Different, indeed, its destiny seems from that of other California deserts criss-crossed by man's irrigation ditches!

Once Arid Regions Now Gardens.

Maps of barely 30 years ago bore the words "Colorado desert" across what is now Imperial county, with 60,000 peop'e.

If the prehistoric monsters who left their tracks about the Salton sea could come back, they would find plenty to eat now, for this below-the-sea region has become the nation's hothouse.

Years ago a plant explorer for the United States Department of Agriculture brought some date suckers from Arabia, which were planted, experimentally, at Indio, in the Coachella valley.

Today a huge industry has grown up and the groves there resemble those about Bagdad or Basra, in Iraq.

Much of the desert basin above the Salton sea, with its duck clubs and speedboat races, is still empty; here and there are date and other gardens of astounding fertility. Men must have felt the heat the day they gave such local place names as "Mecca," "Arabia," "Thermal," and "Biskra."

Planes from Los Angeles for Phoenix, Tucson and El Paso fly down this long, hot valley, entering from the north through San Gorgonio pass. Grotesque tumbleweed, rolling over deserts in hard winds, looks like brown bears at full gallop.

Not far from San Gorgonio pass, you may visit the site of one of many construction camps on the Colorado river aqueduct project with its miles of tunnels. A worker there once found a petrified egg about the size of a coconut.

Across the valley men dig the great hole that will carry water under the San Jacinto mountains. Like the Indians before them, local whites say that sometimes this mountain "growls." Geologists say it is a "young" mountain; that if there are growls, they may be earth tones from subterranean movements along earthquake faults.

Earthquakes Now and Then.

Earthquakes occur here when one block of earth crust slips past another along an earth fracture. Several such faults extend from the Mojave desert to offshore islands.

One such slip caused the Long Beach earthquake of March 10, 1933. Mud and hot water squirted from cracks that opened in the ground. Many people say they saw a waving motion pass across the fields which set trees, houses, and water tanks to swaying, while up from the rocking earth came a deep-toned, roaring sound.

If a giant could seize the edge of this region, as you might grab the lid of a steamer trunk, and thus lift the top off southern California, you would see below it one of Nature's busiest workshops. Down here, in the dark, things go on which affect all that live up above in the sunshine.

Far into the earth, miles and miles deep and many leagues long, run the faults or fractures that figure in the quakes; but more important to man on top of the ground are the vast underground basins that hold water for his wells and other great natural tanks, from which for decades he has pumped that oil which, more than anything else, has put this region on a solid economic basis.

Since exciting early days, when pioneers bored and found oil in commercial quantities within the city limits of Los Angeles, its flow has increased, and southern California has become a financial and geographic center of a Titan industry.

Oil Attracted Many Thousands.

As with the land booms, so in the days of oil excitement there came hordes of oil executives, technicians, drillers, rotary helpers, derrick men, tool-dressers, teamsters and truckmen, roustabouts, pipe liners, tank builders, refinery workers, and stock salesmen, adding their thousands to an already heterogeneous population in and around Los Angeles, the fields of Kern county, and the Kettlemen hills. One well in Kettlemen hills was bored in 1933 to a depth of 10,944 feet, a new record.

Odd, indeed, to visitors is the sight of oil derricks set out in the ocean, down the coast from Santa Barbara, which pump oil from below the sea. At the Rincon field a well has been bored which is more than half a mile from the mainland. The discovery that holes already very deep could be drilled even deeper and actually deflected to reach new sections of oil pools has given Huntington Beach a new boom.

From an airplane you look down on "tank farms," where oil is stored; clusters of white metal tanks appear like giant frosted cakes; roofs of still larger reservoirs, built like ponds, are protected by lightning rods. These, the roaring refineries, the long pipe lines, trains of oil cars, and tank steamers loading at the ports, are the outward and visible signs of this trade now operating under the oil conservation law.

ENCORE

"And if I refuse you, Percy—will you commit suicide."

"Well, that has been my usual custom"

She: "Would you put yourself out for me?"

He: "Of course I would."

She: "I wish you would then, it's getting late"

THE KLEMME TIMES

VOLUME 42 — KLEMME, IOWA, WEDNESDAY EVENING, OCTOBER 13, 1937 — NUMBER 21

More Assistance Will Be Given Aged This Year

D AGE PENSIONERS OF HANCOCK COUNTY TO RECEIVE PAY INCREASE

proximately 50 Percent Boost Will Be Made November 1st

A substantia lincrease in the ount of money paid aged pers in Hancock county, who re- age pensions, will be available vember 1st and will be applied checks received that month, it s learned recently from offici- sources

The amount of increase to each nsioner will be as high as 50 cent of the amount now being eived This applies only to penners on the roll prior to Janu- 1st, 1937. There are 181 penners in Hancock county, as of s date, who have received an erage of $14.76 per month. Recds, as of August 1st, showed 147 nsioners in the county, drawing total of $2,568.

The increased paymens, effect- November 1, will mean an adional $1,200 for the county each nth or an approximate total of 800 per month.

This increase comes at a most portune time, giving pensioners ch needed extra money for the rchase of winter fuel and cloth-

Records, as of August 1st, show- Wright county had a total of on he pension roll. The county eived a total of $3,999 per an average of $14 per pensioner For the state as a whole there 40,042 pensioners receiving a al of $614.196 per month, or an erage of $15.34 per pensioner ch month.

Under the present plan the fedl government furnishes half this amount and the other half furnished by the state.

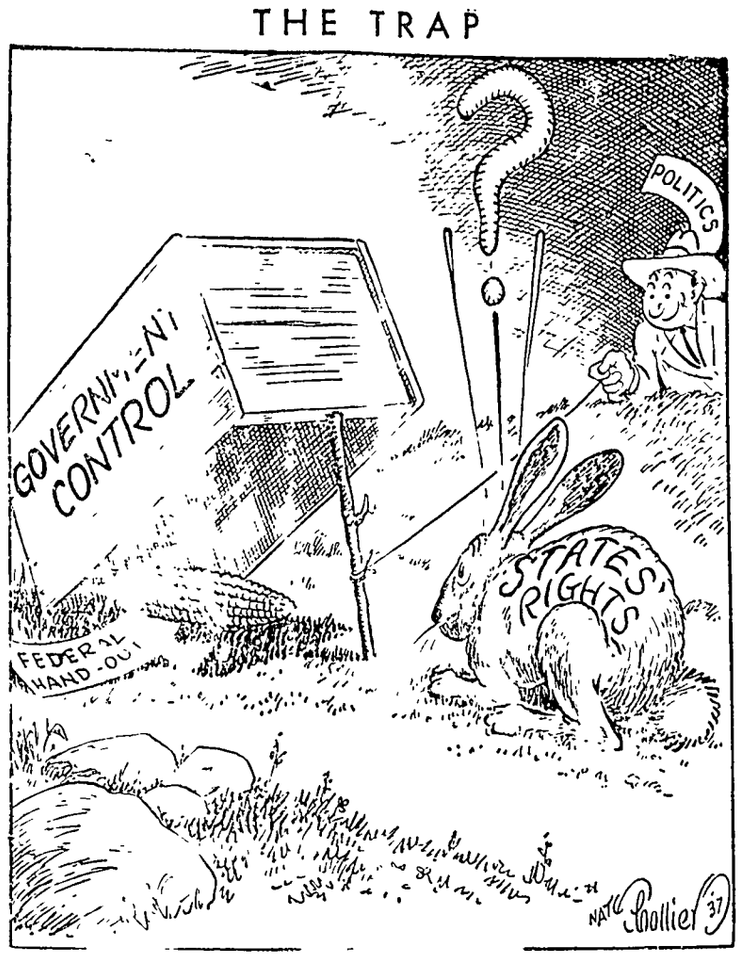
THE TRAP



Kluckhohn Fans Twelve But Ancient Rivals "Win As Usual"

SHAMROCKS LOSE FINAL GAME OF SEASON TO GOODELL

Klemme High School's baseball team closed the fall baseball season by dropping a hard-fought game to Goodell on the local diamond last Wednesday by a score of 5 to 1 Both teams went scoreless for four innings; then the Shamrocks grabbed a one-run lead when Buseman doubled over the cneter fielder's head, made third when Wicks and Lemke walked, and came home when Johnson kicked Schuldt's infield roller Goodell evened the count in the first half of the sixth when Latch was safe at first on an error and scored on Johnson's triple.

In the seventh Klemme had the visitos practically retired when an infield error gave Sellers life at first, and two more errors coupled with two hits resulted in four runs

Kluckhohn, pitching his second game in as many days, gave up only two hits up to the fatal seventh, and he whiffed twelve batters during the game. Johnson was equally effective, holding the Shamrocks to one hit and also striking out twelve Klemme batsmen

Loyal Workers Class Dinner

The Loyal Workers Sunday School class of the M. E. Church held their annual dinner Sunday at the Church There were about sixty present for the dinner A short program was given after the noon meal and the following class officers were elected:

UNLAWFUL TO SELL GAME, DEAD OR ALIVE

It is unlawful to buy or sell, dead or alive, any species of game except rabbits in the state of Iowa. Licenses game breeders are an exception to this law when selling game raisd by them.

What 128,000,000 Consumers Want

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

Recent estimates by the Bureau of the Census place our population at approximately 128,000,000

That includes everyone within the territorial boundaries of the United States. That is the group for which our government is conducted, and by which it is supported. That is the American nation.

How is this huge group faring?

In the one thing that concerns it most—the cost of living—not so well!

From housewives and wage-earners throughout the nation are heard protests against the increasing strains imposed on the family budget; against the deepening dips into the weekly pay envelope required for the necessities of life.

In cases where the family income has remained stationary, the burden entailed is serious. In those rarer instances where income has risen, the benefits of such increase have been offset by the higher costs of food, rent, clothing and equipment essential to life and work.

This is not what our 128,000,000 consumers expect when the politicians promise them better conditions. What they anticipate is not less for their labors, but more.

Neither politicians nor the government — as experience has proved—can fix successfully or directly the cost of commodities. **But they can reduce the high cost of living, by cutting the high cost of government—for again, as experience has proved, the two are twins.**

A steady climb in the public debt, and a corresponding rise in political payrolls is not the way to lighten either of those burdens. If the government wants to help its people, let it lower its own costs then watch the cost of living fall in unison.

And 128,000,000 consumers will cheer such a program.

HENRY PEITZKE, FORMER KLEMME BLACKSMITH DIED AT LUVERNE

Funeral services are being held this Wednesday afternoon at the Methodist Church at LuVerne for Henry Peitzke, 74, who died of double pneumonia.

Mr. Peitzke was a blacksmith and went to LuVerne from Klemme 32 years ago. Mr. Peitzke operated a blacksmith shop in Klemme for a number of years.

He is survived by his widow, a son, Roy, of Webster City, and four daughters, Mrs Florence Allen, West Union; Mrs. Vern Stone, Mason City; Mrs. George Deitzel, Spencer, and Mrs. Faye Thompson, Eagle Grove.

BAKE SALE

The Kings Heralds of Liberty will hold a Bake Sale at the Wellemeyer Store on Saturday, Oct. 23, beginning at 10:00 a. m.

Return To Home

GOODELL—Mrr and Mrs. J. Hasselberg and son, Oscar, from West Brooklyn, Ill, concluded a visit with her sister, Mrs. Olandet Sandberg, and returned to their home.

Legion-Auxiliary

The Auxiliary ladies will meet this Thursday evening at the home of Miss Grace Blank.

TEXAS GIRL, 14, IS MARRIED 2nd TIME

HOUSTON, TEX.—A Texas girl who married at 12 and was a widow and a mother at 13 was remarried at 14 Thursday. The widow of H C. Lassiter, who was accidentally killed while cleaning a gun, now is the wife of Leslie Webster. She has a 13 month old daughter.

Garner Chapter Of Eastern Star To Meet Friday Night

There will be work in the Initiatory Degree at the Eastern Star Chapter meeting at Garner this week Friday evening.

"Tough Baby," a short fiction story of a girl who tried to break up a love triangle with a gun In the AMERICAN WEEKLY, the magazine distributed with NEXT SUNDAY'S CHICAGO HERALD AND EXAMINER.

SCHWARZ-HARRENGA

GARNER—A marriage license has been issued to Erwin Schwarz, 23, Lakota, and Martha Harrenga, 22, Titonka.

An Iowa clergyman boasted he could marry forty couples in an hour. Forty knots an hour is going some

The Most Valuable "Crop"

While adult farmers are struggling with the problems of production and marketing, a splendid new "crop" of farmers of the future is growing up

More than a million farm boys and girls are now enrolled in the 4-H clubs Here they are learning practical lessons in successful agriculture. On a not distant tomorrow, they will be operating the nation's farms, organizing and running the nation's farm marketing cooperatives and working out the problems of the day.

The fact that organization of farm youth has now reached its highest point in history, augers well for the agricultural future. The training and information these young farmers receive in their 4-H clubs and elsewhere will prove invaluable

Make Your Own Lace Accessories

By CHERIE NICHOLAS

MISS COLLEGE GIRL, Miss Debutante and matrons young and not so young who being active in social affairs need must "dress up" to occasion, here's telling you how to economically acquire that air of elegance which fashion demands for this fall and winter. No matter how ungenerous your clothes allowance may happen to be you can have a whole collection of lace "pretties" such as the sketches here show at comparatively trifling cost. In fact the idea that prompts this illustration, together with its story, is to give you "pointers" on dressing smartly and handsomely on a limited allowance.

A touch of lace will do it! Transform your simplest demure and unpretentious gown into a costume of distinction. And now that we've told you, the first step is either to let your favorite dressmaker in on the secret (show her these sketches) or perhaps you prefer to thriftily adopt the "make it yourself" course of action. Not that you have to be an expert with the needle, for, provided with carefully selected patterns, there is no reason why, if you can sew even a little bit, that you should not successfully copy these charming fantasies. No matter how many you make of these lovely lace items you can't ever have too many.

Here's a word of friendly advice: don't stint in getting the best type laces for the finer and more exquisite the lace you use in making these dainty fashions the more conclusively will they carry a message of high-style prestige.

If you are clever and have a knack of your own a pattern will not be necessary for the cape for it is cut along simple circular lines. However, a pattern similar to the model shown should be easily available. It has little tailored epaulet effects on the shoulders and cunning wee buttons with tiny thread-crochet loops to fasten it down the front. You can get it hemstitched about the edge or finish with roll hem. As an evening wrap this cape of black Chantilly may be worn over the fashionable all-black gown or over the dress done in lovely pastels.

Have you heard the news about the stunning blouse and skirt or jacket and skirt formals that designers are featuring this season? They are quite the talk in fashion realms. The jacket is supposed to be of sumptuous fabric or lace in contrast color to the monotone skirt. Choose black lace if you want it to "go with everything," although metal lace is wonderfully effective, or if you cherish a color scheme why not a lace jacket in the new spruce green with a crepe skirt in darker rich green, or suppose we say any color just so the jacket is lace? It is no trick at all to get a simple basque-jacket pattern of the type pictured and it will be found easy to make.

The little white cotton lace bolero is very popular and it can be made up so inexpensively it is worth while to keep two or three in waiting for emergency calls. Wear it over simple afternoon dresses or over a floor length crepe sheath which transforms it into an evening ensemble. Jeff of London has made an effective accessory ensemble of black Chantilly lace. (See sketch to right bottom.) The jabot with its high neckline matches a pair of gauntlets of the same black Chantilly, and together they give the essential feminine look to the most tailored of suits.

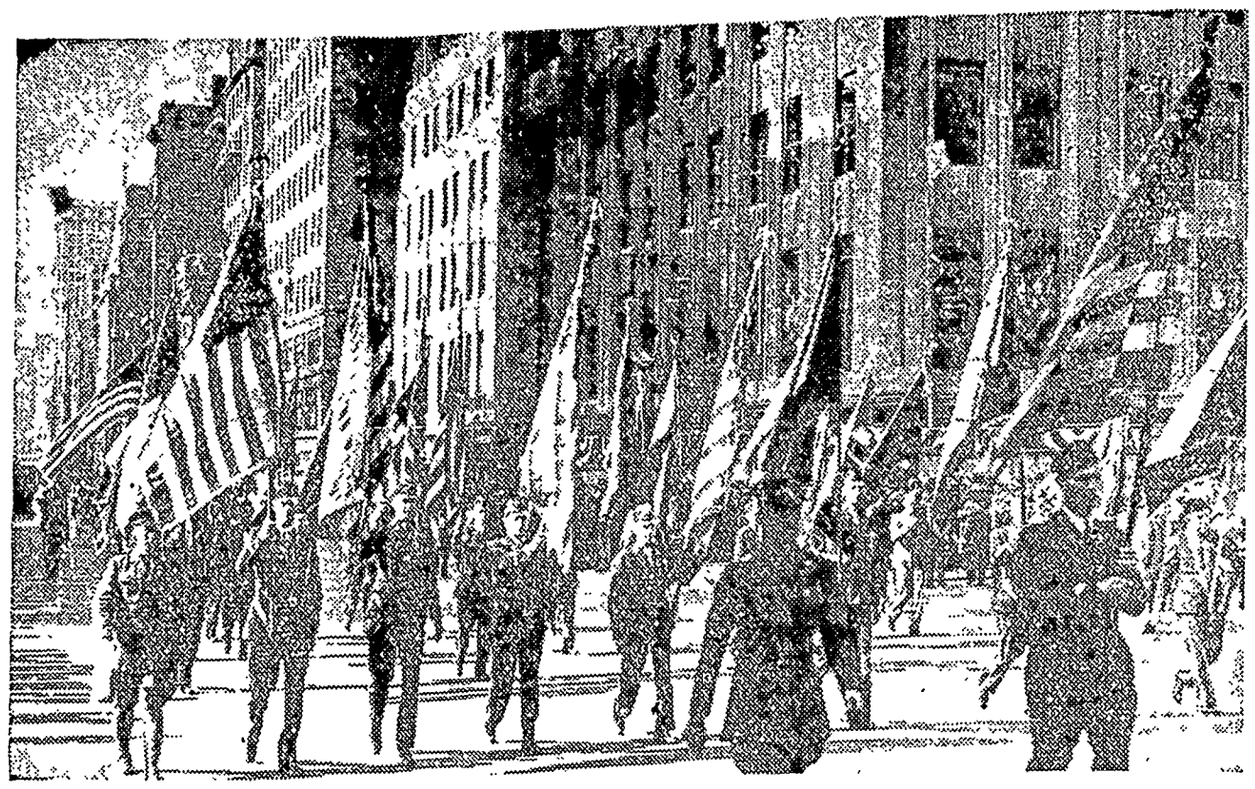
Massed Colors Lead the Legion Parade



Two hundred thousand strong, members of the American Legion paraded down Fifth avenue, New York, in a procession that lasted for nearly 24 hours. View above shows the massed national colors which were in the vanguard of the marchers, who were attending the organization's nineteenth annual convention.

When Windsors Visited Hungary

The duke and duchess of Windsor and their hosts, Mr. and Mrs. Charles E. Bedeau, pose in native costume before the latter's hunting lodge at Bordsodivanka, Hungary, where the Windsors were guests recently. The duchess stayed at the French villa of the Bedeaux for a time after she left England last winter.

Daniel J. Doherty Legion Commander

Daniel J. Doherty, Boston attorney, who was elected national commander of the American Legion at its recent convention in New York city. Doherty was born in Woburn,

Mass., in 1894, enlisted in the United States navy in 1917, where he served as a warrant officer during the war. He has held many posts in the Legion. Mrs. Malcolm Douglas of Seattle, Wash., was elected president of the American Legion Auxiliary.

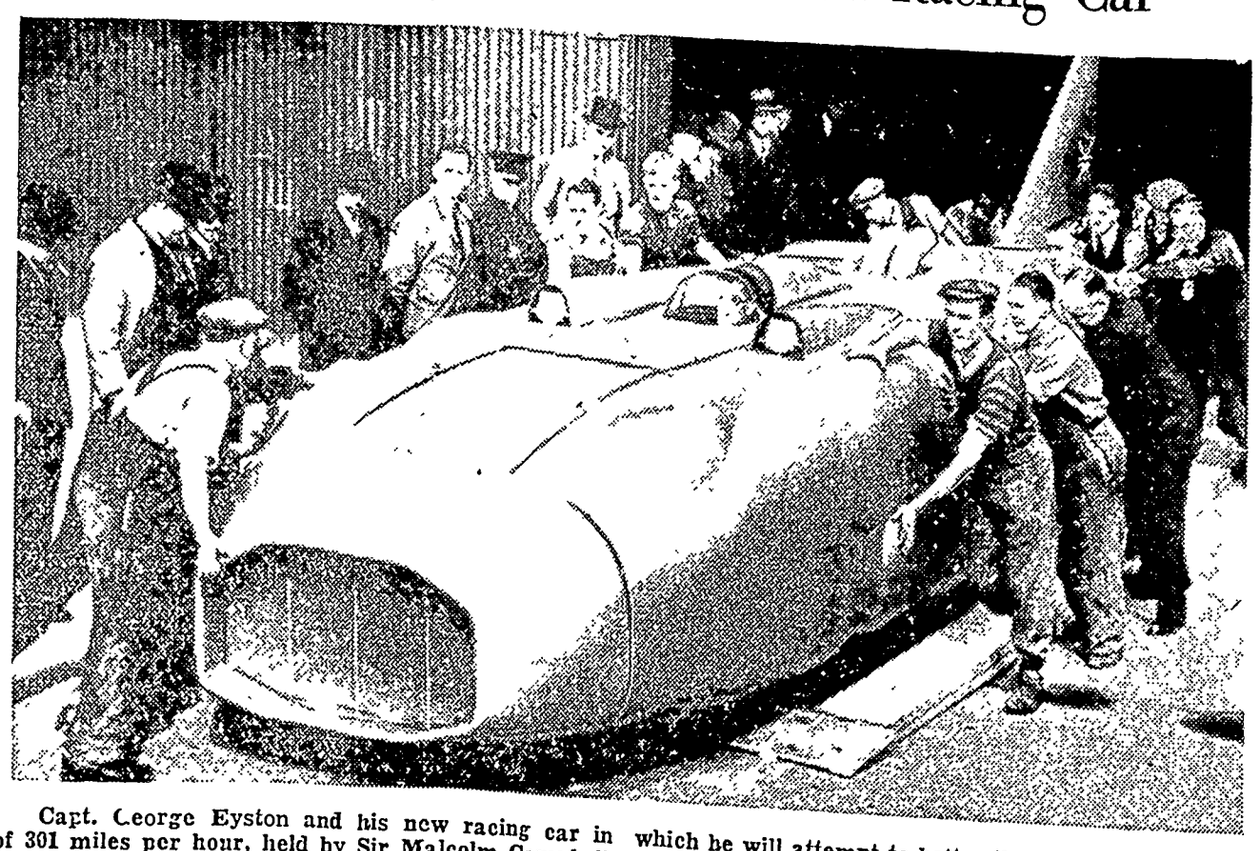
NICE PLAYMATE

If Geza Szegedi of Budapest, Hungary, lacks for friends, he can blame only himself and his strange hobby. Geza's father is keeper at the municipal zoo and with a veritable ark of animals to choose from, the lad picks a python for a companion.

Here's the "Bird" for Aviation

Not satisfied with present-day aircraft, R. Passat, center, of Surbiton, England, invented this new-type flying machine which he claims is inspired by action of birds in flight. Wings of the "Lark," as he calls it, catch the air like the feathers of a bird in flight.

Seeks New Speed Record With Racing Car



Capt. George Eyston and his new racing car in which he will attempt to better the world speed record of 301 miles per hour, held by Sir Malcolm Campbell, shown at Chiswich, England. The new speed tests will be made at Salt Lake City, Utah, when Captain Eyston arrives there from England with his new car.

SILHOUETTE TRENDS FOR EVENING DRESS

By CHERIE NICHOLAS

Outside of that the pencil-slim Directoire with its high slit skirt and the revival of the Empress Eugenia, there is a definite tendency in many houses to a Spanish type of dress. This is usually marked by flounce ruffles. And one must not forget the gently widened skirt as evidenced also in the afternoon clothes. The most startling bit of material used in this has been the placing of various types of lace over lame to give the firmness and stiffness required. One more skirt—and the silhouette can be settled. That is the short front. This varies from the gradation effect to those cut off clear to the knees in front to show a filmy petticoat of ruffled net. A cross between this and the Directoire are skirts which are cutaway like a man's coat, to the knees and then come down to the ground at either side seam.

Daytime Footwear for Fall Loses Rugged Sporty Look

Most daytime shoes have lost the rugged, sporty look that formerly characterized the appropriate footwear for tailored suits. Smart, soft-toed models, many of them made with elastic insets and gores, mould the foot trimly. Others, constructed entirely of elastic leather, insure a streamlined silhouette, unmarred by gapping sides or fastenings that protrude.

These snug, form-fitting styles are as easy on the feet as bedroom slippers, partly because of their construction and partly because of their comfortable walking - height heels covered with matching materials or built up of little uncovered layers that are nick-proof and resilient.

BRIDLE-PATH CHIC

By CHERIE NICHOLAS

To dress up to the part she plays should be the ambition of every true sportswoman. It may be along scenic bridle paths that the enthusiast guides her gallant steed or it may be in the glare of bright light and trumpet loud in the fashionable horse show arena that she will make her bow. In either event her riding togs must be correct down to the slightest detail. The picture shows a sartorially perfect outfit We would especially call your attention to the horse's head carved from brown shell catalin that is noncha lantly pinned on her coat. During the summer it became quite a fa to wear novel carved catalin fish frogs, snails and such, either clip or brooches, on one's bathing suit.

"Quotations"

To live in the present is medicine for the spirit; it is the path to peace. —*Bruce Barton.*

Imitation of life—that's all that a good many women know today.—*Fannie Hurst.*

Why must only the ugly things of life be the material out of which drama is built?—*Otis Skinner.*

A leader is merely one who knows where he wishes to go, and gets up and goes.—*John Erskine.*

The wise carry their knowledge as they do their watches, not for display, but for their own use.—*Sir Thomas Browne.*

Sorrow itself is not so hard to bear as the thoughts of sorrow coming. Airy ghosts that work no harm do terrify us more than men in steel with bloody purpose.—*T. B. Aldrich.*

The Only Way for Chap in Such a Fix

Two heavyweight boxers—not let it be added, in the first class—were booked to fight an important contest.

Each man, secretly, had backed himself to lose the fight.

During the first round one of the men accidentally hit his opponent a light tap on the nose, whereupon the recipient of the blow lay down and let the referee start counting.

The other man was in a quandary. However, just as the referee reached the count of "nine," a brilliant idea came to him.

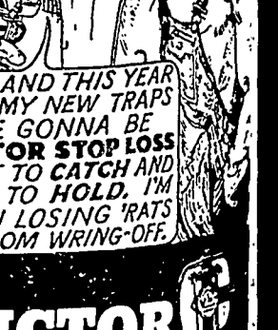
Rushing over to his prostrate opponent, he kicked him fiercely in the ribs, and was disqualified.

All people who suffer occasionally from headaches ought to know this way to quick relief.

At the first sign of such pain, take two Bayer Aspirin tablets with a half glass of water. Sometimes if the pain is more severe, a second dose is necessary later, according to directions.

If headaches keep coming back we advise you to see your own physician. He will look for the cause in order to correct it.

The price now is only 15¢ for twelve tablets or two full dozen for 25 cents — virtually, only a cent apiece.



15¢ FOR 12 TABLETS

virtually 1 cent a tablet

The Camera Goes to College

PICTURE PARADE Follows Peggy Co-Ed

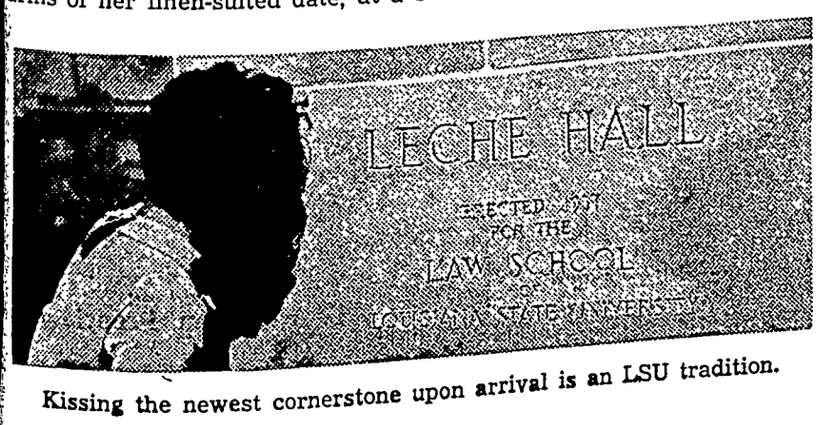
VACATION days are over. Peggy Co-Ed and her thousands of counterparts the nation over have started back to the whirl of studies, sports and dates that characterizes co-education in scores of American colleges and universities. Many, as "freshies," are meeting this Great Adventure for the first time. Here the camera shows what a typical freshman co-ed found as she started the new semester at Louisiana State.

Somewhat apprehensive Peggy Co-Ed stepped off the train at Baton Rouge, wondering what college days held in store for her.

Like the average freshie, Peggy had to go through certain entrance formalities to make sure she was equipped to become one of the 7,300 students. It's not such an ordeal, however, and we see her above, receiving her card while others await their turns. This card entitles her to attend classes, but for the first few days the excitement makes it hard to get down to the grind. In music class (at right) is she absorbed in that sonata? More likely in that handsome professor!

The day's studies over, Peggy and dormitory mates primp for dates.

And at night we find her twirling about the gymnasium floor in the arms of her linen-suited date, at a student "hop." This is the life!



Kissing the newest cornerstone upon arrival is an LSU tradition.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington.—Some weeks ago when the Treasury was parading a lot of names of well known individuals before a joint congressional tax committee, I discussed the purposes of the investigation and reached the conclusion that the whole affair was staged. If I remember correctly, I called it a vaudeville stunt, designed by the Treasury to save its face for having made bad guesses as to tax collections. The tax collections, as everyone knows, were much below New Deal estimates and somebody had to be the goat. So, it was natural to make rich men the goat by calling them tax evaders.

Finding the Goat

At the same time, I reported to you the fact that there was a difference of opinion among Treasury subordinates. Some of them wanted to make a great show of names of individuals who had resorted to practices not prohibited by law in order to reduce their taxes.

I did not know at that time how serious the disagreement was within the Treasury. It has only lately come out into the open. As a result, two important Treasury officials have quit their jobs and have gone back to private life. I refer to Morrison Shafroth and Russell I. Ryan, chief counsel and assistant chief counsel, respectively, of the bureau of internal revenue. These two men know more about tax evaders and tax avoiders than anybody else in the Treasury but they had one grievous fault. They wanted to be honest about the whole situation. That was a fault because being honest did not make possible a flamboyant display of hatred for taxpayers who had employed legitimate means to pay as little tax as the law permitted.

As far as I can ascertain, Messrs. Shafroth and Ryan wanted to cooperate fully with the higherups in the Treasury in so far as a tax investigation by a joint congressional committee would point the way for improvement of the law. They knew, as many others know, that the internal revenue laws have holes in them. The smart lawyers and smart taxpayers naturally have taken advantage of these holes in the law because they are human despite the fact they are rich So, the chief counsel and his assistant proposed to Secretary Morgenthau and Treasury General Counsel Herman Oliphant that the investigation be made along lines of a scientific character, that close study be given to some of the methods that had been employed to avoid taxes. In other words, Shafroth and Ryan were anxious to develop legislation on the basis of the experiences which they had had and loopholes they had found to be in common use. But their fault was honesty, as government officials would not be denied the vaudeville performance and the columns upon columns of publicity which Mr. Morgenthau and Mr. Oliphant, not to mention President Roosevelt, desired to see.

* * *

I stayed through all of the hearings before the joint congressional committee. They ran for fourteen days. Each day the Treasury trotted out another official as the witness before the committee and he was armed with a prepared statement which he read for some two hours to a committee that sat back in easy chairs and smoked cigars in comfort—while newspaper men avidly wrote stories about rich men, some good and some bad, who had committed the heinous sin of paying as little tax as the law permitted.

Stooping Low

The resignations of Shafroth and Ryan rather convince me that the Treasury stooped to about the lowest level it has reached in recent years. Of course, it was not the first time in our history that income tax has been used for political intimidation. Reprisal is a strong word to use about government officials but I cannot escape the feeling that the Treasury used that investigation as a method of reprisal against many men who had opposed the New Deal.

I reach that conclusion on the basis of a review of the names which Messrs. Shafroth and Ryan refused to parade before the committee but which the Treasury itself used as the principal actors. Not more than three of the eighty-odd names presented to the committee had contributed to the Democratic national campaign fund a year ago. The tactics were not far from those employed by the late Huey Long in enforcing his will upon the people of Louisiana.

I can add to this a statement of the fact that Under-Secretary Magill, who had charge of presenting the so-called evidence before the committee at the capitol, believed the Treasury was not following an entirely wise course in the methods it employed. But Mr. Magill went along with the scheme and there were many of the correspondents covering that hearing who felt he tried to do the job fairly.

So now Morrison Shafroth and Russell Ryan are back in private life and in their places are men picked by Mr. Oliphant, men who are likely to obey orders regardless of the whims of Mr. Oliphant and Secretary Morgenthau.

* * *

Another instance of official action that seems to indicate a bad trend in government lately has occurred. This incident was propagated by the federal power commission, one of the numerous federal agencies that is supposed to be largely judicial in character but which is equipped at the same time with administrative powers.

Indicates Bad Trend

The facts are these:

There was a group of men who served as directors of the Associated Gas and Electric company. These same individuals were directors for numerous corporations that are subsidiaries of that same company.

The federal power act provides that the commission may require directors of one power company to divest themselves of connection with any other power companies—one of the strongest features of the law. The commission is empowered to make its own investigation of these interlocked directorates and then on its own motion may require such directors to appear and give the commission satisfactory reasons why they are holding places on the boards of more than one corporation. This also is a sound provision of law and undoubtedly works to the benefit of all consumers of light and power.

Before I proceed further, let it be definitely understood that I have not a great deal of respect for the Associated Gas and Electric company. Its record does not warrant my respect as an observer. Undoubtedly, however, its management complies with the terms of its corporate charter but as a great public utility it has obligations to the public beyond the terms of its charter and it is my opinion that the moral obligations are such that this age demands full observation of them.

This brings us to the crux of the power commission action. Late in September Vice Chairman Seavey of the commission had ordered the group of directors referred to above to show cause why they should not be compelled to relinquish various positions on other boards of directors. A hearing date was set. A few days before the hearing date, the directors in question resigned the positions to which the commission objected and then their attorney issued a statement which said, in effect, that they had resigned because they were convicted in the minds of the commission before the commissioners had heard the case. He used rather strong language, perhaps too strong in expressing his views.

Upon publication of the attorney's statement, Vice Chairman Seavey promptly ordered him to appear before the commission to give his reasons for the statement and to defend himself against disbarment from practice as a lawyer before the commission.

Now, lest I be misunderstood, I do not know the attorney, Mr. Paxson; I know nothing about the merits of the case in question. But it is significant that an agency of the government suddenly decides that it can prevent a man from earning his living because he criticized members of that agency.

* * *

Occasionally, situations develop in national politics that provide a real laugh. One of them is now at hand. It results from the nasty controversy that swirls around the head of Hugo Black of Alabama, newly appointed associate justice of the Supreme court, who is charged with being a member of the Ku Klux Klan.

Just a Big Laugh

Terrible as is the charge and worse if it eventuates that Mr. Justice Black still is subject to the oath of the invisible empire, there is humor in the way a lot of senators and other government officials are running to cover. It has been almost a scramble among Democratic senators to let the public know by issuing statements that they would not have voted for Senator Black's confirmation as a member of the court if they had known he was a klansman. It makes one laugh again when one recalls how carefully the majority of the Democrats in the senate refused to hear evidence or hold any sort of a hearing concerning Mr. Black's qualifications. They did this by voting down a motion for hearings.

It is not pleasant to contemplate how the senate so many times passes on judicial appointments with the carefree abandon of a boy on his way home from school

ASK ME ANOTHER ?

A Quiz With Answers Offering Information on Various Subjects

1. Which is greater, the diameter of the earth from pole to pole, or the diameter between two points on the equator?
2. What is meant by the gentlest art?
3. Who was called the scourge of God?
4. Do United States vessels pay toll when passing through the Panama canal?
5. What is meant by a repeating decimal?
6. Does the United States have a woman ambassador or minister to a foreign government?
7. What are the seven follies of science?
8. How may one change Centigrade temperature into the equivalent Fahrenheit temperature?
9. Does the United States army carry out executions with a firing squad?
10. What is the definition of a college?

Answers

1. The latter, since the earth is slightly flattened at the poles.
2. The term refers to letter writing.
3. Attila, king of the Huns in the Fifth century, so styled himself.
4. No.
5. It is one in which a figure is repeated without end, such as .66666+.
6. Mrs. J. Borden Harriman, the only one, is minister to Norway.
7. The so-called follies of science are the quadrature of the circle, the duplication of the cube, trisection of the angle, perpetual motion, transmutation of metals, fixation of mercury, the elixir of life.
8. Multiply by 9-5 and add 32 to the product. To change Fahrenheit into Centigrade, subtract 32 and multiply the remainder by 5-9.
9. The United States army uses hanging as the method of execution. The practice of carrying out a death sentence by shooting was discontinued about the time of the Civil war.
10. A college, as defined by the National Conference Committee on Standards of Colleges and Secondary Schools, is an institution requiring for admission graduation from a standard secondary school, or the equivalent, and offering a four-year curriculum leading to the first degree in arts and sciences, of such character as to qualify for admission to a graduate school of recognized standing.

Uncle Phil Says:

And Is That True?

That all men are created equal is one of those things everybody says and means that all men are created to have an equal chance.

We sometimes wonder if a pugilistic champion could stand three days of haying.

A cackling laugh is not so cackling if it is at your comic remarks.

When a young man who has a girl rents a safety deposit box, he's got a hope chest.

They Can't Follow Rules

Most people who are in jail are there because of defective judgment—on their part.

Solon wasn't so smart. He said "Reprove thy friend privately; commend him publicly." Reprove thy friend privately and thou'lt have none. We don't reprove our friends; we love 'em.

If the bombing apparatus of war is developed any further, all the wars will be "dig-in" wars.

The resolution hardest to keep: To hold your tongue.

Worthy of Friendship

"MAKE me worthy of friendship, and give me friends; make me worthy of love, and give me love," was the daily prayer of a loyal heart that had learned the sacredness of human ties. Many a lonely one, complaining of neglect and isolation would find life's whole environment changed by learning humbly and sincerely to pray that prayer. Friendship, to abide, must find a worthy resting place, and love has its duties. No one can demand either as a right. The heart that is tenderly and unselfishly ready for them will never miss them.

FREE TO BAND INSTRUMENT PLAYERS

Simplified, practical instruction in salesmanship combined with the opportunity to earn extra money selling world-famous Martin and Indiana brass instruments and saxophones, and Pedler clarinets. Grade School News

Grades 1 and 2

We have some new wall paper in our play corner

Isabelle brought a pretty plant to school.

We went to visit the bank on Wednesday When we came back we wrote the story of our trip to the bank. Maybe we are going to visit some other places down town soon.

We haye Halloween decorations up in our room Last week we drew and colored black cats.

Grades 3 and 4

We invited Miss Hansen's room to an Indian Homes reading party on Friday The third grade gave the party.

We have the framework of our Indian Tepee finished.

In Science class we talked about signs of fall

Ruth Bell brought a pretty geronium to school It has a pink blossom on it

This year we are keeping a Room Record In it we are keeping our school news, pictures of the boys and girls things we have made and things we have liked this year. We hope this book will be interesting to visitors in our room

Grades 5 and 6

Patricia Kudje and Lawrence Bock reporters

Eunice Lawens side won the health contest Thursday The losing side will give a short original program to entertain nthe winning side during the free period next Friday.

We have had many interesting stories in our 'news corner" about the war between China and Japan

The fifth grade geography class is studying about the Pacific States We are also making maps to show the mountains and valleys also the crops and where they are grown in the states

In sixth grade we are working on a Canadian Unit By maps we have shown where the different industrial regions are and where the wheat, oats and apples are grown We are also doing outside reading in the library to find out how the people of the far north "tundra" region work and live.

Posters in connection with our Health "Fresh Air" Unit in the sixth grade, have been finished

Thursday afternoon we enjoyed a Fire Prevention Program in Miss Merritt's room They gave reports telling us about big fires and how they were started They also told us how we could pevent fires

Grades 7 and 8

The seventh and eighth grade appointed Ellen Kilgore as news reporter for this week Each week a different person will report the news for our room.

Monday morning we went into the assembly and saw the freshmen initiated

Eugene Haberkamp is acting as librarjan in our room.

This week we have been observing "Fire Prevention Week" We have read about the great Chicago fire, San Francisco fire, and other more recent fires Reports have been given on fire prevention laws, modern fire equipment fire hazards and various ways that we may prevent fires In the seventh grade hygiene class we learned how to care for burns

Thursday afternoon we invited the fifth and sixth grade room in to a fire prevention program

Charles Bock and Homer Blickenderfer have been the school patrolmen for this week

Charles Bock, Melvin Coobs and Ellen Kilgore are the only people who had perfect scores in spelling last week

—Ellen Kilgore

—K H S—

Ivan Johnson, Virgil Stille Morris Nuehring, and Chester Ward are the crazy maniacs, so "Who Wouldn't Be Crazy is just as crazy as it sounds See the junior class play on September 21 and 22

ITEMS OF INTEREST FROM ELL TOWNSHIP

•

Miss Mary and Albert Swanson entertained the following to dinner Sunday: Mr. and Mrs Oliver Potter, of Mason City; Mr and Mrs Art Kudje and family, Mr and Mrs. Stuart Hevelin and family and Mr and Mrs. Jack Etchen and Betty Jean

Mr and Mrs Melvin Neuberger and daughter, Wert Loger and Mr and Mrs O W. Lemke were Sunday evening visitors at the Lewis Neuberger home

Mr and Mrs. Herman Stromer returned Monday from their trip to Eagle Bend, Minn A niece of theirs Miss Norma Stork, accompanied them home for an indefinite stay

Mrs John Johnson and daughter, Bertha, Mrs. Truels Steffins and family and Misses Ethel Swanson and Florence Tanner visited at the Rueben Lemke home Wednesday afternoon.

Mr and Mrs. Lloyd Smith and son, Gary, and Mr. and Mrs. LaVern Christensen were dinner guests at the John Christens home Sunday.

Smiles

A Late One

"Please, sir, could I have tomorrow afternoon off—?"

"Ah, yes. Your grandmother, I suppose!"

"Exactly, sir, she is making her first parachute jump."

One Must

"Do you believe in fate, Pat?"

"Sure, and phwat would we stand on widout 'em?"

"The bravest man I ever knew," said the explorer, "was the chap who took a taxi to the bankruptcy court and then, instead of paying his fare, invited the driver in as a creditor."

Exercise

He felt that he was getting too fat, so he went to his doctor about it.

"The finest way to slim," the doctor told him, "is to shake the head slowly and deliberately."

"And how often should I do that?" asked the patient, looking puzzled.

"Every time you're asked to have a second helping at the table."

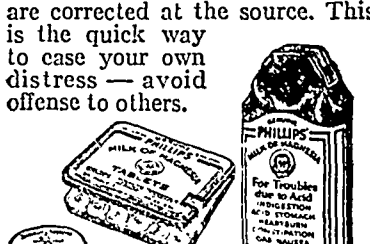
I LEARNED TO 'BEAT' ACID INDIGESTION

ONCE LIFE WAS MISERABLE, NO APPETITE... LITTLE SLEEP...UNTIL THE DOCTOR SAID "ALKALIZE"

BUT NOW—AT THE FIRST SIGN OF ACID-INDIGESTION I USE PHILLIPS' AND I FEEL LIKE A NEW PERSON ALMOST IMMEDIATELY!

The fastest way to "alkalize" is to carry your alkalizer with you. That's what thousands do now that genuine Phillips' comes in tiny, peppermint flavored tablets — in a flat tin for pocket or purse. Then you are always ready.

Use it this way. Take 2 Phillips' tablets — equal in "alkalizing" effect to 2 teaspoonfuls of liquid Phillips' from the bottle. At once you feel "gas," nausea, "overcrowding" from hyper-acidity begin to ease. "Acid headaches," "acid breath," over-acid stomach are corrected at the source. This is the quick way to ease your own distress — avoid offense to others.



Seeking and Blundering

Seeking and blundering are so far good, that it is by seeking and blundering that we learn. — Goethe.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder may be burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. *Doan's* have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

Crows Are Enemies of the Wild Ducks in Breeding Season

Control Methods Are Recommended by Expert

Washington.—Crows are major enemies of wild ducks in at least a part of the great wild duck breeding grounds in Canada, a survey by E. R. Kalmbach of the United States biological survey shows.

Of 512 duck nests studied, 31 per cent (156 nests) had been ravaged by crows. Other causes of destruction had accounted for another 20 per cent of loss, so that of all the nests that started the season with hopeful batches of eggs, only 49 per cent turned out live ducklings.

It is possible, however, Mr. Kalmbach notes, that part of the egg destruction by crows might have been wreaked after the parent ducks had abandoned the nests for other causes.

Furthermore, he cautions, this survey was made in a part of the nesting area where the crow concentration is unusually high, and where a large duck population offers unusually great temptation to raid for eggs.

How They Should Be Controlled.

For practical control purposes, Mr. Kalmbach recommends: "Crow-control operations on duck-breeding grounds should by all means be entrusted only to those who fully recognize the hazards associated with human intrusion on waterfowl nesting grounds. The work should not be carried out haphazard or by mass action devoid of careful supervision. There should, in fact, be solicitude for the privacy of every nesting duck.

"At winter crow roosts, where control is possible at a lower cost per bird, the benefits with respect to waterfowl are, in turn, less direct, since only a part of the birds present at these roosts actually enter the problem of crow-waterfowl relationships on the breeding grounds.

Upper Cambrian May Have Had Land Plant Life

Cambridge, Mass.—Plants have lived on land many millions of years longer than is commonly supposed, if fossil plant remains examined by William C. Darrah of the Harvard Botanical museum here really are what they very decidedly look like.

The fossils are spores, minute one-celled bodies that serve instead of seeds with lower plants that produce no true seeds. These particular spores have the form and markings that characterize spores of the ferns and their relatives.

But the formation they come from, a boghead coal deposit in Sweden, belongs to the Upper Cambrian geologic age, 500 million years or more ago, when there were supposed to be no land plants living, and none to come for many millions of years. It appears to be a projection of land-plant life into a hitherto unsuspected past.

Age of Earth Checked by Potassium "Clock"

New York.—A radioactive potassium "clock," latest aid to scientists seeking to know the age of the earth, indicates that the world is less than 3,000,000,000 years old, Dr. A. Keith Brewer of the United States bureau of chemistry and soils reports in the magazine Science.

Radioactive potassium, K 40, changes over long periods of time into the common variety of calcium, the metal that forms the basis for lime and limestone. Scientists can compute the age of the earth from their knowledge of how much calcium is to be found today and a knowledge of the rate at which radioactive calcium decomposed.

Results by the potassium "clock" method, Dr. Brewer reported, are in close agreement with estimates of the earth's age gained from another radioactive "clock," that of radium, uranium and lead.

Jupiter Due to Have Big Disturbance Soon

Denver.—A great disturbance on the planet Jupiter to occur during the next few months was predicted in a communication to the American Association for the Advancement of Science meeting here from Dr. E. C. Slipher of Lowell observatory, Flagstaff, Ariz. It will take the form of a series of intense dark spots in the giant planet's equator. A small faint marking gives warning of the approaching spots, judging from a similar happening in 1920

Keep Skin Clean to Prevent Acne Is Advice to the Young

Local Treatment Is Best, Say the Dermatologists

Chicago—For acne—the adolescent's complaint—local skin cleanliness brings the best results.

That improperly functioning endocrine glands are probably responsible for acne, medical research examiners believe. But no glandular substance found is enough better than local treatment to justify the expense and effort of its administration.

Thirty-nine students at the University of Iowa have recently been treated for acne as a part of a scientific experiment Dr Grace E Williams, medical adviser to women, and Dr. Ruben Nomland, professor of dermatology at the university, report their observations on these students in the Journal of the American Medical Association.

With evidence pointing to a deficiency of sex hormone in acne patients, the Iowa physicians began their study. They took twenty-eight women students and eleven men, the average being nineteen years. Of these eleven had severe, twenty moderately severe, and eight mild acne.

Hormone Treatment Not Effective.

All thirty-nine students were asked to give meticulous attention to details in the care and treatment of their skin. In addition, twenty of them were treated with sex hormones, while the remaining nineteen were also given injections but the injections were merely sterile water. The students did not know which were getting hormone substance and which were getting water.

Treatment went on for from four to six months with 85 per cent of those given the hormone substance showing moderate to marked improvement and 78 per cent of the control group given sterile water showing the same degree of improvement.

The Iowa doctors concluded at the end of the experiment that a deficiency of the pituitary-like hormone is not an important factor in causing acne and that the local treatment is still the best bet for controlling acne.

Here are the instructions for local treatment of acne given to most of the students:

Stop all picking and squeezing. Discontinue the use of all cosmetic creams. Wash with soap and water twice daily, keeping the skin nongreasy almost to the point of scaling. Eat a diet low in carbohydrates. Eat no candy. Remove blackheads by placing hot towels on the face for five minutes, then applying a thin coating of 3 per cent resorcinol in cold cream to the face and again applying hot towels for five minutes. The blackheads are then squeezed out with a comedon remover, the face rinsed with cold water and hamamelis water applied. Apply a prescribed lotion two or three times a day. Avoid iodized salt. Shampoo the hair twice a week.

Female of Species Is Tougher Than Male

Nottingham. England.—Sex is equally distributed among Britons only in young people; between the ages of fifteen and nineteen the numbers of boys and girls is approximately equal. At earlier ages there are more males, later females predominate.

This seesaw of the sexes, and what it means biologically, was discussed here before the meeting of the British Association for the Advancement of Science by Prof. F. A E. Crew, noted biologist of the University of Edinburgh.

In a word, the female of the species is noticeably tougher than the male. Men, boys and boy babies all tend to die off faster than their sisters.

Huge Fossil Beast Is Found in Colorado

Chicago.—Fossil remains of a hitherto unknown species of extinct mammal, big as a hippopotamus, have been found in Colorado by an expedition of the Field Museum of Natural History. Bryan Patterson, in charge of the expedition, reported the find to headquarters here.

The creature lived in the early days of the age of mammals, about 45 million years ago, when the region that is now the Rocky mountains was a low, flat plain.

Screen Star's Yacht Is Now Science Laboratory

La Jolla, Calif.—The seagoing yacht, Serena, formerly the property of Lewis Stone, noted actor, has been purchased for the Scripps Institution of Oceanography by Robert Scripps, son and nephew of its two founders and head of the Scripps-Howard Newspaper Alliance. The vessel will replace the institution's former floating laboratory, the yacht Scripps, burned on November 13, 1936.

'Way Back When

By JEANNE

BETTE DAVIS WAS AN USHERETTE

LIFE has a strange way, sometimes, of repeating a circumstance from our previous struggles, as if to remind us that what may have once seemed a difficult trial was actually preparation for a later triumph I am thinking, particularly, of Bette Davis and the marvelous performance she gave as the waitress, Mildred, in "Of Human Bondage"

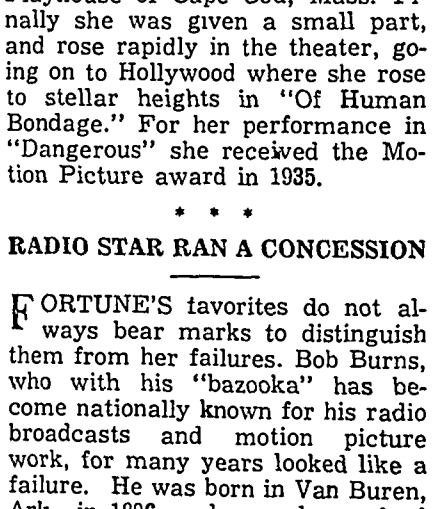
Bette Davis was born in Lowell, Mass., in 1908. Her mother had only a small alimony with which to support Bette and her sister, so she became a professional photographer After attending the Mary Arden school of Peterboro, N H., Bette went to Cushing academy of Boston There, she waited on tables to earn her tuition. To the sixteen-year-old little girl, whose dramatic ambitions made her supersensitive to her role in life, her occupation as waitress was humiliating in contrast to the advantages enjoyed by her fellow students. Miserable though her school days were, that occupation was to be the role of one of her greatest triumphs. Would Bette Davis have played such a convincing "Mildred" if circumstances had never forced her to be a waitress at school?

Recognition came to Bette Davis soon after school. She had always wanted to be an actress and her mother encouraged her, although her father thought she should take a business course in New York and prepare to be a stenographer. She attended a dramatic school in New York instead, and then obtained a job as an usherette in the Cape Playhouse of Cape Cod, Mass. Finally she was given a small part, and rose rapidly in the theater, going on to Hollywood where she rose to stellar heights in "Of Human Bondage." For her performance in "Dangerous" she received the Motion Picture award in 1935.

* * *

RADIO STAR RAN A CONCESSION

FORTUNE'S favorites do not always bear marks to distinguish them from her failures. Bob Burns, who with his "bazooka" has become nationally known for his radio broadcasts and motion picture work, for many years looked like a failure. He was born in Van Buren, Ark., in 1896, and was always fond of music. His first "bazooka" was a horn made from a piece of pipe welded to a funnel, because he had nothing else to play. After two years in college, he joined some friends in Oklahoma raising peanuts. Bob gave that up to go back to Van Buren where he joined a minstrel troupe at three dollars a



week. He tried to get a theatrical job in New Orleans, next he tried New York, with no luck, and went to Little Rock, Ark. There, he failed at trying to sell advertising on commission.

During the World war, Bob Burns was in the marines, was a crack rifle shot, and entertained the soldiers with his "bazooka." After the war, he started a concession on the boardwalk at Atlantic City, running a game of chance He married a girl who worked in another concession and, together, they started a dance hall; but it failed. Failure after failure And in the midst of his troubles, his son was born.

But then Bob Burns got a job in vaudeville, and in a few short years he was at the top of the entertainment world, with contracts for stage, motion pictures, and radio. His "bazooka" in which he had such faith, but which seemed such hopeless comedy to many people, is with him today and nationally known.

STAR DUST

Movie • Radio

★★★By VIRGINIA VALE★★★

IF YOU thought Deanna Durbin a remarkably talented youngster last year when you saw her in "Three Smart Girls," you will think she is nothing short of a baby genius when you see "One Hundred Men and a Girl." Her voice, always good, has developed so amazingly that she ranks with the best of screen prima donnas. Even more startling is the development of this quiet fourteen-year-old as an actress. She plays comedy, farce or tragedy with the deft assurance of a veteran. Supported by Stokowski, that most brilliant of conductors, no nervous qualms weaken her voice, and in scenes with Alice Brady, Adolph Menjou, and Mischa Auer, those persistent scene stealers, she more than holds her own.

Deanna Durbin

—★—

RKO has already finished the screen version of "Stage Door" with Katherine Hepburn and Ginger Rogers in the leads. The dialogue, everyone says, simply sparkles, and although Hepburn and Rogers are at their very best in it, Andrea Leeds and Lucille Ball, who play small roles, draw a big share of the enthusiastic comment.

—★—

Bill Powell paused in New York briefly on his way to the Scandinavian countries for a much-needed vacation. He has been near collapse ever since the death of Jean Harlow, to whom he was engaged to be married. When he comes back, he and Myrna Loy will make another sequel to the "Thin Man." Far from being tired of the roles that brought them their biggest success, he says that they enjoy them more than audiences do.

Myrna Loy

—★—

Very few actors enjoy success in Hollywood for more than five years, but producers never find a newcomer who can handle Alan Hale roles. He has just signed to play Little John in the new version of "Robin Hood" with Errol Flynn. It is the same role he played 15 years ago when Douglas Fairbanks made the picture.

—★—

It looks as if all Hollywood will be trying to congregate on the Bing Crosby set soon, for Bee Lillie, the elegant Lady Peel no less, is going to play opposite him. If you missed Bee on a recent Vallee hour, you should shed one tear at least. She gave the sketch that she has done innumerable times — "Two dozen double damask dinner napkins, please," and it was even funnier than before.

—★—

Maybe Eddie Cantor is awfully smart to switch his radio program from Sunday nights to Wednesday, because the Sunday night competition is going to be even more fierce than usual this winter. There will be Jack Benny, of course, Phil Baker, and Joe Penner, but in addition there will be two big screen favorites with new programs—Rosalind Russell and Tyrone Power. Robert Taylor had better hurry back from England if he doesn't want Tyrone to displace him as Matinee Idol Number One of the younger set.

Eddie Cantor

—★—

Humphrey Bogart is getting to be so popular on the screen that producers are toying with the idea of making a hero of him, but every time they bring up the subject, Humphrey takes to his heels and runs away. He played a smirking hero once, back in 1930, and neither audiences nor directors wanted to see him again. It wasn't until he played the murderous Duke Mantee in "Petrified Forest" that they forgave him. Since then he has specialized in the deepest-dyed villainy in "Black Legion" and "Bullets or Ballots." In "Dead End" he is so magnificently villainous that hero and heroine, Joel McCrea and Sylvia Sidney, have a hard time distracting attention from him.

—★—

ODDS AND ENDS—Constance Bennett is going to make another goofy comedy like "Topper" as soon as she and Countess di Frasso launch their cosmetic company . . . Erin O'Brien Moore, who plays "Nana" in "The Life of Emile Zola," is being boomed by thousands of admirers for the much-disputed role of Scarlett in "Gone With the Wind"

Lesson for October 17

CHRISTIAN SPEECH AND CONDUCT

LESSON TEXT—James, Chapter 3.
GOLDEN TEXT—Let no corrupt communication proceed out of your mouth.—Ephesians 4 29
PRIMARY TOPIC—The Words I Say.
JUNIOR TOPIC—A Bridle on the Tongue.
INTERMEDIATE AND SENIOR TOPIC—Christian Speech
YOUNG PEOPLE AND ADULT TOPIC—Christian Words and Works.

Christian speech and conduct may well be studied in the book of James, for he stresses the importance of works as demonstrating faith. There are two common errors—one is to attempt to be justified by good works apart from faith in the Lord Jesus Christ—the other is to talk about believing in him and then fail to live in accordance with one's profession. Some have assumed that James fell into the former error, urging works as a substitute for faith, but an intelligent reading of his epistle clearly indicates that he is in no sense contradicting the Scripture doctrine of justification by faith, but is showing that professed faith which does not result in Christian living is in reality a dead and useless thing.

I. Christian Talk (vv. 1-12).

As he enters upon his searching and convicting discussion of the tongue and its misuse the writer distinguishes between

1. Two kinds of talkers (vv. 1, 2).

a. "Teachers" (v 1.) who have a peculiar responsibility because they stand as the representatives of God at the sacred desk. It is not a place to be sought after, and the man who fills it at God's call needs divine grace and direction that he may speak the truth.

b. "We all" (v. 2). The speech of every one of us counts either for or against God, even though we may not fill the teacher's chair or stand in the pulpit.

2. A single danger (vv. 3-12). All of us have the one danger—lack of "tongue-control." Developing that thought the text first points out that

a. Powerful things need control (vv. 3-5). The horse is a wild and useless animal without the directing and restraining bit. A ship without a rudder will be lost. A tongue needs direction and control, for while a little thing, it is tremendously powerful.

b. An uncontrolled tongue is dangerous (vv. 6-8). How vivid is the imagery of the words before us. A fire spreading and destroying, an untamed animal running wild in all its fury, a deadly poison eating away the life—such is the uncontrolled tongue.

We recognize the truth of these things. We see how vile and careless speech debases man, how words chosen for their power to destroy pour forth from the press, over the footlights, from man to man and literally "set on fire the course of nature" (v. 6).

c. An uncontrolled tongue is inconsistent (vv. 9-12). Again the figure is striking. The fountain which pours forth fresh pure water to sustain life does not at the same time bring forth the bitter brackish water. Fig trees do not bear olives, vines do not bear figs. Nature is consistent and dependable.

But the tongue—ah, that is another matter! How sadly do we confess our failure, for here do we "offend all" (v. 2). We bless God, and defile and destroy man, with the same lips. "These things ought not so to be" (v. 10).

II. Christian Walk (vv. 13-18).

The word "conversation" in v. 13 is an English word which now means "talk" but which formerly meant "manner of living."

1. Words and works must agree (vv. 13,14). It is only right that those who speak of following Christ should prove it in their manner of living. Talk may be smooth and broad in its claims, but the demonstration of its reality and honesty is in the daily walk. This calls for wisdom which is divine—earthly wisdom will not suffice.

2. Earthly wisdom is false (vv. 15,16). There is a wisdom apart from God. Men of the world are brilliant and able, but scrutinize their wisdom and you will find that it is "sensual"—that is, of the senses—or natural as distinguished from spiritual. All too often it is downright "devilish" (v. 16).

3. True wisdom is from above (vv. 17,18). Undefiled, unselfish, uncompromising, but not quarrelsome or stubborn, impartial and sincere—and "full of mercy and good fruits"—such is God's wisdom for the Christian's life.

Strength Unto Strength

The strength of a man consists in finding out the way in which God is going, and going in that way too. —Henry Ward Beecher.

Physical and Spiritual Growth

We develop physically by acquiring for ourselves; but spiritually we develop by giving to others.—Rudledge.

Opportunities

A wise man will make more opportunities than he finds.—Bacon.

Fall Fashion Parade

BE THE first to wear the new Fall fashions in your group—let Sew-Your-Own help you to step right out in front, in the parade of new Fall Fashions. Today's trio gives you wide choice. Your first occasion frock if you are young and slim is a good looking basque model; for run-around a pretty yoke model that is as easy to make as it is to wear, and if you are full bosomed a jabot model that takes away inches.

The Popular Basque Dress.

If you are twenty or thereabouts, you'll adore this pretty basque dress with its flaring skirt The slim wasp waist and short puffed sleeves above a swing skirt are as young as the morning. Have it in a pretty dark print banded in velvet ribbon for every afternoon festivity. It's a dress that you'll wear all through the winter.

Yoke-Style House Frock.

Every woman will be quick to see the advantages of this frock, in style and wearability. The round yoke buttons at front and gives a fresh, young look to this design Best of all, it is cut in one piece from neck to hem so that you can make it in practically no time at all. The waistline is darted for snug fit. You'll look and feel years younger in this model—wear it 'round the house and for afternoon, too.

Look Slim and Sleek.

The newest fashions give you a slim, sleek look even if you are not blessed with a svelte figure. The jabot model in the illustration is designed to make even the woman who is a bit on the plump side look sleek and inches slimmer. Make this dress in one of the new thin wools and see how you'll stand out in your crowd as a fashion leader.

The Patterns.

Pattern 1257 is designed for sizes 12 to 40. Size 14 requires 4⅝ yards of 39 inch material and 11 yards of ribbon to trim.

Pattern 1380 is designed for sizes 34 to 48. Size 36 requires 4¼ yards of 39 inch material.

Pattern 1373 is designed for sizes 34 to 50. Size 36 requires 3⅝ yards of 54 inch material and ¾ yards of 39 inch material for jabot in contrast.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Drive, Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Household Questions

Cleaning Enameled Sinks. — Those stubborn dark streaks which accumulate on enameled sinks and bathtubs can be removed with kerosene.

* * *

When Washing Soft Polishing Dusters.—Rinse them in slightly soapy water instead of clear water. This makes the dusters much softer and they polish better.

* * *

Crab Apple Jelly. — Take one pint of water to every pound of apples, and boil until soft. Then put through jelly-bag. Allow one pound of sugar and a tablespoonful of vinegar to every pint of liquid, and boil for half an hour or until it jellies.

* * *

Johnny Cake.—One cup yellow corn meal, one cup bread flour, one-third cup sugar, one and one-half cups sour milk, half teaspoon soda, half teaspoon baking powder, one teaspoon salt. Mix and sift the dry ingredients twice, and gradually add the sour milk. Beat well, and bake in a shallow greased pan, in a moderate oven.

* * *

Removing Scorch Marks. — Scorch marks can be removed from linen by boiling together the juice of an onion, one ounce fullers' earth, one-quarter ounce shredded soap, and one teacupful vinegar. Allow the paste to dry on, then brush off and wash in the usual way.

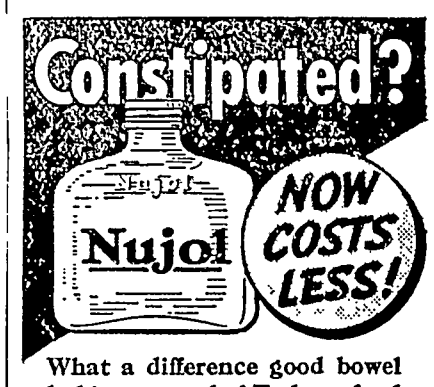
* * *

Dry Soiled Clothes. — When clothes are sent to the laundry they are usually paid for by weight. Money can be saved if the housewife makes certain all articles are dry before they are sent out.

* * *

Potatoes for Short Cakes.—Hot, boiled and mashed white potatoes are good in making short cakes and puddings. They not only save flour, but require less shortening.

WNU Service



What a difference good bowel habits can make! To keep food wastes soft and moving, many doctors recommend Nujol.

Knowledge and Experience

Knowledge, like religion, must be experienced in order to be known.—Whipple.

IT'S "Filter-Fine" MOROLINE SNOW-WHITE PETROLEUM JELLY WORLD'S LARGEST SELLER AT 5¢

YOU CAN THROW CARDS IN HIS FACE ONCE TOO OFTEN

WHEN you have those awful cramps; when your nerves are all on edge—don't take it out on the man you love.

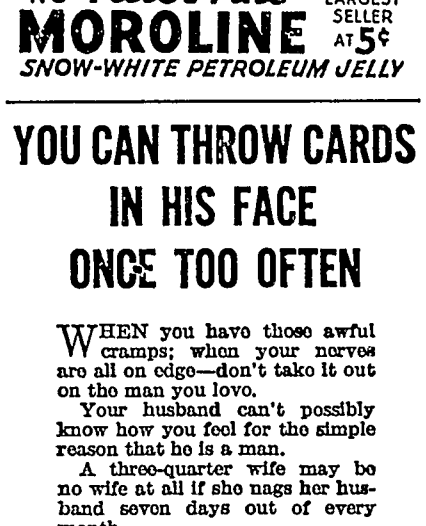
Your husband can't possibly know how you feel for the simple reason that he is a man.

A three-quarter wife may be no wife at all if she nags her husband seven days out of every month.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessoning the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

THE CHEERFUL CHERUB



It is better to prepare and prevent than to repair and repent.

The difference between death and taxes is you don't die as often as you pay taxes.

Prices of poultry may advance from now to December.

Anyway, a man can still take a chew without feeling that he should first offer one to the lady

Mrs C J Wille, Township Chairman, Mrs Addis Greimann, Publicity Chairman, Miss Ruby Schram, Music Chairman; Mrs W L Thada, Health Chairman.

District Cooperators

Mrs John Johnson, Mrs Carl Wille, Mrs H Stromer, Mrs Aug Josten, Mrs Fred Barz, Mrs Edwin Thiemann, Miss Mary Swanson, and Mrs John Waddingham

Leaders

Mrs John Anderson, Mrs Roy Butz, Mrs. Ray Ford, Mrs Verner Stromer, Mrs Ewalt Josten, Mrs Ed Christians, Mrs Elmer Schneider, Mrs C J. Wille and Mrs W L Thada

Liberty Officers Elected

The Liberty ladies held an election of officers with the following results.

Mrs H A Greimann, Township Chairman; Mrs Victor Huenemann, Publicity Chairman, Mrs Emil Beier, Music Chairman, Mr-Verner Haberkamp, Health Chairman

District Cooperators

Mrs B. V Greimann, Mrs John Goll, Mrs. William Gast, Mrs William Hampel. Miss Lydia Haberkamp, Mrs. K. Zwald, Mrs Emil Beier, and Mrs. Kermit Stille

Leaders

Mrs Erwin Moll, Mrs. Ben Reimer, Miss Ruth Abele, Mrs. Aaron Stromer, Mrs. Wes Lenz, Mrs Paul Stromer, Mrs. Richard Ax, and Mrs Roy Schaefer.

Tea was served after the meeting by the hostesses, Mrs. Henry Greimann, Mrs. Weaver and Mrs Ben Riemer.

It may be all right to pay a man back in his own coin, but it is better never to have borrowed it in the first place.

MR. AND MRS. TOM BLANK HAVE LIVED IN UNITED STATES OVER 50 YEARS

Mr and Mrs Tom Blank have lived in America now over a half century It was just 51 years ago last Saturday that Mrs Blank and two oldest children (Mrs Ahrenkiel of Goodell, and Mrs Will Lau, Garner, the latter deceased) arrived in the town of Belmond Mrs Blank and the children arrived at Baltimore on the previous Tuesday, 51 years ago She was accompanied by her sister

Mr. Blank had been in this country about a year before his family arrived and was working for the Rock Island railroad at Belmond Mr Blank and his family later came to Klemme and Mr Blank was employed by the Rock Island for forty-five years and then retired He was always interested in the affairs of the town and served a number of years as councilman.

The Blank family is typical of the many good German families who came to this country years ago and helped build up the community

Notice To Violators

All Traffic Violations, including failure to stop at signs, speeding, reckless driving, drunken driving, drunkenness on the streets, etc. MUST BE STOPPED.

The Law will be enforced and stiff fines will be dished out to all violators.

PAUL GRANGE, Mayor

TOWN OFFICIALS

GEO. BUSEMAN, Marshall
H. L. SUCKOW, J. P.
W. C. KERAUS, J. P.
H. J. SMID, Constable
Q. STILLE, Constable.

The citizens of Klemme who are law abiding should report any violations they may see to any of the above officials. On traffic violations get the number of the car and report it and it will be taken care of at once.

BUILD SMOKESTACK 409 FEET HIGH

Marion, O.—A smokestack 409 feet high, believed by its builders to be the tallest stack east of the Mississippi River, was completed here recently

Junior Class To Present Play Thurs.--Friday Eve

RURAL ELECTRIFICATION PROJECT IS ADVANCING

M. C James, Hancock County Rural Electric Cooperative President said today that the project for Hancock County was making definite advances V L Hein, project superintendent is m the county working, making his headquarters in the Farm Bureau office in Garner L. B. Eckels and K R Brown, engineers with the assistance of M C James and Mr. Hein plan to have temporary lines layed out by the last of this week. The development of the project will be announced as soon as possible and as the work progresses details will be given

SKATING RINK WILL MOVE

The skating rink which has been in Klemme for the past two months will be moved to Belmond soon The recent heavy snow which fell just about wrecked the tent over the rink, and the heavy poles had to be dropped down to prevent the canvas from tearing The rink has enjoyed a good business here

LOCAL PRODUCE STORE HANDLES LINE OF OLD RELIABLE REMEDIES

Henry Lewis Tells Of Le Gear Products In Advertising Campaign

This week Henry Lewis, proprietor of the Lewis Produce Store in Klemme, runs the first of a series of advertising on Dr. L. D Le Gear's live stock and poultry prescriptions

The Le Gear line is one of the oldest products on the market. It is a standard quality and is nationally advertised Be sure to read Mr Lewis' first advertisement in this issue as it has a free offer to farmers.

MEGREW RESIGNS AS MANAGER OF CENTRAL STATES OFFICE

Will Be Succeeded By R. J. Cory Of Minneapolis, Minnesota

W. H Megrew, manager of the Central State office at Garner for the past few years, announces that he has resigned, effecive October 15th

Mr Megrew has not announced his future plans but he and his family expect to remain in Graner for the time being

R. J Cory, of Minneapolis, was appointed as manager and took over his new duties Friday. Mr. Cory has been operating a grocery store in the city, but has had previous experience in electrical work

FIRST SNOW OF THE SEASON WAS HEAVY FALL FRIDAY NIGHT

The first snow of the season hit North Iowa, Friday. Light snow flurries fell from time to time throughout the day but hardly left a mark Late Friday afternoon the weather settled down to a good old fashioned snow fall and the ground was soon covered with a blanket of heavy, wet snow

Saturday morning there was a good four inches of heavy, wet snow on the level. The heavy snow broke off many tree branches and flattened bushes and shrubbery.

Reformed Ladies Aid Will Meet Next Week Wednesday

The Ladies Aid of the Klemme Reformed Church will meet next week Wednesday afternoon, Oct. 27th at the church parlors. Mrs. Gottlieb Goll and Mrs. Herman Priebe are the hostesses.

JUNIORS TO PRESENT CLASS PLAY THURSDAY AND FRIDAY

WHO WOULDN'T BE CRAZY with ticket-selling kids rapping o the door fifty times a day for whole week? Perhaps that's wha you have been wondering th. week. Perhaps, too, you have bee wondering what this "crazy" business is all about. Well, there's only one way to find out, and there's only one way to drive those kids away from the door-- buy a ticket to "Who Wouldn't Be Crazy, the junior class play to be given Thursday and Friday of this week. October 21 and 22

The setting of this play is the lawn of the Good Samaritan Sanitarium where there isn't anyone very much unbalanced but where a lot of people get in such mixups that some of them don't know whether they are going or coming.

If you can imagine Genie Kluckhohn as a hard-boiled cop, Harold Wicks as a negro flunky, Mildred Patterson as his little chocolate drop, and Ruben Grosshuesch as a speed demon you will just be starting to get a little idea of the entertainment this play holds for you. There are sixteen characters in all, and you know there must be lots of action to keep that many people busy. You'll see this action put on by an all-star cast Thursday and Friday nights

Miss Florence Wallace, our new dramatics instructor, is directing the play She has coached this play before and knows just what to tell the juniors to get the most laughs out of every line. If your blood pressure will stand two hours of laughing don't fail to see "WHO WOULDN'T BE CRAZY"

FIRST COLD SNAP OF FALL SENT THERMOMETERS DOWN

North Iowa had a fair sample of winter when the thermometers hit a low for the season early Thursday morning, when 22 degrees were recorded in Klemme Thursday night was still colder and Friday morning 16 degrees was the reading in most North Iowa towns.

M. E. Aid

The Methodist Ladies Aid Society meets this week Thursday at the church parlors

All aid members are urged to get one new member Thursday and bring along to join us in our work for the next year. We have lots of fun working together. Come and join us, anyone who wishes to be an aid member. There will be a quilt on this week, so quilters, come early and help quilt

METHODIST EPISCOPAL CHURCH

William Zabilka, Pastor

Klemme Church:

Sabbath School 10:15 a. m.
Worship Service 11:20 a. m
Epworth League 7:30 p. m. at Klemme.
Election of Sunday School officers at the close of the S. S. hour.

Has New Corn Sheller

Walt Rosendahl has purchased a new Minneapolis Moline corn sheller which he is mounting on a truck His new outfit will shell much faster than the sheller he has been using the past few seasons.

Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington.—It may be, as I have frequently been told, that the average person—Mr. John Q. Public—has very little interest in the doings of the federal reserve system. It may be true that the average citizen accepts the federal reserve banks as a thing apart and of little or no concern to him because they are so far removed and, further, because they indulge in what the demagogues used to call "high finance."

Federal Reserve

Whether my information is correct and regardless of the public concept of the federal reserve system, I am devoting some space this week to a discussion of certain developments in the federal reserve banking structure in an attempt to show the trend of money conditions in this country at the moment.

Lately, the federal reserve board of governors announced a revision of its regulations governing discounts and advances by federal reserve banks. Now, it may be said that these regulations affect only the banks that are members of the reserve system. That is true but it is not the whole truth because everything that the federal reserve board of governors and the federal reserve banks do affects you and me and everyone else whether we are little fellows and, therefore, unimportant individually, or whether we are trustees of great sums of money such as is the case with corporation presidents.

The board of governors, in the revision of its regulations, has made it possible—if not obligatory—for the reserve banks to take almost any kind of paper that is an evidence of debt. That is, the reserve banks are now empowered to receive from the member banks that paper upon which you and I borrow, any paper that shows that a citizen owes the bank money, and to give that bank money in exchange for the evidence of that debt.

Everyone, of course, is familiar with a note or a mortgage on a piece of real estate. Most people understand about installment paper which is simply a note providing for payment of the amount due over a period of months. But there are many other kinds of evidence of debt that is in frequent use among business men from the smallest storekeeper in a rural village to the greatest banker in the world. Under the regulations now operative in the federal reserve system there seems to be almost no paper which the local banker cannot send to the federal reserve bank and receive cash in exchange. Of course, that obligation must be paid off some time and the arrangement simply permits the federal reserve banks to carry the debt until its maturity.

All of this obviously sounds as though the federal reserve system is at last to be helpful to us little fellows. That is true. It is going to be helpful in increasing the number of us little fellows who get ourselves in debt. It is going to do that because it makes getting into debt easier.

I think no one should object to the reserve board regulations in all details. There must be credit given where credit is needed; that is to say when you prohibit borrowing money you choke off eighty-five per cent of all of the business done in the United States. Yet, credit is dangerous, a double-edged sword and must be handled with extreme caution by the borrowers as well as by the lenders. As we have seen from the inglorious debacle of 1929, there can be too much credit extended, and when I say that, I refer not only to loans by banks but the sale of goods, wares and merchandise that enter into everyday life. And, going a bit further on that line, there can be too much credit extended by the manufacturer and jobber to retail merchandising establishments just as easily as there can be too much credit extended by the retail merchants to you or to me. One can get into debt over his head just as easily by purchasing at retail or wholesale as by buying more land than we can afford to own or a home larger than we need.

So, a discussion of what the board of governors of the federal reserve system has done can lead in this instance only to a conclusion that danger flags are waving.

* * *

I do not want to exaggerate present conditions or signs as I see them. This is no time to become excited. There are, however, boundaries beyond which we cannot go in the matter of credit without facing another tailspin of the type of 1929. That is the thing I fear may result from an accumulation of federal policies of which the late action by the federal reserve board is only one.

Don't Get Excited

It is perfectly human and natural for each one of us to aspire to better things, to have more of this world's goods for our enjoyment and to equip ourselves by way of greater resources for the future. We will do those things sometimes when we ought not to do them simply because the instruments are available and we do not stop to count the ultimate cost. To the extent, then, that the federal reserve board probably has made borrowing easier it has tempted a certain percentage of citizens, or will tempt them in the future.

The condition of easier debt that is now presented is, as I have said, only one of many temptations and inducements for getting into debt that has been offered by the Roosevelt policies. It is unnecessary to recount here how many pieces of legislation, how many executive and administrative rules have been made to permit citizens to use money that is not their own. They are almost numberless. The result has been, is, and will continue to be the creation of a lot of debt that will hang over us all for years to come.

The federal government itself has taken the lead in getting into debt. The latest Treasury statement shows that the United States government owes more than thirty-seven billion dollars. That amounts to $281.63 for every man, woman and child in the United States. Compare that with the national debt as of 1932 when it stood at $19,500,000,000 or a debt of $155.93 for every living person in the United States.

* * *

I do not know when, if ever, this gigantic national debt will be paid off. I think probably the American people with traditional tenacity will stick by the job and get it done some time, but I must refer to the job as a very slow process. It required twelve years after the World war debt reached its peak of twenty-six billion to reduce it by ten millions. That reduction was more rapid than had ever been known before in any nation and it was made possible because of the prosperity which we enjoyed during those twelve years.

Pay Off Sometime

It would seem, therefore, that we must consider not only a slowing down of individual debt making, but a sharp curtailment of national debt making as well. If we do not, a yawning cavern of unsounded depths awaits us.

Some weeks ago Mr. Roosevelt sent instructions to the various agencies of the government to save ten per cent out of the operations for the current fiscal year to help in balancing the budget. There were no ifs, nor ands, nor buts about President Roosevelt's instructions. The spending agencies were told simply to lay aside that ten per cent which, in the aggregate, would amount to around four hundred million dollars. The President said during a speech at the great Columbia river dam the other day that he hoped to balance the budget in the next fiscal year. Most other people hope that the President's hope is realized because Mr. Roosevelt has stated several times that the budget will be balanced "next year" and some of us are beginning to wonder whether his budget balancing statements are not like the statements which President Hoover made at the beginning of the depression. He said, you will remember, a number of times that "prosperity is just around the corner," a corner that still seems to be next year.

* * *

But Mr. Roosevelt must be commended and criticized at the same time for his budget balancing ideas. Mind you, no criticism can possibly be attached to the objective—a balanced budget. But commendation must give way to criticism on some of the things that are happening under the flat order for a reduction in spending.

Budget Balancing

Take this case for example: The National Park service, like other agencies, laid away ten per cent of its operations. This impounding of money happened to coincide with the greatest flock of visitors ever to enter the gates of the country's national play grounds. It costs money to police and protect the parks; it requires funds to provide for the comfort of the throngs of visitors to national parks. The result, in the case of several parks, was that they were forced to close their gates to visitors from a week to a month earlier than they usually do in the fall. Their money had run out.

Well, say you, what harm does that do? Simply this: Visitors to national parks, such as Yellowstone, for example, pay much more for entrance fees and the things they must buy while in the parks than it costs the government to maintain the parks.

But that is the crux in this situation. The National Park service does not keep the money that is paid in by park visitors. Those funds are turned directly into the treasury as general revenue. The books of the National Park service, therefore, show only outgo.

The condition is one, therefore, it seems to me, that almost warrants a statement that the policy is "penny wise and pound foolish."

U. S. Nazi Parade at New Jersey Camp

Fritz Kuhn, national leader of the German-American Bund, gives the Nazi salute to uniformed Ordnungs Dienst (camp police) marching by him during a Harvest day celebration at Camp Nordland, near Andover, N. J., recently.

Fire Menaces Chicago Stock Yards

Flames which swept over a block-square building of one of the major meat-packing plants in the Union Stock yards at Chicago caused damage in excess of $200,000. Nearly a third of the fire-fighting apparatus of the city was called to the yards to prevent a spread of the conflagration. Picture shows firemen fighting the blaze.

THREW FIRST CURVE

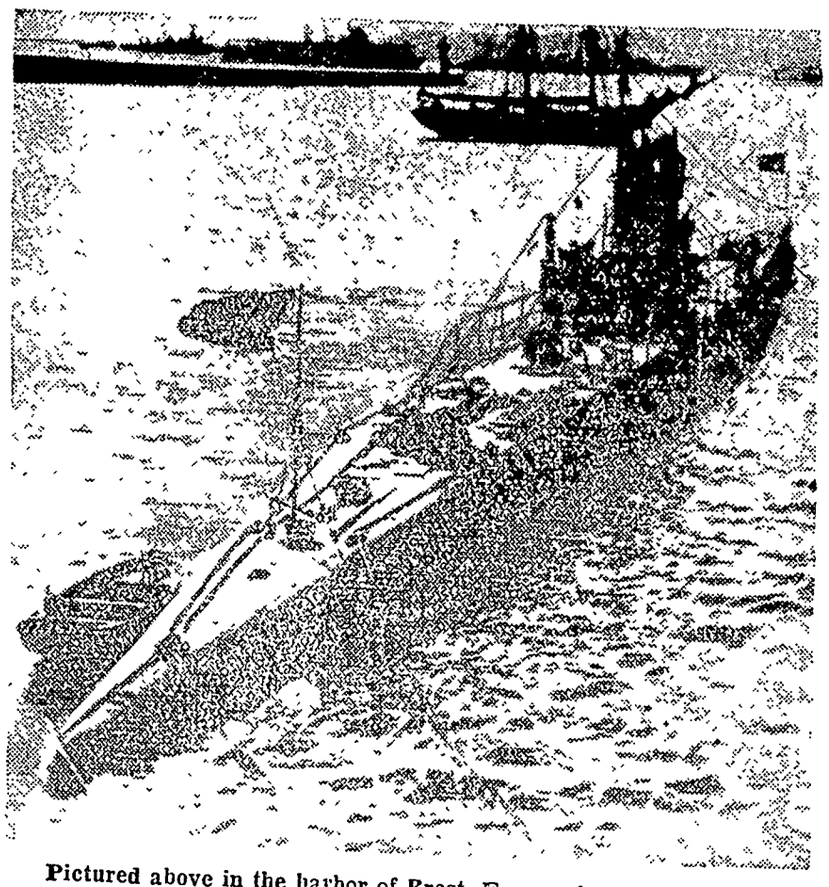
Fred Goldsmith, a real veteran of the diamond, is shown as he demonstrated how he threw the first curve ball, originated by him. This "roundhouse" surprised the batter by coming in wide and breaking right across the plate. Goldsmith, as a member of the Chicago White Stockings, pitched the first world series game held between his team and the Cincinnati Red Stockings in 1882. This was six years after the founding of the National League in 1876.

Windsor's Cousin to Marry Heir to Greek Throne

Princess Frederica Louise Christa, twenty-year-old daughter of the duke of Brunswick, whose engagement to Prince Paul of Greece was announced recently. Prince Paul,

brother of King George II of Greece, is heir presumptive to that throne. The princess is a second cousin of former King Edward VIII of England.

Loyalist Sub Stranded at Brest



Pictured above in the harbor of Brest, France, is the Spanish loyalist submarine C-2, left stranded by its crew which divided into Red and anti-Red groups. A rebel plot to seize the submersible failed and the boat is now awaiting a new crew to take it back to Valencia, Spain.

Shanghai in a Daze as Flames Sweep City

While on all sides their city burns before their eyes, these residents of Shanghai walk listlessly about the foreign settlements apparently apathetic to their fate. The dense columns of smoke rise from buildings set afire by exploding aerial bombs and shells.

IT'S GREAT TO BE BACK AT WORK

when you've found a way to ease the pains of

RHEUMATISM

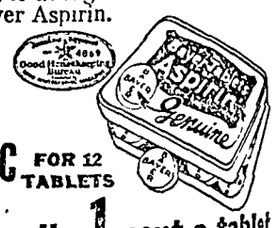
and do it the inexpensive way, too.

You can pay as high as you want for remedies claimed to relieve the pain of Rheumatism, Neuritis, Sciatica, etc. But the medicine so many doctors generally approve—the one used by thousands of families daily—is Bayer Aspirin—15¢ a dozen tablets—about 1¢ apiece.

Simply take 2 Bayer Aspirin tablets with a half glass of water. Repeat, if necessary, according to directions.

Usually this will ease such pain in a remarkably short time.

For quick relief from such pain which exhausts you and keeps you awake at night—ask for genuine Bayer Aspirin.



15c FOR 12 TABLETS

Cause of Regret

I regret often that I have spoken, never that I have been silent.—Syrus.

WOMEN WHO HOLD THEIR MEN NEVER LET THEM KNOW

NO matter how much your back aches and your nerves scream, your husband, because he is only a man, can never understand why you are so hard to live with one week in every month.

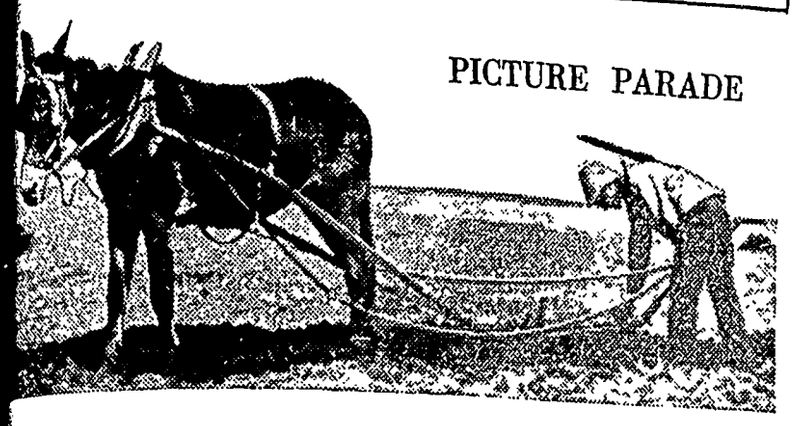
Too often the honeymoon express is wrecked by the nagging tongue of a three-quarter wife. The wise woman never lets her husband know by outward sign that she is a victim of periodic pain.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

Jews Are Fighting for a Homeland

PICTURE PARADE



Ready at any moment to defend the strip which he is trying to convert fertility is the Jewish settler of the Jesreel valley.

IVE or six million Jews, uprooted by dictatorships and tossed about by economic storms, may have to depend upon the development of the ly Land, under British mandate, as a solution to their difficulties. But y face the hostility of the Arabs living there, whose economic and igious interests conflict with theirs.

n North Palestine the ws fence themselves in med settlements as a protion against marauding ab bands, while they try work the poor land. With itain anxious to get rid of r mandate, and with enies in nearly every cor- of the world, these "peo- without a country" are a sorry plight.

The life is not an easy e, by any means. Backeaking labor is not made y more bearable by conant threat of pillage and ath.

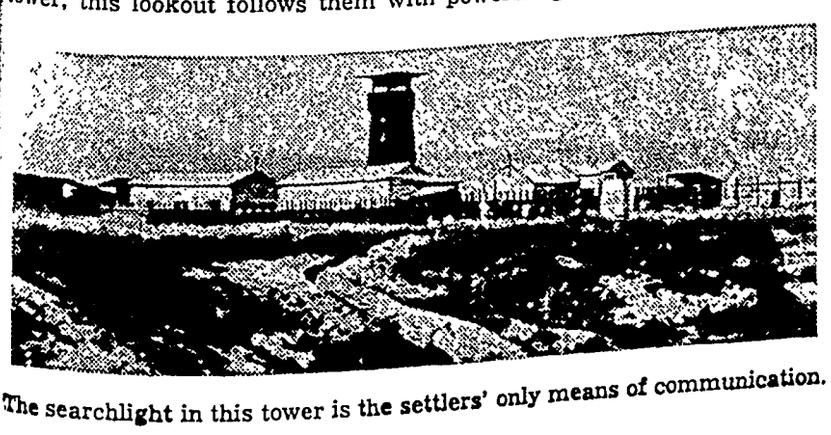
Pictured here is life in a nced-in settlement in the sreel valley.

Settlers must carry rifles while working the swamp-infested plain.

Men and women take turns in guard duty behind the barbed-wire fence which protects the settlers from the raiding Arabs. A woman sentry is pictured here. Note her studious appearance, determined look and mannish military dress.

The Arabs Are Coming!

The dreaded Mohammedan raiders have been sighted by a neighbor settler, who immediately set up a signal. From her position in a high tower, this lookout follows them with powerful glasses.



The searchlight in this tower is the settlers' only means of communication.

STAR DUST

Movie • Radio

★★★By VIRGINIA VALE★★★

AN ANNIVERSARY celebration that meant much to motion-picture and radio folk, took place a short time ago at Loew's State, one of the few remaining vaudeville houses in New York. On its sixteenth birthday, players who got their start or revived their careers there sent telegrams and encouraged the manager to keep vaudeville alive.

Among the many famous names who graduated from this theater are the radio pets Edgar Bergen and Charlie McCarthy, Martha Raye, James Cagney, Walter Huston who played a dramatic sketch fifteen years ago, and Joe E. Brown, who was one of a team of acrobats who called themselves artists.

Joe E. Brown

Screen stars too numerous to mention have played personal appearances there, and it was during an engagement of Buddy Rogers and his band that his romance with Mary Pickford first became widely known.

—★—

Tex Ritter's musical Westerns made for Grand National are becoming so popular he is looming up as a real rival for Gene Autrey, who is currently the screen's number one attraction. No drug store cowboy is Tex Ritter—he really comes from Texas, and every so often he bolts from his stage, screen, and radio successes to go back to ranching. The first time he was lured away from ranching, it was for a role in "Green Grow the Lilacs," the Theater guild play which also launched a young actor by the name of Franchot Tone. The next time he came East to appear at the Madison Square rodeo, the radio moguls grabbed him.

—★—

Gordon Miller, who threatens to become a matinee idol, reached pictures by the hitch-hike route. He is slated for the very important role opposite Deanna Durbin in her next picture, "Mad About Music." He hitch-hiked from his home in Flint, Michigan, to New Orleans, where he went to the Plantation night club and offered to sing for his supper. He sang himself into a steady job. Universal picture's talent scouts heard him and signed him up.

—★—

The same men who picked Tyrone Power and Don Ameche out of obscurity and guided them to film fame think that they have a new matinee idol in the person of Dick Baldwin, whom you will see in the Ritz Brothers' new picture, "Life Begins at College." Baldwin was just about to leave Hollywood, discouraged over his failure to get parts, when he was called to the Twentieth Century-Fox studios for a test. A day later he was given a contract.

—★—

Eleanor Holm Jarrott, the beautiful swimming star, who has been thrilling the customers at the Great Lakes Exposition since early summer, is going to be Tarzan's mate in motion pictures this winter. She will play opposite Glen Morris, world decathlon champion. Eleanor was in pictures for a short time two years ago.

—★—

Barbara Stanwyck surprised even her closest friends when she got on a boat headed for the Panama canal and the Pacific coast instead of one going to London where Robert Taylor is. She said she has no idea when she and Bob will meet again. It has been raining so continuously in England that outdoor scenes of his picture have been delayed and his almost-daily cablegrams sound pretty blue over the prospect of a long absence from Hollywood. She won't go over to see him, though, partly because she is all signed up to make a lot of pictures in Hollywood.

Barbara Stanwyck

—★—

ODDS AND ENDS—May Robson, who is playing Aunt Polly in "The Adventures of Tom Sawyer," celebrated her fifty-fourth anniversary as an actress recently at the David Selznick studios . . . Red Skelton made such a knockout test for R. K. O. that he has been given the role intended for Milton Berle in "Having a Wonderful Time" . . . Douglas Fairbanks, Jr., was summoned back from London via telephone to play opposite Katherine Hepburn in "Bringing Up Baby" . . . If Hollywood moguls really want to lure Irene Rich away from radio and back to the screen, she says that they will let her play a giddy siren. She won't play any more neglected wives . . . So strenuous is the dance that Eleanore Whitney will do in Paramount's "Thrill of a Lifetime," doctors have prescribed a six-week health routine that includes five meals a day and ten hours' sleep a night as preparation.

© Western Newspaper Union.

Ask Me Another?

A Quiz With Answers Offering Information on Various Subjects

1. Has there ever been an airplane flown around the world?
2. How long does it take to get a telephone call through to London from this country?
3. How many miles of submarine cable are there?
4. What town is nearest the geographical center of the United States?
5. What is pectin?
6. Why are some tin cans enameled on the inside?
7. What is the population of the earth?
8. How many hospitals are there in the United States? Hotels?
9. What is the largest vote a labor party ever cast in the United States?
10. Did the United States have diplomatic relations with the Vatican during the Civil war?

Answers

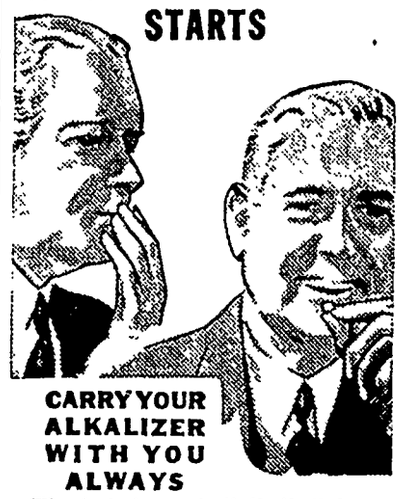
1. There has never been a round-the-world airplane flight in that such a flight would require girding the globe at its greatest circumference, either along the equator or along a single degree of longitude.
2. It takes about 10 minutes.
3. The earth is encircled with more than 300,000 miles of submarine cables, 100,000,000 miles of telephone wires and 5,000,000 miles of telegraph cables.
4. Lebanon, in Eastern Smith county, Kan., is the nearest.
5. It is a substance which appears in many vegetable tissues as a constituent of the sap or cell wall. In making jellies its presence causes fruit juice to solidify.
6. Red fruits and vegetables bleach in contact with tin plate and foods with sulphur content discolor the can just as a cooked egg discolors a silver spoon. The stain is harmless but uninviting.
7. There are about 2,000,000,000 people on the earth, according to the 1930 estimates of the International Statistical institute.
8. There are 6,189 registered hospitals in the United States. There are approximately 29,000 hotels.
9. In 1892 a fusion of industrial workers and farmers known as the Populist party, and roughly comparable to the Farmer-Labor party of today, mustered 1,027,000 popular votes and 22 electoral votes. The vote was about one-tenth of the total vote cast.
10. Yes. At the commencement of the Civil war, John J. Stockton of New Jersey was minister resident at the Vatican.

Appreciation

TO BE able to appreciate the best that there is in life is an ideal that every youth should have. There are all sorts of things in life, some of them good, some of them bad, and some neither very good nor very bad. There are hosts of young people who miss the best things, because they have fixed their attentions on lesser things. So the finest things in life they never see. The youth who has learned to look for the best in music, in art, in literature, in his associates and in himself, will get the most out of life.

A MISTAKE TO WAIT

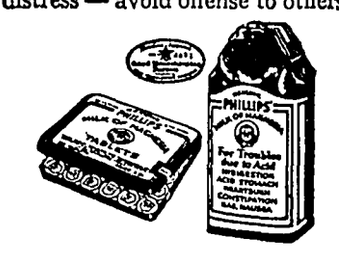
WHEN "ACID INDIGESTION" STARTS



CARRY YOUR ALKALIZER WITH YOU ALWAYS

The fastest way to "alkalize" is to carry your alkalizer with you. That's what thousands do now that genuine Phillips' comes in tiny, peppermint flavored tablets — in a flat tin for pocket or purse. Then you are always ready.

Use it this way. Take 2 Phillips' tablets — equal in "alkalizing" effect to 2 teaspoonfuls of liquid Phillips' from the bottle. At once you feel "gas," nausea, "overcrowding" from hyper-acidity begin to ease. "Acid headaches," "acid breath," over-acid stomach are corrected at the source. This is the quick way to ease your own distress — avoid offense to others.



NO OTHER TIRE CAN MATCH ITS PERFORMANCE! Because THE GROUND GRIP TREAD IS PATENTED!

FARMERS everywhere know that the Firestone Ground Grip Tire out-performs all other tractor tires. They know its outstanding performance is due to the famous Firestone Ground Grip tread and no other tire can match its performance because this tread is PATENTED. They know also that no other tire can give them so many important money-saving advantages.

GREATER TRACTION—Takes a deeper and broader bite into the soil and has positive self-cleaning action.

GREATER STRENGTH to resist the strain of heavy pulling is provided because every fiber of every cord is saturated with liquid rubber by the patented Firestone Gum-Dipping process. Two extra layers of Gum-Dipped cords under the tread bind the tread and cord body so solidly together that we guarantee the tread will not separate from the cord body.

GREATER SAVINGS—Saves 25% in time and up to 50% in fuel over steel-lugged wheels. Low-cost Firestone cut-down wheel program permits using one set of tires on several different implements.

GREATER DRAWBAR PULL enables this amazing tire to do more work in a given time.

Only *genuine* Firestone Ground Grip Tires can give you such performance! See this amazing tire today at your nearest Firestone Implement Dealer, Tire Dealer or Firestone Auto Supply & Service Store.

For greatest economy and performance SPECIFY Firestone Ground Grip Tires on all new tractor and wheeled farm implements.

Listen to the Voice of Firestone featuring Margaret Speaks, Monday evenings over Nationwide N. B. C. Red Network.

MORE FARM TRACTORS ARE EQUIPPED WITH FIRESTONE GROUND GRIP TIRES THAN ALL OTHER MAKES OF TIRES COMBINED

5 Keep hands clean.
6 Do not wet your finger to turn a page.
7 Turn pages carefully
8. Find your book and sit down to read
9. Do not mark in books
10. Help keep the library neat

Grades 5 and 6

Corrine Merkel and Edward Barz

Reporters

Marjorie Hartbeck and Betty Mae Blickenderfer are health captains for our new contest which started Monday

In our reading classes we have been reading stories of the African Jungles written by the late Martin Johnson. Betty brought us a newspaper aricle written by Mrs Johnson which told how the natives of Africa build fires to help capture the wild animals

The sixth graders are trying an experiment in Hygiene class. It is to prove that there are disease germs in dust

We have new poem and book charts in our room When we learn poems or read books we put the names of them on the charts.

In English we studied the picture. "The Angelus" It was painted by Jean Francois Millet, a famous artist. It is a picture of peasant life in France We wrote stories either of the picture or the life of the artist.

This week we are having our six weeks tests.

Grades 7 and 8

Lorraine Buntenbach — Reporter

The seventh grade has finished a unit of work over China. The study of this country has been very interesting because we have used the many current events which are found in the papers and magazines

Charles Bock brought a peanut plant to school today We examined it closely, tasted the raw peanuts, and then sent it to the other grade rooms Last week Ellen Kilgore brought some cotton that she raised herself.

Tuesday morning our room attended the program by the Parkinson National Music Ensemble We enjoyed the closing number the most for the group imitated several circus bands.

This week both grades had six weeks tests Arlene Buseman was the only student who received 100 in the six weeks spelling test.

The patrolmen for this week are Dean Merkel and Billy Zabilka

Some of the new models we are told will have chatter-proof glass back of the front seat.

U-Delt-Em Bridge Club Met

At Home Of Mrs. H. H. Raney

The October meeting of the U Delt-Em bridge club was held at the home of Mrs. H. H. Raney, Thursday afternoon. Mrs George George Lawhorn and Mrs. W. L. Thada won first and second high scores and Mrs. Dulmes won the "lucky cut." Lunch was served after bridge Mrs Sumner Trumbull was a guest.

TAX COLLECTIONS OF SEPTEMBER TOTALED $195,737 IN HANCOCK

Current taxes collected for Hancock county for September, came to $195,737.90. Delinquent taxes brought in $583 38 and automobile registrations added $420.75 An added income of the county is $1,000 in rental money from three pieces of land held for the permanent school fund of Iowa.

Entertains In Honor Of Friend At Algona

Mrs. H. H. Raney will be hostess at a bridge party at Algona on Thursday evening when she is entertaining a number of friends in honor of Miss Loretta Howie, who will be married soon. Miss Howie will marry a classmate of Dr. Raney.

Mother: I'm shocked and grieved to hear that you are at the foot of your class.

Sonny: Well, can I help it if the boy who always was at the foot of the class leaves school?

American Legion Auxiliary Notes

The Klemme unit met at the home of Grace Blank Oct. 14.

Another member was added to the list this month, making a total of thirty-two.

Plans were made for a local supply shelf of clothing and bedding to be used by the unit in its welfare work. Mrs. Paul is chairman of this committee and anyone having new or used cloth. or bedding they wish to dispose of, and would like to help in this necessary work, may notify the chairman who will have it called for These articles will be classified as to size or age and will be ready for release when calls for assistance come to the Auxiliary.

Carpet rags, for which there is a steady demand, were sown for the hospital at Knoxville.

The county convention will be at Corwith the 26th of October The district committee woman will be present at this meeting.

Next unit meeting will be Nov 11th at the home of Mrs. D. P. Anderson.

Curbstone Barbers in Shanghai's Native Quarter.

Shanghai Vistas

Life in Shanghai Before Japanese Shells Began Their Destructive Work

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

ON THE Whangpoo approaching Shanghai there is little to indicate that one is entering China except for fleets of native fishing junks moving about in the river. The river banks are lined on both sides with oil supply depots, smoking factory chimneys, warehouses, silk filatures, repair docks, and strange things of foreign import.

Shanghai's water front skyline is decidedly occidental in appearance and most strikingly impressive. Until the present century, low, commodious Chinese buildings or two- and three-story structures served a majority of the business concerns; but the introduction of excellently equipped modern offices initiated a period of extensive building.

The tendency of Shanghai's building program has been distinctly skyward in the last few years because of the congestion in the business areas occasioned by its meteoric expansion in trade.

Construction of tall buildings, however, even those of eight and ten stories, presents considerable difficulty to the architects because of the nature of the footing upon which the foundations must be laid. The soil is entirely alluvial deposit; but, in spite of the obvious handicaps, architects are exploring new heights for Shanghai with 10-and 15-story structures.

The Chinese, quick to appreciate this upward direction of city-building, have begun erecting tall department stores, tea houses, guild halls, and other structures which bring them financial advantage and modernize the appearance of Shanghai

Radical indeed are the changes that have taken place in architectural expansion in the last decade, including vast alterations in the skyline of the metropolis.

In the Old Native City.

In a few minutes' walk from the most up-to-the-moment districts of Shanghai, however, one can be in surroundings that are little altered since the day when the first foreign firm marked out its business site in the muddy concession.

Within the Mantao district, at the southern side of the city, lies the old Chinese settlement, or Native City Modernization has been slow to move in this locality, and native life takes much the same course that it followed before steamship screws began stirring up the muddy Whangpoo around the fishing junks and sampans.

Even here, however, there have been changes. Since the Republic has come into existence, the old wall that surrounded the city has been demolished. Narrow cobbled streets with open sewers running down their centers gradually have given way to more cleanly concrete passages. Loathsome beggars have somehow been reduced in numbers, although there are still more than enough of the pitiable wretches.

North of the International Settlement lies the thickly populated Chinese district of Chapei. Chapei borders upon the Soochow creek boundary and is just back of the foreign district of Hongkew. This district, before the Sino-Japanese battles several years ago, was somewhat more modern and progressive than the Native City region. Here, in Chapei, were located large Chinese business concerns devoted to exporting and importing. Here had sprung up offices, factories, and printing establishments, among the last named the Commercial Press, largest publishing concern in China, valued at one and a quarter million dollars. In this locality, too, is the Shanghai railway station.

Foreign Settlements of Shanghai.

But the focus of all Shanghai is the foreign settlements, for in them have been the remarkable incentive and expanding force that have built this modern seaport. First allotted a portion of land on the south side of Soochow creek, following the treaty of Nanking, in 1842, when Shanghai was indicated as one of the five treaty ports, British business established itself and expanded, digging drains and filling canals to make the concession habitable.

Six years later France was conceded the territory between the British concession and the Native City, and only a few years afterward Americans leased land in the Hongkew district, which extends along the Whangpoo water front north of Soochow creek, where the river makes a sharp curve to the right

This so-called American Settlement was never organized as such, but was incorporated with the British district in 1863. Thus came into being the International Settlement, premier nucleus of modern Shanghai. Other portions of land have been added on the west, where old-timers used to bag snipe in off days from their offices.

The French chose to remain apart and today continue to administer their own concession as a separate unit.

The years have seen a fast-moving panorama since the early days when the International territorial fusion came into being, received nourishment, and became what has often been termed "The Model Settlement." The administration of the International Settlement has been in many ways a unique experiment, perhaps without parallel in any other place; and results make it evident that the Shanghai Municipal council has served the Settlement well.

Governed by Elected Council.

The council is composed of a group of members elected by the taxpayers of British, American, Japanese, and, more recently, Chinese nationality. The number has been increased from time to time until 15 members are now included in the group that directs the affairs of the Settlement of 1,008,000 people.

Paving, policing, planning — a multitude of tasks face the paternal body which, gratis, guards the interests of International Shanghai. A similar, but smaller, task confronts 17 other men who handle the affairs of the French territory with its nearly 435,000 inhabitants.

Because Shanghai has not always had a peaceful career, troops of the four chief foreign nationalities have been maintained to give necessary protection to the residents of the city. Shanghai has also had a volunteer corps with a personnel of more than 2,000, which was organized at the time of the stress of necessity during strikes and when the pot of Chinese political affairs had been boiling over.

Big, bustling Shanghai, this titan of commerce in Far Asia, lives beyond the boundaries of any one settlement or nationality; it commands all of them together for its life and trade. Well beyond three million people are numbered in the districts that form the whole of greater Shanghai.

Cosmopolitan, too, as only one of the world's largest seaports can be, it records in its census 50 foreign nationalities. The commercial capital can also call from its midst representatives speaking practically all the numerous dialects in China, if one should ask for further confusion in the linguistic babel.

Picturesque Scenes on the Bund.

The facets of life and activity of the metropolis are as multiple as the peoples that compose it.

Stand any day along the Bund and watch the variety of traffic that passes under the signals of a tall, bearded Sikh traffic policeman. Electric tramcars, loaded buses, and trackless trams, filled to all available standing room; motor cars and trucks of every kind and size, although American makes are in the majority; wheelbarrows that trundle along with tremendous loads; coolies, turned beasts of burden, bearing bales and baskets of incredible weight; great two-wheeled trucking carts, with as many as six or eight perspiring coolies straining at the pull ropes; rickshas, well past the period of their best usefulness in these days of increasing taxi service, trying by their very importunity to gain a stinted living; bicycles, carriages, pedestrians—the whole contrasting procession passes.

On another street a Chinese wedding palanquin or a long funeral cortege moves along with all the red and tinsel glitter that China assembles around these two events. At the corner the procession waits for a traffic jam to clear before it can proceed.

FARM TOPICS

CAUTION IS URGED IN BUYING CATTLE

Five Important Points Are Cited by Expert.

By R. C. Ashby, Associate Chief, Live Stock Marketing, University of Illinois. WNU Service.

With a big corn crop, with fat steers hitting new highs and with the trade talking even higher prices, caution at five different points in buying feeders may pay large dividends this fall.

First consideration is a declining cattle market a few months hence. In six or eight months fed steers may be selling for little more a pound then they cost as feeders. Therefore in laying in his cattle, the feeder should decide about when he expects to market and what he expects fat cattle to sell for at that time.

The second point of caution is that plainer feeders may show better margins, if marketed from January to June, than quality cattle will show. Pork supply will continue short and lower grade beef is used to fill in. In buying plainer feeders, sorting is important to know and to get the "good-doing" kind.

Successful feeders do not get excited and buy feeders at high prices just because others are doing it. This year it may pay to wait until the main rush is over before buying.

The fourth point is to get the best possible advice and assistance in buying feeders. There is every indication that plenty of feeder cattle will be bought too high this fall. It is a year when good advice may save the feeder a lot of money.

Usually the best investment a farmer makes is the reasonable commission which an honest and skilled feeder buyer charges to assist in buying feeder cattle. Such assistance will be particularly valuable this year.

Finally, there is the importance of getting good weights. Two factors should be kept in mind—to see that the cattle do not have an excessive fill and to insist that they be weighed on scales that have been proved accurate.

Teach Chicks to Roost, Is Advice of an Expert

Teach chicks to roost while they are young. By so doing there is far less chance of them huddling up in a corner of the brooder house and smothering, suggests H. L. Wilcke, head of the poultry husbandry, Iowa State college.

Provide easily accessible roosts before the brooder stove is removed. Roosts that slope gradually upward have been found best. The first roost pole should be about six inches from the floor. The roost poles need to be close enough together so that a chick may hop from one to another. A two by two inch roost pole is satisfactory. Dropping boards beneath them will make cleaning easier.

Spraying or painting the roosts and other parts of the brooder house with a mixture of one part cresol to five parts crankcase oil or with kerosene will hold mites in check. Lice may be controlled by Black Leaf 40, spread in a thin ribbon layer along the center of the roosts.

Mash for Poultry Flock

There is little to be gained by feeding moist mash continuously, according to a North Carolina State college authority, but it has an important place in the feeding schedule of most flocks at some time during the year. It should be used with early hatched pullets to prevent a partial or complete molt; with late hatched pullets to hasten production in the fall; with laying hens to keep up production until October, and with breeding hens to hasten production in January. Three pounds of the regular laying mash moistened with hot water or milk for each 100 birds will give excellent results. This should be fed about two o'clock in the afternoon.

FARM NOTES

Egypt is encouraging the cultivation of wheat instead of rice.

* * *

Early hatched hens are more successfully forced into a molt than are hens hatched later.

* * *

When the first eggs are found, all pullets that show much comb development should be housed. Those slower to mature should remain on range.

* * *

Wisconsin raises more chickens than all the New England states.

* * *

Thin-shelled eggs indicate a lack of minerals or vitamin D in the ration.

* * *

Hawks are valued by farmers of the Pacific Northwest because they kill ground squirrels.

* * *

Entering a farm silo while it is being filled, or shortly after, is dangerous because of the possible presence of suffocating gases.

Language of Bees Discovered to Be "Scented Dancing"

How They Tell Where Honey Can Be Obtained

By WATSON DAVIS

Washington. — Bees have a language of scented dancing. By means of it a scout bee that has made a rich discovery can send his fellow workers out after honey with almost as much dispatch as police are rushed to points of need by radio calls.

Scientists used to think that bees located flowers by color or scent. This is partially true. But in an exhaustive study of the bee habits, Prof. K. Von Frisch of Munich found that bees communicate with one another by a strange sort of dance performed within the hive. In this way they tell where honey can be obtained most easily.

Often it will take hours and sometimes days for a good feeding-place to be discovered. But when one bee has found the honey, many, perhaps several hundred, will appear in a very short time. And they all come from the same hive as the discoverer.

They Talk by Dancing.

Professor Von Frisch set out to discover the language or mode of communication of the bees.

Here's what he found: If a new kind of flower begins to bloom, it is discovered by a scout bee. He loads up with honey and flies home. In the hive he reports the discovery by a queer sort of dance, turning round and round in a circle with queer tripping little steps, once to the right, once to the left, very vigorously, often for a minute on the same spot. Other bees crowd around with high interest. They rush out of the hive and soon can be found at the honey source.

The dance is a signal that honey has been found. The bee carries upon him the scent of the flower containing the nectar. The other bees noting this odor search for it as they fly out of the hive in all directions Moreover, the discovering bee returns to the good honey source and broadcasts another odor created by a scent organ on its abdomen that also guides the other workers.

Need Human Biology of Broad Scope If Race Is to Survive

Ann Arbor, Mich.—A science of human biology, broad enough in its scope to synthesize knowledge of man's mental and spiritual sides as well as of his physical nature, ought to be evolved within the next century if civilization is to survive—perhaps even if the human race itself is to escape extinction.

This was the concluding note of an address here by Prof. Raymond Pearl of the Johns Hopkins university, at the celebration of the hundredth anniversary of the founding of the University of Michigan.

The necessity for such a science of social synthesis has been thrust upon us, Professor Pearl declared, by the long strides science has taken in putting more wealth and power into the hands of men, while other aspects of our evolution have remained stagnant. We have advanced enormously in power, and little or not at all in wisdom or goodness. So the very advances we boast of in material things make our development so lopsided that it threatens to crash and end.

Challenge to the Scientist.

Fumbling attempts at such unification of human knowledge and striving have been made hitherto by politicians and the clergy—with results not particularly distinguished, Professor Pearl pointed out. These practitioners are not wholly to blame for lack of success, either, he admitted; the prerequisite of real knowledge of the whole nature of man has simply not been met—the data do not yet exist. That is one of the chief challenges to the scientist: both by natural aptitude and training he is best equipped to obtain such data; and he should therefore seek and find them.

Professor Pearl would not yield to any temptation to pessimism regarding the future. He invited his hearers to look backward over the hundred years since the founding of the university: Pasteur, Lister, Huxley, most of the great leaders of the scientific revolution of the Nineteenth century, were still children then. With a record of so great achievement in so short a time, he felt, there is no reason for supposing that the world will not continue to go ahead.

Highway Traffic Is Counted Exactly by the Robot Watchman

Provides Basis for All Safety Regulations

Washington. — A roadway's traffic pattern which varies with the day of the week, the hour of the day and the day of the month, is the dictator of all safety and traffic regulation policies, as well as the selector of all new highway undertakings.

Robot infra-red light beam "watchmen" are one of the new mechanisms by which highway engineers now keep a 24-hour watch on roads where changes are needed.

Infra-red beams directed across the highway onto photoelectric cells now keep watch and are able to count as high as 24,000 vehicles an hour. Operation of the device costs $150 a year compared with $5,000 for a continuous manual counter check.

The photo-electric counter is seldom noticed by even the most observing motorists. It consists of two short posts with cross arms, one on either side of the road. The post supporting the light source is equipped with two ordinary automobile headlight bulbs whose light is rendered invisible by filters. This eliminates any confusion which might result in night traffic. Parallel beams projected across the road and spaced 30 inches apart provide a current path to the photo tubes on the opposite post.

Count Is Almost Perfect.

Whenever the two light beams are intercepted simultaneously the interruption is recorded by the counting mechanism in the receiving box. At the end of each hour the printing apparatus stamps the day of the week, the time, and the cumulative traffic total. If the current should fail, the time of the failure is recorded, as well as the number of vehicles counted up to then.

Errors in the count never exceed 5 per cent of actual traffic volumes, and are usually held to within 1 or 2 per cent of accuracy. There are, however, several unavoidable sources of error, such as when two cars passing the counter in opposite directions intercept the light beams at the same time. Only one vehicle is then recorded.

"Phantom" trucks have been found which pass by the electric eyes without being seen. This mystery was solved when it was observed that the ghost trucks were painted either white or aluminum, with the result that at certain hours during spring or fall days sufficient light was reflected back to a receiving unit which faced north so that the light ordinarily furnished by the light source was replaced.

Most of the freak errors encountered cancel out.

Leprosy Declared No Real Menace in United States

Denver.—Leprosy, a plague of the ages, is still one of medicine's greatest mysteries. But Dr. G. W. McCoy, United States public health service medical director, speaking here before the American Association for the Advancement of Science, pronounced it "not one of our major public health questions," as it is in other parts of the world.

In most parts of the United States there is no need for the isolation of cases, in Dr. McCoy's opinion, except for charity reasons or because of the esthetic sensibilities of the community.

Dr. McCoy believes that nearly all cases of leprosy originate only in Florida, Louisiana, and Texas. But because the period between infection and development of the disease is ordinarily from five to ten years, and sometimes twenty years, the tracing of the source of infection is difficult. Only about a thousand cases of leprosy exist in the United States, half of which are known.

Moonlight Does Not Affect Growing Crops

Washington.—Moonlight has no effect on growing crops, if experiments with "artificial moonlight," or polarized light, are any criterion. Results of these experiments were announced by Dr. Earl S. Johnston of the Smithsonian institution.

Polarized light was used instead of ordinary light in tests with numbers of oat seedlings. Two effects were watched for: the bending response which plants normally show to light, and the assimilation of carbon dioxide to form carbohydrates, which is always dependent on light. Control groups of seedlings were exposed to ordinary light, under conditions otherwise identical.

The reactions of the plants in both groups of experiments were so nearly identical that Dr. Johnston concludes there were no really significant differences between them, and hence no special effect that could be ascribed to polarized light.

A True Sentiment

That is a true sentiment makes us feel that we do our country less, but because we have laid up minds the knowledge of lands and other institutions other races, and have afresh within us the instinct common humanity, and of versal beneficence of the —Dean Stanley.

Lesson for October 24

CHRISTIAN RENEWAL

LESSON TEXT—Titus 3:1-11.
GOLDEN TEXT—For the grace of God that bringeth salvation hath appeared to all men.—Titus 2:11.
PRIMARY TOPIC—The Good Shepherd.
JUNIOR TOPIC—In His Likeness.
INTERMEDIATE AND SENIOR TOPIC—A New Life in Christ.
YOUNG PEOPLE AND ADULT TOPIC—Renewed Life Through Christ.

The pastoral epistles, of which Titus is one, were written by Paul to his young brethren in the faith who had been called to the ministry of the gospel to instruct them concerning three important matters—(1) Church order and organization, (2) sound doctrine and (3) holy living.

The third chapter of Titus, our lesson for today, deals with the life of believers in Christ in their relation to unbelievers. The great underlying reason why Christians should conduct themselves in meekness and humility toward others is that except for God's grace we who bear the name of Christ would be, and indeed were before our regeneration, just like the unbeliever.

We shall best study our lesson, therefore, by considering first of all v. 3 which indicates the lost condition of man by nature, then follow him through the miracle of redeeming grace, vv. 4 to 7, and finally see him as a living testimony in vv. 1, 2, and 8 to 11.

I. Lost—by Nature (v. 3).

It is not a pleasant picture that is painted in the graphic words of this verse, but, remember, it is God's picture of the unbeliever. He is said to be "foolish"—that is, irrational and senseless in his course of living. He is "disobedient" to the law of God. He is "deceived," literally "out of the way," misled by Satan. He thinks his pleasures and lusts are serving him, but alas, he is only a slave in bondage to and serving them. Such a life can only result in a man's becoming hateful to his fellowmen. They in turn are hateful to him, and so he hates them. Thus the whole world becomes a hateful place where men are "living in malice and envy."

How we thank God that we need not stop at this point. Man is by nature lost in sin—but he may be

II. Saved—by Grace (vv. 4-7).

How sweet are these three words in the sinner's ears! Saved by grace, not works, and made heirs of eternal life.

1. "Not by works" (v. 5). Someone has said that man is determined by one means or another to claim salvation by his good works. To do so may flatter the flesh, but it surely finds no support whatever in Scripture. We are to work for Christ because we are saved, and after we are saved, but no man can be saved by works.

2 "By his grace" (v. 7). God shows his unspeakable kindness and love toward man—saving him by grace, through Jesus Christ. Grace has well been defined as "unmerited favor." We deserve but the just condemnation of our sin, and God in his mercy saves us, through faith in his Son.

3 "Made heirs" (v. 7). Saved now? Yes, thank God! Satisfied? Yes, praise his name! But there is more yet to come. We who deserved only God's judgment are now made heirs of an eternal hope. 'Tis indeed no small thing to be a child of God.

Now—we are ready to approach in the right spirit the admonition to live out our salvation as a daily testimony to others.

III. Witnessing, by Holy Living (vv. 1, 2, 8-11).

The young preacher Titus is told to "put them in mind" to be

1. Subject to rulers (v. 1). True patriotism (and we did not spell it "pay-triotism") stands very close to godly living. National leaders would do well to recognize that the decay of our national life will follow the decadence of spiritual life. A man who is right with God will be right with his fellowmen, and a noble and useful citizen.

2. Meek and kind to all men (v. 2). Meekness is not weakness. Gentleness is the attribute of strong men and women.

3. Maintaining good, avoiding evil (vv. 8-11). It is the tendency of man to divorce morals from religion, to profess a faith which does not touch his daily life. Let us affirm "constantly" and "confidently" (as the R. V. has it) that those who believe in God should "be careful to maintain good works"—yes, and at the same time to "avoid" that which is "foolish," contentious, "unprofitable and vain."

Knowledge and Ignorance

The best part of our knowledge is that which teaches us where knowledge leaves off and ignorance begins.—O. W. Holmes.

Justice

Justice is the idea of God, the deal of man, the rule of conduct writ in the nature of mankind.—Theodore Parker.

The Test of Truth

The truth makes free, brings joy, hope, encouragement.

Trim Ways to Greet Fall

WHEN the haze hangs in the horizon and you want to step right out and tell the world it's grand to be alive—that's when you want simple dresses like these to wear. Under a coat or without a coat—they're tops. Sew-Your-Own approves this fashion for simple things and helps you to make them for your own wardrobe with the aid of the three patterns shown here. Make them for your wardrobe—you need only a little time. Patterns include complete instructions.

Coat Dress for Large Women.

The woman with a real figure problem likes the ease and trim lines of this Princess coat dress, made to wear as casually as a coat. The dress buttons like a coat and takes inches off the silhouette. It's designed on flattering semi-fitted lines and is correctly made in silk or wool fabrics. For morning wear, this is a frock smartly made in sturdy cotton.

Slim Waistline in Misses' Frock.

If you wear a 12 to 20 size, then you'll want this very becoming dress made with lifted waistline to give you a molded figure-line. Square shouldered and trimly finished with two pockets, this dress will see you through every daytime occasion and is smartly made in silk, velveteen or thin wool.

Woman's Shirtwaist Dress.

This fashion—good year in and year out—is one which you will want in your wardrobe in a heavy silk or in a sturdy cotton. Make it yourself and have a dress that you can wear at every hour of the day. Note the raglan sleeves extending from the yoke of the dress, a detail that assures you complete comfort.

Pattern 1983 is designed for sizes 36 to 50. Size 38 requires 3¾ yards of 54-inch material, plus ⅞ yard 39-inch fabric to contrast.

Pattern 1379 is designed for sizes 12 to 20. Size 14 requires 2⅞ yards of 54-inch material.

Pattern 1225 is designed for sizes 34 to 44. Size 36 requires 3⅝ yards of 39-inch material, plus ½ yard of contrasting.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Send 15 cents for the Barbara Bell Fall and Winter Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns.

MME BOY MAKING GOOD IN BUSINESS AT TOLEDO, OHIO

he Times is in receipt of a s clipping from the Toledo, daily in which appears a e-up and a picture which is of rest to Klemme people. The tells of the success and th of the H. & H Machinery Supply Co of which Harold is one of the owners and has ge of the hobby department old's cousin, Geo. McLeary, is other partner in the business he firm handles a full line of ral makes of wood and metal king machinery, shop supplies, dicraft supplies and also spon- a hobby club of 55 member- which meets at the store ev- Wednesday night.

he company was organized in 5 and has experienced a rapid wth and they recently moved larger quarters and have in- ased their line of stock.

Return From Southern Trip

Dr and Mrs. D. P. Anderson baby daughter, Neva, return- Saturday from a six days trip t took them as far south as reveport, Louisiana, and Dalla , xas. They also visited with rel- ves in Missouri, Kansas, Ne- aska and Oklahoma.

Dr Anderson says that it was a ry pretty trip at this time of e year and they enjoyed the autiful scenery all the way wn south They drove through e ozark region of Msisouri and kansas which is a beautiful ute. Down south they saw cot- n being ginned and baled.

DISTRICT MEETING HELD AT UNITED BRETHERN CHURCH AT GOODELL

Ministers' and Womans' Missionary Association Met Wednesday, October 20th

The District meeting of the Ministers' and Womans' Missionary Association was held in the U B Church at Goodell, Wednesday, Oct. 20th

Delegates from the Ventura Stilson and Webster City churches were present

Mrs Garth, of Webster City was the Chairman in the forenoon and Rev Hougham, pastor at Ventura, lead the devotions, using as his subject "I Must Work" Mrs Miller, Mrs Riggs, Mrs Carpenter, of Webster City and Mrs Gus O'Krueg, of Goodell, were on the morning program.

Lunch was served by the local W M A women

Mrs Fred Riggs was the Chairman in the afternoon Dr Dye offered the invocation and Rev Miller, pastor at Stilson, lead the devotions, using as his subject, "The Works Of Him" The High School girls' Quaret, Misses Virginia and Barbara Wallace Eileen Ruka and Katherine McMullen favored the meeting with a special number which was much appreciated Miss Dugan was at the piano

Rev Ward, who has been a missionary to China for over 40 years, brought a splendid message giving some of the present conditions there The seventh and eighth grade and high school were present to enjoy and benefit by the address

Mrs Dye had the closing services, using as her subject, "That Sent Me" This brought to a beautiful climax the theme for the meeting "I Must Work the Works of Him That Sent Me"

Rev Fred Riggs, pastor at Webster City, gave the closing prayer and Benediction

START CULLING PULLETS NOW, WATERS SUGGESTS

Carefully cull the pullets now! That, says N F Waters of the Poultry Department, Iowa State College is the foundation for a high producing flock By handling his birds several times during the year the poultryman should be able to sort out non-productive or low producing birds early in the year Waters says

While it is not possible to examine a bird and tell whether it will make a desirable breeder or not, yet birds may be culled on the basis of how nearly they conform to the ideal breed type Such factors as the color, shape and size of the birds may be considered After a bird has completed one laying year, it is possible to judge its past performance by such criteria as the amount of yellow pigment in the beak and legs length and time of the moulting period, quality of the skin and the general condition of the bird

Non-producing birds should be discarded, Waters points out, because birds low m vitality and diseased will spread disease and parasites to healthy individuals, and the removal of these "boarders" will save on both feed and labor The net result is a larger income from the flock.

If a flock owner does not know how to sort his flock and remove the non-producers he should seek the aid of a licensed culler in his community

A finish fight between armed bandits and reckless drivers is what this country seems to need right now.

HELPING THE MOUNTAIN CLIMBER

Strong Arm Of The Law Bears Down On Law Violators Here!

THREE PAY FINES ON VIOLATIONS HERE TUESDAY

Frank Terhufen was arrested Monday night by Marshall Buseman on a drunken charge and lodged in jail Tuesday he was brought into Mayor Grange's court where he was fined $15 00 and costs amounting to $20 85

Constable H J Smid made two arrests Tuesday morning Mi Ryan, driving a Coca Cola truck was picked up for driving through a stop sign He was tried in Justice Henry Suckow's court where he was fined $5 00 and costs, or $8 85

Donald H Smith, Des Moines, driver of a Colonial bread truck was arrested by Constable Smid for driving through a stop sign His case was also tried in Suckow's court and his fine and costs amounted to $8 85

These arrests should be a good warning to others that the peace officers really mean business and that violators will be punished Law enforcement officers are determined to put a stop to reckless driving and drunkenness in Klemme

KLEMME VETERINARIAN BUYS PRACTICE AT WESLEY, IOWA

Dr H H Raney, who has practiced veterinary medecine in Klemme for nearly three years, will leave about November 1st for Wesley to take over the practice of Dr F A Bonnstetter.

Dr Raney purchased the home where Dr Bonnstetter and family have been residing and will move as soon as the Bonnstetters vacate

Dr Bonnstetter suffered a serious injury some time ago and will move with his family to the south where he expects to practice and regain his health

Dr and Mrs. H H. Raney have resided in Klemme for nearly three years and have gained many friends during that time who will regret having them leave the community

Standard Bearers held their meeting in the M. E. Church parlors Tuesday evening, with their mothers and members of the Missionary society and friends, as guests. The missionary subject was presented in the form of a pageant and was very interesting. The old officers, with the assistance of their leader, Mrs Earl Schaeffer, installed the new officers, by a candlelight service, which was very impressive. A lovely lunch was served by the girls.

DRUNK DRIVING CHARGE IS FILED IN ACCIDENT

Car Hits Protection Put Up Near Residence Of Mrs. Mitchell

GARNER —William Larsen, 38, and John Hansen, 27, both of Kanawha, were brought to the court of Justice H V Reed Friday afternoon charged with intoxication after the automobile driven by Larsen crashed into a brick pillar near the home of Mrs O S Mitchell late Thursday night Both suffered cuts on the face and bruises and Hansen was treated by a local doctor but Larsen refused to receive medical aid

Daly Files Information

They were arrested by City Marshall James O'Connor and lodged in jail until they were able to appear in court

County Attorney W D. Daly filed information. Hansen pleaded guilty to intoxication charges and was fined $10 and costs

Larsen, charged with driving an automobile while intoxicated was bound over to the Hancock Jury and released after furnishing a $500 bond Frank Senneff, Britt attorney, represented the men

The accident occurred on the curve of old highway No 18 at the north end of Main street at the place where a young couple from Forest City were both killed seven years ago when their car crashed into the Mitchell home One of the brick pillars installed by the highway commission, following several accidents, was broken and some of the posts pulled out. The Ford V-8 driven by Larsen was badly wrecked

FATHER OF KLEMME TEACHER DIED AT LA CROSSE HOSPITAL

Mr Martin Elstad was called to La Crosse, Wis, the fore part of last week by the serious illness of his father, who was in a hospital there. Mr Elstad's father died Wednesday of last week and the funeral services were held Friday

Mr Elstad has been in the general merchandising business at Prosper, Minnesota, for a number of years Mrs. Elstad died several years ago. Martin is the only child.

The sympathy of the community is extended to him at this time.

Royal Neighbors Will Give Away Quilt Saturday Night

The Royal Neighbors will give away a fancy quilt Saturday night at the W. L. Thada store.

Art Schultz Is In Serious Condition After Crash

LIVING UP TO THIS PLEDGE WOULD ELIMINATE ACCIDENTS

The pledge taken by all who affiliate themselvse with the Hancock County Safety Council would eliminate a great many accidents on the highway if every driver would religiously observe the following rules:

1. To drive carefully and at reasonable speed and to observe all traffic signals and stop signs
2. To refrain from pasing on hills, and to take curves cautiously and on the right side.
3 To signal my intentions before turning or stopping
4 To take nothing for granted with regard to the other driver
5 To give strict attention to my driving and to drive only when physically and mentally fit
6 To have my car inspected at least twice a year for brakes lights and other safety features.
7. To guard the safety of all children as I would that of my own
8 To look upon the safety of my passengers as my personal trust and responsibility.
9 To be courteous in my car as I am in my home
10 To obey all rules of safety in my home and at my work and as a pedestrian on the streets

All of these things I will do in the belief that a human life is more important than the few seconds I might save by hurrying.

LEVY FOR YEAR IN HANCOCK COUNTY IS MORE THAN $600,000

Treasurer of Hancock county Roy L. McMillin reports that the total levy for the year is $605.917-59 Of this amount, including the month of September, the office has collected $544,530 84 or 89 87 per cent of the total. Delinquent tax collections were $11.159 01

Checks amouning to $102,329.12 were mailed in September to schools, to corporations $11,736.46 and to townships. $785.18

The total indebtedness for the county is $24,000, drawing 2½ per cent for the poor fund

Congress—and Its Special Session

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

Congress, as this is written, is preparing to convene at Washington in special session.

Meanwhile America wonders what that session will bring forth.

Many things have been promised. But, as most Americans remember, many things were also promised before the preceding session — and failed to materialize. Out of it came principally a long and bitter battle to preserve our Constitutional concept of a balanced form of government.

In this period of nation-wide tribute to the Constitution on its 150th anniversary, citizens will hope that the need for such a conflict will not reappear.

They will hope that Washington will give its full time, instead, to legislation devoted to the equal well-being of all citizens.

Relief from the rising costs of living which affect every segment of our 129,000,000 people, expanded opportunities for employment, continued progress in our national development, elimination of unnecessary waste, renewed confidence in our agencies of government—these are some of the things that the people seek from Washington.

It is a familiar and a traditionally American demand. It was what Thomas Jefferson had in mind when, in discussing the ideals of our early Republic, he wrote:

"A wise and frugal government which shall restrain men from injuring one another, which shall leave them otherwise free to regulate their own pursuits of industry and improvement, and shall not take from the mouth of labor the bread it has earned! This is the sum of good government."

With that precept as its guide, Congress could make the special session well worth while.

GARNER MAIL CARRIER SERIOUSLY INJURED IN AUTO CRASH

Garner Farmer In Hospital After Being Injured By Bull

Arthur Schultz, mail carrier on route four, Garner, was seriously injured early Saturday evening in a car crash on highway 18 east of Garner Schultz is in a serious condition at Mercy hospital, Mason City, suffering a ruptured kidney, gashes on his face and head, possible internal injuries and loss of blood.

Schultz, who was alone, was driving east when he turned out to pass going up a hill east of Garner and crashed into a car driven by R V. Reed of Charles City Reed suffered a broken knee and head cuts. Both cars were badly smashed up.

Farmer Injured By Bull

Roy Lawhorn, who lives on his farm just north of Garner, was injured Saturday when he was attacked by his Guernsey bull which trampled him His life was possibly saved when Mrs. Lawhorn heard her husband's crys for help She drove off the enraged animal with a club and got her husband out of the yard.

Mr Lawhorn is in a Mason City hospital where his injuries are being treated He received five broken ribs and numerous cuts and bruises.

DESPITE COLD AUTO DRIVERS WARNED TO USE SIGNALS

Cold weather is here, but the motor vehicle department has not become warm hearted on the matter of hand signals

"I know it's cold to open the window and put out your arm to signal, but we can't permit any exceptions on account of the weather," Chief John R. Hattery of the highway patrol said Saturday.

Klemme Girl Honored At Waldorf College

Miss LaVohn Sherwood, daughter of Mr and Mrs. W L. Sherwood, was recently elected president of the Waldorf German Club of Forest City, Iowa. Miss Sherwood is also a member of the choir which will make its annual spring tour into southern Minnesota, Wisconsin, Illinois and Iowa.

Bridge Party At Trumbull Home

Mrs. Ed. Buntenbach and Mrs. Sumner Trumbull entertained at three tables of bridge Friday afternoon at the Trumbull home Mrs W L. Thada won high prize and for second they drew. Mrs George Stokesbary won the draw A lovely lunch was served by the hostesses, after a pleasant afternoon of cards.

Liberty Township Farmer Buys Property In Klemme

J J Stille, of Liberty township, has purchased the Mrs Ben Katter property in Klemme. This is the place to blocks south of the Klemme Co-Op. Oil Station occupied by Mrs Herman Bridges and children.

Birthday Dinner

Mrs. Lena Schroeder had a birthday last Wednesday, but postponed celebrating the event until Sunday when she entertained a number of relatives at a duck and goose dinner. Those present were: Fred Barz and family; Henry Barz and family; Albert Barz and family; Rev. Grosshuesch and family, and Mr and Mrs. Will Barz of Garner.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG WASHINGTON, D C

Washington.—I doubt that there is any phase or function of government that is less understood by the people at large than questions or actions relating to foreign policy. It is easy to understand why this is so. American foreign policy, like the foreign policy of every other nation, is closely akin to patchwork. It cannot be otherwise because of the very nature of the matters to be dealt with officially. Foreign policy, indeed, is one thing to which President Roosevelt's oft-quoted statement about his decisions resembling those of a football quarterback can be most properly applied. It is a day-to-day treatment with new decisions as changes come in the international play.

Our Foreign Policy

This brings us to the President's Chicago speech and the announcement by the State department of American conclusions that Japan is the aggressor in China. Of course, all persons who have read anything about the Sino-Japanese war knew long ago that the Japs were conducting a raid on China. Officials of the government knew it also, but there is a difference and must be a difference in the methods employed by individuals as distinct from those employed by a nation which represents all of its individual citizens. Time had to elapse, therefore, before our government or any other could say definitely and publicly that Japan was seeking to acquire new territory by theft and seizure.

Many observers and many individuals have indicated their surprise at the President's speech which, by the way, was the most distinct pronouncement of any that he has ever made. There was likewise surprise when the secretary of state, Mr. Hull, gave the press his statement condemning Japanese aggression even though the statement should have been anticipated after Mr. Roosevelt's Chicago speech and after word had come from Geneva that the League of Nations appeared unanimous in the same conclusion.

The reason that I say there should have been no surprise concerning the final position which our government has taken traces back to the administration of President Hoover and Henry L. Stimson, then secretary of state. It was at that time that a fundamental change took place in our foreign policy but it was not a change that appeared to be sensational at the moment. In other words, the position which Mr. Hoover and Mr. Stimson took at that time was overlooked because there was no real crisis to attract attention to American policy.

What that change in policy did is plain now. It was the beginning of the end of the isolationist program which followed the bitter controversy over President Wilson's proposal that the United States affiliate with the League of Nations and adhere to all phases of the program embodied in the league covenant. The reaction against Mr. Wilson's plan was violent and carried us to the other extreme—so much so that for a number of years we were a lone wolf among nations in fact as well as in name.

The one thing that really represents an important change of policy that Mr. Roosevelt enunciated at Chicago is his view of neutrality. Without making any particular reference to the neutrality statute enacted last winter under the sponsorship of Senator Pittman of Nevada, Mr. Roosevelt announced without equivocation that the United States will do everything it can, short of military force, to curb the Japanese course in China. That is to say, and I believe it is accurate, we will not invoke the neutrality laws if such a course will do harm to the Chinese. Rather, the American policy for the time being at least involves working hand in hand with other nations that may be striving to maintain international order and morality in matters in which we are directly concerned.

* * *

I have been asked several times recently concerning the possibility that the United States may engage in actual war in the Far East. I think that eventuality is very far removed.

Keep Out of Far East War

Possibilities always exist for a nation to get tangled up internationally under conditions such as obtain throughout the world today, yet I do not believe that the United States ever will do more in the Far East than exert moral pressure upon the Japs. It must not be overlooked, however, that the bulk of American sympathy is with the Chinese. One cannot tell how far that may lead us as a nation. Nor is it possible to forecast the weight of this sympathy in an economic way. I mean by that, no one can foretell what such a thing as a boycott of Japanese goods may mean eventually.

From all of this it must be plain that our national course in the next few months will have to be determined largely by the other fellow. Or, to state the proposition in another way, the lengths to which the United States will go in punitive action against Japan is likely to be determined, first, by the reaction of our own citizens to Japanese barbarism and, second, the moves by other dominant nations of the world.

Mr. Roosevelt was returning from an 8,000-mile trip when he delivered his Chicago speech. That trip was announced in advance as being for the purpose of an inspection—to see how the country was taking the New Deal. That, however, was not the whole truth. Mr. Roosevelt wanted to feel the public pulse politically on the Supreme court packing proposition and its related questions; he wanted to find out how the country felt concerning those Democrats who had opposed the court packing; he needed information about the demand for an extra session of congress to enact crop control legislation and, in addition, he wanted to see what the general feeling was about the Sino-Japanese war.

The trip was timed admirably. It took Mr. Roosevelt away from Washington and, further, away from the red-hot cauldron resulting from the fact that Associate Justice Hugo L. Black of Alabama was a member of the Ku Klux Klan.

The information that filters back from observers aboard the President's train presents something of a paradox. Almost unanimously, the observers found that Mr. Roosevelt was still immensely popular personally. Concerning his various programs, including crop control legislation, the observers report that they found conditions ranging from violent opposition to plain apathy or complete lack of interest.

It is a most confusing situation from a political standpoint. I have found few individuals able or willing to attempt an analysis of it. Generally speaking, lack of enthusiasm for a program sooner or later will kill off politically the individual who sponsors the program. Yet, no one will say at this time at least that such a result can be expected in Mr. Roosevelt's case.

But the political effect of his Chicago speech must not be minimized. Whether Mr. Roosevelt so intended or not, his speech demanding that Japan respect treaties and observe the rights of other nations and his pointed criticism of policies such as those employed by Mussolini, Hitler and Stalin, have the effect of rallying the people behind him.

* * *

Some persons who are opposed to the New Deal have been mean enough to say that Mr. Roosevelt took his trip West in order to get away from Washington until the incident involving Associate Justice Black had blown over. I do not know whether the exposure that Mr. Justice Black had been a member of the Ku Klux Klan alone prompted Mr. Roosevelt to leave. I repeat only what is being said.

Black Klan Affair

Mr. Justice Black has now taken his seat as a member of the court. He told the country in a radio speech before assuming the robes of office that he had resigned from the Klan and that, as far as he was concerned, the incident was closed. He stooped somewhat, I think, when he tried to dodge the issue by charging that those who had exposed his Klan connections were trying to discredit Mr. Roosevelt. But, Mr. Black is now a member of the court and I do not see what anybody can do in the way of unseating him.

The reason for adverting again to the Black Klan affair is to make a prediction. That prediction is: as long as Mr. Black sits as a member of the Supreme court of the United States, he will receive repercussions of the case. I will wager now that regardless of what position Mr. Black takes in deciding any future litigation, there will be those who will point to him and remark that "he was once a member of the Ku Klux Klan." Likewise, regardless of the views or arguments he advances in any decisions rendered by the court, Mr. Black will be referred to continuously as "the Klan member" or as "the Roosevelt liberal."

Take it any way you like—the appointment and the confirmation of Hugo Black as a member of the Supreme court under the circumstances now known and affirmed by Mr. Black himself constitutes one of the worst situations yet recorded on the appointive power of the President and the power of the senate to approve presidential nominations.

But laying aside all of these things, there is a real tragedy resulting from the circumstance. If there is one branch or agency of our government in which it is necessary for the people as a whole to have faith, it is in the judiciary. I think I can foresee that the Black appointment and its attendant features will shake the faith of many individuals in courts.

It ought never to have happened

The Oppressor

IF WE should look under the skin of the prosperous and prevailing tyrant, we should find, even in the days of his joys, such alloys and abatements of his pleasure as may serve to represent him miserable, even in the hour of his prosperity, and independent of his final infelicities; and although all tyrants may not have such accusing and fantastic consciences, yet all tyrants shall die and come to judgment; and though such a man may be feared, he is not at all to be envied.

"Envy thou not the oppressor, and choose none of his ways."—C. Buck.

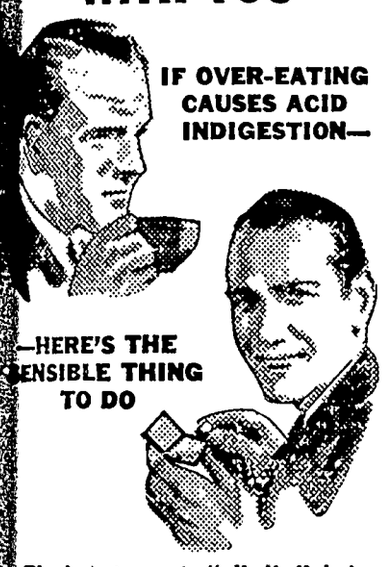
CARRY YOUR ALKALIZER WITH YOU



IF OVER-EATING CAUSES ACID INDIGESTION—

—HERE'S THE SENSIBLE THING TO DO

The fastest way to "alkalize" is to carry your alkalizer with you. That's what thousands do now that genuine Phillips' comes in tiny, peppermint flavored tablets — in a flat tin for pocket or purse. Then you are always ready.

Use it this way. Take 2 Phillips' tablets — equal in "alkalizing" effect to 2 teaspoonfuls of liquid Phillips' from the bottle. At once you feel "gas," nausea, "overcrowding" from hyper-acidity begin to ease. "Acid headaches," "acid breath," over-acid stomach are corrected at the source. This is the quick way to ease your own distress — avoid offense to others.

Daring Hides Fear

Fear is often concealed by a show of daring.—Lucan.

Making Opportunities

Weak men wait for opportunities, strong men make them.

HOW OFTEN CAN YOU KISS AND MAKE UP?

FEW husbands can understand why a wife should turn from a pleasant companion into a shrew for one whole week in every month.

You can say "I'm sorry" and kiss and make up easier before marriage than after. If you're wise and if you want to hold your husband, you won't be a three-quarter wife.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

Be Chic This Fall in Handsome Lace

By CHERIE NICHOLAS

LACE, lace, lace! Write it down on your shopping memoranda as many times as you wish and then add a postscript in favor of lace, for lace reaches a new high this season in the matter of importance. Yes, indeed, if you are seeking style distinction, the sooner you turn laceward the better.

What the style creators of our day and generation are doing with lace in the way of daring and ingenious handling leaves nothing to the imagination. For instance, there are the stunning lace trimmed black sheer wool dresses that bear the Paris stamp and carry that "something different" look which we all covet. Perhaps it is the sleeves banded with insertions of fine black Chantilly that bespeak a new lace story, or it may be that befrilled edgings of Val edging (black or white) impart a charming and youthful air to a simple black wool frock for practical daytime wear. The way Val lace is used for neckline finishings and for outlining decorative little pockets likewise for trimming the new blouses is most enchanting.

Another adaptation of lace is in insets and appliques of individual motifs. These are positioned anywhere on the dress much after the manner that gay print motifs were used on monotone fabric during the past summer. While these insets, which are apt to be bowknot or bouquet cutouts, adorn evening gowns for the most part yet some designers are working discreetly and most attractively into daytime wools and other fabrics. This furore over lace has also resulted in the revival of the dress with a deep lace yoke and sleeves. Leading couturiers are showing some lovely models of this type.

The biggest thrill, however, comes in the acceptance of lace used in a fabric way. The idea, to be sure, is not new for its practicality has been demonstrated without question during the last several seasons. Nor has the advent of fall and prospect of winter retarded the movement to use lace as one would any material for the making of practical day dresses and the blouse to wear with your smart autumn wool suit. On the contrary we have come to realize and appreciate that a handsome lace dress tailored to utmost simplicity is not only good looking and practical but being lace it flatters and "does something" for you as none other but lace can do.

You'll love a dress like the one shown to the right in the illustration to wear this fall and winter under your furred cloth or all-fur coat. Just try out the idea and see how practically and logically this theory of lace for the daytime frock works out. This tailored frock of black lace over a black slip fits ideally into the mood for simple elegance that dominates the new fashions. It is an almost classic style accenting the slenderizing lines that are a fashion "must" this season. The zipper fastening from neckline to hemline is the piece de resistance, giving the gold touch that glorifies black this season throughout the mode Speaking of this fastening, most everything, dress, coat, blouse, bag and girdle, is decoratively, at the same time practically and conveniently zippered this season.

If in doubt as to the new blouse to wear with your autumn suit, let lace, either handsome wool lace or the now-so-modish macrame or some equally as sturdy type, solve your problem. In a noted Paris collection showing new clothes for fall, Martial et Armand presented the black crepe suit with silver fox which we are showing to the left in the picture. The most outstanding thing about the ensemble is the combination of lace with crepe. Lace is also being combined with many other fabrics in the fall showings of eminent French designers. In this case the blouse is of china-blue lace with interesting neck treatment. A black belt accents the color contrast.

HER STARLET BAG

By CHERIE NICHOLAS

The movies have a great deal to do with the modern trend in child thought, and when a child sees her favorite star carrying a smart little handbag, as little girls in filmland are wont to do, she wants one too. To satisfy this longing a well-known designer is creating miniature replicas of "grown-up" handbags for aspiring starlets. You can see by the picture that a "starlet" bag carries with it just such movie glamor as delights the heart of any and every little girl.

WOODEN TRIMMINGS FOR FALL COSTUMES

Novelty wooden buttons adorn many of the newest sports frocks while handsomely carved wooden clips, pins and buckles are also featured as trimmings. Polished themes are noted with the real grain of the wood brought out as well as though an antique cabinet maker had been working on it. Plaids, cut-out leaf and flower motifs and many other themes also are introduced.

Belts made entirely of wooden pieces hinged together or of wood in alliance with metal chains are decorative assets to suits as well as dresses while the same ideas are repeated in the designing of necklaces and bracelets.

Pouch Bags Fashionable as an Accessory for Autumn

Pouch bags are back in style for fall and are shown in soft dull leather broader at the base than at the top. Fashioned with round or rectangular caps that fit over the opening of the bag, when it is opened the sides may be spread out so that the contents may be found easily.

Silky antelopes with severe gold and silver trim are the loveliest of afternoon bags.

Evening Headdress

You must wear, when you dress formally for evening, either a feather, a flower or a fantasy of glittering sequins in your hair.

Keeping Up With Science

Famed Ancient Colors Bettered by Modern Dye Manufacturers

Tyrian Purple and Blue of Egypt Are Debunked

New York.—Our modern age is sometimes criticized for doing things in a big way. We turn out paints by the vat; dyes by the carload. It is supposed to be a sad change from the good old days when Egyptians mixed colors that would last 4,000 years, and when Tyrians patiently extracted drops of royal purple from shellfish.

But chemists who concoct our up-to-date colors can well defend themselves. They long ago investigated the Tyrian purple legend and showed that this famous dye is no regrettable lost art.

True, the dye makers of Tyre achieved a sort of miracle by milking thousands of snail-like shellfish to get the lone whitish drop from each head. In the air the white stuff turned green, then blue, then purple. Finally, set by alkali, it became the crimson that Tyrian purple actually appeared.

Our Chemists Do Better.

But, the chemists explain, the only reason debutantes and shopgirls aren't wearing royal purple today is because better crimson dyes are known. Laboratories could make it by the ton, but you wouldn't buy it.

It is the same with the famous Egyptian blue used in decorating walls in Egypt, and later in Rome.

Recently, research scientists for a printing ink corporation tested this blue, because of its reputation for permanency. Gently handling specimens of Roman wall painting, they analyzed the blue color by a spectro-photometer. They found the Egyptian blue a good deal like modern ultramarine. It was fast to light, heat, salt water, and mild acids. But—it did not come up to modern standards.

Men Not Born Equal, Study of Primitive Races Evidences

New York.—All men are not born equal. Scientific evidence, long lacking or insufficient, now points to genuine mental differences between races apart from the more superficial superiority that results from advantageous geographic location, proximity to other peoples, and a background of culture or civilization.

It has been natural to suppose that men differ from each other mentally as they do in the more obvious matters of skin color, shape of nose, or curliness of hair. But procuring scientific proof of such differences was a stupendous task.

The test with which an American child is given an I. Q rating is obviously not suited to an adult African Bushman. Written tests are automatically barred for the illiterate.

So-called performance tests are almost equally useless. The uncivilized man cannot understand the directions necessary, the pictures are meaningless to him.

A new attack is provided by comparing two primitive peoples not with civilized man but with each other. Dr. S. D. Porteus, psychologist widely known for his psychological maze tests, has gone to the desert wastes of central Australia and to the home of the Kalahari Bushmen in South Africa.

Despite better food and water supply and easier living conditions, the Bushmen excelled the environmentally unfavored Australian aborigines in only two respects, Dr Porteus reports in a new book, "Primitive Intelligence and Environment," (Macmillan). They offer more determined resistance to white invaders and they are more skillful artistically.

Cinnamon Trees Grew in Texas Many Years Ago

Stephenville, Texas —Cinnamon trees once grew in what is now Texas, millions of years ago, when there were dinosaurs to browse on their leaves.

A group of fossils which include leaves of plants like cinnamon, sassafras, sarsaparilla, and maple, found near here, are described by Prof. O. M. Ball of the Agricultural and Mechanical College of Texas in the Journal of Geology.

Utah Fossil Tract Last Pasture of the Huge Sauropods

These Reptiles Famous for Having Two Brains

Washington.—The bones of a sauropod, gigantic dinosaur that made the world picture of 150,000,000 years ago a nightmare, have been found in a western Utah fossil tract that may have been the last pasture where the last of the fabulous-appearing reptiles awaited their final end, the Smithsonian Institution announced.

Another chapter has thus been written in the curious history of the forty-ton monsters and their smaller racial brothers that peopled the world hundreds of millions of years ago and then utterly disappeared.

The bones, found by Dr. Charles W. Gilmore, the Institution's paleontologist, are only 80,000,000 years old as against the 150,000,000 year age of most of the dinosaur remains, giving rise to the belief that the western Utah tract where they were found may have been the spot where the monsters met extinction.

Insufficient materials to reconstruct the sauropod, known from other specimens to have ranged between 75 and 100 feet in length and 40 to 50 tons in weight, were found. But enough evidence was uncovered by Doctor Gilmore to add significantly to previous knowledge regarding these creatures.

Last Round-Up of Reptiles.

True mammals were already beginning to appear in North America at the time that the last of these massive creatures were making a last stand against probable climatic changes that cut off their food supply.

The last round-up, with drouth and chill over the semi-tropical forest which at that time covered North America as the herders, may have taken place in Utah in the neighborhood of the fossil finds. Scientists have been unable to proceed further than such speculation in accounting for the disappearance in a very short time of the giant reptiles of the Cretaceous era.

The sauropods are famous not only as the largest land creatures, but because they had a small brain in the head and a second "brain" in the hindquarters for controlling the movements of the hind legs and tail, in much the same fashion as a hook-and-ladder fire truck.

Finding the sauropod bones in the 80,000,000 year old beds was called "more remarkable than finding a living mastodon or saber-toothed tiger" by the Smithsonian institution.

More Broken Necks Are Due to the Automobile

Chicago. — More people are getting their necks broken these days than in the horse and buggy era, and the automobile is responsible, Dr. H. F. Plaut of Cincinnati told members of the Congress of Radiology here.

The particular part of the neck which gets broken is the atlas, the first vertebra at the base of the skull which forms the pivot on which the skull rotates.

"Previously fractures of the atlas were reported among longshoremen and in gymnasium accidents," Dr. Plaut recalled. "Now automobile accidents throw riders against the tops of cars and pitch them to the pavement with many cases of fractured atlases."

Most of these patients recover and are fully active, Dr. Plaut said. Fractures of the skull above the atlas are more dangerous.

The atlas is not easily injured by direct violence because it is well protected by other bones and is deeply imbedded in surrounding soft tissues. But in a head-on fall the force is directed against the weakest part of the atlas by the pressure of the skull at this point.

Picnic Site of Oldest Inhabitants Is Found

Minneapolis. — Two thousand knife-marked bones, remnants of ancient feasting in the northern lake region of Minnesota, have been discovered at a camp ground of America's earliest people.

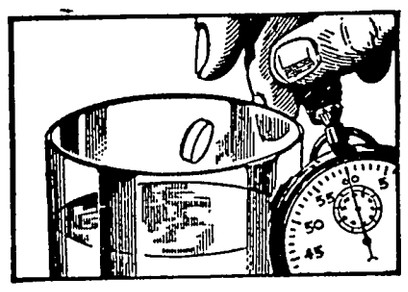
Prof. A. E. Jenks of the University of Minnesota announced the find to the journal Science. That the scene reveals very old inhabitants is indicated by finding bones of a kind of bison, long extinct on this continent, among the bones of bear, elk, caribou and other big game animals in the kitchen refuse The feasters also left knives and other tools of bone and stone.

The kitchen dump, abandoned thousands of years ago, is buried three to nine feet under a bog of grasses and marsh weeds, in Itaska State park. Professor Jenks has been excavating the site in co-operation with the state conservation commission and the federal government.

Mistakes Are Past

When you make a mistake, don't look back at it long. Take the reason of the thing into your own mind, and then look forward. Mistakes are lessons of wisdom . . . The past cannot be changed. The future is yet in your power.—Hugh White.

READY TO BRING YOU RELIEF IN MINUTES



THE REASON BAYER ASPIRIN WORKS SO FAST

Drop a Bayer Aspirin tablet into a tumbler of water.

By the time it hits the bottom of the glass it is disintegrating.

This speed of disintegration enables genuine BAYER Aspirin tablets to start "taking hold" of headache and similar pain a few minutes after taking.

YOU can pay as high as you want for remedies claimed to relieve the pain of Headache, Rheumatism, Neuritis, Sciatica, etc. But the medicine so many doctors generally approve — the one used by thousands of families daily — is Bayer Aspirin — 15¢ a dozen tablets — about 1¢ apiece.

Simply take 2 Bayer Aspirin tablets with a half glass of water. Repeat, if necessary, according to directions.

Usually this will ease such pain in a remarkably short time.

For quick relief from such pain which exhausts you and keeps you awake at night — ask for genuine Bayer Aspirin.

15¢ FOR 12 TABLETS

virtually 1 cent a tablet

Others' Excellences

We should allow others' excellences, to preserve a modest opinion of our own.

Beware Coughs from common colds That Hang On

No matter how many medicines you have tried for your cough, chest cold, or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with any remedy less potent than Creomulsion, which goes right to the seat of the trouble and aids nature to soothe and heal the inflamed mucous membranes and to loosen and expel the germ-laden phlegm.

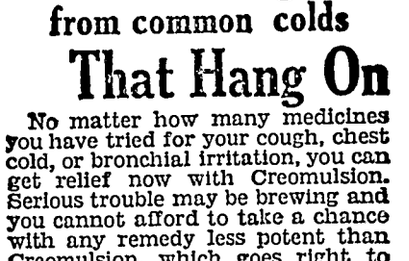
Even if other remedies have failed, don't be discouraged, try Creomulsion. Your druggist is authorized to refund your money if you are not thoroughly satisfied with the benefits obtained from the very first bottle. Creomulsion is one word—not two, and it has no hyphen in it. Ask for it plainly, see that the name on the bottle is Creomulsion, and you'll get the genuine product and the relief you want. (Adv.)

Laugh Each Day

No day is more wasted than one in which we have not laughed.—Chamfort.

CONSTIPATED?

To keep food waste soft and moving, many doctors recommend Nujol—because of its gentle, lubricating action.



INSIST ON GENUINE NUJOL

WNU—N 42—37

HELP KIDNEYS

To Get Rid of Acid and Poisonous Waste

Your kidneys help to keep you well by constantly filtering waste matter from the blood. If your kidneys get functionally disordered and fail to remove excess impurities, there may be poisoning of the whole system and body-wide distress.

Burning, scanty or too frequent urination may be a warning of some kidney or bladder disturbance.

You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel weak, nervous, all played out.

In such cases it is better to rely on a medicine that has won country-wide acclaim than on something less favorably known. Use *Doan's Pills*. A multitude of grateful people recommend *Doan's. Ask your neighbor!*

SEE PROSPECT OF LARGE GRASSHOPPER OUTBREAK

More Eggs Laid This Fall Than Year Ago, Survey By Entomologists Show

There will be more grasshoppers in 1938 than there were in 1937 if the number of eggs deposited by the '37 'hoppers is any indication

According to a survey conducted by Iowa State College entomologists, the bureau of Entomology. U S D A, and the State Department of Agriculture, the number of grasshopper eggs found this year is much higher than both the number of adult 'hoppers found and he number of eggs found last fall

Complete reports from 42 counties have been received and analyzed, while all reports will be completed in several weeks. Carl J Drake, head of the Department of Zoology and Entomology at Iowa State College, states.

"In some of the more favorable egg-laying places as many as 128 pods of eggs have been found per square foot" Dr Drake reports (Each pod contains 30 to 40 eggs)

Dr Drake attributes the high number of eggs found this year to the long, dry fall favorable to the adults for egg laying and to the fact that this year large numbers of the 'hoppers lived until October while last year they lasted little longer than September

On motion Geo. Buseman was allowed an increase of $5.00 per month as Marshall & Str Commissioner

Meeting adjourned.

NEWS FROM GOODELL AND VICINITY

Mrs. Burr, of Minnesota, is visiting with her son, Martin and family.

Mr and Mrs Jim Parker and son, Pat, of Simpson, Canada, are visiting with the former's sister, Mrs. Cashman and family and other relatives at Belmond

Wm Roths and family have moved to Belmond where they expect to make their future home.

Mrs Mac Fuller and daughter are visiting relatives in Lake City and Nebraska.

Harm Rust returned from Rochester where he received treatment at the Mayo hospital

The young people's S. S. class held a committee meeting Tuesday evening at the Dale Brede home Mrs. Dye is their teacher

Mr and Mrs. Orville Smith concluded a visit here with the former's mother and other relatives and returned to their home in South Dakota

Donald Burke and Everett Evenson spent the week end in Des Moines visiting friends.

Margaret Veenstra, who attends college in Cedar Falls, spent the week end at home

Jay Buchanan has rented his farm to John Wessel for next year Mr Wessel also bought some of the livestock

Miss Margaret Druery who attends College at Cedar Falls spent the week end at home

Henry Brede and fmaily attended the funeral of a relative in Garner Sunday

Gus O'Krueg and wife left Sat. for Minnesota to visit relatives.

Barney Vance has been ill and has finally had to submit to an operation at the Belmond hospital

Mr and Mrs Howard Terhufen and son, Dean, were guests of Tom Roths and family Sunday.

Mr and Mrs Reinean, of Meservey were guests at the home of their daughter, Mrs. Henry Waage and family, Sunday Mr Waage is now able to do light work after his serious operation

Mr and Mrs. Gerald Burk were entertained at the Raymond Johnson home Sunday evening

Fred Bachman and wife were visitors at the Jake Bachman home Sunday.

The Community extends their sincere sympathy to Orthel Johnson and family as it was his brother-in-law who was killed in the Renwick school bus that met with the serious accident, he being the bus driver He leaves a wife and two small children. Orthel and family left at once for Renwick.

Little did our parents ever think that the day would ever come when the steering-wheel would be the family circle.

Iowa certainly looks grand this year People are cheerful and happy and looking forward to better things The old state is bound to come back. We may not have $250 an acre land for some time, which is probably just as well, but prices are strengthening

INSIDE AIR MAIL ROUTE PROPOSAL IS DRAFTED

LETHBRIDGE, Alta. — A plan for the United States and Canada to paricipate in establishing an "inside" air mail route to Yukon and Alaska was drafted here at a meeting attended by individuals from the two countries.

Horseshoeing Record Recalled

CLEVELAND—John Glatch, one of the few blacksmiths left in the city, recalls the time 18 years ago when he and a helper shod 220 horses in 36 hours. Glatch alone has shod 52 horses in one day.

All cows in Iowa cow testing associations last year produced an average of 317 pounds of butterfat—over 100 pounds more than cows that were enteretd in the first year of testing in Iowa.

Old friends are best but they offer few surprises.

The cure for tuberculosis is based on rest, fresh air, nourishing food and sunshine. It requires much courage to pull through a long period of recovery. How much better it would be to guard against the disease in the first place, instead of locking the barn after the horse is stolen.

A wife is the person who can spot a blonde hair on her husbands coat at twelve paces and entirely miss a pair of garage doors.

Can you remember the days when more automobile drivers than pedestrians were seen under automobiles.

Postal Rate Once Caused Long Debate in Congress

In the year 1790 there were but 75 postoffices in the United States, the majority of which were confined to the cities. The Postmaster General then reported to the congress that he had turned over $37,935 to the Treasury department for the year's receipts, observes a writer in the Philadelphia Inquirer.

A stabilized postal rate was adopted in 1816. A single one-ounce letter, carried within 30 miles, cost 6½ cents, over 30 miles and under 80 miles, the charge was 10 cents; over 80 miles and under 150 miles the rate was 12½ cents; over 150 miles and under 400 miles the postoffice received 25 cents. A letter or parcel weighing more than one ounce cost four times the usual rate for the distance it would travel.

For many years after the schedule was adopted by congress the people pressed for a reduction. On several occasions enterprising congressmen introduced bills to reduce the rates, but a watchful Postmaster General succeeded in convincing the legislators that such measures were foolhardy to adopt, as a drop in revenue would mean an increase in subsidizing funds granted by the congress to maintain postal service.

After constant pressure congress passed a bill which became effective on March 3, 1845. A half-ounce letter, up to 300 miles, was delivered for 5 cents; over 300 miles the rate was 10 cents; with an additional charge for every half ounce over the original weight. Newspapers were delivered without charge up to 30 miles.

"Muck-Amuck," Indian's Bread in Lord's Prayer

The Pacific Northwest Indian of two centuries ago had no word for bread, something unknown to him, so he asked for "muck-amuck" when he recited the Lord's prayer, according to an authority in the Detroit News.

The "muck-amuck," states the writer, covered his daily ration of meat, fish and other food.

Another Chinook version of the Lord's prayer, one of several used, brought to light by a writer for the American Guide, was found in some long-forgotten documents.

"Ne-si-ka Papa klaxta mit-lite kopa Sach-a-lie," it begins.

A literal translation read:

"Our Father who dwells on high, good for our hearts your name, good you chief of all people; good your heart to such country as our up above; give us all days our food and stop remembering all our sins we make to them, suppose sin against us; throw far away from us all evil"

The various Chinook version of the Lord's prayer, it is said, came into being about 1740 from the influence of early missionaries

Not until later did the Indians come to use a word for bread, "sapo-lil."

The Chinook was a kind of esperanto language in which all tribes could talk somewhat with each other, and was in use before the white man came.

Old Ohio Court Rule

Some court-trial laws in effect in several counties in early Ohio were said to result in "men being hung so that jurymen might dine" From the time that the case went into the hands of the jury until a verdict was reached, the members of the jury were not allowed to eat, sleep, converse with anyone else, or have any light. So that these prohibitions were not violated, the sheriff was required to take this oath: "You do solemnly swear that, so far as in your power, you will keep this jury together without meat or drink, water excepted, fire or candle, that you will suffer no person to speak to them, nor speak to them yourself unless by direction of the court, only to ask 'are you agreed upon your verdict?' and this you do as you shall answer to God."

Rush Job in A. D. 122

The discovery of a dedication tablet among the ruins of Hadrian's wall proves that this line of ancient fortifications was built in less than five years, observes a writer in Pearson's London Weekly. The wall, running from Wallsend, at the mouth of the River Tyne, to Brownees on the River Solway, was built by the Romans, under the Emperor Hadrian, as a means of protecting Roman Britain from invasion by the barbarian clans of the north.

The work was under the control of Platorius Nepos, governor of Britain, and the tablet, dedicated to him, mentions that he was occupied with the construction from A. D. 122 to 126 The building plans were constantly changed while the work was in progress.

Where Sugar Comes From

Sugar is obtained from the sugar cane, from the beetroot and from the maple tree. Until a German chemist named Markgraft discovered sugar in the Eighteenth century only cane sugar was known. It was used in India over 1,000 years B. C.; the Persians refined it and used it a good deal in their medicines. Maple sugar is common; it is obtained from the sap of the maple tree. Both cane sugar and maple sugar are good to eat in the unrefined state, but beet sugar has to be refined before it can be used.

THADA'S

A Good Store In A Good Town — Klemme, Iowa

IT PAYS TO USE WANT ADS

Feed Grinders
. . . and Hammer Mills

SPEED UP GAINS ON FEEDERS AND INCREASE MILK PRODUCTION.

IF you are feeding a car of steers or milking over eight cows. "Believe It Or Not," if you do not have a mill you are paying for one and don't know it Just go into any feeder's yard who is feeding ground feed; or ask the man who is milking a few cows and using a hammer mill. You don't see his yard a foot or two deep with corn stalks lying around. Why lose all this valuable feed? We know of several parties that run all their feed through a mill In fact, their barns are full now, of this kind of feed Instead of getting fifty ton of ordinary hay and roughage in the barn, these parties have nearly double that amount, have it where it will be a pleasure to feed it, and we ask you, "Will it produce more fat—or if milking, more milk?" It will pay you to investigate this angle of the feed game

Stop in at the implement department and ask Ira about these mills.

A Cheap Corn Crib...

IF you don't like the idea of "Slat Corn Cribs" and want something that will hold five or six hundred bushels of corn, in the form of a movable corn crib at a price that won't cost very much per bushel, drop in at the yard. We believe that we have something that will answer the every year crib shortage. You can move or place it advantageously for feeding.

Come in and we will show you what we have Don't forget to leave your order for SLAT CRIBS.

High School News

Mr Elstad was called to La Crosse, Wisconsin, last Tuesday, and word came that Mr Elstad's father had passed away The funeral was held Friday at 1:00 o'clock at Prosper. Minnesota.

Mr G E Homestad taught in Mr Elstad's place

—K H S—

Report cards were given out Wednesday for the first six weeks.

—K H S—

We have more new books for the school They are "The Gorgeous Hussy," "A Man for the Ages," "The Crisis," "The Covered Wagon," "White Fang." "Typee," "Scaramonche," and "Dri and I."

—K H S—

The basketball schedule has been completed Six home games and ten away from home have been arranged The season opens November 12th at Latimer

Calvin Schaefer

—K H S—

Tuesday, October 10, Mr Hamilton of the Hamilton College of Commerce Mason City, gave a talk about choosing a vocation.

Mr Hamilton had drawn his talk from his experience with young people who were in the high schools he had visited He said that nine out of every ten students did not know what college they were going to attend after they had completed their high school education nor did they know what they wished to take up as a life work

He also said that the best thing to do would be to know what you were going to do and where you were going And to know something about the college to which you planned to go

His talk was very interesting and we are sure that the members of the Klemme High School will not soon forget it

Louise Alber

—K H S—

With the assistance of Miss Wallace, the freshman girls made some new curtains for the Home Economics room, which made it very attractive

—K H S—

The twelfth grade girls are beginning to make woolen dresses in Home Economics.

—K H S—

In English, the tenth grade is beginning the study of "Silas Marner"

—Della Kaduce

—K H S—

New equipment for the laboratory has been purchased Some of these articles are an aquarium and stock a barometer, models of lift and force pumps, and a set of slides for the microscope.

This equipment helps us to understand and be more interested in science

—Fritz Gobeli

—K H S—

The honor students in the high school for the first six weeks have been announced These students had a grade of B or better in all of their subjects They are Jacqueline Kudje, Elsie Ward, Avis Barz Novella Beier Gladys Griffen, and Ray Jorgenson, Jr

Grade School News

Grades 1 and 2

The second graders finished their readers and have new scrap books

We are enjoying our little newspapers which come every week

We are planning a Halloween party for next Friday afternoon

Grades 3 and 4

We have an Indian Tribe in our room It is the third grade Indian History Class They belong to the Little Sioux Tribe Each child has chosen an Indian name for himself

You should see our free-hand drawings! We have drawn an Indian boy and an Indian Tepee The best drawings are on the bulletin board.

Georgraphy 4 class has started a unit plan. They are making a picture map of their United States Journey A picture chart of each city is also being made

We are learning an Indian Dance We have learned two new Indian songs and two new autumn songs

The tepee has its cover on now

Our easel paints are ready for use

Grades 5 and 6

Julia Bell and Herbert Schwartz
—Reporters

We have had our first self-testing drill in both Arethmetic classes his week We have twenty of these drills during the year

This week has been a "new book week" for us We got many new copies of supplementary readers We also got nine new story books Miss Irvine is going to read to us one of them called "Doctor Dolittle's Garden"

We have finished our colored chalk drawings of airplanes Some of them are on our bulletin board

In Georgraph the fifth graders are studying the Mountain States Edward Barz brought us a cactus which came from Colorado It is real prickly Junior has shown us some pictures of this region which were taken while he was on a trip through these states

The sixth grade Geography unit is on Australia We are making maps showing where things are found; like wheat, cattle, sheep, etc

Grades 7 and 8

Charles Bock—Reporter

Fourteen students have had perfect attendance this six weeks they are· Billy Grosshuesch, Eugene Haberkamp, Elwyn Jacobs, Dean Merkel, Caroline Schwartz, Edwin Tiggeman, Homer Blickenderfer, Garland Brinkman, Lorraine Buntenbach, Arlene Buseman, Melvin Coobs, Lucille Hartbeck, Ellen Kilgore, and Billy Zabilka.

Members of our room have been helping the juniors by selling tickets for their class play They are· Elwyn Jacobs, Dean Merkel Arlene Buseman, Billy Grosshuesch, Lorraine Buntenbach, and Robert Jahnke

The seventh grade English class has been writing friendly letters. They wrote to their former teacher, Mrs Norma Barz Voetberg They also wrote to Eugene Johnson and Betty Reed.

Basketball practice will begin sometime next week.

We have ten new books to add to our library Almost everyone is anxious to read them Betty Etchen is acting as our librarian

Billy Grosshuesch and Edwin Tiggeman are patrolmen for this week.

NO ONE EXEMPT

There are many who think that women and the youngsters are exempt from the law requiring a hunting license No one is exempt from the law requiring a hunting license No one is exempt, regardless of sex or age, except the owners or tenants of land and their children, who may hunt on their own land without a license.

The question often asked is whether both landowner and tenant may hunt on the same land without a license when the landowner does not live on the land. It has been held that when the owner leases his land to another, unless the hunting rights are specifically reserved, they pass to the tenant, and the owner must purchase a license should he desire to hunt on that land.

DAIRY PRODUCTION HINTS

Stalk fields make fair pasture for low producing or young stock following an early husking, according to Adam J Wilhelmi, Hancock County Cow Tester Fresh cows, however, should never be turned in corn stalks.

Start regular winter feeding when the cows freshen in the fall. At freshening time, feed a light, bulky, laxative feed.

Check up on the production of your cows and cull the low producers. Do not wait longer to make final arrangements for a bull. If you plan to use an old one, he should be in an exercise yard and fed on a ration that will put him in good condition for use.

All calves should be ear tagged so that their identity will not be lost.

Young calves can be dehorned very easily by clipping the hair around the horns and applying caustic potash.

Liberty Township

Mrs. Emil Beier called at the Richard Ax home Wednesday afternoon

Mr and Mrs. Francis Buseman from Waterloo spent from Sunday until Tuesday visiting at the Henry Buseman and John Velau homes

Mr. and Mrs James Trumbull of Mason City visited at the Harry Pringnitz home Thursday afternoon

Mr and Mrs. Lew Abele and family were dinner guests at the Fred Griffen home near Popejoy Sunday.

Mrs Richard Zwald of Garner visited at the Kenneth Zwald home Sunday

Mr and Mrs Emil Beier and Carl Reimer were dinner guests at the Albert Reimer home in Garner Sunday.

Mr and Mrs Gilbert Kropp visited at the Emil Beier home Sunday evening

Mrs. August Ridder is helping at the Ben Ridder home this week.

Mr and Mrs Albert Lange and family were diner guests at the Mrs D H Hammon home in Garner Sunday

Mrs Kenneth Zwald had the misfortune of falling Saturday evening and breaking her ankle

The W F M S will meet at the home of Mrs. Emil Beier next Wednesday afternoon, Nov 3rd

The election of Sunday School officers was held Sunday at Liberty Church Results are as follows Supt, Emil Blummer; Ass't. Supt, Lew Abele, Treasurer, Herman Gast; Sec, Billie Lemke; Ass't Secretaries, Glen Lange and Harold Abele: Pianist, Ruth Abele

The Kings Herald of Liberty Church wish to thank all who helped with their Bake Sale Saturday They made $17 00

HERE'S HOW

The best way to find a place to hunt is to ask permission of the landholder whether the land is posted or not Nine times out of ten, permission will be granted if you make yourself acquainted and chat a few minutes with him.

The epedemic of sleeping sickness now subsiding in Iowa leaves more than 10.000 dead horses behind and a loss estimated at considerably more than a million dollars. No definite report on the prevalance of the disease is available but estimates based on a survey of the state and partial reports from veterinarians and rendering plant managers indicate that probably 30,000 horses have been afflicted with the disease with at least 10,000 faalities.

The wise man gets his wisdom from those who have none.

ANOTHER "PICTURE PARADE"

IN THE not-so-dim-and-distant past the mask was accepted as a symbol of evil, the hiding of the face being regarded as sufficient proof that the owner of the face was a person bent on a guilty mission.

In this scientific age, however, the mask is in more general use than at any time in history. In sport, in industry, on the stage, in medicine, aviation and the beauty parlor, the mask has its important niche. Here we present a few pictorial examples submitted by expert cameramen throughout the United States and Europe.

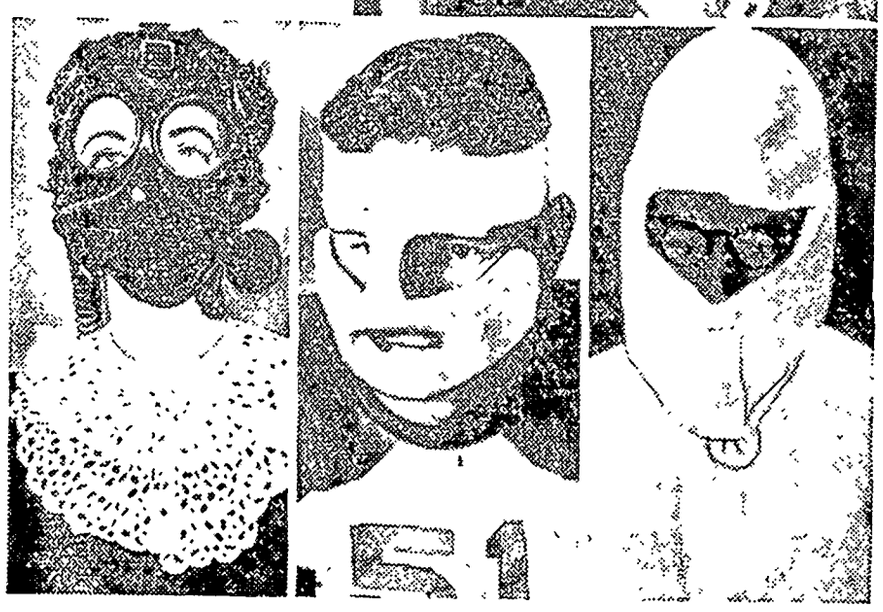
Once the court gallants of Elizabeth's time wore masks when they kept illicit love trysts. Statesmen, too, while engaged in intrigue, resorted to this camouflage. Today a steel worker wears a mask to protect him from the glare and super-heat of an oxy-acetylene torch.

Even animals wear masks in Europe to protect them from gas attacks in warfare.

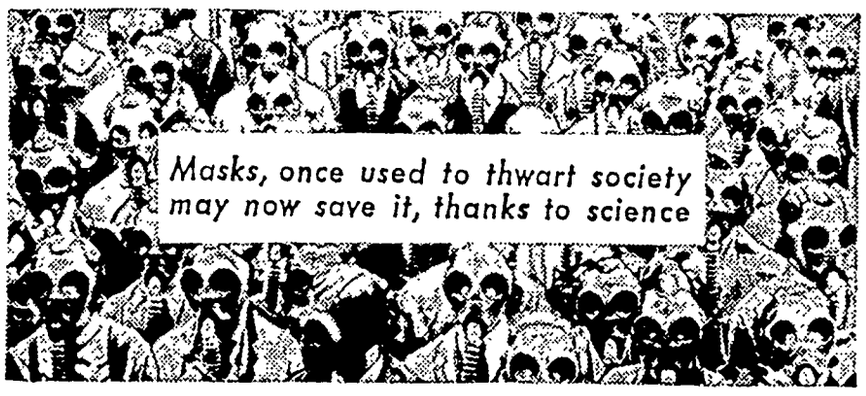
At left, a German dog with its mistress, and above, an American military horse.

Throughout history, the mask has been the symbol of the theater. In ancient Greece, all actors wore masks. Theatrical masks of pure gold have been found in the tombs of Egypt's princesses and pharaohs At the right is seen a Benda mask, used in the theater of the present day.

This mask is unusually mobile and, expertly used, appears extraordinarily lifelike.



Nowadays masks protect citizens from dust storms (left), guard football players against facial injuries (center) and protect surgeons and their patients from infection. Even hay fever sufferers can get almost complete relief by wearing masks which filter the irritating pollen from the air.



STAR DUST
Movie • Radio
★★★By VIRGINIA VALE★★★

WHILE all the important motion-picture producers were trying to interest Ronald Colman in big, serious dramas, he slipped over to the Hal Roach studio and agreed to star in a goofy comedy called "Fancy Free." No one else even suspected that Ronnie wanted to join the parade of serious players who have scored in light offerings.

His best friend, Bill Powell, is suspected of selling him the idea. Bill has such fun making comedies, and so do Myrna Loy and Carole Lombard, and the newest recruit, Constance Bennett. I would not be at all surprised if Constance were to play the lead opposite Colman.

—★—

Now that Bill Powell is wandering around Europe, Myrna Loy is going to stray over to the Twentieth Century-Fox studio to make a picture with Warner Baxter, her second-best leading man. The story is "Career in C Major," and is all about a woman with a not-so-good voice who is absolutely determined to get into grand opera. Her husband views the whole project with distaste, until he finds that his barber-shop chord baritone is just what the opera scouts have been looking for.

Warner Baxter

—★—

Just as soon as a radio performer makes an outstanding hit, the motion picture scouts grab him, so now it is Professor Quiz who is going to step before the camera. He and James Wallington, the ever-popular announcer, are going to be in Columbia Pictures' "Freshman Follies."

—★—

The tremendous popularity of "The Prisoner of Zenda" has revived interest in swashbuckling mythical kingdom romances, so Sam Goldwyn has decided it is high time to film "Graustark" again. It has been made twice before, but not in the gorgeous way that Sam will make it. He plans to have Merle Oberon play the beautiful princess and Gary Cooper the American newspaper man who rescues and marries her.

—★—

Since he subbed for Don Ameche on the Charlie-McCarthy-Nelson Eddy program, Herbert Marshall is the most-sought-after actor in Hollywood for radio programs. If any sponsor could persuade him and Claudette Colbert to appear regularly together, the program's popularity rating would be sure to start near the top. But just wait until you hear Brian Aherne's voice in the Warner Brother's picture, "The Great Garrick." He is going to give Mr. Marshall some competition.

—★—

Phil Spitalny is being ribbed by his friends, and all because he ran into difficulties while filming a Paramount short film featuring his Hour of Charm All-Girl orchestra. They all worked hard, finished the film on schedule and went home satisfied that they had done their best. But the studio called up next day to protest that a man's voice could be heard in the midst of the all-feminine chorus. Spitalny went to hear the sound-track played, pretty indignant that their work had been spoiled. Only to find that it was his own voice on the film.

—★—

Motion-picture fans who have been lamenting because so many of their Hollywood favorites have abandoned the screen for a fling on the stage can just stop worrying. So far the plays have not been good enough to hold the players for long. Sylvia Sidney, Henry Fonda, and Elissa Landi will probably be back at Hollywood at work in pictures before very long. But Frederic March, undismayed by their so-so success, is headed for New York with his wife to do a stage play.

Sylvia Sidney

—★—

ODDS AND ENDS—Walt Disney has finally vetoed the plan to put Mickey and Minnie Mouse on a weekly radio program. Can't spare the time to see that it is done right, and won't let his little darling Minnie and Mickey be directed by anyone else . . . Alice Faye did not like the dressing room Universal studio provided for her, so she got a moving van to bring her own dressing room bungalow over from the 20th Century-Fox lot . . . Olivia de Haviland has eliminated all the other candidates for the lead in "Robin Hood" opposite Errol Flynn. Each figures that the other brings luck to a picture . . . Paul Muni and his wife are on a six months' world cruise to the deep regret of all the companies who wanted him to take another picture right away.

Native Cargo Boats on the Whangpoo River.

River That Makes Shanghai China's Most Important Seaport

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

OF ALL the rivers streaking the map of China, only two, the Whangpoo and the Yangtze, have played important roles in the Sino-Japanese incident.

The Whangpoo, the river on whose banks Shanghai rises, played a double role in the tragedy of the embattled city. For Chinese and Japanese, the river and its adjacent mud flats were a heavily bombarded battlefield. For the occidentals marooned in Shanghai, the sluggish muddy stream was the nearest exit.

The Whangpoo river is usually the most anonymous stream in China Whenever Shanghai is spoken of as a seaport, the Whangpoo is being slighted, for this relatively little-known river actually makes possible the commercial importance of China's largest city.

The Whangpoo can truly be called the author of Shanghai's success story: from fishing village to world port in less than a century. Only native junks of Chinese fishermen sailed the Whangpoo and tied up at the walled village of Shanghai in 1842, when foreign trade was first permitted by treaty to enter, Since then, the muddy creek has borne sail and steam ships from all the seven seas, until the traffic has constructed a modern metropolis on the Whangpoo's mud flats.

Shanghai is two steps removed from the ocean. Vessels must travel into the broad yellow mouth of the Yangtze and turn to the left into its tributary, the Whangpoo, for 13 miles before reaching "seaport" Shanghai.

Constantly hanging over the river is the threat of silting up. Two million cubic yards of mud a year must be dredged to keep the channel open to a low-tide depth of 28 feet. A treacherous mud-bar lurks where the river empties into the Yangtze, and here some sea-going vessels transfer their cargo to lighters rather than cross the bar. Fifty years ago Shanghai was pitied as a doomed city, about to be cut off from foreign trade entirely by the menacing silt. Warships and ocean liners, however, still ride at anchor in Shanghai's harbor, keeping China's leading city among the world's ten busiest ports. Foreign shipping, without reckoning matting-winged sampans and heavy junks that swarm about the harbor, amounts annually to over 30 million tons.

Makes the City's Waterfront.

Beside the Whangpoo runs the world-famous Bund, crowded thoroughfare replete with foreign and local color. Clubs, banks, business houses, and consulates focus international interest along the waterfront. With approximately 60,000 foreigners of 50 different nationalities in Shanghai on business and pleasure, the Whangpoo bears a great responsibility as commercial entrance and safety exit.

Paralleling the river on the route from the Yangtze to the metropolis is the first railroad built in China. But it has not yet even challenged the supremacy of water transportation in linking the port with the sea.

Clipper ships moored in the Whangpoo, and restless to recruit a full crew by hook or crook and sail for home, brought a picturesque idiom into the English language: "to Shanghai."

The Yangtze, while neither the longest nor largest river in the world, is a Chinese combination of Mississippi, Colorado and Potomac. Like the Mississippi, it is the largest stream in the country; like the Colorado, it flows through the deepest gorges; and like the Potomac, it has the capital, Nanking, a city of historic associations.

Compared with the other great rivers of the world the 3,000-mile length of the Yangtze is exceeded by the Mississippi-Missouri, the Amazon and the Nile. In volume it ranks third, after the Amazon and Congo, but in one respect it leads all others: with its tributary rivers, lakes and canals it constitutes the inland water system most used by man as a carrier of commerce.

Vast Basin of the Yangtze.

The Yangtze drains in all some 770,000 square miles, an area equal to one quarter that of the United States. In its basin live 175,000,000 people, one-tenth of the population of the entire world. A broad, deep natural waterway for ships serves a teeming, civilized population, living on fertile, cultivated soil in a temperate climate. These people produce and exchange goods with the outside world. Little wonder that the Yangtze is considered of strategic as well as economic importance!

The Yangtze is more to China than any river could be to the United States. In a land of few railroads and almost no improved highways the Yangtze provides the only reliable route to the rich interior of China. The Hwang, or Yellow river, China's second largest stream, is too temperamental to be of high economic value. Its sudden floods and shifting channels have earned for it the nickname "China's Sorrow," whereas the Yangtze is "China's Joy." Yangtze floods, unlike that of last summer, are generally not destructive, and they cover the bottom lands with new, rich earth which more than compensates for flood damage.

Furthermore, on the broad bosom of the Yangtze, whose name means "Son of the Ocean," ocean steamers may ascend 640 miles to Hankow, second largest city of China. Here, in the midst of the central plains, is the distributing center, the New Orleans of the Yangtze basin. Smaller steamers can push on to Chungking; junks to Suifu; and rowboats to Batang, in eastern Yunnan province—a total distance of 1,500 miles from the Yellow sea.

Some see in the Yangtze, which follows a general west to east direction, the logical boundary between the north and south of China. Geographically, however, China is divided into three main sections, with the great Yangtze valley forming a middle state. The Yangtze basin is an entity, the people, flora and fauna being distinct from those to the north and to the south of it.

The Yangtze has several names among the Chinese, only the last few hundred miles being known as "Yangtze Kiang," kiang being one of the Chinese words for river. Some Chinese call the stream Ta Kiang, or Great River.

Rising in the mountains of Tibet, near the birthplaces of three other mighty Asiatic rivers—the Yellow, the Mekong, and the Salwin—the Yangtze carves a way through tall mountain ranges, forming some of the deepest river canyons in the world. In one place the Yangtze gorge is 13,000 feet deeep.

Through the middle plains the Yangtze drains some of the richest and oldest farming lands in the world. Here are many shallow lakes, which absorb the spring thaws and act as feeding reservoirs in the dry season, and fields of tea, rice and wheat. Mineral deposits and ironworks around Hankow, which is really three cities in one, suggest a comparison between this section of the Yangtze and Pennsylvania's Monongahela.

Delta Densely Populated.

In the lower Yangtze delta the countrysides are only a few feet above sea level. The Delta has millions of inhabitants to whom land is so valuable that not a single square foot can be wasted. Numerous canals, natural and man-made, make this region a Holland of the East. The canals serve as safety valves in time of flood, and also carry nearly all the traffic of this part of China. Thousands of Chinese, loath to waste even a foot of precious land on a dwelling, are born, live and die on houseboats, going ashore only to till their little farms or to market their produce.

Each year the mighty Yangtze empties into the Yellow sea some 6,428,000,000 cubic feet of earth in the form of silt, slightly more than the amount excavated to build the Panama canal! If straightened out on the map of the United States the Yangtze would measure from San Francisco to Cape Cod.

Throughout its lower, navigable stretches an unending pageant of steamers, barges, junks and sampans constantly passes. Rafts of logs, with miniature villages on top, drift down with the current. Often these floating homes are partly covered with earth, on which vegetables grow, and pigs and chickens wander at will.

Shanghai once was directly on the Yangtze but the channel shifted and the city now lies twelve miles from the mouth of the great stream, on the tidal Whangpoo.

© Western Newspaper Union.

Lesson for October 31

THE MORAL ISSUE IN THE DRINK PROBLEM

LESSON TEXT—Romans 13:12-14; I Corinthians 6:9-11; Galatians 5:16-24

GOLDEN TEXT—Walk in the Spirit, and ye shall not fulfil the lust of the flesh.—Galatians 5:16.

PRIMARY TOPIC—My Neighbors.

JUNIOR TOPIC—The Greatest Law.

INTERMEDIATE AND SENIOR TOPIC—Why Is it Wrong to Drink Alcoholic Beverages?

YOUNG PEOPLE AND ADULT TOPIC—The Moral Issue in the Drink Problem.

The title for our lesson is well-chosen—"The Moral Issue in the Drink Problem."

First, let it be clear that there is an issue Those who have business, social, or political connections with the liquor traffic would like to have us believe that the repeal of prohibition settled the matter once for all. But let us be sure of this fact—the liquor problem is at our very door, and it must be met.

In the second place, many would have us think that the matter of drunkenness is a social, political, or even a physical problem, without any moral implications whatever But those who are informed know that even the supposedly innocent beer is inextricably tied up with vice and crime. A prisoner in a federal penitentiary writing before prohibition was repealed said, "Criminals hail with delight . . . the return of liquor via the beer route and the greater license that the return of the saloon will inevitably bring. With the return of beer will come open prostitution and gambling." His words were true.

I. Drunkenness Is a Work of Darkness (Rom. 13:12-14).

Just as there are darkness and daylight in the physical universe, so there are two contrasting spiritual realms, of darkness and light.

Men "loved darkness rather than light because their deeds were evil," according to the Lord Jesus. (See John 3:19) This spiritual realm of darkness is directed by "rulers of the darkness of this world" (Eph. 6:12), and their purpose is "spiritual wickedness." With the "works of darkness" the believer is to "have no fellowship" (Eph. 5:11), but is to "reprove them" and bring them into the light where their true nature is made manifest (Eph. 5:13).

"God is light, and in him is no darkness at all," and those who have fellowship with him "walk in the light." (See I John 1:5-7.)

Drunkenness is a work of darkness. It separates man from God and makes him fear the glorious light of his countenance. The solution for that awful condition is revealed in v. 14. "Put ye on the Lord Jesus Christ."

II. Drunkenness Is a Work of Unrighteousness (I Cor. 6:9-11).

No drunkard "shall inherit the kingdom of God" (v. 10), and the man who takes his first drink has put his foot on the path that leads to the drunkard's grave. Of course no man plans to go that far, but the fact is that such is the tragic conclusion for hundreds of thousands of men and women—damned for time and eternity by drink.

Again in this passage we have the answer to our problem. Not reformation, not education, not culture (desirable and useful though we recognize these things to be), but being "washed," "sanctified," and "justified" in "the name of the Lord Jesus and in the Spirit of God." Try that on your town drunkard. Thank God, it works!

III. Drunkenness Is a Work of the Flesh (Gal. 5:16-24).

The flesh—that is our bodies ruled over by self-will as opposed to God's will—is revealed in the Scriptures to be thoroughly bad, and in opposition to God. Consider the appalling list of the works of the flesh in verses 19 and 20. And note that in the midst of them stands drunkenness.

It is the lowest in man that responds to intoxicants. Little wonder that the Brewers' Journal came out right after the election of 1932 with the statement that "not one tenth of one-per cent of American youths know the taste of real beer We must educate them." In other words the normal taste of an intelligent person would revolt at the stuff, but once give it a chance to stir the lusts of "the flesh" and the victim is caught.

Once again, note the antidote—live in the power of the Holy Spirit, and the flesh with its lusts is crucified (v 24). How shall we have the Holy Spirit and his power in our lives? By taking the Lord Jesus Christ as personal Saviour.

Words Without Action

Few men suspect how much mere talk fritters away spiritual energy—that which should be spent in action, spends itself in words.

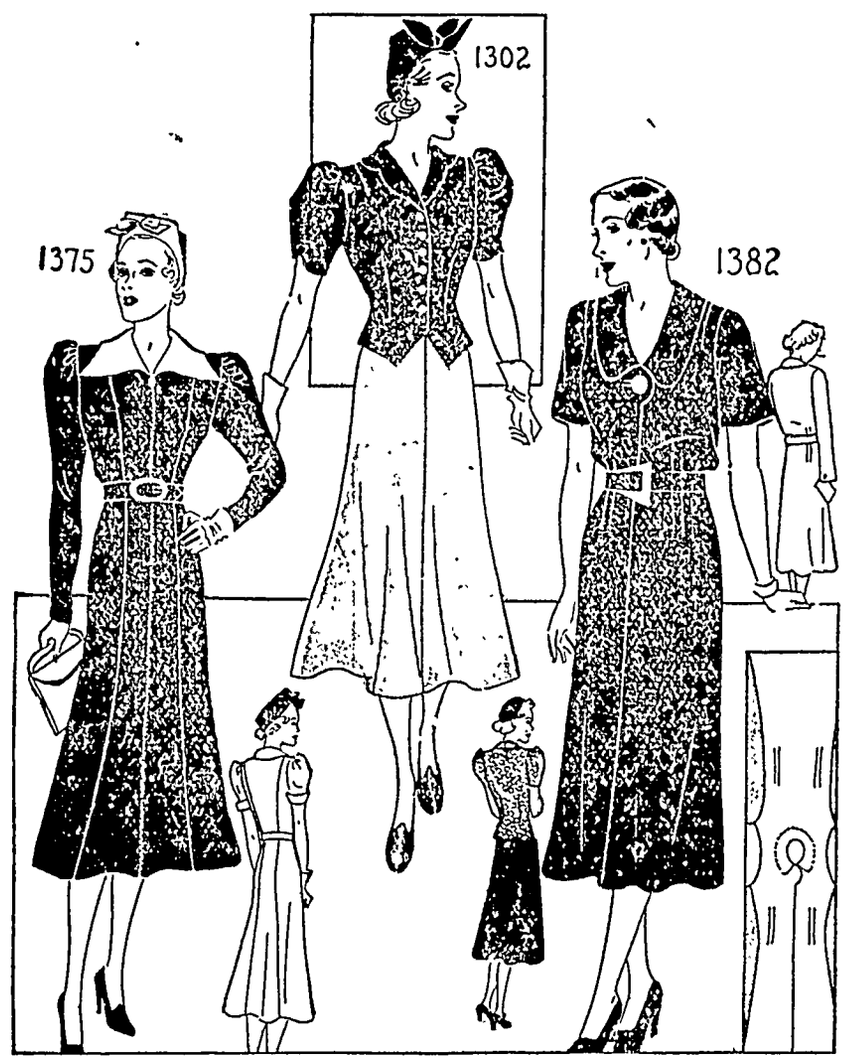
Killing Time

People partial to this crime of killing time might be pardoned if they'll only kill their own.

Kindness

Kindness is a language the dumb can speak, and the deaf can hear and understand.—Bovee.

Wool Is Going Places



LADY, lady, lady have you anything in wool? Smart women everywhere are clamoring for wool. They're wearing it to work in, to play in, to date in, to go to church in. Yes, wool is going places! Sew-Your-Own is here with three ultra-smooth new models for you to choose from.

Needs Slim Lines.

That "something in wool" might well and easily be the handsome model at the left above. Especially does a weightier fabric need slim lines and here you have them pared down to hairline precision. The zipper from throat to hemline gives this frock additional chic, and the far-reaching collar takes care of that all-important need for contrast. French wine, black, duck green, and gendarme blue are the popular colors.

Compliment to Youth.

Youth and the blouse 'n' skirt have always gone sporting together. That's a compliment to youth and real flattery for the two-piecer above, center. This engaging combination has a waist-coatish topper and a simply cut, flaring skirt. A singular asset is its size range: 14 to 42. And because it is figure flattering every size is benefited. Acetate crepe is lovely for the blouse; velvet or thin wool is smart for the skirt.

For a Busy Body.

If you're a busy body or a lady of legion labors, you'll thank Sew-Your-Own for the charming new frock at the right. Now is the time to cut two versions: one in gingham for housework, another as your "something in wool" in the long sleeve style for all occasions.

The Patterns.

Pattern 1375 is designed for sizes 12 to 20 (30 to 40 bust). Size 14 requires 2½ yards of 54-inch material. With short sleeves, 3½ yards of 39-inch material. Collar and cuffs in contrast take five-eighths of a yard.

Pattern 1302 is designed for sizes 14 to 20 (32 to 42 bust). Size 16 requires 4⅜ yards of 39-inch material.

Pattern 1382 is designed for sizes 34 to 48. Size 36 requires 2½ yards of 54-inch material with long sleeves; 3¾ yards of 39-inch material with short sleeves.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Drive, Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Send 15 cents for the Barbara Bell Fall and Winter Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns.

MANY LETTERS

Addressed to You Personally

THINK of the advertisements in this paper as so many letters addressed to you personally. That's what they're intended to be, and, actually, that's what they are. This newspaper is, in effect, a mail-bag which brings you news of events and news of the best merchandise at the fairest prices.

You don't throw away letters unread. You don't read three or four letters carefully and skim through the rest. Treat the "merchandise letters" in this newspaper the same way. Read them all. Read them carefully. One single item will often repay you for the time it has taken to read them all.

Many good housekeepers have formed the habit of reading their newspaper with a pencil and paper, ready to jot down the articles they wish to look at when they start out on their shopping tour. Try this method. It saves time, and saves money, and provides you with the pick of the day's merchandise.

EVERY ADVERTISEMENT HAS A MESSAGE ALL ITS OWN

SCHICK SHAVER $15

NO BLADES— LATHER— BRUSH— LOTIONS

How long to shave?

Experienced users of Schick Shavers find that the average time for a shave is from three-and-a-half to eight minutes. But the *time* is nothing compared to the joy of shaving in perfect comfort.

You cannot cut or scrape yourself with a Schick for it has no blades. You do not use water, soap, brush, creams or lotions. Toughest beards and tenderest skins are shaved quickly and closely.

There is no more economical way to shave. The Schick pays for itself. Customers have had as many as 2000 shaves from a Schick in five years shaving every day and twice on Saturday and Sunday. Come in and let us demonstrate one to you.

Established 1892

Announcing the **"70"** *of '38*

***Thirty-six years ago*—Hart-Parr, now the Tractor Division of Oliver, founded the tractor industry—coined the word "tractor." *Two years ago*—the Oliver Row Crop "70" appeared as a new tractor—new in its 6-cylinder power—new in its use of automotive advances—new in its streamlined appearance. The "70" was more than a new tractor; it was then, as the "70" of 1938 is today—a new idea—a host of new ideas in farm power.**

TWO YEARS of unremitting research, two years of field work, two years of constant improvement passed. "70's", by the tens of thousands, in the hands of America's farmers, enabled one man to do more work, more easily, than one man ever did before.

TODAY, there flashes across the land the "70" of '38, a handsomer, smoother tractor than any ever built before. Its Six-Cylinder Engine pours constant overlapping power to the Tip Toe Wheels, smoothly, quietly, efficiently. The "70" HC is powered by a high compression engine for gasoline—the "70" KD is powered by a different engine for kerosene or distillate.

The "70" makes modern use of modern motor fuels.

OLIVER KNOWS, as every automotive engineer knows, that any one engine can only get average performance from both high and low grades of fuel, and fails to get full power from either.

SEE THE OLIVER "70", the tractor that has everything: 6-cylinder power, self-starter, engine operated implement power lift, electric lights, Tip Toe Wheels, mounted tools in plain sight—everything that enables one man to do more work, more easily than before.

DRIVE THE OLIVER "70", the tractor that does everything. From the comfort of its spring-and-hammock seat you plow, bust, disc, plant or cultivate more acres, more easily than one man ever did before.

See an OLIVER "70" Before You Buy

Drive the "70"—Inquire—Test—Compare. We'll be glad to demonstrate. Come in today and make us prove that the "70" of 1938 is the finest farm power in the field today.

E. F. JACOBS BOUGHT OUT HARDWARE STORE IN 1919

Business Was Started By Henry And Charlie Gruetzmacher In 1889

Ed Jacobs came over from Garner in 1919 and purchased the hardware store and business here from George and John Gruetzmacher on August 14th and the new firm became Jacobs & Son Hardware The old business was known as the Gruetzmacher Bros Hardware store The business was started forty-eight years ago, in 1889 by Henry and Charlie Gruetzmacher These men conducted the business for several years and then sold out to their brothers, George and John After two years Ed bought his father's interest and has since conducted the srore as the E. F Jacobs Hardware

Mr. Jacobs, the present proprietor, was raised on a farm near Maqoketa, Iowa and moved to Garner with his parents Mr and Mrs Chris Jacobs, in 1913 After completing his schooling, Mr Jacobs took a position at the Viken Hardware Store where he worked for three years He then was employed by the Famers Co-Operative Society for a year, resigning his position in 1918 to join the army and served during the World War in the Motor Transportation Corps and was stationed in Texas and New Mexico. After the war he worked for the Greimann Ditcher Co at Garner

After coming to Klemme, Mr Jacobs began to expand the business by putting in a most complete line of hardware for both home and farm and the business grew each year as he reached further out into new territory, carrying items that especially appealed to farm trade

In 1928 the business had grown to such proportions that it became necessary to build a warehouse in which to store stock that could not be carried in the store This new building was constructed of hollow building block and is 40 x 48 feet in size

Again in 1931 it was necessary to remodel the store by converting the tin shop and a storage room into store space This remodeling gave the store a 48 foot front and ample space for the many lines carried.

Early on the morning of March 14, 1937, fire destroyed the entire hardware store building and much of the stock However, Mr. Jacobs was open for business in a few days and conducted the business at hi warehouse, which had hurriedly been converted into a temporary store

In a few weeks he began making plans for a new building and the present fine building is from his own plans. Blue prints were made from his drawings and the Iowa Retail Hardware Association helped him plan the modern interior arrangement

Mr Jacobs has been greatly handicapped the past year and underwent a serious operation last December However, he has an energetic nature, made the best of the situation and came out on top and went into business with more determination than ever Ed has always been a good booster for the town and the whole community

Ed never believed much in radical changes and so the first wholesale companies he started doing business with, are still receiving orders for stock Mr Jacobs wants to thank the following firms and their salesmen for the interest they have shown in his business during the past eighteen years, and we list here a few of the principal firms with whom he does business

Cutler Hdw Co. Waterloo; Crane Co. Mason City, Farwell, Ozmun Kirk Co, St Paul; Jenny, Semple Hill, Minneapolis, Lowe Bros Co., Chicago, Boyt Harness Co, Des Moines, DeLaval Separator Co. Chicago, Klauer Mfg Co., Dubuque, Majestic Mfg Co, St Louis, Perfection Stove Co, St Paul, Pittsburg Plate Glass Co Des Moines, Premier Furnace Co, Dowagiac, Mich, Quick Furnace Co., Des Moines, Westinghouse Electric Co. Des Moines; John H Witte & Sons, Burlington; Dexter Washer Co Fairfield, Ia; Harper, McIntire Cedar Rapids

Mr Jacobs' principal helper in the business for many years is Levi Klotzbach, who has been with Ed since he bought the business. Mr Klotzbach worked for the Gruetzmacher Bros several years He is in charge of the tin shop, furnace and stove repairing and furnace installation. Mr Klotzbach is an expert tinner and furnace man and is kept busy most of the time at this kind of work

Melvin Neuberger, who assists Ed in much of the detail work of the store and waiting on trade, has been with him for seven years

Cecil Bridges has been working at the Jacobs Store now for the past two years as clerk and general helper where needed

MY NEIGHBORS

It seems just a few years ago that two young men started in business across the street from my store, one a Butcher and the other a Hardware Merchant

It takes a lot of hard work to learn the ins and outs of a Merchantile business One must study the merchandise available on the market in order to assemble the best lines in his store One must watch the collection and credit end of a business so as to preserve the balance necessary to carry through good times and bad times and one must study the customer's needs so that the customer will be well served and will come again and again

I have watched these neighbors of mine grow up Both these men are married and have interesting families This helps to make a man steady and unselfish, very necessary qualities for a merchant

I refer to C A Larsen, the Butcher and Food Merchant, and to E F Jacobs, the Hardware Merchant.

I am very glad it was possible for these men to build new store buildings after the fire We need these strong, active young men in our community and hope that they will live long and continue to prosper

ARTHUR WELLEMEYER

U Delt Em Bridge Club Met

The members of the U Delt Em Bridge club met at the home of Mrs Earl Schaeffer Thursday afternoon It being the last meeting Mrs Raney would be a member of the club she was presented with a gift from the members. Mrs A. H Dulmes won high prize and a lovely lunch was served by the hostess. In the evening all the members with their husbands gathered at the Schaeffer home as a farewell for Dr. and Mrs H. H. Raney. Bridge was played at six tables. Mr and Mrs C. G. Waterman won the high couple prize and Dr and Mrs. Raney were presented with a gift from the committee who served as hostesses for the evening, being Dr. and Mrs. Schaeffer, Dr and Mrs. Dulmes, Mr. and Mrs Art Kudje and Mr. and Mrs. A. L. Kingery.

Mr and Mrs. Theodore Wright of Belmond were guests at the Sumner Trumbull home Sunday.

WE ARE SORRY!

On account of the large amount of advertising this week we were forced to leave out a lot of news The Times this week is printing 2,370 copies which are being mailed out to farmers in the territory surrounding Klemme If you like this copy of the paper drop in Saturday and subscribe. . . we will still let you have a year for a dollar.

E. F. Jacobs And C. A. Larsen To Open New Stores Saturday, Nov. 6

ART SCHULTZ DIES OF WOUNDS RECEIVED IN AUTOMOBILE CRASH

Was Rural Mail Carrier At Garner For Past Twelve Years

Arthur Schultz, rural mail carrier from Garner, who was injured in an accident near that city a week ago last Saturday night died in a Mason City hospital Saturday morning as a result of injuries received in the wreck.

Mr Schultz was born March 28, 1897, in Garner He was a past commander of the Garner post of the American Legion, having served in Company 32 at Camp Grant during the World War. For the last 12 years he acted as rural mail carrier on a route southwest of Garner

He is survived by his wife and an adopted son, Jackie, one year old, his mother, Mrs Carstens of Mason City, a brother, Walter Schultz of Minneapolis, and three sisters, Mrs James Manuel of Mason City, Mrs Henry Greimann of near Garner and Mrs. Rose Lyons of Denver

FUNERAL SERVICES HELD FOR LUTHER TANNER LAST SUNDAY

Luther Tanner, young Liberty township farmer who lived on the farm with his mother, Mrs. Rose Tanner, died last Thursday morning from a self-inflicted rifle wound from a 25-20 cartridge which pierced his heart

Funeral services were conducted Sunday afternoon at the Tanner home and the sermon was given by the Rev Wm Zabilka, pastor of the Klemme, Methodist Church.

Obituary

Luther Irving Tanner was born January 18, 1909 and died October 28, 1937 Age 28 years, 9 months and 10 days He lived his entire life on the home place.

He attended his home country school until he completed the grades. Then he attended the Klemme High School from which he graduated in 1927 He was interested in School atheletics and played on the high school baseball and basketball teams For the last few years he has been playing baseball with the Garner Red Sox and basketball with the Klemme Vagabonds.

He was made a life member of the Kings Herald of the Liberty Church when a boy and united with the Church on Confession of his faith in Christ April 12, 1925.

While his untimely death was a shock not only to his own loved ones, but to the entire community, yet the disease germ had worked its way deeper into his life than anyone had dreamed of Our sympathies, as well as those of the entire community and all who knew Luther, or "Mike" as he was better known among his friends, go to the grief stricken family

Those who survive him are, his mother, Mrs Rose Tanner; his brother, Robert; three sisters, Florence at home, Bernice who is teaching school at Madrid, and Francis who has a position in Chicago.

NEW BRICK BUILDING PLANNED AS MODERN HARDWARE STORE

Arrangement, Fixtures, Lighting For The Convenience Of Customers

The E. F Jacobs Hardware Store, which will have a formal opening on Saturday is one of the finest hardware stores in North Iowa

The building is 48 feet wide and 88 feet long, the walls are constructed of hollow building block and the front is built of selected Redfield brick. In order to give a clear floor space in the store, a self-supporting type roof was used, constructed of oval truss steel The store front is divided into three sections, using two entrances. The plate glass front was installed by the Pittsburg Plate Glass Co. and the window frames are of stainless white metal

The interior of the store is well arranged and consists of a large room for display, an office room at the rear, and a room at the rear for unpacking merchandise This room also accomodates a work bench for small repair work

The entire main store floor is finished in a special design Insulite Wall with a light tile effect ceiling, giving the store plenty of light in all parts of the room

In the basement is the tin shop and repair department where various machines have been installed for tinwork and repairing Here also will be carried surplus stocks and shelves will be built to accomodate the stock in storage

The heating plant is located in the basement and is a large Premier furnace, using a forced hot air circulation and is automatically controlled and the coal is fed by a stoker

The store fixtures on the main floor are all of the latest type wall display shelves and cabinets, and the table style of display is used on the floor The fixtures were manufacteured in Duluth and purchased through the Retail Hardware Association

Mr Kammeier, of Mason City a representative of the Association, assisted in arranging the store and putting the new stock on display.

The new bolt racks, belt rack, glass rack, and tool rack were all designed by Mr Jacobs and built in Klemme.

Material for the new building was all purchased from the Northern Lumber Co who supplied the brick, block, steel, cement Insulite, lumber, washed sand and gravel and other material.

John Suckow, local contractor erected the building and the workmanship is high class and is very pleasing to Mr. Jacobs

Electric wiring and fixtures were installed by C J Papousek of Belmond. The store is one of the best lighted stores in North Iowa and the indirect lighting gives the appearance of daylight and adds to the comfort of the shopper.

IT WILL PAY YOU TO DRIVE MILES TO BE IN KLEMME SATURDAY

Only A Few Of The Many Bargains Are Listed In The Ads

Saturday, November 6th is Klemme's Big Bargain Day at which time the E. F Jacobs Hardware and the Klemme Food Market will formally open their new places of business for the inspection of the public

Bargains All Over Town

Every place of business in Klemme is featuring specials for the big day and it will pay you to come here and see what Klemme merchants offer you. Nowhere in North Iowa will you find newer merchandise than in the Klemme stores

Many specials are listed in the ads in The Times this week, but because of lack of space, many specials could not be quoted. Come in early and stay late.

Free Gifts Given Away

The Times estimates that approximately $500 worth of merchandise will be given away by various merchants. Details may be obtained at the various places of business where free gifts are on display

NO SHOOTING OF PHEASANTS THIS YEAR

DES MOINES—The conservation commission Friday gave Iowa pheasants another year's breathing spell from hunters by voting a closed season on the species.

M L. Hutton, conservation director, said the commission found pheasant "conditions at variance with the time when the law was passed"

The commission also voted a closed season on Hungarian partridges but ordered an open season on quail in 12 southern Iowa counties.

Included Saving Clause

The last legislature passed in its revision of the conservation laws listed an open pheasant season for nov 12 to 14 inclusive for 40 Iowa counties. The revision, however, included a saving clause by which the conservation commission was authorized to change the opened terriories or order a closed season altogether if it deemed the population of the pheasant and quail to be so low that there were no shootable surpluses of birds

Open Quail Counties

The open quail counties are Lucas, Appanoose, Monroe, Wapello, Davis, Van Buren, Jefferson, Henry, Lee, Des Moines, Louisa and Muscatine.

The quail season opened Monday and lasts the entire month of November.

Klemme Ministers And Wives To Attend Anniversary Celebration

Rev and Mrs. Wm. Huenemann and Rev. and Mrs Calvin Grosshuesch will take part in a service at West Concord, Minn. in honor of Rev. and Mrs. E. H. Vernholt who have served the congregation there for 40 years. Rve. Vernholt is the former pastor of both Rev. Grosshuesch's former home congregation at Plymouth, Wis., and Rev. Huenemann's home congregation at Waukon, Iowa.

Entertained At Bridge

Mr and Mrs. Ed. Jacobs and Mr. and Mrs. George Lawhorn entertained at five tables of bridge at the George Lawhorn home Sunday evening. Mr adn Mrs. Art Kudje were high couple, and Wm. Kirkwood won the door prize. Mr. and Mrs. Hod Lawhorn of Garner were out of town guests. Lunch was served.

REDFIELD PRODUCTS USED IN THE CONSTRUCTION OF JACOBS' BUILDING

Company Also Specializes In Materials For Use In Farm Buildings

The face bricks and hollow building blocks which were used in the construction of the Jacobs Hardware Store building were manufactured by the Redfield Brick and Tile Co. of Redfield, Iowa, a company which has been in business for a long time and is noted throughout the Middle West for the very high quality clay products which they turn out.

The plant is owned by people at Redfield and both the management and the employees take considerable pride in manufacturing the best in clay products

Have A Variety Of Products

Redfield products are used in construction of beautiful but economical and permanent barns beautiful homes, warm and healthful chicken and hog houses machine sheds, corn cribs, silos, garages, in fact their tile are adaptable to most any kind of farm building construction.

Have Patented Tile Beam

The company also manufactures the patented tile beam floor recently designed at Ames to reduce fire hazards on farms. They manufacture a complete line of drain tile from the small 3 inch to the large 12 inch tile.

Their common brick are manufactured both with holes and without holes, the latter solid ones being used principally in walls where maximum coverage is permitted with the minimum of expense.

The entire line of products manufactured by the Redfield Brick and Tile Co may be obtained at the Northern Lumber Co in Klemme, who supplied the building material for the fine new Jacobs Hardware Store building, one of the finest in North Iowa

rsen's Locker System One Of The Best Cold Storage Plants In Iowa

ERATED LOCKER LANT OPEN IN KLEMME

ncement of the opening Klemme's modern cold locker plant has just been Mr C. A. Larsen, pro- of the Klemme Food Mar the new Locker System nt will accomodate several individual lockers for age. 165 of which are now and ready for use Mod- ck freezing methods are d which enables the pat- e plant to preserve meats, vegetables in fresh frozen condition in all their original flavor as long as desired and to enjoy them at any time or season of the year

The lockers, Mr Larsen explains, are large sanitary steel compartments arranged in much the same way as a safety deposit box in a bank vault A customer rents a locker to which he is given a private key, and to which he has access at all times The room in which the lockers are kept is held at a constant temperature of fifteen degrees above zero providing for the storing of "quick frozen" fresh meats fresh vegetables or other perishable food products for each family who either raises their own meat or purchases it where they choose, keeping it months if necessary

Mr Larsen states that a custom butcher service is also provided to cut up the meat for locker patrons or do butchering for farmers who do not wish to do so themselves Various temperature rooms are provided for the proper processing of the meat and other food products One room is held at a temperature of 34 degrees in which the meat will first be properly chilled and aged It is then cut up into steaks roasts, chops, etc wrapped in parchment paper and marked as to the contents of each package

The meat then goes to the "Quick-freezer" where it is rapidly frozen at a temperature below zero This quick freezing process is different from odinary slow freezing in that it causes the ice particles to form small so small in fact that it does not burst the cell tissues as slow freezing would the result is that all the natural food flavors and juices are retained and this process is one of the principal reasons why these refrigerated locker systems are so well patronized wherever they are installed From the quick freezer foods are removed and transferred to the customer's locker to which he has access at all times

The locker idea was originally designed for the farmer who butchers his ow meat. It makes it possible for him to butcher during the summer as well as in the winter, and it saves the bother of having to can or cure the meat. City people also found they cold use these lockers by purchasing their meat by the half or by the quarter and thereby effect a big saving on their meat bills The discovery of the benefits of "quick freezing" have still further increased their usefullness for it makes it possible to enjoy fresh strawberries, peas roasting ears and other fresh foods for Chistmas dinner.

Mr Larsen explains that the building has been heavily insulated with corkboard up to 8 inches in thickness and that the latest York refrigerating machinery has been installed by the Amana Society Amana, Iowa. who are distributers of York air conditioning and refrigerating equipment

The lockers, made by the Midwest Metal Stamping Co. of Kellog, Iowa are quite as attractive a place in which to store food as a modern household refrigerator and have every modern sanitary feature

Starting some seven or more years ago in Oregon, the idea of storing farm killed meats and farm grown vegetables has become a popular one In Iowa there are over two hundred plants with an average of over 300 lockers each, making the service available to at least 60 000 patrons The idea is also spreading rapidly in Wisconsin, Illinois and many other states

The Times wishes to congratulate Mr Larsen in bringing this service to the community for such an industry will not only hold business which rightly belongs in this trade territory but will undoubtedly bring new customers to Klemme who are at present going elsewhere, for it has been proven that those who rent lockers visit the town on an average of twice a week The addition of this service should be a fine thing for Klemme

Poison bait prpared with red squill is recommended by Iowa State College for control of rats not only because it kills the animals but because it is relatively harmless to humans and domestic animals.

Good Material Pays

You wouldn't build a house of tar paper because it Wouldn't last.

You can't have good Concrete work with Sand and Gravel hauled from a pit or sand bank because it won't last.

The best construction Money you spend is for the foundation of your building. Use sand and gravel washed clean of clay, dirt, shale, and soft stone and your cement work will be permanent Our material delivered to your site will give you more dollar value than any other item in your building cost.

You Can Order Our Products Through Your Local Lumber Dealer

KLEMME LOCAL NEWS

Friday of this week there will not be any school as the Klemme teachers will go to Des Moines for teachers meeting.

Mrs Ed Buntenbach and Mrs. Sumner Trumbull have issued invitations for a one o'clock bridge luncheon for Wednesday afternoon at the Buntenbach home.

Mr and Mrs Emory Weaver of Garner are the parents of a fine baby boy born Tuesday, October 26th, at the Mercy hospital in Mason City

R N A members gave away their very pretty quilt at Thada's store Saturday evening. Mrs. Allie White of Goodell was the lucky winner

Ben Reemstma of Ventura was in Klemme Thursday He has purchased the Lawhorn acerage just north of Garner and will move there in the spring

Mr and Mrs. Donald Nissen of Sioux City came Thurday and visited until Sunday afternoon at the John Day home.

Mrs Mary Much and Ada stopped on their way home from Spencer Friday at the A H. Dulmes home Mrs A H Dulmes and Dick went home with them and stayed until Saturday afternoon

Mrs Paul Grange and Dorance and Mrs P M Wilson were at Mason City Wednesday on business

THE PEDDLER

One day last week I rode the Rocket train to Minneapolis, where I went to buy gift items such as Pictures, Mirrors, Lamps, Small Rugs, Tables, Etc, suitable for Christmas Gifts.

A young man got on the train at Mason City and took the seat beside me, and he sure was disgusted with North Iowa He belonged to a gang of House-to-House Peddlers His Boss, the brains of the peddling gang, lived in Chicago The Boss watches the papers to see where business is best and sends his men to sell where the Farmers are most prosperous Just now the most prosperous part of the U S is a streten along the Mississippi river, which extends from Canada to Texas.

My Companion on the train was the 'scout," sent out by the boss to try out the farmers and see where it was easy to sell Then the boss sends out the rest of the gang into the territory and they "clean up" The scout, however, did not like North Iowa and moved on to Minnesota

Every few years, when conditions are exceptionally good in Iowa a flock of Houst-to-House Peddlers will arrive like a swarm of bees to gather honey Sewing machines, Vacuum Sweepers, Oriental Rugs, Framed Pictures, etc are all sold at double price

One well-to-do farmer was sure disgusted after he paid $135 00 cash money together with his old machine for a new Treadle Sewing Machine He did not realize that Wellemeyer sells splendid Sewing Machines for less money The new Howard, $25 00; the new Ruby, $39.00 to $45 00, and the high grade new Home Machine for $55.00 to $65.00

Several ladies are "tearing their hair" because a smooth peddler sold them a nice non-electric vacuum sweeper for $44 50 each, while Wellemeyer handles the same line at $19.00 each.

With electric vacuum sweepers the story is the same, the peddler gets $75 00 to $85 00, while Wellemeyer sells splendid Electric Sweepers in different grades $25 00 to $39 00

The oriental rugs sold by the peddler can always be bought at Wellemeyer's for half price

Visit Wellemeyer's store often so that you will know our prices before the smooth talking peddler comes

SEE AMERICA'S NEWEST TRACTOR "70"

THE OLIVER ROW CROP

Deciding on power is important business for the modern farm. So before you buy any tractor, or even a team, see and drive the Row Crop "70". Inquire, test, compare. Two years ago tho "70" first appeared—new in its 6 cylinders, its automotive advances, its streamlines. More than a new tractor, the "70" was then as the "70" is today, a new idea in farm power.

IT HAS EVERYTHING

Smooth 6-cylinder Power flows to Oliver Tip Toe Wheels under Finger-Tip Control.

4 Speeds Forward:
2.44, 3.32, 4.33 and 5.88 m.p.h.

Central Tool Mounting—
Planters and Cultivators Work in Plain Sight in Front of Operator.

Real Driver Comfort—
Easy-Riding Seat,
Automotive Steering

Modern Tractor Engines
for High Compression "70" HC — or Low Grade Fuel "70" KD

High Compression for Gasoline — For Kerosene or Distillate

With or Without:
Self-Starter, Implement Power Lift, Rubber Tires, Electric Lights, Power Take-Off.

The "70" Enables One Man To Do More Work More Easily Than Before

IT DOES EVERYTHING

Plows with 2 Big Bases or 4 Discs at 3.32 and 4.33 m.p.h.

Lists and Busts with 2 or 3 Bases Mounted on Strong, Rigid Beams.

Plants with Check Row, Runner, Sweep or Lister Planters; Center-Mounted.

Cultivates with Corn, Cotton, Beet, Bean, Vegetable Disc, Skip-Row or Tool Bar Cultivators; Floating Gangs.

Mows with Mounted or Drawn Mower.

Runs 6-Foot Combine, 2-Row Corn Picker; Other Power Take-Off Work.

Drives 22x36 Thresher or Handles Other Belt Jobs of Equal Size.

The "70" Does All Jobs Better Than Any Tractor Built Before

IT'S A BEAUTY IN LOOKS AND PERFORMANCE

See and Drive the Oliver "70" before you buy—Inquire—Test—Compare. Drop in and let us show you the newest and finest farm power in the field. You be the judge.

•

Congratulations to E. F. JACOBS and C. A. LARSEN

We want to congratulate these progressive business men on the opening of their fine new buildings Saturday, Nov. 6th. They have shown that they believe in the future welfare of Klemme and this fine community, and have backed up their belief with dollars and cents.

Let's all co-operate with them in making this the best community in all North Iowa. Without co-operation we cannot progress, so let's all pull together for the best interests of all.

We are operating for the best interests of the dairymen and the upbuilding of our community. We appreciate the support we have been given during the past years by the farmers in this territory.

The Klemme Food Market's New Modern

Cold Storage Locker System

Is Ready To Serve You

At last we are able to announce the good news that hundreds of farm families have been waiting for, KLEMME'S REFRIGERATED LOCKER SYSTEM IS READY TO OPEN! Town folks, too, will want to know more about this modern food saving service that is taking Iowa by storm. Be sure to visit our plant on Saturday, Nov. 6th, when we are having our Grand Opening. Let us show you one of the most modern and up-to-date locker plants in Iowa and show you the four important steps in this modern process which keeps meats, fruits and vegetables fresh indefinitely and preserves their natural tenderness and flavor.

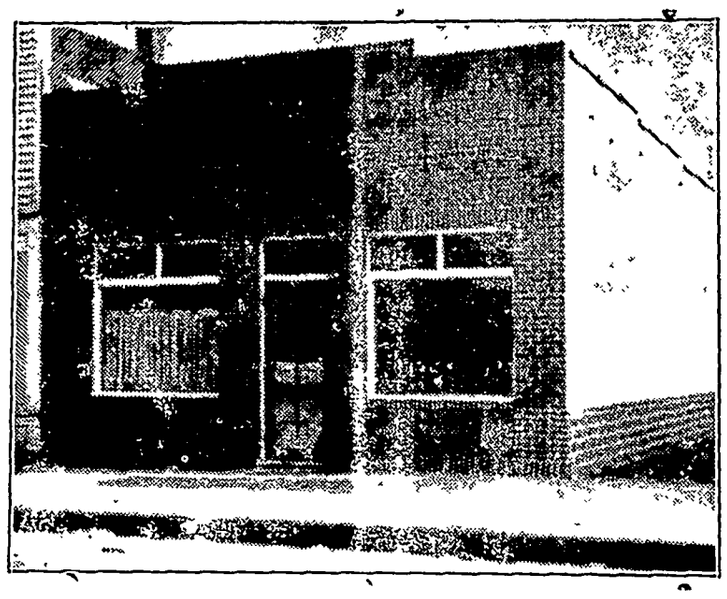
Let us show you how a Refrigerated Locker will help you to live better, and live cheaper! Even if you no not have your own killed meats, a locker will save it's cost several times a year, because you can buy in quantity at advantages prices and use as needed. Rent a locker—enjoy fish, spring chickens, vegetables and other out of season delicacies you could not otherwise have. Your locker will prove a valuable source of supply for those Thanksgiving, Christmas and New Year dinners that will soon be here. You can have a variety of meats and vegetables all the year around by renting one of our lockers.

Individual Lockers Are Now Available

And because we feel no farm family can afford to be without this money saving service, we have made provision for several hundred and more to be added as required. A modern, fully automatic refrigeration system insures your foods being kept at the correct temperature day and night throughout the year, and with the key to your own locker you can help yourself at any time during business hours.

LOW RENTAL RATES

A POSTAGE STAMP PER DAY will provide you with a large roomy locker that will hold a quarter of beef and half a hog at one time. ONLY $10 PER YEAR. $1.00 PER MONTH.

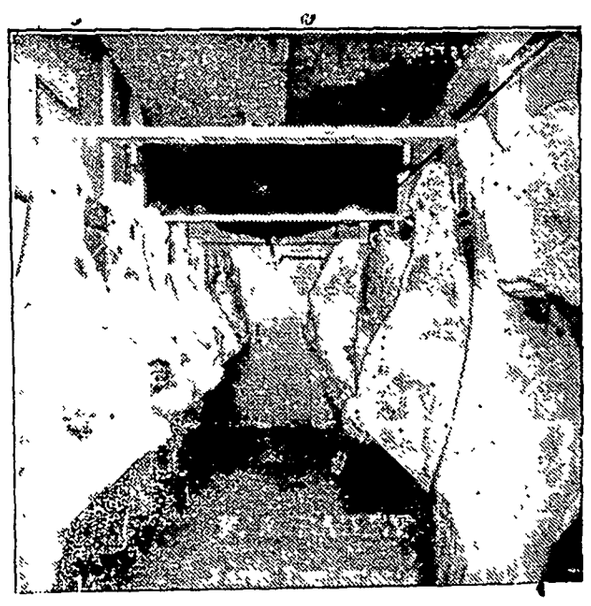


You Can Butcher Any Time You Wish

Enjoy your own fresh country killed beef and pork the year round . . . you can butcher in summer as well as winter if you have a refrigerated locker. Here we have most modern facilities for properly chilling and cutting your meat, wrapping and quick freezing it ready for your locker where you may come and get it at will.

SAVES CANNING AND CURING OF MEAT

LET US PREPARE YOUR FRESH MEAT NOW FOR USE THROUGHOUT THE COMING MONTHS.



As shown in the illustration above, meats fresh from the country are immediately placed in a modern "chillroom" maintained at a temperature just above freezing by automatic controls Here all animal heat is chilled out and meats are aged before being taken to the cutting room shown to the right.

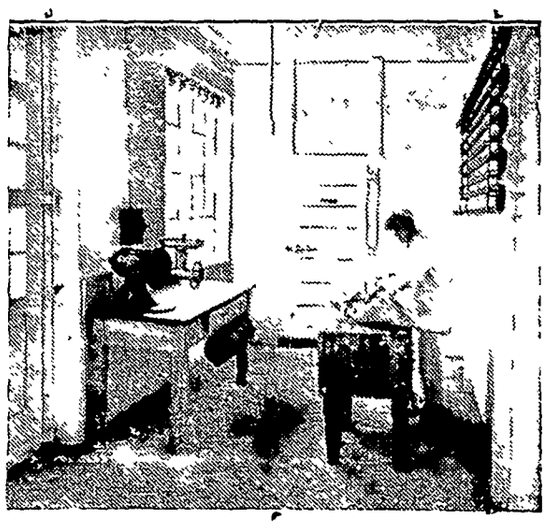
START SAVING MONEY—
RENT A LOCKER
TODAY!

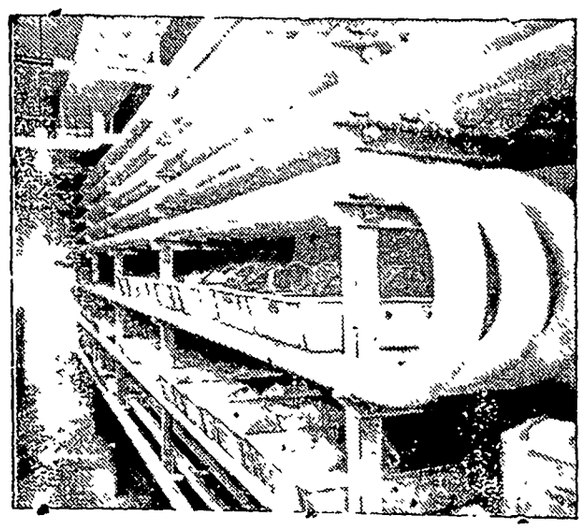
You Are Cordially Invited To Inspect This Modern Plant On Our

Opening Saturday, Nov. 6th

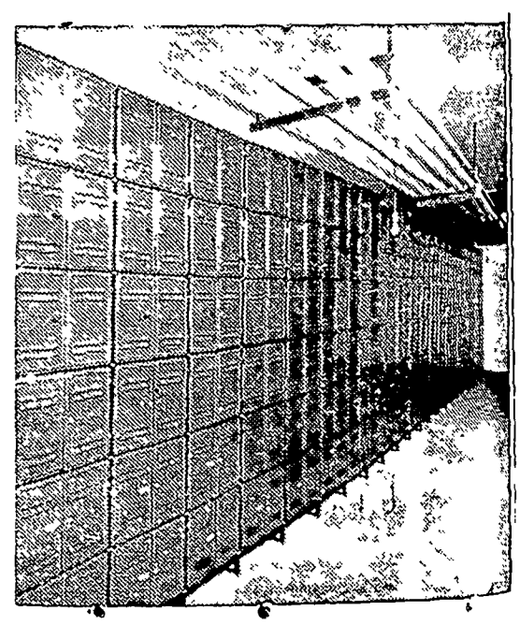
10 LOCKERS GIVEN FREE FOR THREE MONTHS!

INSPECT OUR PLANT WITH NO OBLIGATIONS AND ASK FOR PARTICULARS





In a modern cutting room such as the one shown above, we will cut meat according to your directions, wrapping each cut in parchment paper and marking it for your easy identification The next step is shown at the right above. This is the "sharp freezing room" where the packaged meat or vegetables are quick frozen at zero temperatures to preserve their natural color, flavor and juices Quick freezing does not burst the cell tissues and natural juices and flavor are preserved After being quick frozen the foods are being placed in your own individual locker



Certainly there could be no more inviting place to store foods than these big roomy Midwest Lockers shown above. Every compartment is completely surrounded by a gentle circulation of cold air, and foods in one compartment cannot possibly come into contact with another Here your fresh frozen foods are sure to keep in perfect condition until you need them

KLEMME CONSTABLE ARRESTS TRUCK DRIVER ON SPEEDING CHARGE

(Left out last Week)

Constable H J. Smid and Justice of the Peace Henry Suckow who were driving to Belmond Friday evening on business were forced to stop on the highway when they said a spot light from an approaching vehicle was focused on them Constable Smid turned his car around and gave chase to the offender, the driver of a large truck Smid caught up with the driver and arrested him and took hime into Justice Reed's court at Garner Riley Combs, of Red Oak, driver of the truck, pleaded guilty to driving his truck sixty miles an hour and was fined $20 and costs

Our reporter notes that Martin Brinkman has recently improved his home by having new shingles put on the roof.

IMPORTANT

On October 29th the State Conservation Commission by Administrative order dclared a closed season on Pheasants, Hungarian Partridge, Mink and Muskrat.

On November 2nd the Commission, acting upon legal advice pertaining to a technicality of the law in regard to the population count of fur-bearing animals, rescinded its action relative to closed season on mink and muskrat.

The definite official status of the seasons on these respective birds and animals now is·

Pheasants· No Open Season

Hungarian Partridge. No open season

Muskrat: Open Season November 10th to January 10th

Mink· Open Season November 10th to January 10th

Seasons on all other birds and animals remain as outlined in the printed synopsis and law booklet.

State Conservation Commission,
M. L. Hutton, Director

Klemme Water Supply Is One Of Best In The State

STATE SANITARY ENGINEER GIVES KLEMME WATER HIGH RATING

Inspections Made Regularly Of Klemme's Deep Well Water

H W Posten, Assistant Sanitary Engineer from the Iowa State Department of Health, recently made an inspection of the Klemme water supply and pumping and storage ejuipment. Mr Poston took samples of the water and submitted samples to the State Hygenic Laboratories at Iowa City for analysis

A report from the Laboratories gives Klemme water as high a rating as is possible to attain In other words, Klemme water is absolutely pure

Klemme water is obtained from a pure white sandstone at a depth of 1500 feet. A vertcal turbine pump, automatically operated by electricity, elevates the water in to two large storage tanks where it is put under pressure and forced into the mains

Sewer System Inspected

At the time Mr. Poston was in Klemme he also inspected the sewer sysem and gave it his official O. K

The Klemme Sewage Treatment Plant consists of an Imhoff tank. dosing chamber, trickling filters, and a sludge bed. The effluent from this plant flows to a pond and eventually reaches the Iowa River. Mr. Poston reported that this plant is well maintained and operated The Imhoff tank is kept clean. and the trickling filters were in good operating condition at the time of the inspection.

Mr Poston also reported the effluent was clear, odorless, and free from suspended solids, and it was his opinion that no nuisance conditions can result from the sewerage effluent as found at the time of inspection. He commended Mr Buseman for the interest and care he has shown in maintaining the plant

The Klemme Sewer System is one of the best in the state for the size of the town.

Shamrocks Open Season At Latimer Friday Night

LOCAL YOUNG COUPLE KEPT MARRAGE SECRET FOR OVER A MONTH

Helen Miller and "Bub" Gates Married At Northwood September 26th

Mr. and Mrs. Lawrence "Bub" Gates pulled a real surprise on their many friends and succeeded in keeping their marriage a secret for several weeks.

Miss Helen Miller, daughter of Mr. and Mrs. Dan Miller of Goodell, and Mr Lawrence Gates, son of Mr and Mrs. Fred Gates of Clear Lake, were united in marriage on Sunday, September 26th at Northwood, Iowa Rev. Mays, pastor of the Methodist Church, performed the ceremony.

The couple was attended by Mr. and Mrs. Roger Schlawin, of Garner.

The Bride wore a dark aqua blue dress with brown accessories. The Groom wore a suit of Oxford gray.

Mrs. Gates was reared in this community. She attended the Goodell public schools and is a graduate of that high school. Mr. Gates has also spent a greater part of his life in this community. He attended the schools at Ingram, Wis, where his parents resided for a few years. He is at present employed as mechanic at the Klemme Auto Co.

The young couple have gone to housekeeping m the apartment at the Martin Barz home. The Times joins with their many friends in extending congratulations

THIRTY TEAMS, OVER HUNDRED MEN DO QUICK JOB OF PICKING CORN

Over one hundred men and thirty teams took over the task of finishing the job of picking corn at Mrs. Rose Tanner's farm last Thursday afternoon. There was around thirty acres of corn to be picked and the job was finished in about two hours and the corn all put in the cribs. Around 2100 bushels of corn was picked by the volunteers.

The men say they all had a big time. There were from one picker to five pickers per wagon and some men jumped from one wagon to another. There was quite a jam as the field narrowed down and the air was full of ears of corn and "Tubby" Hummel claimed the honor of picking the last ear.

Gladys Zabilka Is Chosen As Campus Leader

Gladys Zabilka, daughter of the Rev. and Mrs. Wm. Zabilka of Klemme, is one of the Campus leaders chosen to assist with arrangements for the Cornell college Homecoming at Mount Vernon Nov. 13th. Approximately 30 undergraduates are listed to plan the old fashioned pepster on the evening preceding the game with Carleton, a reunion of the old literary societies who set the social pace prior to 1920, a frosh-soph flag rush, the numerous dinners, breakfasts and teas, engineer the voting for a Homecoming Queen, and dress the campus in gala decorations.

SHAMROCKS TO PLAY FIRST GAME OF SEASON ON FRIDAY NIGHT

Coach Al Kingery's Klemme High School Shamrocks will prv the lid off the 1937-38 basketball season Friday night when they trek to Latimer to meet a strong team there in the first game of the season Latimer had an excellent record last year, losing only one or two regular season games, and the Klemme boys are expecting a tough battle

Coach Kingery has been sending his boys through their paces for the past three weeks and will have a strong aggregation built around the veterans, Jorgenson, Schuldt and Grosshuesch. Some of the leading contenders for the vacancies left by graduation are Trampel, Lau, Wicks and Kluckhohn, all of whom are likely to see action in the first game.

The Shamrocks, present sectional champions, are one of the teams to be feared this year and will try to make the going tough for any and all opposition. The season's schedule includes four Class A schools and some of the best Class B aggregations in the state.

The basketball season is started The first game will be played November 12 with Latimer. The schedule for the year is:

Nov	12	.... Latimer (there)
Nov	19	..... Ventura (here)
Nov	26	.... Clear Lake (there)
Dec.	3	..... Hayfield (here)
Dec.	6	..... Kanawha (here)
Dec.	10	..... Goodell (there)
Dec	14	..... Garner (there)
Dec.	17	..... Woden (here)
Jan.	7	..... Kanawha (there)
Jan.	11	..... Ventura (there)
Jan.	14	.... Crystal Lake (here)
Jan	18	..... Belmond (there)
Jan	21	..... Hayfield (there)
Jan.	28	..... Goodell (Garner)
Feb	4	..... Woden (there)
Feb.	11-12	.. County Tournament
Feb	18	..... Crystal Lake (there)
Feb.	24-25-26	Sectional Tournament

American Legion Auxiliary Notes

The Auxiliary will meet next Friday night, November 12, at the home of Mrs. D. P. Anderson. Members please note change of time. This change was made to avoid conflict with the P T.A. program on Thursday, November 11th.

Several new members will be initiated at this meeting.

Five ladies from Klemme attended the county convention at Corwith October 26th. Mrs Laird, the 8th district committee woman was present and gave a splendid talk on the recent national convention in New York City.

This month holds two significant dates for Auxiliary members, National Education Week and Armistice Day.

The Auxiliary will sponsor the speaker for the P T. A. program Thursday. All members are urged to attend this meeting and tell others to attend. The Auxiliary wants to cooperate with the schools and P T. A. whenever possible and this is a splendid chance to show the spirit of cooperation.

Girl Scout News

The Girl Scouts met in the bank basement Monday night, Nov. 1st. We made plans for the coming year and definite plans for the first three months.

On Nov. 8th we met at Arlene Buseman's home. We planned what kind of paint and cloth we are to use on our screens. A lunch was served by Arlene and her mother.

Dairymen and poultrymen should have a much better financial return the coming year than a year ago.

Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington.—There is much talk among the Republicans, both for and against, concerning the proposal to hold a general party conference early next year. The plan projected would bring together delegates from every state just the same as the convention that is held every four years for nominating the presidential and vice presidential candidates and formulation of party policies through adoption of a campaign platform.

G. O. P. Conference

The question has many angles and in consequence many pros and cons already have been advanced. In natural consequence also, some very well-known Republicans have taken definite decisions, either for or against the plan which has the approval of men like John Hamilton, chairman of the Republican national committee, and former President Herbert Hoover. Some very splendid men find themselves honestly in opposition and have said so in unequivocal terms.

The issue will be fought out at a meeting of the national committee early in November and probably there will be such a convention early in 1938.

As I have said, there is argument on both sides but after discussing the situation with many Republicans, it appears to me that the advantages outweigh the disadvantages. I say this from the standpoint of the country at large.

Many times in these columns, I have expressed the conviction that a strong minority party, whether that party be Republican or Democratic, is a very healthy condition for the country as a whole. A political party with too great a majority is likely to run away with itself and do many unsound things. We have had proof of this during the Roosevelt administration and we had proof of it during the administrations of the late President Harding and President Coolidge when Republicans had too many members of the house and the senate and the Democratic minority was impotent.

I cannot speak from a Republican standpoint any more than I can speak from a Democratic standpoint. Nevertheless, from the position I attempt to follow as an observer of national affairs and long range national policies, it does seem that the Republicans ought to quit fighting among themselves and get together to oppose that which the present minority in this country finds objectionable in President Roosevelt's policies. They ought to determine on a set of principles and stick to them. It is their obligation and if they fail to fulfill that obligation, it seems to me they had best disband, get rid of those who attempt to be leaders in the Republican party and let somebody else organize the minority faction in the United States—and it is to be remembered that even in the last election there were almost 16,000,000 Republican voters.

In advocating this action, I am not motivated as much by my belief in and support of some of Mr. Roosevelt's policies as I am in my disagreement with others of the program to which the New Dealer has adhered.

A strong and vocal minority will insure the retention of rights and powers in the hands of the people where they belong and at the same time it will compel Democrats to stick together in carrying out sound policies proposed by the President.

That latter statement may sound paradoxical. I think it is not. I make the statement because I know how many times the gigantic Democratic majority in congress has fought over trivialities and because I know how many times sincere opposition to unsound policies has met with defeat without the country knowing the reasons for that opposition.

Taken all in all, therefore, I believe it is an obligation upon me as an observer of national affairs to declare in favor of a movement by the minority party that will result in a concentration of its power for the good of the nation.

* * *

And what, one may ask, should be the creed of the minority party next year?

Well, as I see the picture, the Republican party must be the conservative party in the United States. President Roosevelt and his New Dealers cannot avoid being the radical party. I have said this many times in these columns and it is more evident now even than when I reported upon the situation earlier. The conservatives can and should have a voice in their government even if it is only an opposition voice that constitutes a balance-wheel.

What of the Creed?

Proceeding from that premise, therefore, there can be little argument that the principles which the Republicans advocate should be drawn from principles of governmental policies that have proved sound. That is to say, the Republicans cannot afford to attack Mr. Roosevelt on everything he has done, but they can tear him politically limb from limb with constructive proposals to take the place of those things he has done which represent discouragement, deceit and disaster to the country's economic life.

There will be no gain for the Republicans in 1938 elections if they attempt to ride two or three different horses as they did in 1936. For example, they cannot do as Candidate Landon did, to wit, call for a balanced budget in one speech and advocate being Santa Claus in another; they cannot blow hot and cold, and, therefore, they must be either conservative or radical.

It seems to me the Republicans can probably plan for an immediate balancing of the national budget. In that connection, they can with justification demand curtailment, if not entire elimination, of many governmental functions inaugurated under the New Deal. They can offer constructively a proposal to legislate out of existence some 20 or 30 federal agencies for which there never has been and is not now any excuse for their existence.

* * *

Another question that is crying for attention is the huge national debt, now at $37,000,000,000, the highest in history. That debt must be reorganized and placed on a basis that will permit gradual liquidation of it. The Roosevelt administration has done nothing regarding the debt except to build it higher and higher.

National Debt

If the Republican party wants to do a constructive job it ought to set to work to examine all of the statutes enacted by congress in the last ten or twelve years and especially those enacted in the haste of the emergency with a view to repealing of many of them. Some can and should be rewritten to make them workable. Those statutes placed on the books by the Roosevelt administration constitute outstanding evidence of the lack of opposition. We all know many of those bills were written in executive departments and sent to congress with instructions to pass them unchanged. Bad legislation has resulted many times and a checkup surely is indicated.

As regards legislation now on the statute books, it seems to me we will never have sound prosperity until certain laws that increase production costs are eliminated. I mean by this that there are numerous laws which have the effect of widening the spread between the price of the raw materials and the price of the manufactured products. Legislation of this kind is bound to force down the prices paid to the producers and, in my opinion, the results are beginning to be reflected on products of the farm.

Probably the most delicate question with which the Republicans are confronted relates to wages and hours of labor. Business interests have been shortsighted. Too many times employers have overworked their employees and have shown but little consideration for the rights of labor. The result is that labor is demanding consideration in the shape of protection at the hands of its national government and the Republicans, whether they desire to or not, must take a stand.

* * *

Among other principles upon which I think the Republicans as the conservative party surely can agree is that there is too much government in business. The government itself is engaged in many lines of commerce and industry and it is breaking down private enterprises in countless ways. I regard the function of government as a thing to be confined to matters and enterprises which individuals cannot do as individuals. We might use the postal service as an example. No one would be so silly as to say that the postal service could be operated satisfactorily in any other way than as an agency of the federal government. In contradistinction to the postal service, however, we can point to such things as the building of model homes for private citizens. I think the government has no business at all in that field. This is so, first, because of the tremendous waste accompanying any governmental operation and, second, for the reason that private persons who are holders of funds whether the amount is great or small recognize real estate mortgages as sound investments. I need not mention the red tape or the politics that can choke up any such thing as a government housing development.

Then, There's These

I could go on and mention numerous other general principles upon which there can be honest differences of opinion. It is upon these questions where differences are honest and not created for political reasons that the Republican party should express itself. It ought to do this if it is going to be representative of opposition sentiment.

Scenes and Persons in the Current News

1—Miss Jeanette Rankin, former congresswoman from Montana and now associate secretary of the National Council for the Prevention of War, pictured as she addressed a meeting of the body recently and pleaded for American aloofness from foreign disputes. 2—Defenders of Shanghai repelling a Japanese attack on the city. 3—Herr Von Stohrer, newly appointed German ambassador to the insurgent government of Spain (left), shown as he acknowledged cheering crowds at Salamanca, Spain, with the Nazi salute. General Franco, who received the new envoy's credentials, is shown at his right.

"Nuts to You, Willie Squirrel"

Life for Willie, pet squirrel owned by Mr. and Mrs. Lawrence Britten of Greenville, Tenn., is just one dentist chair after another. Willie's front teeth began to curve backward toward the roof of his mouth and his owner carted him off to the dentist to have them ground off. The dentist opined that Willie eats too much prepared food.

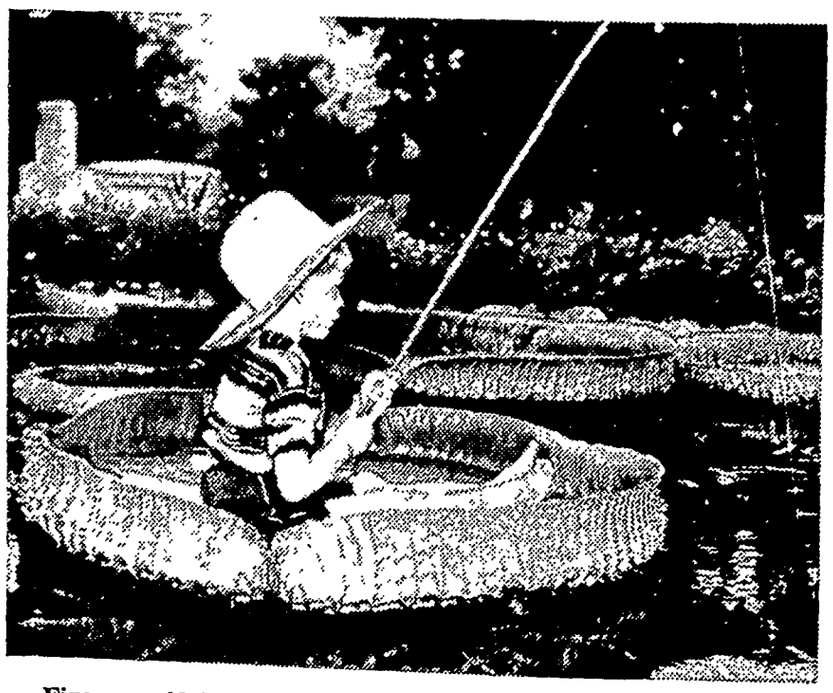
SIGNS FOR MOVIES

Airline hostesses are all so capable and charming that the inroads of Cupid are the most serious factor involved in alienating them from their jobs. Now comes an announcement from an airline company indicating another threat. As evidence we show you a picture of pretty Daphne Lane, airline hostess who has just received a motion picture contract.

BONNEVILLE CHIEF

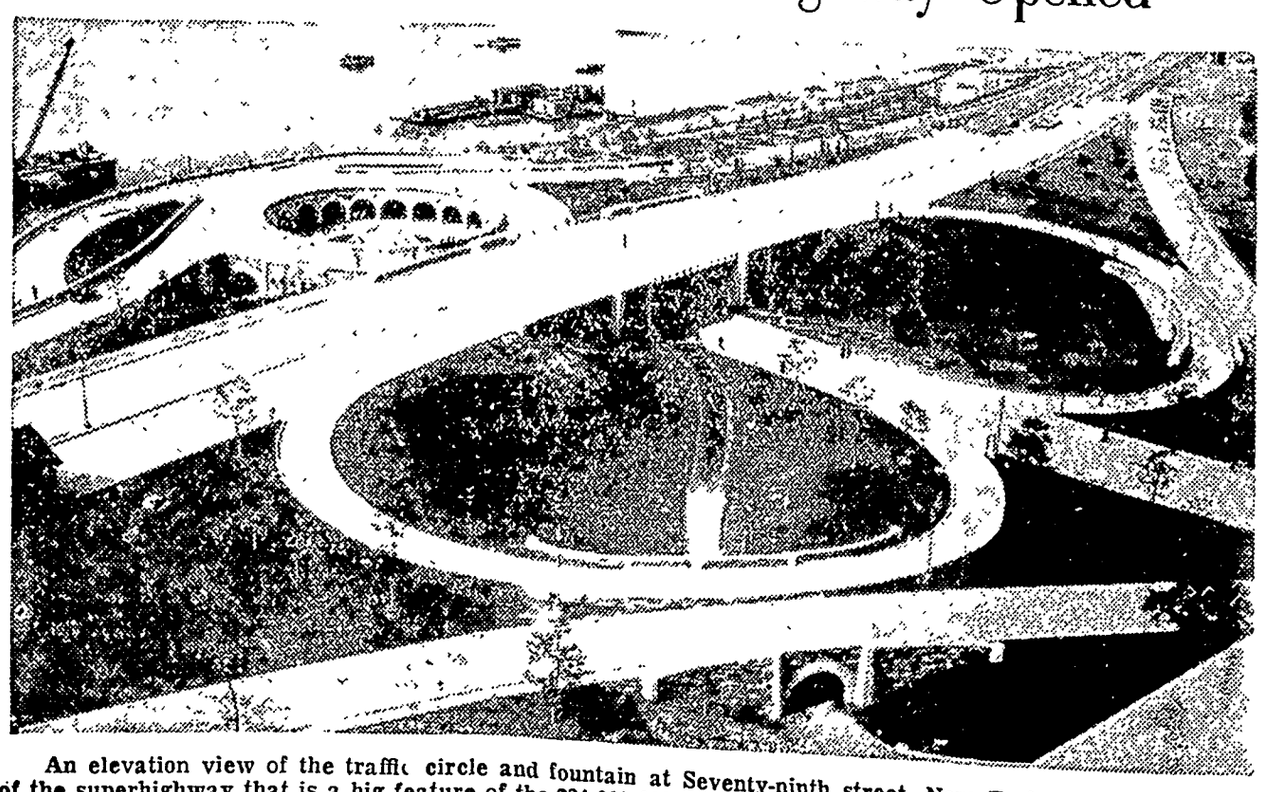
James D. Ross of Seattle, who has been appointed by President Roosevelt as administrator of the Bonneville dam project. Under the supervision of Secretary of the Interior Harold L. Ickes, Mr. Ross will administer the transmission and sale of all hydroelectric power.

Lily Pad Is His Fishing Boat



Five-year-old Lonny Bliss of Miami, Fla., is a keen angler. He is pictured as he tries his luck for the wily fish that lurk beneath the lily pads. These rare tropical water lilies grow so big that Lonny can get right out on one and use it instead of a boat.

New York's $24,000,000 Highway Opened



An elevation view of the traffic circle and fountain at Seventy-ninth street, New York city, showing part of the superhighway that is a big feature of the $24,000,000 improvement project on Manhattan's west side waterfront. Beneath this traffic circle is a garage accommodating 250 cars.

Favorite Recipe of the Week

LET us have our peach dessert in abundance while there is a generous amount of this fruit in the market.

Open Peach Pie.

6 peaches
Sugar, cinnamon
1 egg yolk
3 tablespoonfuls cream
1 tablespoonful butter
1 cupful flour
1 egg
½ teaspoonful baking powder
¼ cupful sugar
2 tablespoonfuls milk

Make a cookie dough type crust from last six ingredients as follows: Mix dry ingredients. Work in butter, and add the slightly beaten egg and milk. Mix, then pat and roll out on board or pastry canvas. Fit into nine-inch pie plate. Peel the peaches, remove stones and slice in eighths. Arrange in circular fashion over the dough. Sprinkle with sugar and cinnamon mixed. Beat the egg yolk, add three tablespoonfuls cream and drip over and around the peaches. Bake in hot oven for about 30 minutes or until crust is browned and peaches are soft.

How One Woman Lost 20 lbs of Fat

Lost Her Prominent Hips Double Chin—Sluggishness

Gained Physical Vigor—A Shapely Figure.

If you're fat—first remove the cause. Get on the scales today and note how much you weigh then get a 4 oz. bottle of Kruschen Salts which will last you 4 weeks.

Take one-half teaspoonful of Kruschen Salts in a glass of hot water in the morning—modify your diet and get a little regular gentle exercise—in a few weeks get on the scales and note how many pounds of fat have vanished.

Notice also that you have gained in energy—your skin is clearer—you feel younger in body—Kruschen will give any fat person a joyous surprise.

But be sure it's Kruschen—your health comes first.

You can get Kruschen Salts from any leading druggist anywhere in America (lasts 4 weeks) and the cost is but little. If this first bottle doesn't convince you this is the easiest, SAFEST and surest way to help you lose ugly fat—your money gladly returned.

Of Greater Value

Good instruction is better than riches.—William Penn.

HOW LONG CAN A THREE-QUARTER WIFE HOLD HER HUSBAND?

YOU have to work at marriage to make a success of it. Men may be selfish, unsympathetic, but that's the way they're made and you might as well realize it.

When your back aches and your nerves scream, don't take it out on your husband. He can't possibly know how you feel.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

GET RID OF BIG UGLY PORES

PLENTY OF DATES NOW...DENTON'S FACIAL MAGNESIA MADE HER SKIN FRESH, YOUNG, BEAUTIFUL

Romance hasn't a chance when big ugly pores spoil skin-texture. Men love the soft smoothness of a fresh young complexion. Denton's Facial Magnesia does miracles for unsightly skin. Ugly pores disappear, skin becomes firm and smooth.

Watch your complexion take on new beauty

Even the first few treatments with Denton's Facial Magnesia make a remarkable difference. With the Denton Magic Mirror you can actually see the texture of your skin become smoother day by day. Imperfections are washed clean. Wrinkles gradually disappear. Before you know it Denton's has brought you entirely new skin loveliness.

EXTRAORDINARY OFFER
—Saves You Money

You can try Denton's Facial Magnesia on the most liberal offer we have ever made—good for a few weeks only. We will send you a full 16 oz. bottle (retail price $1) *plus* a regular sized box of famous Milnosia Waters (known throughout the country as the *original* Milk of Magnesia tablets), *plus* the Denton Magic Mirror (shows you what your skin specialist sees) . . . all for only $1! Don't miss out on this remarkable offer. Write today.

...xuriously Furred Costumes

By CHERIE NICHOLAS

...HE big news about ...all and winter fash... ...is that they bespeak ...ew high in elegance. ...en fashion goes op... ...t, goes sumptuous, ...s luxurious, then what ...vitably happens? Well for one ...g it follows as the night the day ...designers turn to handsome furs ...fur trimmings as one way of ...veying the message of elegance ...he mode.

...hich accounts for the fact that ...new coats, suits and ensembles ...w an enrichment of fur that em... ...tically declares an era of luxuri... ...dress. In consequence, women ...o are fashion-alert have taken ...r cue and are making it their ...ef concern to acquire a complete ...emble costume styled of high... ...de material ranging from rugged ...orful tweeds to refined duvetyns, ...adcloths or velvets that are ...ced with precious fur—the sort ...t bespeaks a "lady of quality." ...he models pictured have been ...efully selected from among a ...lection shown at a preview given ...the Style Creators of Chicago in ...wholesale district. These furred ...tumes were designed by mem... ...s of their group to meet the de... ...nds of women that class as ...ong the best dressed.

...Perfect for crisp autumn days is ...outfit to the left in the picture. ...e dress is of sheer black alpaca ...ave. Its novel metal chain and ...sp closing showing between the ...on the coat gives it a military ...aring. The free-swinging corona... ...n red wool coat is a fascinating ...rment, and its tuxedo bands of ...arten fur make it more so. ...Which reminds us the revival of marten fur this season is a most significant event. It has been a long time since we have been seeing much marten in the style picture. Its return will be welcomed for it is not only as handsome as can be, but for dependable wear it has no superior.

When the smartly dressed woman steps out in a gorgeously furred costume as centered in the picture, she will be the cynosure of admiring eyes. This sheer wool model combines a tuxedo-front coat trimmed in a huge cross fox with a one-piece dress that is simply charming. Note the decorative quilted flowers outlined in gold thread at the neckline. The gold kid belt adds the finishing touch.

There is really no limit to the ingenuity displayed in the placement of fur. It is used for separate sleeves in cloth coats so much so that the fashion has become quite outstanding this season. The coat with a bolero top is ever so smart, too. The newest wrinkle is the bolero type that has the lower cloth part zipped on so that it can be removed at will thus providing a jaunty little fur jacket or full length coat. Among countless other fur arrangements novelties are to be seen such as a panel of fur extending down the back of the coat from neck to hemline as if it were a watteau pleat. Frequently double borderings of fur occur about hemlines.

The shoes are ...ulti-toned open throat suede ox... ...ords with bindings of coffee brown ...nd Araby green on harvest rust. ...he bag is a large suede design ...harvest rust with gold metal ...rim.

JEWELRY DESIGNERS GO ROMANTIC ALSO

By CHERIE NICHOLAS

With romanticism gaining such a headway in fashions for fall, small wonder that jewelry manufacturers have recognized it and are all set for a hey-dey. Jewelry, my good woman, is not only getting bigger and better, but practically all of it has been inspired. Some of the inspirations are modern, but most of them have been drawn from an era when romance was at its height and glamour stalked the world in high places.

Such romantic figures as Empress Carlotta, glamorous wife of the ill-fated Emperor Maximilian who reigned for such a short time, (1864-1867) over Mexico; Joan of Arc; grand duchesses whose jewels were of such splendor as to have been remembered; these, and lovely ladies of the gay nineties and the naughty naughts, are being immortalized, more or less, in smart pieces of costume jewelry designed by Alberta, one of America's leading costume jewelry designers.

The "Empress Carlotta" jewelry has been copied from some of her pieces of jewels found in a museum in Mexico For evening it is the most elegant, for it is made of Kimberley gems which are cut and set like fine diamonds in 24 karat gold washed metal.

"Joan of Arc" jewelry is part of an all-metal group which Alberta believes will be a big success for fall. This line is made of a silvery metal studded like the doors of a medieval castle.

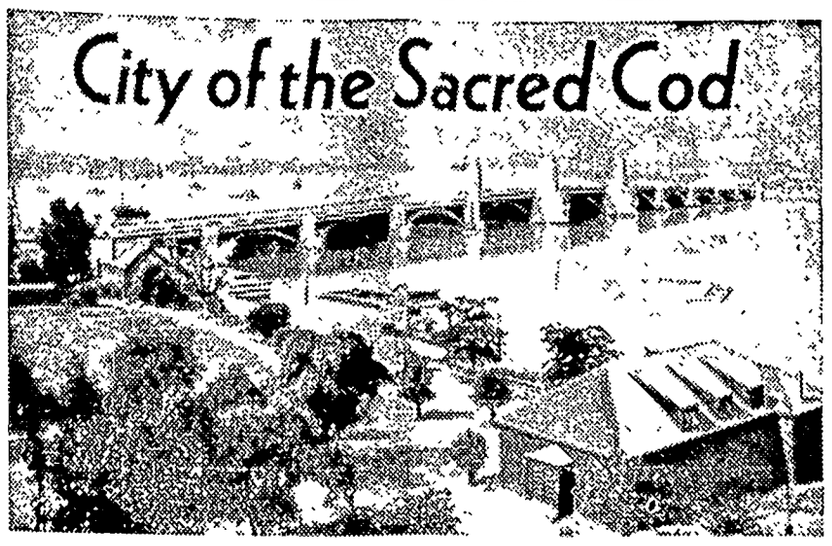
Costume Jewelry

The dog collar and the feather tiara are two revivals of the Gay Nineties period which are important this season.

Hats, Handbag Match

Knitted hats and handbags are designed to match hand-knit frocks and suits in dark, rich colors for winter wear.

City of the Sacred Cod



Charles River Basin and West Boston Bridge.

Some Reasons Why Boston Can High-Rank Among American Cities

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

GEOGRAPHICALLY, Boston is the trade and population center of rich, industrial New England. A few minutes' ride from Faneuil Hall are more than 5,700 factories and over 25,000 stores of one kind or another.

Boston does not flaunt these distinctions; yet seek and you find she has America's largest drydock; the world's greatest fish-freezing and storage plant. Here is a center of America's paper, wool, textbook, and cotton-manufacturing industries, and the second port in America in volume of ocean-borne passenger traffic.

Her deep-channeled harbor, whose modern piers connect with rails and highways, is one of the most accessible on the Atlantic seaboard; it has 40 miles of berthing space and deep water to accommodate the largest vessels.

When "Boston ships" traded hardware for California hides before the days of '49, the shoe and leather industry of New England began. Today, a large share of all hides used in American leather and shoe factories is bought and sold inside one square mile of old Boston, where even in the middle of the street you catch the acrid whiff of newly tanned leather.

In Bombay is an old American icehouse. It dates from the period, beginning 1805, when Boston skippers took cargoes for sale in Jamaica, Cuba, Brazil and India. Now high-grade electrical machines, which include refrigerators, rank among Boston exports.

Boston's pioneer place in the import and processing of tropical things is still hers. She and her neighbors make now more than a third of all America's rubber shoes; the trade name of one cocoa made here has been a household word for generations. Jute, burlap, goatskins, fleeces, bales of cotton, sisal, fruit, sugar, coffee, all pass this way.

Ask how long skilled workers have served in the same plants; hear how many generations of a given family have worked at the same trades, and you begin to account for the vitality of Boston industry. Here is pride in good work, inherited knowledge, genius for craftsmanship.

Made Banana a Staple Food.

John Hancock probably never saw a banana. At the Philadelphia Centennial exhibition, in 1876, curious crowds gazed in wonder at a bunch of them. Now everybody, from Quoddy Light to Golden Gate, from Key West to Alaska, knows their smell and taste.

Boston's United Fruit company makes the banana, once a rarity wrapped in tinfoil, today a staple American food.

Yet its greatest feat is not in distribution, but production. About its success in turning jungle into rich plantations and its conquest of tropical disease, piles of fat books are written. All that is far from Boston, yet it was a Boston man, Andrew W. Preston, who conceived these incomparable tasks. When he began, long ago, the world banana crop barely equaled what New York alone now eats in a few weeks!

To get bananas the company had to raise them; so it became a vast agricultural concern. Jungle areas cleared and planted total thousands of square miles.

When Minor C. Keith, of United Fruit, started his railroad to Costa Rica from Puerto Limon to San Jose, a 19-year job that cost more than 4,000 lives from fever, there was but little rail in all Central America. Now the company owns and operates its tracks, trucks, and aerial tramways in a dozen tropic regions. It has built towns, piers, radio stations, hotels, harbors, hospitals; stores, schools, churches, theaters, playgrounds; shops, warehouses, markets; water, light, and power plants, and workers' homes by the thousands.

Center of Fish Industry.

Besides growing bananas, it raises meat, vegetables, and other foods for its armies of workers, and operates sugar plantations, mills, and refineries; grows coconuts, cocoa, and other tropical products; and annually carries some 40,000 passengers on its 97 ships from Boston, New York, Baltimore, New Orleans, and San Francisco to 25 different ports between Habana and Cartagena, Colombia.

Though Boston, remote from grainfields and ranches, must go far for bread and meat. she also covers much of America with fish, as well as bananas.

"But what profit might arise?" That was King James' query when Pilgrims asked him, in 1618, to permit them to sail for the New World.

"Fishing," they replied.

"So, God save my soul!" he exclaimed. "'Tis an honest trade. 'Twas the Apostles' own calling."

There's a reason why the Sacred Codfish is an emblem of Massachusetts; why its effigy hangs now in the statehouse, and has hung, in one assembly hall or another, for more than 200 years. It saved the early settlers from starving; preserved with salt from England, it became their first export, their first source of revenue.

Boston, like Gloucester, catches many other kinds now, from lobster to mackerel, and helps feed the whole United States. And cod is no longer the favorite; haddock is more in demand.

Go for a trip in a trawler. Heading for the Stellwagen bank, the dingdong echo of your radio depth-finder warns you that you are over the fishing grounds, and the big conical net is let go.

Wooden wheels, set on its lower lip, let it roll easily over the ocean floor; big wooden gates at each end, opening outward keep it stretched wide open, so that it scoops up everything that swims or crawls, from "sea eggs" to squid.

"Green," or unfrozen, fish is shipped as far west as Mississippi; frozen fish, really fresh fish preserved by freezing which will keep in perfect condition a year or more, reaches the Pacific coast, while salted and dried codfish, or "bacalao," is consumed as far away as southern Europe, the Caribbean, and the coast of Brazil.

Dawn brings the auction in a big "pit" at the pier's end. Signs on the walls say all bidding must be in English; bids are called in English, but debates rage with confusion of tongues.

Then this big, busy fish pier echoes with excitement. Men in rubber boots, wearing caps with long visors like duck bills, throw fish into rope baskets and swing them to the docks. Others run hither and yon, pushing bright-colored carts filled with fish, followed by sniffing, hard-faced wharf cats.

Bostonians Are Good Sailors.

These Boston people love the sea. For generations they sailed it to make a living. Now many sail for fun, yet with all the skill and grim intent of adventurous clipper days.

Be asked to sail in yacht club races, especially if all your racing experience has been on the deck of a mustang, and you hear a new language. On the first day of "soft spots" in the air, of tacking, luffing, crossing of bows and sterns, and shutting off of the rival's wind, sailing seems a sport not only of odd speech but of mysterious motions.

Then, all at once, you begin to sense these tricks of jockeying with boats. Here is horse racing, but on water! Instead of crowding the other, riding in to the rail to slow him down, you shut off his breeze power. Ship lines are only bridle reins; stiff breezes are spurs, and letting out a spinnaker is merely giving your nag her head.

Fair play and good sportsmanship are ingrained. Inherited English ways and proximity of Harvard, with its generations of clean sport, have fostered this love for games.

Plenty of Sport There.

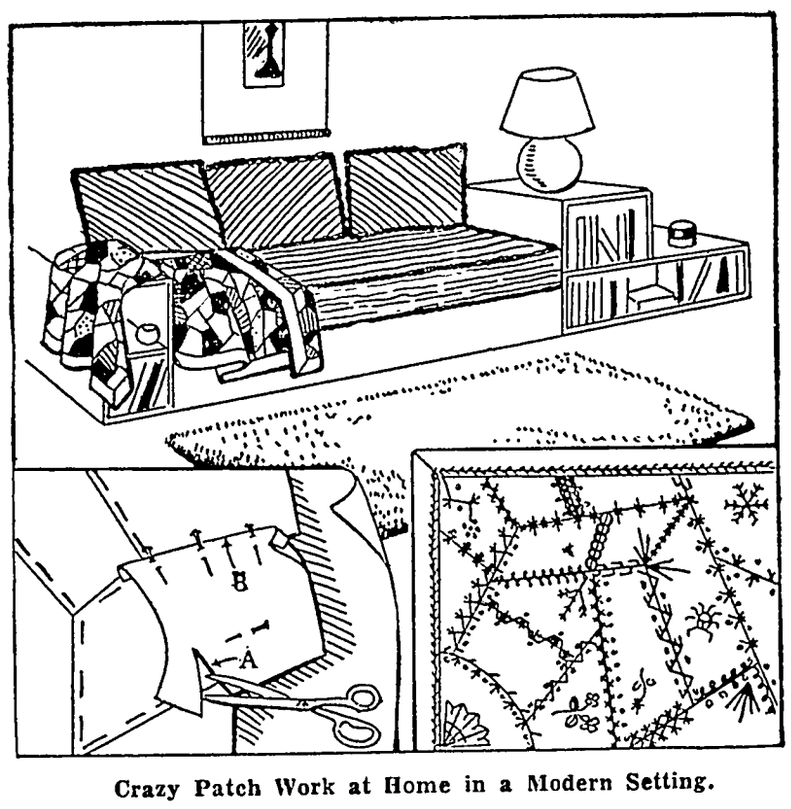
Gymnasiums came early, where circus acrobats and strong men used to be invited to "show off" for the boys. That colorful character in prize-ring history, John L. Sullivan, was born in Boston. Cricket, hockey, boxing, rowing, swimming, high bicycles, and ball players in full beards, Boston fostered them all; yet permitted no league baseball games on Sunday till 1929!

Special "snow trains" leave now, taking winter crowds with skis, sleds, and toboggans, at the first news of heavy snows in the White mountains. Born of the old East Indian battledore and shuttlecock, and introduced into England about a century ago by returning army officers, the game of badminton is now also much played about Boston.

New among Boston sports is midget motor-car racing. She has a special Tom Thumb track, an oddly formed figure with seven turns. To it, on race days, tiny speed cars are hauled on trucks for rough-and-tumble contests.

HOW TO SEW

by Ruth Wyeth Spears



Crazy Patch Work at Home in a Modern Setting.

THE crazy patch is the oldest of quilt patterns, yet there is something amazingly modern in its angular lines. So whether your living room is traditional in style or newer than tomorrow you will be interested in the revival of crazy patch work for what our grandmothers and great-grandmothers called a "slumber throw."

A corner of one of these old silk crazy quilts is shown here at the lower right. The pieces were small—many not more than 1½ inches wide or long. A variety of embroidery stitches joins the pieces. Both plain and figured silks were used, the plain patches often being embroidered with flowers, fans and other motifs.

Larger patches with simple feather stitch and herring-bone stitch at the joinings also give a good effect. The pieces are sewed to a foundation of some firm soft material. Outing flannel or an old wool blanket are good. Pin a piece in place over the space to be filled, trim the edges to the right shape, as at A, allowing enough to turn under, as at B, where the patch laps over the one next to it. Baste the turned edges down as shown. When a number of patches have been basted in place, sew them down to the foundation with the embroidery stitches and then remove the bastings. The backing is tied to the front with silk embroidery thread as comforters are tied. Little or no padding may be used and a plain band around the edge is effective.

Every Homemaker should have a copy of Mrs. Spears' new book, SEWING. Forty-eight pages of step-by-step directions for making slipcovers and dressing tables; restoring and upholstering chairs, couches; making curtains for every type of room and purpose. Making lampshades, rugs, ottomans and other useful articles for the home. Readers wishing a copy should send name and address, enclosing 25 cents, to Mrs Spears, 210 South Desplaines St., Chicago, Illinois.

Home Heating Hints

By John Barclay
Heating Expert

THERE is an easy way to keep dust from sifting through the cracks of the ashpit door when shaking furnace grates. Quite a few readers have asked me how it can be done, and I'm sure many more of you will be interested. Here's how:

Have a spray made of small pipe, connected with the cold water system installed in the ashpit of the furnace. Only a short length of pipe will be needed. In it have small holes drilled and cap the free end.

Just before shaking the grates, turn on the spray. It will throw a fine mist over the whole ashpit, wetting down the ashes as they drop through the grate openings and settling the dust immediately. Then remove the ashes from the ashpit. They will be sufficiently wet to prevent the dust from rising and settling in the cellar.

The cost and installation of such a spray will be but little, and it certainly will save you considerable work in dusting off things on which the dust would otherwise settle.

CLIP THIS AD! Worth $7.50

Take it to any radio dealer! See the new 1938 farm radios. Choose the radio you like best, and ask your dealer how you can save $7.50 on the purchase of a new battery radio equipped with a genuine Wincharger.

Wincharger turns FREE WIND POWER into electricity, brings "big-city" reception to farm homes. Eliminates "B" batteries. Ends expensive recharging. Provides plenty of free electricity to run your radio as much as you want for less than 50c a year power operating cost.

SCHOOL NEWS

The manual training room is being remodeled and painted this year A new table saw is being added to the equipment.

Wednesday evening the basketball boys played a game with the town team.

—Arlene Schmidt

—KHS—

Mr. Elstad and the General Science class made a visit to Mr. Larsen's new locker and cooling system the last part of the week. Mr. Larsen showed the members of the class all the units of the cooler and explained how they worked. They all enjoyed the trip and hoped that they might go on more like it.

—Dorothy Baack

—KHS—

The Home Economics classes No. 1 and 2 finished their slips last Thursday. This week they are starting other work They have the choice of making smocks or pajamas.

—Irene M. Becker

—KHS—

The bookkeeping class started working in their Practice Sets this week. This set takes them through an entire bookkeeping cycle of a business for one month, making all the necessary statements.

—Edna Spitler

—KHS—

The school news is usually typed by a member of the Typing II class. However, this time a member of the Typing I classes, LaRayne Stille, helped set up the news.

—KHS—

The high school and grade students enjoyed a vacation Friday, because the teachers went to the State Teachers' Convention, which was held in Des Moines. The teachers reported that the meeting was very good Among the noted speakers were Mrs. Franklin D Roosevelt and Lord Morley, a speaker in the British Parliament

—Allen Barz

—KHS—

The following is a story written in Freshman English class by Jacqueline Kudje:

A THRILL AT THE RACES

Dust flying and brakes screeching made us sit with our mouths open to wait for the results of this trying time. At last he has slowed down and is stopping at the finishing line. The car has made the required distance in twenty-nine minutes and fifteen seconds. The next car is now being towed to the starting line to begin on its expedition around the race track Oh! What was that? A crash sounds through the air. The ambulance's siren screams madly as the ambulance drives to the scene of the crash. The fence was smashed, but luckily the car and its driver were not harmed. The man ahead of me is so excited that he sits down on his down hat, flattening it like a pancake. The band, directed by Karl King, now starts up a lively tune to quiet the crowd Another car has been given the signal to start. Another car, with the motor roaring, starts around the track, leaving behind it a cloud of dust. It turns the corner at neck-breaking speed, turning on only two wheels. Finally the end Listen! The winner is being announced Gus Schreoder of Cedar Rapids, driving car No. 24 is the great winner. A great cheering arises and everybody leaves the grandstand tired and hoarse.

Grades 1 and 2

We went to visit the Post Office on Monday. While we were there we bought stamps and mailed letters to our mothers

The first graders are reading pre-primers and working in their work books now.

Joyce brought a grape fruit plant to school.

Delores Tanner moved away. There are 14 in second grade now.

Grades 3 and 4

The fourth graders have started the unit on "Little American Citizens." They plan to give a short assembly about "Citizenship" at P. T. A. this month.

The third graders' assembly about Indians will be given at P T A. this month. They are making blankets and headbands as part of their study of clothing.

We listened to the American School of the Air, last Thursday. Everyone enjoys each program so much.

Story telling and story writing have taken up much of the reading and language periods for the third graders.

Grades 5 and 6

We have two new sets of supplementary readers, one for each grade. They are called "Study Readers" We think it will be fun to use them.

Those making a perfect record in spelling last week are Betty Blickenderfer, Ewald Grosshuesch, Marjorie Hartbeck, Patricia Kudje, Duard Lewis and Barbara Johnson.

We enjoyed a vacation on Friday when the teachers went to the convention at Des Moines.

Marjorie Hartbeck's side won our second health contest. We now have to choose new sides.

LauVern Tanner has moved to Garner.

The sixth graders had another self-testing drill in arithmetic.

Grades 7 and 8

Lucile Hartbeck, Reporter

On Friday we had a Halloween party in our room. Ellen Kilgore, Betty Etchen, Billy Grosshuesch, and Garland Brinkman served on the entertainment committee.

Monday Miss Merritt finished reading the book Tom Sawyer. Now we are reading Huckleberry Finn We are all very anxious to see the show Tom Sawyer which is being made.

The patrolmen for this week are Garland Brinkman and Robert Jahnke.

Ellen Kilgore brought a large redwood cone to school which was taken from a redwood tree in California.

The following received one hundred per cent in spelling: Charles Bock, Arlene Buseman, Melvin Coobs and Billy Zabilka.

Ione Tanner has moved to Garner.

Scarcity Of Birds Reason For Second Straight Closed Season

Conservation officials estimated the order closing the pheasant season would result in the sale of 20,000 fewer hunting licenses in Iowa this year.

Whirring farm machinery knives last Spring and summer proved almost as devastating to the pheasant population as the 1935-36 "coldest winter in 117 years," conservation officials said Severe bird losses that winter caused the commission to close the pheasant season last fall.

Two Bad Breaks

The birds suffered two bad breaks last spring and summer, officials said the survey showed The wet spring in pheasant counties drove the hens from their natural cover and they were forced to nest in alfalfa fields. Cutting of the hay crop before the broods came in killed probably 60 per cent of the new generation of birds and eggs, the officials said

The hens then moved into wheat and oats fields and started all over again. These crops also were cut before the new broods could come in, and substantial losses were reported.

Surviving broods, however, are exceptionally large, the officials said. The usual number is eight to ten birds, compared to from six to eight birds in other years.

First Closed Season

Last year's closed pheasant season was the first in Iowa history, conservation officers said Iowa hunters have not been priveleged to shoot partridges in recent years, although there is a legal sanction for such an open season if the commission decides there is a shootable surplus.

This year's survey disclosed less than a third of the number of birds in pheasant counties this year compared to the 1936 census, the officials said. It took the conservation field force ten days to complete the survey, the officials added. Birds were counted in the north, central and south parts of each county, they said.

A closed season on mink and muskrats also was voted by the commission The open season on these animals had been set for Nov 10 to Jan 10

Stuttering Found Related to Twins in Chicago Studies

Both May Be Connected With Left-Handedness

Rockford, Ill. — Twins and stuttering may be closely related in their occurrence, Prof. Mildred F. Berry of Rockford college reports in the magazine "Human Biology."

Recently completed studies of a group of nearly 1,000 Chicago children, half of whom stuttered and the other half of whom did not, reveal that twins are found twice as frequently in stuttering families, Miss Berry declares.

In addition, "in stuttering families containing both twins and single children, stuttering is more frequent among the twins."

Because of the apparent connection between stuttering and twinning, which is believed to be hereditary, Miss Berry also believes that stuttering is passed from one generation in a family to the next. The belief that the affliction is largely psychological now finds itself, she states, "on shifting sands."

Five hundred non-stuttering children and 462 children who stuttered were studied in four Chicago hospitals to determine the possible connection between stuttering and twinning.

Left-Handedness Comes In.

Thirty-two sets of twins were found in the immediate families of the stutterers as against only 15 sets of twins in the non-stutterers' families, she reports. Of the 30 families of stutterers containing both twins and single children, 22 of 55 twins stuttered, while only 13 of 99 single children were afflicted, indicating a further connection between stuttering and twinning.

The high frequency of the speech defect among twins was connected by Miss Berry with the previously reported fact that both stuttering and twinning have been connected with left-handedness. Stuttering is four times more frequent among left-handers than it is among people who use their right hands. Left-handedness is also found to occur six times more often among twins than among the remainder of the population.

Iridescent Films May Soon Displace Oil Prospector

Vancouver, B. C.—The prospector struggling scores and even hundreds of miles to the nearest assay laboratory with a heavy backload of ore for testing may shortly be a romantic hero of the past.

His future brother-in-arms will need little more than a fistful of the same ore to determine whether it is worth his while to go back with mining equipment.

Thin films of iridescent color, like the ones seen on oily streets after a rain, used by the expert in analyzing ores may spell the difference between the two.

This was the tenor of a report here by Prof. A. M. Gaudin of the Montana School of Mines at a joint meeting of the Canadian Institute of Mining and Metallurgy and the American Institute of Mining and Metallurgical Engineers.

Minerals of different chemical composition but which look alike and are difficult to tell apart except by means of costly tests of large amounts can be analyzed under the microscope by means of colored films, Prof. Gaudin reported. Importance is attached to this discovery because of the fact that similar-appearing ores may be widely apart in value.

Differences in the color of the iridescent films are caused by differences in the thickness of the film.

Pact Protects Whales for at Least One Year

London.—Protection for several fast-disappearing species of whale is expected as a result of the international agreement for the protection of whaling, the leading British scientific weekly, Nature, reports.

Chief features of the new agreement, which runs for one year with the proviso that it may be extended as long as necessary, include prohibition of whaling in large areas, prohibition of killing calving whales and setting a minimum size for each of several threatened species of whales.

Clusters of Stars Whirl About Other Celestial Groups

New Discoveries Show Milky Way's Structure

Cambridge, Mass.—Important new clues to the structure of the Milky Way have been found at the Harvard observatory where officials announced discovery of a new type of astronomical sub-system in the universe.

The new system consists of a giant cluster of some hundreds of stars which revolves about a still larger cluster, much as the earth travels about the sun. Astronomers here say it presents the first positive indication they have had that these tremendous clusters may be connected with one another by gravity to form independent sub-orders within the galaxy.

The discovery, made by James Cuffey of the Harvard observatory staff, was the result of numerous extremely accurate computations of the distances from the sun of nine galactic star clusters in the constellation Auriga, the most comprehensive and exact measurements of these distances ever made.

The two clusters the research showed to be companions are those known as Messier 38, which has a mass about 500 times that of our sun, and NGC 1907, which is about 75 times the mass of the sun. The smaller one, it was found, revolves about the larger cluster with the time required for one complete revolution estimated to be about 60,000,000 years.

Colors Determine Distances.

A painstaking study of the colors of nine such groups in Auriga led to the conclusion that these two clusters constitute a system. The colors of stars in clusters are used by astronomers to determine their distances and Messier 38 and NGC 1907 were found to have very similar characteristics. Thus they were shown to be about the same distance from the sun, approximately 28,000 light years. In space they are only 24 light years apart.

A third and still larger cluster, Messier 36, is also believed to be physically connected with the other two groups for it too is about 28,000 light years from the sun. It is about 150 light years from the first two.

Bulls Given Credit for the Dairy Yield of Their Daughters

Washington.—Bulls are given milk and cream-ratings in a new publication of the United States Department of Agriculture.

Not that the records were directly established. Modern agriculture has done a lot of remarkable things, but as yet milk production remains a monopoly of the feminine members of the herd. Nevertheless the honors accorded to bulls in dairy breeds are based strictly on yield records.

The trick is done by studying the yields of daughters of the sires in question, comparing them with the yields of their own mothers made under similar conditions, and crediting the gain, if any, to the influence of "pa's folks." Thus if ten daughters of a given sire gave a milk-yield record of 10,000 pounds for the test period, while their mothers have a comparable record of 9,000 pounds, the thousand-pound difference is chalked up to the credit of the sire. This process is called "proving."

A proved sire with a good record as shown by his daughters' production performance is naturally in demand for the improvement of other herds of milch cows. In the department's list many animals are recorded as having died before the proof period could be completed. But many of them leave sons, which are sought after as suitably aristocratic alliances by owners of blooded dairy herds.

A list of this kind is as important to the dairy industry as the Almanach de Gotha is in European social circles.

Chance Rules Flarings of the Variable Stars

Cambridge, Mass.—Science's many futile attempts to predict the changes in brightness of the heavens' blinking giants, the long-period variable stars, have been ended by the explanation of two Harvard astronomers that only the law of chance governs their irregular flarings and fadings.

Leon Campbell and Dr. Theodore E. Sterne of the observatory staff say no mathematician can possibly anticipate the irregular changes of brilliance. Their research has also eliminated the belief of some astronomers that there have been important and widespread evolutionary changes of increase or diminution among these long-period variables.

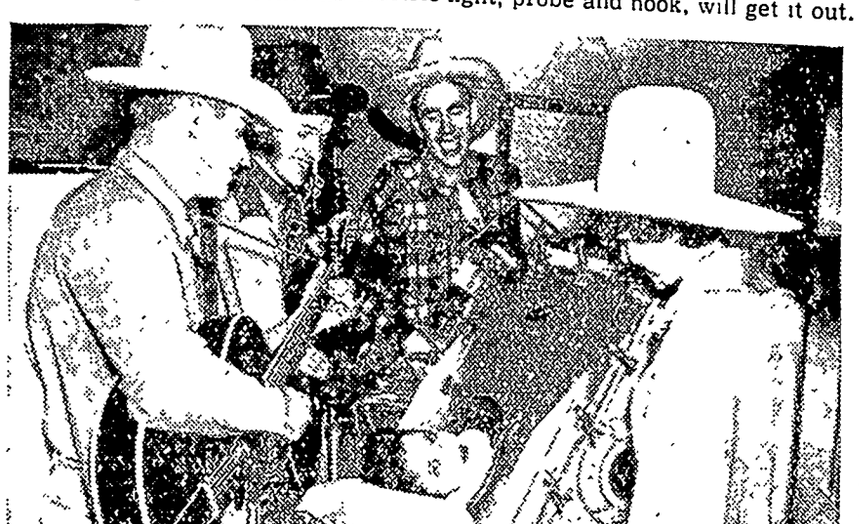
Machines Test Heart, Probe Lung

MEDICINE, like industry, has benefited by the advances of the machine age. Here the camera portrays a few of the ways machines aid in the battle for health. Above: An electrocardiograph testing the current generated by a patient's heart, in Philadelphia. Results of the test are measured on the indicator shown.

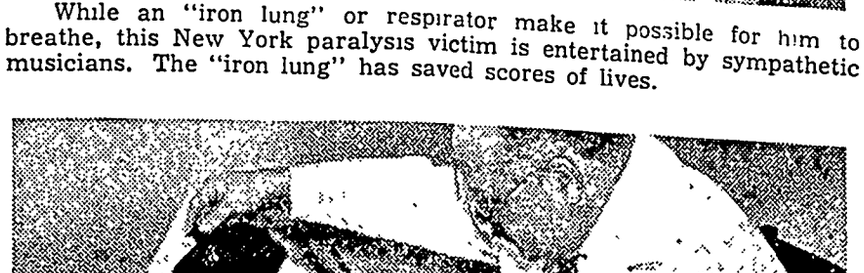
Radium poisoning has been cured by the machine above, which also detects amount in body.

Such painful afflictions as arthritis and rheumatism are treated by the articulator, machine pictured here. Miss Virginia Jones of Philadelphia is receiving the benefit of ultra short waves and exercise.

The patient shown has some foreign object in her lung. In the hands of an expert surgeon, the bronchoscope, which contains electric light, probe and hook, will get it out.



While an "iron lung" or respirator make it possible for him to breathe, this New York paralysis victim is entertained by sympathetic musicians. The "iron lung" has saved scores of lives.



This ultra-violet lamp cleans up erysipelas in three or four days

STAR DUST

Movie • Radio

★★★By VIRGINIA VALE★★★

SOMETIMES a bad break in Hollywood leads to a good one, which is just another way of saying that motion-picture producers are slow to make up their minds. Metro-Goldwyn-Mayer is going to star Willie Howard, the veteran comic of the stage, in a big musical extravaganza, because he was so funny in a skit in "Broadway Melody of 1938."

You never saw the skit, no matter how carefully you watched the picture, because it was cut out. When they first saw it, the officials of the studio didn't think it was so funny, and having to take something out to shorten the picture, they sacrificed what Howard was sure was the most hilarious skit of his career. Taking another look at the discarded film, officials have decided that it was very funny—so funny that they won't waste Howard's talents in the future.

—★—

With the season of big motion pictures only a few weeks old, four of the thirty or so pictures released have made outstanding hits. These are "Prisoner of Zenda" with Ronald Colman and Madeline Carroll, "100 Men and a Girl" with Deanna Durbin, "Thin Ice" with Sonja Henie, and Grand National's "Something to Sing About" with James Cagney. This last is a grand bit of nonsense in which the pugnacious Jimmy sings, dances, and fights his way through a delightful story, aided and abetted by Mona Barrie.

Deanna Durbin

—★—

Victor McLaglen roared into New York recently on his way to London to make a picture, and when Victor roars anyone would think the whole, boisterous good-humored American Legion was back in town. His high spirits are infectious and his magnetism so overpowering that when he introduced his friend Brian Donlevy as the greatest actor in the world, everyone agreed—for the moment.

—★—

Paramount goes right on announcing one picture after another for Frances Farmer, but Miss Farmer says that she is coming to New York to do a stage play called "The Manly Art" written by Luise Rainer's husband.

—★—

Out at the Universal studios where Henry McRae turns out thrilling serials faster than you can say "To be continued next week," they don't have much time to humor temperamental actors, but recently they had to give in and waste an hour or so while an actor had a tantrum. The actor was a lion. McRae thought he would save the lion from the exhausting period of posing while hot lights were adjusted, and brought in a stuffed lion as double. Jealous of this interloper, the lion broke loose from his cage, rushed on the set and tore the stuffed animal to bits.

—★—

Theater owners all over the country are begging Republic and Grand National officials to speed up production on Westerns starring Gene Autry and Tex Ritter, so that the warbling cowboys will have time to make personal appearance tours. The ever-growing popularity of these two lads is the sensation of the bookkeeping departments.

—★—

Ever since Claudette Colbert broke out in "She Met Him in Paris," as an accomplished figure - skater, all the other girls have wanted to show off their proficiency at winter sports. Ruby Keeler, recuperating from her recent illness, is planning for her first starring picture at R. K. O. The story is called "LoveBelow Freezing" and the big surprise is that skiing is the main feature of the picture.

Claudette Colbert

—★—

ODDS AND ENDS—Marlene Deitrich's eyebrows that used to extend way out like streamers return to normal in her new picture "Angel" and will probably start a new fashion . . . Jean Parker made herself a hat, copied from one Gary Cooper wore in "The Plainsman" and now she is very busy helping friends make copies of it . . . Ronald Sinclair has proven entirely satisfactory in roles intended for Freddie Bartholomew, so it is doubtful that Freddie will get anywhere with his strike for more money . . . Simone Simon is going to sing a difficult coloratura aria in her next picture. The studio just found out that she used to make records in France . . . Bing Crosby wants his friend, Babe Hardy, to play a dramatic role in his new picture, now that the team of Laurel and Hardy have split.

Lesson for November 7

CHRISTIAN CHARACTER AND PEACE

LESSON TEXT—Colossians 3:1-17.
GOLDEN TEXT—And let the peace of God rule in your hearts, to the which also ye are called in one body —Colossians 3:15.
PRIMARY TOPIC—In His Name.
JUNIOR TOPIC—In His Name
INTERMEDIATE AND SENIOR TOPIC—How May I Have Peace?
YOUNG PEOPLE AND ADULT TOPIC—The Christian Cure for Strife.

Armistice day is but a few days away, a fact which was probably in mind when the title of our lesson was chosen, for while it speaks of "Christian character" it also refers to "peace." But the peace spoken of here is the peace of God which is the result of peace with God and which issues in holy living. The only hope of this world for a real and lasting peace is in the winning of men and women to glad allegiance to the Prince of Peace, our Lord and Saviour, Jesus Christ.

Altogether proper is the close connection in Scripture between the most profound spiritual truth and practical holy living. Whether it be done in a land of enlightenment or in the midst of heathen darkness the teaching of the deep things of God brings forth in the receptive heart an appreciation of God's provision for our redemption, a consciousness and hatred of sin and an appropriation of victory in Christ. All three of these factors emerge in the study of our lesson.

I. "Seek Those Things Which Are Above" (vv. 1-4).

Faith in Christ makes us one with him in his death and in his resurrection. We are therefore to live in resurrection power. Our Lord has entered into heaven, and is there seated at God's right hand. If we are in him, if we have died and arisen with him, we are dead to the things of this world and our one desire is to "seek those things which are above."

The mystic union of the believer with Christ brings us so close to God our Father that we may say with the poet:

"Near, so very near to God,
Nearer I could not be,
For in the person of His Son
I am as near as He."

We are "hid with Christ in God." He is our very life. Note however that this union with Christ expresses itself in a most practical manner for we as Christians are admonished to

II. "Mortify Your Members . . . upon the Earth" (vv. 5-9).

The most spiritual Christian is the one who is most sensitive to sin and most earnest in his purpose that it should be mortified—which means "put to death." We may not temporize—we must not compromise with sin. Put it to death.

The list of things which are to be put away include a number of sins which we recognize at once as utterly inconsistent with a Christian profession. But note also that there are a number of them which are all too common among Christian people — covetousness, anger, wrath, malice, and so forth. Lying and shameful talk are condoned by some (and practiced by many).

III. "Put On the New Man" (vv. 11-17).

Christianity is positive. We put off sin—we put on righteousness. Knowing no lines of racial or creedal distinction—we recognize Christ as "all and in all." Then as "God's elect, holy and beloved," we are clothed with the Spirit of Christ. Tenderhearted, kind, lowly, meek, of a forgiving spirit, long-suffering; all these Christlike ways of living should appear in those who are hid with him in God. As the encircling band which holds together these beautiful and precious virtues, we have love, "the bond of perfectness" (v. 14).

These outward manifestations of our oneness with Christ have an inward controlling power—for in our hearts "the peace of Christ" is to "rule." The word means to serve as "umpire," as a referee in times of difficulty. There in the Christian man's inmost being we also find the "word of Christ" dwelling, really abiding, and not in scarcity but "richly." Small wonder that there is in such a heart a never-ending song which glorifies God's grace and which helps and admonishes others.

Our final verse sums up the life of the Christian, for in whatsoever he does there is but one motive, one purpose—a willing thankful response to the will of God. He does nothing that he cannot do in the name of the Lord Jesus.

The Thought of God

The thought of the Divine excellence and beauty, how far it is exalted above us and yet how sweetly it shines upon us.

Result of Experience

Experience is a grindstone; and it is lucky for us if we can get brightened by it, and not ground.—W. H. Shaw.

Victory

Victory belongs to the most persevering.—Napoleon.

A Trio of Triumphs

THE way to day-in, day-out chic for the woman who sews is shown in today's attractive new three-way plan. It goes deeper than the surface, you see, in the presentation of a sleek new slip. Ah, and it gives great thought to the surface, as you can't help but note in the two wing-side models.

Spicy New Model.

As shipshape as a Parisian streamline fashion and, in its own role, as important—that's the little number at the left above. It does wonders to give one that up and doing feeling that's handy to have around the house in the morning. You can repeat it time and again without fear of being repetitious; without losing your fondness for it. Anything in gay cotton: shantung, print, gingham, crash, will do nicely for this one.

A Congenial Slip.

Beneath a well-groomed surface hangs a perfect fitting slip! That's an old and honest notion and one Sew-Your-Own abides by religiously. Today's five piece version is as easy to put together as it is congenial to your comfort and outward superbness. Make two while you're about it: one with a plain top for everyday, the other with a bit of frou-frou for dress-up occasions.

Deft Design.

The "girl in the little green hat" wears a dress with many tucks in this her latest picture. It is the dress for you, Milady, to star in at familiar Fall festivities. Deftly but definitely it gives you emphasis where you want it; soft pedals worry-areas. No more willing and able frock than this was ever designed and it can be yours so easily. Thin wool is a smart material and it fits this frock's personality to a T. Let's sew and be seen places this Fall. Okay?

The Patterns.

Pattern 1389 is designed for sizes 36 to 52. Size 38 requires 4⅜ yards of 35-inch material, or 4½ yards, with long sleeves.

Pattern 1988 is designed in sizes 34 to 46. Size 36 requires 3⅛ yards of 39-inch material, plus 1 yard of ribbon for shoulder straps, and 1½ yards of edging for finishing upper edge.

Pattern 1392 is designed for sizes 14 to 20 (32 to 42 bust). Size 16 requires 2¾ yards of 54-inch fabric.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

New Pattern Book.

Send 15 cents for the Barbara Bell Fall and Winter Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns.

© Bell Syndicate.—WNU Service.

OF INTEREST TO THE HOUSEWIFE

Polishing Linoleum.—Dissolve a lump of sugar in the water when washing linoleum or oilcloth, and a brilliant polish will result.

* * *

Preserving Bright Color.—Cooking preserves or jelly rapidly helps to retain the bright color of the fruit. The addition of pectin shortens the necessary cooking time.

* * *

Just for a Change.—If you cannot afford to buy anything new for the house and you are just a little bit disinterested this fall, try changing the position of the furniture and see if that bored feeling will not depart.

* * *

Opening Jars.—A strap with a buckle on one end can be used to good advantage in opening glass fruit jars. Run the strap through the buckle and tighten it around the cap. This enables you to get a good grip on the lid.

* * *

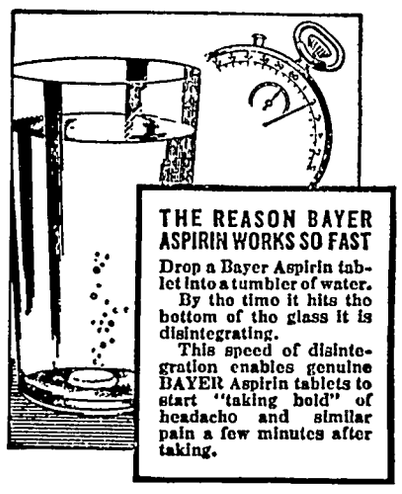
Small Molds for Pudding.—In place of one large basin for a steamed pudding, try several small molds, placing them all in one large saucepan. They will take half as long to cook as one large pudding.

* * *

Using Kerosene Safely.—One of the safest ways of using kerosene is to mix it with wood or coal ashes, then use a few spoonfuls of this mixture when starting or rekindling a fire. This can be stored for regular use in a gallon bucket or other suitable container.

HEADACHE REMEDY

STARTS WORKING IN SECONDS



THE REASON BAYER ASPIRIN WORKS SO FAST
Drop a Bayer Aspirin tablet into a tumbler of water.
By the time it hits the bottom of the glass it is disintegrating.
This speed of disintegration enables genuine BAYER Aspirin tablets to start "taking hold" of headache and similar pain a few minutes after taking.

All people who suffer occasionally from headaches ought to know this way to quick relief.

At the first sign of such pain, take two Bayer Aspirin tablets with a half glass of water. Sometimes if the pain is unusually severe, one more tablet is necessary later, according to directions.

If headaches keep coming back we advise you to see your own physician. He will look for the cause in order to correct it.

15c FOR 12 TABLETS

virtually 1 cent a tablet

WATCH the Specials

YOU can depend on the special sales the merchants of our town announce in the columns of this paper. They mean money saving to our readers. It always pays to patronize the merchants who advertise. They are not afraid of their merchandise or their prices * * *

BUILD A LEAN-TO

ght now is the time to pre- for winter snows and the er care of game. One very ef- ve shelter and feeding station he brush lea n-to It is simple, to make and almost every a farm has the brush on the for its construction.

irst, select the location. It uld be on the south or east a thicket, grove, orchard or e. Next select a small shrub tree that has a crotch 18 to 36 hes from the ground. Then her branches or cut branches saplings that are 10 to 15 feet g. Drag them to the north and st side of the forked tree or ub. Place the butt ends of the nches in the crotch and tie in ce. Spread the branches fan- e to the north and west. Place the feed in a feeder or on ground under the lean-to art to feed early so game will come accustomed to the location d will know where to go when avy snow falls.

IOWA'S ONLY FEDERAL FORT STILL STANDS

Located in the northeastern part of the Town of Fort Atkinson in Winneshiek County is the remains of Iowa's only Federal fort. on an area of 5 acres owned by the State of Iowa are the parts of the two-story barracks, three block houses and the powder house of the original fort

Fort Atkinson, a military fort. was built not to wage war, but to preserve peace In 1837 white settlers in Wisconsin began urging the chiefs of the Winnebago Indians to move their tribes west of the Mississippi River The Winnebagos were willing to move but were afraid of the Sac Fox and Sioux which roamed this territory

After the years of negotiations. General Henry Atkinson escorted the Indians to the Turkey River in northeastern Iowa and started construction of a fort to protect them from their enemies. Troops were maintained at the fort for 7 years but were withdrawn when the Winnebagos moved north into Minnesota

No atempt has been made by the State to restore the fort to its original condition because of the expense involved Several attempts have been made to have the Federal Government take over the area and establish it as a national monument The State maintains picnic facilities at the site for its many visitors

Ventura Cagers Play Shamrocks In First Home Game Friday Eve

SHAMROCKS WILL MEET VENTURA HERE IN FIRST HOME GAME

Lakers Will Open Season Here With A Double Header Ball Game

The Shamrocks will be seen in action for the first time this season on the home floor when the Ventura High School comes here this week Friday for a double header game. The first game is scheduled for 7:45 o'clock between the Little Shamrocks and the Laker Reserves.

Play Clear Lake Nov. 26th

The next game on the Shamrock schedule is at Clear Lake on Nov. 26th. This is the first of a number of class A schools that the Shamrocks will play this year.

HELLO, FOLKS!

A baby boy, weight 9 pounds, was born to Mr. and Mrs. Dwight Helps on Wednesday, Nov. 10th.

Bridge Club Met Thursday At Home Of Mrs. Thada

Mrs. W. L. Thada was hostess to the U-Delt-Em bridge club at her home last Thursday afternoon. High scores were won by Mrs. E. F. Jacobs, Mrs. R. A. Jorgenson and Mrs. A. H. Dulmes. Before the games started Mrs. E. G. Schaeffer read a beautiful poem on Armistice. Mrs. W. F. Missman was a guest. Refreshments were served after the games. After the club meeting Mrs.. Thada entertained Dr. Missman, Mr. and Mrs. Stanley Thada. Leona Larson. Viola Theimann and Marvin and Marjorie Lemke, for supper.

MASONIC FATHER AND SON BANQUET WILL BE HELD WEDNESDAY, DEC. 1

The Annual Masonic Father and Son Banquet will be held at the Masonic Hall at Garner on Wednesday evening, December 1st. All Masons are invited to come and bring their son or a guest.

Shamrocks Won Over Latimer Friday Night

SHAMROCKS GET OFF TO EARLY LEAD IN OPENER AT LATIMER

Little Shamrocks Win Their Game After Hectic Battle

The Klemme Shamrocks high school basket ball teams played their first games of the season at Latimer last Friday evening. They were accompanied by a large crowd of Klemme and Goodell fans.

The Shamrocks were all set for a stiff battle as it was generally supposed Latimer had a fast outfit and it appeared the forecast had been correct when Latimer dashed through for a basket in the first few seconds of play. But the Shamrocks came right back and in a barrage of shots that found their mark lead Latimer by a large margin in every period, piling up a 51 to 16 count at the final gun.

It was a new Shamrock team that stepped into play Friday night, as several regulars were lost through graduation last spring and the line-up has been shifted. Jorgenson has been moved from forward to the center post and the veteran guard, Schuldt, holds his old position Grosshuesch, a reserve forward during most of last season, but who saw action as a regular during the tournaments, and Trampel, also a reserve from last year, are holding down the forward positions. Lau looks like he has earned a steady job as guard as he played a fine game in that position.

Jorgenson lead the scoring spree by sinking twelve field goals and was closely followed by Trampel wih six. Schuldt sank three and Grosshuesch two Lau was too busy at guard and did not attempt a shot, although he has displayed great accuracy in practice scrimmages. Kluckhohn and Grange both saw action on the first string line-up.

The team is a practically new outfit but they seemed to "click" and are accurate on shots, getting an average of nearly one basket out of two tries Friday night. With stiff competition they may not look so good, but it's going to take a good team to stop them this year and they should go places.

Following is the box score of the first string game:

KLEMME—51

	FG	FT	F	TP
Grosshuesch, f.	2	0	3	4
Trampel, f.	6	3	3	15
Kluckhohn, f.	0	0	2	0
Jorgenson, c.	12	0	1	24
Schuldt, g.	3	2	2	8
Lau, g.	0	0	0	0
Grange, g.	0	0	0	0
TOTALS	23	5	11	51

LATIMER—16

	FG	FT	F	TP
L. Johnansen, f.	2	1	0	5
Lage, f	0	0	1	0
Reed, f.	0	1	1	1
Goldberg, c.	1	0	0	2
Henning, g.	1	0	3	2
Grummer, g.	2	2	0	6
TOTALS	8	4	5	16

KLEMME REFORMED CHURCH

Calvin Grosshuesch, Pastor

10:00 a. m. English Service
11:00 a m. Sunday School
8:00 p. m. Tuesday
Young Peoples Bible Class
8:00 p. m. Thursday
Mixed Chorus
8:00 p. m. Saturday
Junior Choir.
1:00 p. m. Tuesday
9:00 a. m. Saturday
Confirmation Class

All children who wish to take part in our Christmas program are requested to turn in their names Sunday.

In the curtain raiser the Little Shamrocks had a little difficulty in procuring a safe lead over the Latimer Junior High and the game was close throughout the four periods. Several of the Little Shamrocks experienced their first competition and two or three players displayed real ability. Barz, midget forward, cut loose and looped three baskets to lead the scoring for the Shamrocks and also contributed a free toss. The Latimer scoring was well divided. The Little Shamrocks took the opener 13 to 7.

Following is the box score of the game.

KLEMME—13

	FG	FT	F	TP
Kluckhohn, f.	1	0	4	2
Barz, f.	3	1	1	7
L. Stille, c.	0	0	2	0
Neuberger, c.	0	0	0	0
Trees, g.	1	0	0	2
Lewis, g	0	0	0	0
Grange, g.	1	0	4	2
K Stille, g.	0	0	0	0
TOTALS	6	1	11	13

LATIMER—7

	FG	FT	F	TP
McCormick, f.	1	0	1	2
Grummer, f.	0	2	0	2
Hambly, f.	0	0	0	0
Reed, c.	1	0	1	2

Jensen, g.	0	0	0	0
Traugott, g	0	0	0	0
TOTALS	2	3	2	7

M. E. BAZAR

The M. E Ladies Aid will hold their annual bazar and supper Tuesday, Nov. 30th, starting at 2:00 p. m.

All church members will be solicited for the food, as this is the time the Aid tries to make all the money they can for use somewhere in the church.

There will be fancy work—aprons and pretty rugs— a fish pond for the children—home made candy—and a big supper.

Bridge Party At Goodell

Quite a number of Klemme people attended a bridge party held at the Community Hall in Goodell Tuesday evening. Bridge was played at twenty-two tables and lunch was served following the games. High scores were won by Mrs. R. A. Jorgenson and A. L. Kingery

Reformed Ladies Aid Will Meet November 24th

The Ladies Aid Society of the Klemme Reformed Church will meet at the church parlors on Wednesday afternoon, Nov. 24 A pot luck lunch and coffee will be served.

Xmas Seal Meeting Called

All those who are to help with the Xmas Seals are requested to attend a meeting Saturday, Nov. 20th at the C. D. of A. Hall in Garner

President, Mrs Clarence Barnes; Vice Pres., Mrs. Hammil of Britt; Secretary, Mrs. Ray Roberts of Britt; Executive Secretary, Dr. W. F. Missman of Klemme; Treasurer, Wm Baggs of Garner.

All these and the various committees from the townships and the publicity committee are invited to attend this meeting and the supplies will be given out. A lunch will follow the afternoon meeting.

S. S. Class Will Have Dinner

The Good Fellowship Class will have a dinner at the M. E. Church dining room next Sunday, Nov. 21. You are invited.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington. — In this so-called modern civilization of ours when we are supposed to keep pace with progress, every one of us is confronted every day with some sort of government regulation or restriction. We are told what to do and what not to do and a good many politicians want to increase the number of things we are told to do.

Network of Spies

Included in this modern civilization is a perfect network of spies who bear official titles of one kind or another, and probably the most insistent of these spies are the agents of government who look after taxes. All of which is necessary because tax payers undoubtedly will dodge a little if they can get away with it. The federal government has a good many thousands of them; state governments have them and county and city governments maintain a veritable army of employees whose job it is to check up on taxpayers. They do their job thoroughly. Make no mistake about that. If the taxpayer does not come through in accordance with the orders of the tax collectors, there is plenty of punishment.

Which brings us to the point of and the reason for this discussion. It sets the stage for the question: If the government, national, state or local, is so punctilious about tax collections, the gathering in of people's money, why is it that government is not equally punctilious about the way the money is spent?. This question is very much to the forefront now. It is a question of paramount importance because of a proposal for governmental reorganization which President Roosevelt insists must be considered by the forthcoming session of congress. The federal government must be reorganized. The reason for this reorganization, according to the President's argument, is that the present structure is inefficient, wasteful, and generally quite unwieldy.

It is to be granted, I think, that much of the present federal government structure is inefficient, wasteful and unwieldy. Throughout the government one will find various agencies charged with the same responsibilities, doing things in opposite directions, winding and binding red tape around the citizens until some of them scarcely can get a hand free to mark their ballots. The whole thing needs a thorough going over but, as I see the picture, this going over should be done with a view to making governmental machinery workable and rebuilding only where hastily conceived governmental agencies and functions have demonstrated that they are acting as a deterrent rather than an encouragement to the nation as a whole.

* * *

I have no quarrel with Mr. Roosevelt concerning the need for changing some parts of the governmental machine. I have a very definite objection, however, to some of the changes he proposes. I object strenuously, for example, to his move to destroy the present setup for protection against improper spending of the taxpayers' money. Specifically, I can see no possible excuse for Mr. Roosevelt's demand that the general accounting office be made subservient again to the whims of politicians by placing that agency under the control of a political appointee, namely, the secretary of the treasury. That is exactly what is proposed, and if the President's governmental reorganization program is accepted by congress in its present form, the President of the United States, whether Mr. Roosevelt or his successor, again will be able to determine to a large measure how the taxpayers' money is spent.

Changes Proposed

That may appear to be an exaggerated statement. One may ask about the constitutional provision which requires that all appropriations shall be made by congress. This would seem to prevent executive mismanagement of the taxpayers' money. Such, however, unfortunately is not the case because we have had proof under President Roosevelt's administration what can be done when one political party has such complete control of the machinery of government. Congress appropriated billions. True. But had there been no general accounting office in existence, I doubt if anyone could have even guessed what would have happened to those vast sums of money.

It has been my privilege to watch operation of the federal government almost 20 years. Because of that experience, I think I am able to say that I am more conversant with the tricks to which politicians resort in getting money out of the treasury than persons who have not had an opportunity to study the government as it actually functions. And because of that experience, I am going to make the unequivocal statement that unless congress repells Mr. Roosevelt's plan to destroy the curb on trick and illegal spending, this nation and its citizens will pay for the folly in waste not now conceivable.

* * *

Someone might arise and say that my statement is unjustified because there was not such a terrific drain on the treasury before the general accounting office came into existence in 1921. My answer to that is that there was a tremendous drain on the treasury before 1921 when the accounting, auditing of bills and checks, was done by individual agencies of the government. The difficulty is that, except for war time agencies, the cost of running the federal government before the general accounting office was established was only about one-seventh of what it is now. None of the federal agencies then in existence were as large then as they are now; none had as much authority nor as great a scope of operations, and the bulk of the new agencies have been born in legislation that is haphazard and undigested to say the least. The older agencies of government have scores of workers who know how to handle their business. Regretfully, it must be said that most of the new agencies are controlled by, completely filled up with, men who are unfamiliar with the gigantic problems their jobs entail.

Drain on Treasury

Public sentiment is a thing difficult to understand. For example, millions of people became wrought up when President Roosevelt sought to increase the membership of the Supreme court of the United States by the addition of six judges of his own choosing. They rightfully fought back against the destruction of our judicial system. Fighting words characterized the criticism of Mr. Roosevelt and his New Dealers who sought to break down the system of checks and balances created in our government by the founding fathers when they provided for executive, legislative and judicial divisions of governmental authority.

So, I am wondering why thus far there has not been an outburst of vehement criticism of Mr. Roosevelt with reference to the proposed destruction of the check on spending. I am wondering, too, why people who complain so violently against spies in the form of tax investigators should not demand of their government equal protection for the funds after they have been taken away from the taxpayers.

* * *

There are two other agencies of the federal government which Mr. Roosevelt's reorganization plan will eventually destroy. Each has proved its worth. Each has a record of service to the nation and protection for individual citizens that cannot be ignored. I refer to the interstate commerce commission and the federal trade commission.

Two Good Ones Doomed

The ICC has supervised the railroads nearly half a century. It has compelled them to be fair when some individuals in the railroad industry were inclined to cheat or take advantage of an unorganized segment of the population. Sometimes there has been criticism of the commission for placing the railroads in a strait-jacket, but the good that the ICC has done far outweighs any damages it has caused.

Yet, it is proposed in the President's reorganization plan to take away the independence which has characterized the history of the operations of this agency. The President wants to place over the commission a political appointee responsible only to the Chief Executive.

Through all of the years I have worked in Washington, there has been a never-ending effort on the part of politicians to get their hands on the agency that controls the railroads. It takes no stretch of the imagination to see what would happen if the politicians were able to succeed in this direction. I am quite convinced that if the ICC is subordinated to the political philosophy of a presidential appointee, every one of us who uses the railroads will be paying toll. The toll will not go to the railroads but to the politicians.

With respect to the federal trade commission much the same can be said. Like the ICC, the trade commission is quasi judicial. It is an independent agency. Times unnumbered, it has stepped on crooked business and has forced business of this stripe to play the game within the regulations. On occasion, I have criticized specific actions by the commission as lacking in judicial consideration. By and large, however, I think no one can say unqualifiedly that the federal trade commission has failed to do its job in the interest of individual citizens —which, after all, is what government is supposed to do.

YOU CAN THROW CARE IN HIS FACE ONCE TOO OFTEN

WHEN you have those awful cramps; when your nerves are all on edge—don't take it out on the man you love.

Your husband can't possibly know how you feel for the simple reason that he is a man.

A three-quarter wife may be no wife at all if she nags her husband seven days out of every month.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

GET RID OF PIMPLES

New Remedy Uses Magnesia to Clear Skin. Firms and Smooths Complexion —Makes Skin Look Years Younger.

Get rid of ugly, pimply skin with this extraordinary new remedy. Denton's Facial Magnesia works miracles in clearing up a spotty, roughened complexion. Even the first few treatments make a noticeable difference. The ugly spots gradually wipe away, big pores grow smaller, the texture of the skin itself becomes firmer. Before you know it friends are complimenting you on your complexion.

Glove-and-Bag Ensemble Is Latest

By CHERIE NICHOLAS

LOOK to your accessories! This is a season when the accessory theme reigns uppermost in the minds of designers. Fashion demands accessory items that not only tune to a nicety to your costume but they must radiate glamor and be as elegant "as thy purse can buy."

So all-important, so outstanding has this idea of smart accessories become in the scheme of things, 'twould almost seem as if the clothes we wear were made to serve merely as a background to show off the swank, the splendor and romance of the added accents in way of jewelry, gloves, handbags and belts, headwear, neckwear, footwear and even the very "hankies" we carry or proudly display in capricious little pockets that may not be so utilitarian as they are decorative.

Especially do handbags reflect this trend of the mode to indulge in elegance and glamor. Leathers are softer, trimmings are more startling and to add to the fuss and furor now raging in behalf of accessories, designers have worked to achieve matching ensembles of bag and gloves which make it simple for the woman of impeccable taste to dress up to her standard.

The illustration shows a trio of perfectly stunning ensembles by David Lewis, American designer, noted for his leather artistry. Here gloves and handbags are matched in a manner so striking the entire costume takes on an air so smart there is none smarter.

Black with gold accents is the favorite language of fashion these times. It's gold and glamor that makes its way into the styling of the handsome and distinctive dressy afternoon and cocktail set to the right below in the picture. For this ensemble the softest of black antelope is used in a frameless skirt-type bag with black bengaline to line it. Gussets of gold kid are set in with inverted pleats both front and back. The soft handles have the "feel" of luxury and the slide-fastener closing adds the practical note. The matching black antelope slip-on gloves are hand-stitched and have gold details, but the back of the glove is devoid of any knuckle stitching which cites an important trend this season.

Tiny perforations are one of the newest style notes in leather. You will undoubtedly see bag-and-glove sets as pictured to the left above at the smartest places. Black perforated antelope soft as a kitten's ear is used for this ensemble—the air-conditioned idea carried out even to one's accessories. The bag is beautifully lined with slipper satin. The short pull-on gloves to match are handstitched and have a corded binding at the wrist but no stitching on the backs.

One of the loveliest of the Lewis tailored bags (see pictured to right above) is simple and squarish in shape, with white cross-stitched whipped edges. The handles are set on the bag with tiny cross stitches, which is the only trim. A slide-fastener gives a wide opening for convenience. This bag comes in grand fall accessory colors and is made of antelope, lined with bengaline. Short pull-on gloves with matching cross stitches around the fingers and the entire glove make this set a striking example of how American designers are keyed to create what the American women want and will wear. Such lovely accessories thrill us with the knowledge that we are correct even to the fingertips.

KNIT THIS SUIT

By CHERIE NICHOLAS

A two-piece suit that looks like a three-piece one, such is this smart outfit of lustre knitting yarn. It is knitted in a waffle pattern in a manner that makes it firm and reliable in wearing. The wide lapels and jabot are knitted separately and then sewn to the jacket. A smart cut-away line makes the jacket take on a trimly tailored and up-to-the moment style.

LAME HEADS LIST OF PARIS FABRICS

Lame heads the list of important fabrics in the Paris couturiers' winter collections, for fabric designers have adapted the metallic material for broader use than ever before.

Lame is no longer simply lame. There are flower print lames in colors, simple heavy gold and silver cloths draped into enchanting evening gowns, iridescent materials with glowing silky stripes; "gold dust" lames; plaid and checkered metallic fabrics and lame moires.

Velvet in all its forms from the sheerest of chiffon velvet through Lyons and even corduroy are distinctive and feature in costumes for wear at every hour of the day Cut velvets backed with colors or metal tones provide luxurious evening fabrics

Four-Way Costume Is Back in New Wool and Velveteen

The four-way costume returns this fall with added popularity in a new plaid wool and velveteen version that is especially appropriate for college or general school wear.

There is a two-piece plaid dress of the shirtwaist type that comes in black, brown, wine or green, with a boxy swagger velveteen jacket and skirt with front panel of the predominant color of the plaid

The velveteen jacket is practical in that it may be worn with other dresses and skirts.

Sequins for Glitter

Glittering sequins embroidery trims hundreds of new fall frocks. Among the motifs which brighten sober dresses are stained glass window patterns, fireworks designs and Louis XV bowknots.

STAR DUST
Movie • Radio

★★★By VIRGINIA VALE★★★

FOR months you will be hearing about the great success of the film "Stage Door," partly because it is such an entertaining picture, but more because it is proving a turning point in the careers of the many young actresses who appear in it.

Katherine Hepburn, so long tottering on the brink of whimsy and oblivion, returns to the early forthright manner of her great success, "Morning Glory" and really tugs at your heart-strings Ginger Rogers proves to be a fine dramatic actress. Andrea Leeds and Lucille Ball make dramatic bits stand out so effectively that they have already been rewarded with leading roles. Constance Collier, for many years a great idol of the London and New York stage, proves that she can be equally effective in motion pictures.

Katherine Hepburn

—★—

Jack Benny has every reason to be proud of his wife's motion-picture debut. In Paramount's "This Way Please," Mary Livingstone tosses nonsensical lines about as deftly as she does on the nation's favorite air program. This picture also serves as the film debut of Fibber McGee and Molly, those pleasant homey folks of the radio, and brings back Buddy Rogers. He isn't as young and exuberant as he used to be, but he can still lead a band. Crowded as the picture is with big-time favorites, two youngsters manage to walk off with a large share of the honors. Betty Grable is a little bombshell of vivacious beauty and Rufe Davis proves to be the most hilariously-entertaining of all hillbillies with an imitation of a man sicking his hound dogs on a pig in a potato patch.

—★—

Decision on putting little Leatrice Joy Gilbert, daughter of the late John Gilbert, in the leading role of "National Velvet" is still in abeyance, but she is assured a future in films. She will make her debut in "Benefits Forgot," an ambitious production in which Walter Huston will play the lead at Metro-Goldwyn-Mayer.

—★—

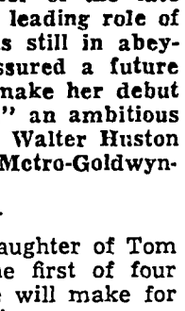
With Ruth Mix, daughter of Tom Mix, starting on the first of four cowgirl pictures she will make for Grand National, this young company is assured more Westerns for release during the coming year than any other company. Tex Ritter is making eight musical Westerns for them, and Ken Maynard is coming back from his tour with the Cole Brothers circus to make eight dramatic Westerns for them.

—★—

Frances Dee retired from the screen long enough to have two babies and bring them up to the toddling age and when she returned to play in "Souls at Sea" she was not at all sure that she wanted to go on with her career. Now, however, she finds that working doesn't keep her away from her babies very much and she enjoys being able to swap professional studio talk with her husband, Joel McCrea. Paramount is equally enthusiastic over her return and will put her in he lead of "Dream of Love."

—★—

Ernst Lubitsch, Gary Cooper and Claudette Colbert have all been marking time while Paramount officials searched for just the right actor to play a very important role in "Bluebeard's Eighth Wife." They were getting discouraged, when they happened to go to a party where "The Prisoner of Zenda" was shown, and as soon as they saw David Niven they chorused "That's our man." Luckily, he was just on his way back from England, and Sam Goldwyn to whom he is under contract had no immediate plans for him.



Gary Cooper

—★—

ODDS AND ENDS—The Wafner Brothers are in a frenzy because the Mauch twins are growing so fast, they are outgrowing some scenarios written for them . . . Lionel Barrymore has gone off to England to work in Robert Taylor's picture being filmed at Oxford . . . Norma Shearer expects to get started on filming "Marie Antoinette" any year now when she can get just the actors she wants in her supporting cast . . . Rumor has it that Cary Grant will be known as number one comic of the screen when "The Awful Truth" with Irene Dunne, and "Bringing Up Baby" with Katherine Hepburn are shown . . . Joan Crawford wishes that fans would write and tell her what sort of role to play next. She does not want to sing or dance, though she does both well, but will try anything else her fans suggest.

Interpreters of the Mode

SO LONG as you Sew-Your-Own, Milady, just so long will Yours Truly strive to interpret the mode for you. Today the trio brings you frocks for every size (from four years to size 52) for almost any occasion. Each has been designed to bring you the ultimate in style in its particular class and all claim a new high in simplicity and comfort.

Ultra-Smart Dress.

It's nice to know you're easy to look at even if the occasion is only another breakfast session. That's why the ultra-smart dress at the left is so handy to have. Note the clever detail all the way through even to the inverted skirt pleat. See how beautifully the sleeves set-in—you just know at a glance how simple it is to put together. Cotton, of course, is the material.

Typical of Youth.

The surest way to be a big little-body is to wear dresses that are as expertly planned as the grown-ups'. The little number above, center, has the smart styling of a sub-deb's frock. It is typical of youth's freshness and activity, and is one model that gets little girls' complete endorsement. It is the number one dress for the number one sweetheart in anybody's family.

An Orchid to You.

Do you think of a charming sorority tea with lots of atmosphere and plenty of style when you look at the handsome new two-piecer above, right? Would you like it made in one color and material, or, perhaps with a topper in gold lame or satin combined with a skirt of a rich dull fabric? Why not make it yourself to suit your own fancy and step into a swell little world of glamour crowded with fans and fun and festivity?

Pattern 1401 is designed for sizes 36 to 52. Size 38 requires 4½ yards of 35-inch material.

Pattern 1366 is designed for sizes 6, 8, 10, 12, and 14 years. Size 8 requires 2⅜ yards of 39-inch material, plus 1¾ yards of machine-made pleating to trim, as pictured.

Pattern 1396 is designed for sizes 32 to 44. Size 34 requires 1⅞ yards of 39-inch material for the blouse, 1⅞ yards of 54-inch material for the skirt.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Drive, Chicago, Ill. Price of patterns, 15 cents (in coins) each.

New Pattern Book.

Send 15 cents for the Barbara Bell Fall and Winter Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns.

© Bell Syndicate.—WNU Service.

Smiles

Enthusiasm

"Was my father very violent when you asked if you could marry me?"

"Was he! He nearly wrung my hand off!"

"The best way for a man to get out of a difficulty is to square his shoulders resolutely and say 'I will,'" remarks a writer. Not if he does it in church.

That's Fitting

"So your name is McDonald?"

"Yes."

"And you want to change it to Laurie Maurice Stevenson. Tell me why you want to do so."

"It's my wife's idea. She thinks I ought to have the same initials that are on our spoons and towels."

"And," said the instructor to the class as he finished his lecture, "if the parachute doesn't open, that is known as jumping to conclusions."

Favorite Recipe of the Week

Dinner-in-a-Pie

1 veal kidney
1 cup pearl onions
4 small white turnips
2½ cups cooked meat, diced
2 small carrots
1 cup tomato soup
½ cup liquid or gravy
½ cup peas

Trim and dice kidney. Prepare onions, turnips, carrots. Cook kidney and vegetables 10 minutes in boiling salted water. Drain, saving ½ cup liquid to thin soup. Fill baking dish (1½ quart) with meat and vegetables. Add pepper and salt. Add tomato soup and ½ cup liquid. Cover with your favorite pie crust.

Still Coughing?

No matter how many medicines you have tried for your cough, chest cold, or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with any remedy less potent than Creomulsion, which goes right to the seat of the trouble and aids nature to soothe and heal the inflamed mucous membranes and to loosen and expel the germ-laden phlegm.

Even if other remedies have failed, don't be discouraged, try Creomulsion. Your druggist is authorized to refund your money if you are not thoroughly satisfied with the benefits obtained from the very first bottle. Creomulsion is one word—not two, and it has no hyphen in it. Ask for it plainly, see that the name on the bottle is Creomulsion, and you'll get the genuine product and the relief you want. (Adv.)

All Serve It

A brave soul is a thing which all things serve.—Alexander Smith.

CONSTIPATED?

What a difference good bowel habits can make! To keep food wastes soft and moving, many doctors recommend Nujol.

INSIST ON GENUINE NUJOL

Copr. 1937, Stanco Inc.

"FIVE *Minus* TWO *Leaves* FOUR"

WRONG? Well, yes—and no. The arithmetic of your school days taught that "If Mary had five dollars and spent two . . ." three dollars remained.

But that is mathematics—not shopping! In managing a home . . . guarding a limited family income . . . we've simply got to do better than Mary did. We must sharpen our buying wits . . . ascertain where the dollars of extra value lurk . . . take five dollars to town and get much more for the money spent.

Fortunately, there are ever-willing guides right at hand—*the advertisements in this newspaper.* Advertised merchandise is often exceptional value merchandise. It makes dollars S-T-R-E-T-C-H.

High School News

Parents and other visitors are invited to attend classes and visit school during the week of November 15 to 19, Mr. Galbreth announced. We have not had many callers this year at school

—Allen Barz

—K H S—

People who attended P. T. A. Thursday night were greeted by two new lights on the front of the school house. These lights will be a great help on the evenings when there is an entertainment at the school house.

—Allen Barz

—K H S—

An inspector from the Iowa Insurance Service Bureau made a tour through our school Thursday, November 11, taking note of our electric wiring and other possible fire hazards. We will receive a letter from him soon. in which he will report on his visit here and make recommendations for improvement.

—Allen Barz

—K H S—

November 11. Armistice Day, Mr. Galbreth gave a talk before the High School assembly. He told us that the people knew when the armistice was signed, that firing had ceased, but this did not mean, necessarily, that the war was over. There was much celebrating in each town and city that day.

At 11 o'clock all the assembly faced the east and thought of the soldiers who died on the battlefield.

—Gertrude Grosshuesch

—K H S—

The Klemme High School held an election for cheer leaders November 11. Elaine Buntenbach. Dwaine Johnson and Juanita Pavey were elected. A pep assembly was held Friday afternoon November 12, prior to the game with Latimer.

—Gertrude Grosshuesch

—K H S—

On Tuesday of last week the girls physical training class had a kitten ball tournament. The seniors won, beating their runners-up, the juniors.

—Irene Becker

—K H S—

Doris Johnson, of the beginning typing classes. typed twenty-nine words a minute with no errors on a five minute test last week.

Grade School News

Grades 1 and 2

The second graders read a train story in their Weekly Readers this week. We decided to learn more about trains. One day we went down to the station to watch the train come in. The next day some children brought boxes to school. We are making engines. Later we will make a train that we can really play in.

William and Ardel brought their toy trains to school.

We have an aquarium in our room. There are goldfish, a tadpole, newts, turtles and snails in our aquarium.

Grades 3 and 4

We have a new oilcloth on our paint table and a new linoleum on the floor. We hope they will help us keep the art corner clean.

Several boys and girls have books on their bookshelves. Miss Azeltine is reading to us about Raggedy Ann and the Magic Pennies.

We used our Reading and Language periods to plan our P.T.A. program.

We plan to begin our clay dishes in Art class today.

Several new articles have been added to the Museum.

Grades 5 and 6

Barbara Johnson, Reporter

Junior Buntenbach had a birthday this week. Tuesday he treated each one of us to a "drum stick." Some of us had never eaten one before.

Barbara brought us a large yellow chrysanthemum for our room on Monday. The chrysanthemum plant. which Julia brought sometime ago has many pretty flowers on it now.

The sixth graders have finished their unit on the "House Fly." They made booklets showing the stages in the life the fly and telling why flies are harmful and how to get rid of them.

We surprised Miss Irvine with a peanut shower Thursday afternoon.

Miss Irvine has finished reading the book. "Pioneer Twins," and is now reading "Doctor Dolittle's Garden."

Grades 7 and 8

Arlene Buseman. Reporter

We are studying the way the seeds of wild flowers and weeds are scattered Each member is bringing different specimens. Our room is divided into four groups. Each group has a chairman. After we have identified the seeds, we are going to look up material on them. Each group is going to make a booklet.

The patrolmen for this week are Melvin Coobs and Russell Wade.

Those who received one hundred per cent in spelling last week are: Charles Bock. Billy Zabilka and Arlene Buseman.

RABBIT ALIASES

A rabbit by any other name would mean a luxurious fur coat for milady. Calling attention to one phase of the economic value of wildlife in general, the American Wildlife Institute lists more than 60 common trade names under which rabbit and hare pelts find their way to the fur market.

Beneath such high-sounding names as Baltic White Fox, Chinchillette, Mendoza Beaver and Polar Seal, for instance, will be found a rabbit or hair skin Baltic White Fox is nothing more than natural rabbit or natural White Hare Chinchillette is chinchilla-dyed rabbit. When the pelt of the rabbit is sheared and beaver-dyed, it becomes Mendoza Beaver and Polar Seal skin comes not from the Polar branch of the circus and stage-struck family but is merely rabbit, dyed and treated to resemble the skin of a northern fish eater.

Rabbit pelts, after different treatments and under various trade names, reach the market in imitation fox, leopard, lion, tiger, mole, ermine, sable, mink, muskrat and squirrel

Of course, rabbit and hare pelts are not the only skins that assume other forms on the fur market The pelts of many other wildlife animals have their values enhanced by careful treatment to make them resemble the fur of some more rare specimen. So vast is the field that a survey made by the United States Biological Survey credits the nation's wildlife with supplying $150,000,000 worth of fur and meat each year.

The fur crop not only provides employment to many professional hunters but a source of income to farmers and their families. Many a farm lad has earned more than his spending money in the healthful outdoors gathering the pelts that are destined to grace a svelte figure or graceful neck

---

In the old days of the draft—stories are still popping off about them—an examiner was putting a large colored boy hrough the usual set of of questions.

"Any previous military experience?" he asked.

"Ah should say Ah has," replied Sam proudly

"Ah is an old timer, dat's what Ah is. Why, boss, Ah been shot at three times befo' dey eveh was a war"

A tub of butter made by F. N. Fabricius of the Dairy Department, Iowa State College was given a perfect score at the eleventh World Dairy Congress in Berlin, Germany, recently

---

Experience is something you get while looking for something else.

PREPARE NOW

Now is the time to perpare for winter feeding of game birds. Perhaps one of the best feeding stations and shelters is the corn shock type. It is known as the "teepee" or "wigwam" feeding shelter and when placed in or very near a natural thicket, weed patch, or grassy slough, gives excellent service To make the shelter, find 3 strong sticks, each about 8 feet long Tie the sticks together about two feet from the smaller ends. Then set up he frame, spread the poles 3 or 4 feet apart at the base and stick them into the ground a few inches. Next place 5 to 10 bundles of corn fodder, cane, sudan grass, or tall millet around the frame. Tie the bundles together near the tops. Spread the bundles at the bases to leave 5 or 6 openings at the base of the teepee.

If the ears are left on the corn stalks, or the seed on the cane, sudan grass or millet, the birds will help themselves readily. In this manner also the food is not covered up with snow and can be reached by the game birds

NEWS FROM GOODELL AND VICINITY

GOODELL U. B. CHURCH
Rev. W. E. Dye, S. T. D., Pastor

Sunday School 10:00 a.m.
Morning Worship 11:00 a. m.
Sermon subject "The Rural Church."

This is in keeping with the request of the Iowa Farm Bureau Federation for the observance of Harvest "Town to Country" Sunday.

America is a rural country. Many of the Rural and Small Town public schools are equal to the city schools.

The old plodding farmer has disappeared and the machine farmer has taken his place. Today the farmer uses more brains than muscle His is respected as any profession The farms have produced most of our leaders. Traveling over the country one sees the farms have improved more rapidly than the home, social and religious life of the country.

In this mesage we will study the "Fields of Services for the Rural Church," and the Churches' place in the Life of any Rural Community

We have already discovered about fifteen of these fields.

We invite the public to worship with us Sunday in the Sunday School at 10 00 and the morning preaching service at 11·00. Do not forget the Christian Endeavor at 7 30

Mr and Mrs. Ted Dutheridge left Tuesday on a vacation trip through some southern states Willard Nelson will have charge of their place and do the work while they are away.

A large group of neighbors and friends held a corn husking bee at the Floyd Franklin home and picked his corn for him Mr Franklin lost all but the thumb from one of his hands in a corn elevator a couple of weeks ago.

The high school young folks had a roller skating party at Belmond Monday night in honor of the Wallace young folks, who are moving to Missouri There were about 30 attended and Rev. Dye Chaperoned the group

The young married people's class and their leader, Mrs. Wallace, held a party in the Church basement Tuesday evening About 30 were present and spent an enjoyable evening A fine lunch was served These parties will be held once each month. Mrs Wallace resigned as teacher as she is moving away and Billie Butts was elected to act as teacher in her place

A miscellaneous shower was held at the Chas Halfpop home Saturday afternoon in honor of their daughter, Gladys, who was married recently to Al McNutt of Chasta. Minn

Mrs McMullen and daughter drove to Forest City Thursday and spent the day with relatives. ,Mrs. E. J Nelson is helping care for the new baby at the home of her sister in Hampton.

Archie Conklin spent the week end with his parents, Mr and Mrs Chas Conklin.

Mr and Mrs. Franklin, and son, Donnie, Mr. and Mrs. Ted Dutheridge and Mr and Mrs. Wm. Johnson

The High School young folks held a S. S. Class party in the Church parlors Friday night About 30 attended. They were chaperoned by Rev. Dye A "pot luck" lunch was served and all reported a fine time.

Mr and Mrs. R. E. Hofer and family and Mr. and Mrs. Anson Avery atended the Armistice Day dance in Britt Thursday night.

Mr and Mrs O. Evenson and family entertained relatives from Fertile Sunday.

LIBERTY TOWNSHIP NEWS

Mr. and Mrs. Orville Bridges and daughter were Sunday guests to dinner at the Sumner Trumbull home.

Mr. and Mrs Awalt Jahnke and son visited Sunday evening at the Henry Jahnke home.

Mr. and Mrs. Frank Brozik and Margie visited Sunday at the Harlow Helps home.

Mrs Herman Bridges and daughter, Irene, and Mrs. Martin Barz and daughter, Maxine, visited at the Orville Bridges home Thursday

---

When man visits other worlds. The weird dangers that must be faced when science invents a vehicle for a voyage to the planets A color page in the American Weekly, the magazine distributed with Next Sunday's Chicago Herald and Examiner.

Mrs Clifford Montgomery was visiting with Mrs. Clarence Bachman Monday afternoon.

Mildred Busse is absent from her school duties in district No. 5 as she has the whooping cough.

FISHING SEASON NEARS CLOSE

Fishing in inland waters will close on November 30th According to the new laws, seasons on all species of fish except bullheads, suckers, carp, buffalo, quillback, gar and dogfish closes on that date Those named may be lawfully taken at any time of the year.

Conservation authorities declare the 1937 fishing season the most successful in years. Constant stocking and improved water conditions are responsible for the good fishing, officials stated.

1st Man: "Say, old fellow, what about lending me a dollar for a day or so."

2nd Man: "Sorry, but the dollar I keep for lending purposes is out today. I'll put your name on the waiting list, though."

SHOULD COOL MILK AND CREAM NOW SAME AS IN SUMMER TIME

Increasing cold weather will bring several problems to the milk producer. Barns, which were open and well ventilated during the spring, summer and fall months, will now be closed and danger of milk absorbing barn odors will be greater.

Milk should be removed from the barn as quickly as possible, suggests C A. Iverson, of the Dairy Industry Department, Iowa State College. While silage passing through the cow does not apparently affect the flavor of milk, this feed, if fed at milking time or shortly before, may cause off-flavor in milk.

Another problem in milk production which is often overlooked during cooler weather is that of properly cooling milk. As the air gets colder it is often incorrectly thought that milk likewise gets cooler and hence needs less arificial cooling "Water is the greatest cooling medium," Iverson declares, "and milk should be cooled in all seasons"

Reports from some creameries indicate that some of the best quality cream was received during the intense hot weather last summer because special care had been taken by producers to properly cool their mik and cream.

Most of us prefer the bliss of ignorance to the folly of wisdom.

More lies are now being told about the age of liquor than about the age of women.

Radiology a Young Science, but Makes Enormous Strides

What the X-Rays Have Done for Diagnosis and Cure

Chicago, Ill.—Radiology, the study and use of both X-rays and radium, is a comparatively young science, but it has turned out to be a precocious youngster. Reports to the International Congress of Radiology in Chicago showed the enormous strides it has made.

Household words today, X-rays were unknown 43 years ago, and radium was first obtained only 39 years ago. Treatment of cancer is the chief meaning these potent substances have in the minds of most persons. This is perhaps their most important field of usefulness but by no means their only one.

Diagnosis of disease has been made far more certain and accurate by means of the penetrating X-rays. "For example, the diagnosis of disease by X-rays has practically revolutionized the study and knowledge of tuberculosis and nearly all cases of this once-dreaded disease are now diagnosed by X-rays," declared Dr. Arthur C. Christie of Washington, D. C., president of the congress. "Most stomach ulcers are diagnosed by the X-ray, as are bone and kidney diseases, afflictions of the sinuses, of the teeth, and even the brain.

Every Organ and Bone Visible.

"In fact, all organs of the body as well as the bone structures can now be made apparent to the radiologist for his diagnosis. By injection of air and gas into the ventricles of the brain, tumors or other brain diseases may be studied from the X-ray film findings. Intravenous injections of certain dyes into the veins outline the gall-bladder.

"Foreign bodies, such as nails, coins, and other metals occasionally swallowed by children, can be accurately located by the X-ray so that the bronchoscopist may extract these dangerous objects.

"Inflammatory lesions, such as boils, carbuncles, muscular arthritis, are often cured or reduced by X-ray therapy."

Sudan Grass Is Safe for Pasturage Only When Long

Madison, Wis.—Farmers who have pastures of sudan grass, which frequently contains prussic acid, are warned by the Wisconsin College of Agriculture here to make sure that the grass is more than a foot high before cattle are allowed to graze on it.

Short sudan grass, especially when dark in color, has been found to contain dangerous amounts of the acid, one of the deadliest poisons known and blamed in the past for a number of cattle deaths.

Ancient Folsom Man Is Still Among the Missing

Washington.—Folsom man is still missing.

So says Dr. Frank H. H. Roberts, Jr., of the Smithsonian Institution, who has returned from a third summer spent hunting this elusive American.

Folsom men, widely regarded scientifically as the oldest known inhabitants of our continent, hunted big game perhaps 10,000 years ago, but are traced today only by their trail of stone weapon points and by a Colorado campground where a group of them rested.

This year, Dr. Roberts says he worked toward what seems to have been the center of their camp. He found more of their stone work but no human burials. So—Folsom man is still missing.

Keystone State Beavers Increasing Rapidly

Harrisburg, Pa. — Ninety-six beavers, imported into Pennsylvania where they had been extinct, have multiplied to well over 15,000, according to the last beaver count.

The 96 animals were brought in between 1917 and 1924; no beavers had been found in Pennsylvania for the 70 years prior to 1917.

The beavers represent, it was stated, a decided economic asset, for, now that trapping is permitted, the annual take ranges upward of 6,500 beavers worth more than $20,000.

"Vodas" Name Given to Stammer-Making Electrical Device

Controls the Voice for Trans-Atlantic Phone

New York.—If any readers are now going through the process of learning one new word a day to increase their vocabulary the word "vodas" is recommended. It won't be found in any dictionary now in existence and is as new as today's newspaper.

To save playing the old game of asking "animal, vegetable or mineral?" one should hasten to add that vodas is an instrument through which the electrical impulses of your voice must pass when, and if, you next talk by trans-Atlantic radio telephone.

The vodas does many things to your voice, including the creation of an artificial stammer. And it can turn your normal voice volume into the roar of a super-giant if necessary.

Vodas is a newly coined word composed of the first letter of each word in the following phrase: "voice-operated device anti-singing." A vodas, S. B. Wright of the Bell Telephone laboratories of New York explains, represents the radio and electrical engineers' answer to the unique and intricate problems which arise at the links between land telephone lines and their wireless trans-oceanic counterparts. Not the least of these problems is the fact that radio noise is much more severe than wired telephone noise.

Creates the Needed Lag.

Best results on combined radio and wire telephone circuits could be achieved if first one speaker said all he had to say and then allowed the other to talk. Actually, in ordinary conversation there is a quick interchange of talk which is disastrous for good reception if both speakers want to talk at once. And that is where the "stammer" mechanism of the vodas comes in. It causes an almost imperceptible delay before the circuits will accept the voice of Mr. A, for example, after Mrs. A finishes telling him how little Johnny is. A one-sixth of a second lag is all the electrical vodas needs to handle the conversation in normal fashion.

Modern radio telephony requires a man in a control room to handle the two voices speaking, in a fashion somewhat like the operator in a radio control room in a broadcasting station. The control man's job includes adjusting the receiving relays to the particular amount of noise existing; adjusting the transmitting and speech volumes properly; selecting the proper hangover or delay time for the two voices and perhaps increasing the sensitivity of the transmitting side of the vodas in the case of talkers who either speak so softly that the electrical impulses created by their voice are unable to trip the relays, or else people on wire lines having weak volume and more than the usual amount of line noise.

Whey, Once Likened to Squeal of the Pig, Has Numerous Uses

Cambridge, Mass.—A multitude of uses have been found for whey, formerly milk's equivalent of the famous pig's squeal that couldn't be set to work.

Sweetened and dried, whey, a by-product of cheese manufacturing, makes an excellent candy filling. "Whipped cream" can be made from whey. Flavor and food value of canned or homemade soup is improved by the addition of powdered or condensed whey. Tomato juice and fresh whey when mixed form an "attractive" beverage or starting point for a variety of tomato soup.

This was the essence of a report by B. H. Webb of the United States bureau of dairy industry before the Food Technology conference at the Massachusetts Institute of Technology.

Velvet Is Crush-Proofed by Formaldehyde Dip

Washington.—Velvet, the delicate cloth of royalty and of milady's evening gowns, that crushes and mats so easily, will shortly appear in new crush-proof form, Science Service reports.

Winfield W. Heckert of Ardentown, Del., has found that dipping velvet in formaldehyde, long famous as an antiseptic and disinfectant, by a special process, makes the velvet fibers resistant to crushing.

Formaldehyde-treated velvets retained their shape perfectly, Heckert claims, when crushed for hours under heavy weights exerting a pressure equal to that exerted by the average person sitting in a chair. The untreated fabric was badly crushed when treated in similar fashion.

Strange Pals of the Animal Kingdom

Animals, like human beings, often make strange friendships for which there is little explanation. For instance, a cat usually looks upon a rat as a one-course dinner, but Buddy, the kitty shown above, has made quite a pal of a white rodent. Both are owned by Joseph Lantigne, of Albany.

Marco, an Australian "honey bear," romps with his friend, Napoleon, the police dog. They're in Hollywood.

Nellie was a New York spaniel. She roamed the streets homeless and hungry. Her eight puppies all died shortly after they were born, because the poor thing had been undernourished. But in a home for stray animals Nellie found eight new-born kittens who had lost their mother. She adopted them and they adopted her, proving that there is always an outlet for mother-love.

Pictured below Nellie and her feline brood is another odd animal affection. The Bible says that there'll come a time when the lion and the lamb shall lie down together, and here is the King of Beasts practicing up for the occasion with his bosom pal, a little black dog. Their owner is Mrs. A. J. Nannetti, of Oakland, Calif.

Furs or feathers, it really makes little difference. Above, an Australian Tabby throws a paw about her pal, the cockatoo. At right is a hen in a Chicago suburb. Deprived of her chicks, she adopted a brood of collie pups.

And just to prove once more that mother love knows no bounds in animal life, we present this kind-hearted kitty who adopted a brood of frisky yellow chicks.

Enemies by tradition, this dog and fox are friends in fact.

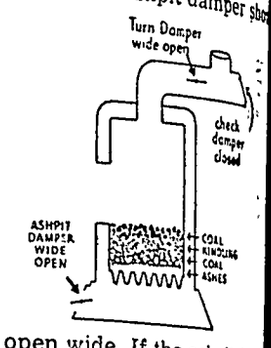
Home Heating Hints

By John [illegible]
Heating Expert

IT'S really no trick to build a good furnace fire quickly and easily.

Leave a layer of ashes about two inches deep spread on the grates. Spread about two inches of coal over this layer of ashes. Over the coal, place a generous amount of kindling—newspapers and light, dry wood.

The turn damper in the smoke pipe and the ashpit damper should

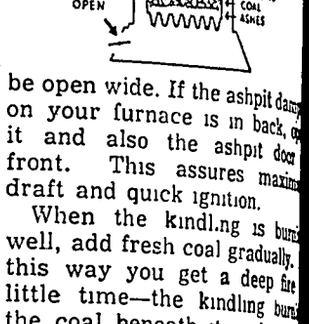


be open wide. If the ashpit damper on your furnace is in back, open it and also the ashpit door in front. This assures maximum draft and quick ignition.

When the kindling is burning well, add fresh coal gradually. In this way you get a deep fire in little time—the kindling burns the coal beneath it, and the fire, in turn, igniting the coal above. From time to time, add additional fuel until you have a solid, clear fire. When this is done, close your dampers and close the ashpit door.

WNU Service.

THE REASON HEADACHES ARE RELIEVED SO FAST



THE REASON BAYER ASPIRIN WORKS SO FAST

Drop a Bayer Aspirin tablet into a tumbler of water.

By the time it hits the bottom of the glass it is disintegrating.

This speed of disintegration makes genuine BAYER Aspirin tablets start "taking hold" of headache and similar pain a few minutes after taking.

All people who suffer occasionally from headaches ought to know this way to quick relief.

At the first sign of such pain take two Bayer Aspirin tablets with a half glass of water. Sometimes if the pain is more severe another dose is necessary [illegible] according to directions.

If headaches keep coming back we advise you to see your physician. He will look for the cause in order to correct it.

The price now is only 15¢ for twelve tablets or two full doses for 25 cents—virtually, only a cent apiece.

15¢ FOR 12 TABLETS

Safe Pleasant Way To Lose Fat

How would you like to lose pounds of fat in a month and at the same time increase your energy, improve your health?

How would you like to lose that double chin and your too protruding hips and at the same time make your skin so clean and clear that it will compel admiration?

How would you like to get your weight down to normal and at the same time develop that urge to activity that makes work a pleasure and also gain in ambition and keenness of mind?

Get on the scales today and see how much you weigh—then get a bottle of Kruschen Salts which will last four weeks and costs but a trifle. Take a teaspoonful every morning—more or less diet—get a little regular gentle exercise and when you have finished the contents of this first bottle weigh yourself again. Now you will know the pleasant way that the 6 salts of Kruschen have helped you lose unsightly fat and you'll also know that the 6 salts of Kruschen have supplied you with glorious health.

But be sure for your health's sake you ask for and get Kruschen Salts. Get them at any drugstore in the world and if the results one bottle brings don't delight you—do not joyfully satisfy you why money back.

© Western Newspaper Union.

Lesson for November 14

THE CHRISTIAN MINISTER

LESSON TEXT—I Timothy 4:6-16; II Timothy 2.1-4.
GOLDEN TEXT—Neglect not the gift that is in thee.—I Timothy 4:14.
PRIMARY TOPIC—Two Brave Preachers
JUNIOR TOPIC—Two Brave Preachers.
INTERMEDIATE AND SENIOR TOPIC—Why and How Ministers Are Trained
YOUNG PEOPLE AND ADULT TOPIC—The Christian Minister in the Modern World.

"The Christian Minister"—there is no greater calling among men, but none is more often the target for misrepresentation and abuse by those outside, and all too often the victim of the carelessness, weakness, and sin of those within its own circle On the other hand it has had, and continues to have to this day, within its ranks such a noble army of faithful and sacrificial men as would probably be impossible to duplicate in any other calling.

The study of today's lesson should arouse in the hearts of Christian people a high regard for the ministry as a calling, and a kindly purpose to aid their minister to live up to its glorious possibilities. Every true minister who studies it will find his spirit humbled before God in thanksgiving for the privilege of service, and in prayer that he may be forgiven for his failures and empowered for the work of the future.

The need for such a study is indicated in the verses just preceding our lesson, namely, I Timothy 4:1-5, where we read of the express warning of the Spirit of God that in the latter times there should be teaching and preaching which departed from the faith, substituting men's wisdom for God's Word. One who looks around him cannot but feel that we have fallen upon that evil day.

I. What to Preach (I Tim. 4:6-9). The "good minister of Jesus Christ" preaches the words of God. To do this he must himself be "nourished" by them. Spare your preacher the necessity of running errands, serving on boards and committees, and encourage him to study his Bible.

Preacher, are you studying God's Book, learning and teaching "good doctrine"? If so you will have no interest in or time for "profane and old wives fables."

II. How to Preach (I Tim. 4:10-12).

1. Sacrificially (v. 10). The man who regards the ministry as a nice, easy, respectable occupation is not in the same calling as was the apostle Paul. In fact, there is nothing to indicate that he is in the Christian ministry at all, for in that calling there is labor and suffering of reproach. This is not something to be borne in a spirit of resigned submission. The minister knows and "trusts in the living God," and gladly bears every responsibility with which God may entrust him.

2. Authoritatively (v. 11). The minister of Christ speaks for God. In doing so he teaches with assurance and is to "command" men in the Lord's name. All too often the servants of the Lord feel and act like "grasshoppers" (see Numbers 13:33), and everybody else regards them as feeble and impotent, when they should be "strong in the grace that is in Christ Jesus" (II Tim. 2:1).

3. Actively (v. 12). Whether young or old, the minister is to be an example, a pattern in his active daily life. Note how discriminating is the scripture. He is to be a pattern for others in speech, manner of living, in love, in spirit, in faith, and in purity of life.

III. Who Is to Preach (I Tim. 4:13-16).

1. The man who is divinely called (v. 14). God called Timothy; men recognized that call and ordained him to give his life to the exercise of his God-presented gift. This is the right order for our day.

2. The man who is properly prepared (vv. 13, 15-16). The ministry calls for the best preparation that a man can possibly obtain He must know how to read God's Word, both publicly and privately. He is to be skilled in exhortation, and in teaching Christian doctrine.

In conclusion, let us consider the portion from II Timothy 2 which properly presents the work of the minister as that of a soldier at war against the world, the flesh, and the devil. He must be prepared to bear hardness, and he must not yield to the temptation to get into "sidelines," no matter how dignified and profitable they may be. His sole business is to serve and to please God.

What Education Means

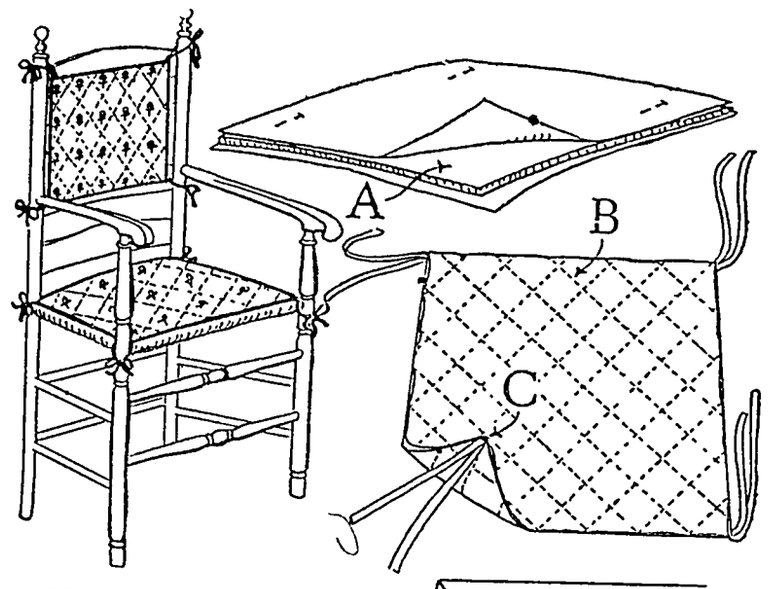
The real object of education is to give children resources that will endure as long as life endures; habits that time will ameliorate, not destroy; occupation that will render sickness tolerable, solitude pleasant, age venerable, life more dignified and useful, and death less terrible.—Sydney Smith.

A Happy Man

Happy the man who sees a God employed in all the good and ill that checker life.—Gowper.

HOW TO SEW

by Ruth Wyeth Spears



There May Be Many Reasons for Making Quilted Chair Pads.

IF ALL the reasons for quilted chair pads were lined up in order of their importance the most intangible reason of all might head the list. Yes, it is quite likely that any decorator, amateur or professional would place atmosphere at the top. But then it is also possible that first rating might be given to the reason that the pressure of slats across the backs of chairs is softened by quilted pads. Then, though it might not be mentioned, it is a known fact that worn out cane seats are sometimes replaced with inexpensive composition seats which may be disguised by gay quilted pads.

Chintz, calico or gingham chair pads are in fact one of the simplest and most inexpensive ways of adding color and charm as well as comfort to a room. Such pads are often used on the backs of chairs and not on the seats, and especially for side chairs, the seat pads used without any back covering. In making such small things as these it is quite easy to do the quilting on the machine Or, if you wish to take the other point of view about it, the work of quilting them by hand would not consume an unreasonable amount of time. There is no doubt that handwork has a certain quaintness that machine work lacks.

The pads shown here are made with one layer of sheet wadding between the two layers of the chintz. The edge bindings and ties are made of bias tape. Cut the three layers of the pad material exactly the size and shape you want them to be when finished. Place the sheet wadding between the two layers of covering material as shown here at A. Either pin or baste in this position, and then quilt, either by hand or by machine, as is shown here at B. Make the ties by stitching the lengthwise edges of the bias tape together, and then tack them to the corners of the pad as at C before it is bound. Now, bind the edges, sewing the ties right in with the binding as shown here at D.

Every Homemaker should have a copy of Mrs. Spears' new book, SEWING. Forty-eight pages of step-by-step directions for making slipcovers and dressing tables; restoring and upholstering chairs, couches, making curtains for every type of room and purpose. Making lampshades, rugs, ottomans and other useful articles for the home. Readers wishing a copy should send name and address, enclosing 25 cents, to Mrs Spears, 210 South Desplaines St., Chicago, Illinois.

Friendly Talk

BUT after all, the very best thing in good talk and the thing that helps it most is friendship. How it dissolves the barriers that divide us, and loosens all constraint—this feeling that we understand and trust each other, and wish each other heartily well! Everything into which it really comes is good. It transforms letter-writing from a task into a pleasure. It makes music a thousand times more sweet. The people who play and sing not at us, but to us—how delightful it is to listen to them!

Yes, there is a talkability that can express itself even without words. There is an exchange of thought and feeling which is happy alike in speech and in silence. It is quietness pervaded with friendship —Van Dyke.

Bridge Luncheon Given At Clear Lake Country Club

Mrs. C. G. Waterman, Mrs. A. H Dulmes, Mrs. P. M. Wilson and Mrs. R. A Jorgenson were guests at a one o'clock bridge luncheon given at the Clear Lake Country club by Mesdames Marks, Hogan and Bemis of Garner. Mrs. Waterman won high score, Mrs. Frank Zeiger of Garner, second high score, and the door prize was won by Mrs. Schissel of Garner.

REMEMBER THE SONG BIRDS

Persons desiring to hold song birds throughout the winter should place feeding devices out now. Food should be supplied regularly, even before snows cover up natural food, to acquaint the birds with the location. Many birds will remain which would otherwise leave the vicinity if they know food is available at all times.

Local Happenings

Klemme and Vicinity

Rev. Fred Griewe is visiting at the Emil Patet home this week.

Rev. Wm. Zabilka was at Clear Lake Monday on business.

Mrs Ben Swalve is listed among the ill this week. Mrs. Wm. Meyer is taking care of her.

Clare West. of Red Oak, spent Thursday visiting at his home here.

Lew Neuberger is reported to have been very ill during the past week.

Ben Lau has returned to Klemme after a stay of several weeks at Tracy, Minn.

Mrs. Otto Baack of Tracy, Minn is visiting this week with Klemme relatives and friends.

The Standard Bearers held their monthly meeting at the M. E. Church Tuseday evening.

The force at the Northern Lbr. Co. are working at their annual task of taking inventory this week.

Dr. and Mrs. E. G. Schaeffer spent Sunday visiting with his mother at Forest City.

Mr and Mrs. Henry Lau of Tracy. Minn., spent the latter part of the week visiting with relatives in this community.

Rev. Zabilka was at Garner, Friday helping a group there solicit for the retired ministers' fund of the Northwest Iowa Conference.

Mr. and Mrs. Ben Katter and Mrs. R. W. Elder drove to Buffalo Center Tuesday to attend an uncle's farm sale.

Mr. and Mrs. John Waddingham and son, Billie, went to Des Moines Saturday and visited at the Elmer Fuller home until Sunday evening.

The Misses Marie Blank and Ruth Stille were dinner guests of Mrs. P. W. Johnson and children Monday evening

Edmond Josten is the owner of a new Master De Luxe Chevrolet which he purchased from the Klemme Auto Company last week.

Mr and Mrs. Bob Giesel and Mrs. Esbeck, of Andrew, came Friday evening and visited until Sunday at the E. F. Jacobs home.

Dr. and Mrs. A. H. Dulmes and son. Dick, were dinner guests at the Rev. Grosshuesch home Tuesday.

Mr. and Mrs. John Larson and Mr. and Mrs. Harry Larson drove to Iowa City Sunday to see Miss Bessie Larson who was sick.

Mr and Mrs. Alex Early of Goodell, visited at the Elmer Larson home west of Klemme Sunday evening.

The Albert Tanner family, who have been living in the house on the Kraus farm north of town, have moved to Garner and live across from the Sales Barn

ORDER XMAS CARDS AT ONCE—as low as 2c, each complete with envelopes and with your name printed. Times Office.

Mr. and Mrs. Lloyd Paris, of Armstrong, visited at the A. L. Kingery home over Wednesday night. The ladies are sisters.

Mrs. Lena Schroeder is having a quilting bee at her home every day this week. Each day a different group of ladies come to her home to quilt.

Mr. and Mrs C. G Waterman and daughter, Marian, and Mrs. Mary Waterman were Sunday dinner guests at the T F. Mitchell home in Swea City.

Mrs. Mary Mutch and daughters, Ada of Grundy Center and Mrs. Filkins of Iowa City, spent Thursday visiting with Dr. and Mrs A H Dulmes.

CHRISTMAS CARDS—50 cards for $1, complete with envelopes and with your name printed. Mail orders 10c extra. Times Office.

Mr and Mrs C. G. Waterman, Mr. and Mrs. Wm. Keraus and Mrs. T. F Mitchell of Swea City, drove to Iowa Falls Wednesday and attended the funeral of J. J. Nachazel

Otho and Verl Keraus, of Swea City spent last Thursday visiting with their parents. Mr. and Mrs. W. C. Keraus. The business places at Swea City were closed for Armistice Day.

Ed. Medaus and family who have been over near Duncan during the summer where Ed. worked on a farm, have moved to the tenant house on the Dr. Zinn farm northeast of Klemme.

Mr. and Mrs. W. L. Sherwood are this week enoying sunshine and warm weather down in Texas. Sunday they drove to Iowa Falls where they were joined by relatives and all drove down into Texas for a trip.

Dr. and Mrs. D. P. Anderson and daughter, Neva Ann, accompanied by Grandma Haefner, who is now 92 years old, drove to Harris, Ia, last week Sunday where they spent the day visiting with Rev. and Mrs. Ralston and family.

Mr. and Mrs. Ted Bode of Woden entertained the county school superintendents and their wives, and the coaches and their wives, at a party Monday evening. Supt. and Mrs. W. H Galbreth and Coach and Mrs. A. L. Kingery of the Klemme schools atended.

Mr. and Mrs. Emil Patet drove to Hayfield last Thursday to visit Mrs Victor Waldeck, who was sick. Mrs Waldek was later removed to the Park Hospital for a major operation Mrs. Patet is at Hayfield doing housework at the Waldek home

P. W Johnson, accompanied by his sister, Mrs. Walter Lau, of Albert Lea, Minn., left Friday for Paxton, Ill., being called there by the serious illness of their mother. From here they drove to Waterloo where their brother also joined them.

Mrs. Eelko Buss is ill with pneumonia at the home of her daughter, Mrs. Ed. Becker. Mrs. Buss had been at Belmond taking care of her brother when she became ill. Her condition Tuesday morning was reported much better.

Since John Larson built a new house on his farm southwest of town, the old house was moved across the road east of its former location. Recently the old house has been remodeled. Stained shingles were put on over the siding and the place looks very neat. Mr. and Mrs. Elmer Larson occupy the house.

NO MORE FROGS

Iowa has a closed season on frogs After November 30th and until June 1, 1938, it will be unlawful to take frogs. It is unlawful to ship frogs out of the state at any time.

hamrocks Keep Record Clean In Second Winner

N HANDILY IN ROUGH AND TUMBLE CONTEST

Shamrocks Down Ventura Reserves 19 to 9

n what proved to be a rough tumble contest between two ky teams, Coach A. L. King- 's Klemme High School Sham- ks downed a scrappy Ventura e, 44 to 13. The Shamrocks rted strong and ran the count 13 to 7 by the end of the first iod In the second period, how- r, Klemme went on a fouling ee and Ventura, who seemingly ld not miss on gift shots, made tougher for the boys. At half- e the score stood at 18 to 13 in or of the Shamrocks.

Coming out for the second half Shamrocks led by Schuldt and genson dropped in counters m all over the floor, and kept ball so much in their posses- n that Ventura failed to score roughout the entire second half.

Leading the Klemme scoring s Jorgenson, with 16 points, ile Schuldt was right behind h 15 Trampel, slim forward o is proving to be the real ds. accounted for 7 points and osshuesch got 4 before he was ced out on fouls early in the rth quarter. Kluckhohn, who ne in for Grosshuesch hit the p once.

Grell was the main gun for ntura, getting two field goals d four free throws for a total of oints. Lineweaver, who threw a nch in the machinery in the et of Klemme at Ventura last r, was held to one lone field l.

Following is the box score of first team game:

LEMME—44

M. E. AID BAZAR AND SUPPER

The annual Bazar and chicken supper will be next Tuesday Nov. 30th. Bazar will start at 2 00 p. m, supper at 5 30 until all are served.

MENU
Fried Chicken — Potatoes
Gravy
Baked Beans
Pickles — Jelly — Rolls
Carrot and Cabbage Salad
Pumpkin, Apple or Cocoanut cream
Pie — Coffee

There will be a fish pond for the children and a home made candy booth

Come and get a new apron, new rug or fancy work to give for Christmas

Supper 40c or 2 for 75c—25c for grade children

Everybody is invited to come and enjoy the supper.

TRAFFIC VIOLATORS APPEAR IN LOCAL COURTS THE PAST WEEK

Carl Patro, Garner, appeared in Justice Suckow's court and was fined $10.00 and costs, being charged with speeding with a truck

Silas Branick. Britt, was fined $2 00 and costs by Justice Suckow for failing to have identification lights and proper reflectors on his truck

H. J Stille, Klemme, was fined $5 00 and costs in Justice W. C. Keraus' court being charged with failure to have truck properly equipped with lights

All of the above offenders were apprehended by State Highway Patrolmen.

BOYS WILL MAKE TRIP TO CALIFORNIA

Lester, soon of Mr. and Mrs George Buseman, and Franklin, son of Mr. and Mrs Henry Buseman. left today, Wednesday, on a trip to the west coast. The boys expect to take in all the places of interest and plan to spend the winter in California.

Thanksgiving Day

By RAYMOND PITCAIRN
National Chairman Sentinels of the Republic

Again in 1937, as through many years of its history, our Nation celebrates from ocean to ocean, from Lakes to Gulf, the most typical of all American holidays.

It is the observance of Thanksgiving Day—a celebration first dedicated to reverend gratitude for bountiful harvests; then later to appreciation of other blessings and promises of the passing years.

Never has America been without cause for such gratitude. For despite frequent problems, America remains, in a turbulent world, a land of faith and of fulfillment. That is true today, as in the past.

While other nations follow the hideous chimera of war, America remains at peace with her neighbors.

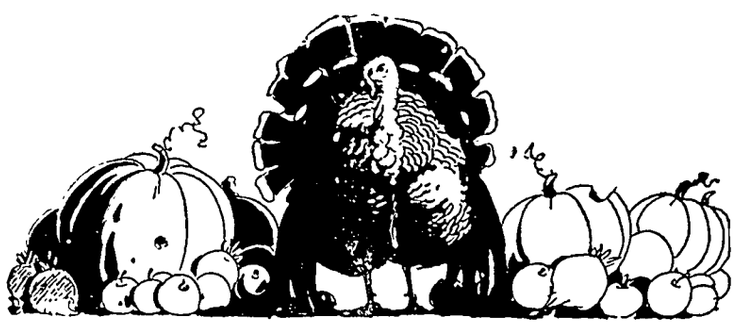
While other nations sacrifice the happiness of their people to the strutting show of nationalistic ambitions, the American people still believe in personal opportunity and freedom.

While other nations bow and scrape to the pretensions of dictators and their cliques, America is still dedicated to the proposition that all men are equal, and entitled to life, liberty and the pursuit of happiness.

While other peoples suffer and die in the clutch of desperate economic and political experiments, Americans still enjoy the highest standards of life of any nation.

There is the glow of promise, too—not only of plentiful harvests, but of changing attitudes by our national leaders which presage freer opportunity for production of the many requirements of the American people, and wider reemployment for those on whose enterprise and labor all production depends, whether at the plow, the lathe or the desk.

For these things Americans are grateful. For these they offer thanks to a Providence which blessed their efforts to make the earth yield more generously and to create by their own unfettered energy, the greatest, the freest and most bountiful land on earth.



A Thanksgiving Prayer

For what we have, though small it be,
We thank thee, Lord.
For the simple joys of serenity,
We thank thee, Lord.
For the gentle touch of the friendly hand
Of those who love and understand,
We thank thee, Lord.

Of all thy gifts the greatest three
Are friendship, love and fidelity.
Let others pray for the harvest's yields,
For the golden grains of the fruitful fields,
Humbly our prayer to thee we send
That when we've reached our journey's end,
Someone may say, "Farewell, good friend."

W.P.R.

Goodell Cagers Won Hard Battle From Swaledale Tuesday Night

GOODELL HIGH SCHOOL SPLITS WITH SWALEDALE IN GAMES

Goodell First Team Wins By Six Point Margin In Tuesday's Game

A number of basket ball fans from Klemme and vicinity took in the double header game at Goodell Tuesday night.

In the opening game the Swaledale reserves won their game 27 to 2`

In the first string game Goodell jumped into a lead in the first quarter when the score stood 8 to 2 for Goodell. The boys from Swaledale played on even terms in the next quarter and the half ended 12 to 6 for Goodell.

The third quarter was all Swaledale's and the visitors started right off with a couple of baskets and ran the score up to 12, while Goodell registered one free throw and the quarter ended Goodell 13, Swaledale12.

Kenny Boller, Goodell's speedy little forward found the basket several times to soon put his team ahead with a safe lead. Hofer, veteran guard, also came through and the game ended Goodell 22, Swaledale 16.

RECEPTION THIS WEDNESDAY EVENING FOR MR. AND MRS. ROY SWANSON

A reception is being held this Wednesday evening at the Garner Opera House for Mr. and Mrs. Roy Swanson, newlyweds.

Miss Lydia Haberkamp, daughter of Mr. and Mrs. Wm. Haber-Kamp, and Mr. Roy Swanson, son of Mr and Mrs. Oscar Swanson, were married this Wednesday afternoon at the Elltown Reformed parsonage by Rev. Huenemann.

Kelly's orchestra will play for the dance this evening. Details of the marriage will be published next week.

The cold storage holdings of meat on Sept. 1st were 17 per cent less than a year ago.

A THANKSGIVING SUGGESTION

W. G. WILLIAMS BUYS GARNER HERALD FROM FRANK CLARK

Transaction Again Puts Garner In The One Paper Class

Last Wednesday, W. G "Bill" Williams closed a deal whereby he became the owner of the Garner Herald published by Frank Clark for the past five years.

Mr. Williams entered the newspaper business at Garner in 1926 when he purchased the Garner Leader from Ted Tierney, and the following year he bought the Garner Signal from Frank Clark and for five years Garner had but one paper, the Garner Leader and Signal. a consolidation of the two papers.

Five years ago Mr. Clark returned to Garner and started the Garner Herald and was assisted in the business by his son, Harold, who is now publisher of the paper at Bancroft.

The time has passed when two papers are necessary in any town, and Garner will be much better served with one paper. There have been many consolidations in the past few years and there are now but a very few towns in the state which support more than one paper. "Bill" is a veteran newspaper man and has given Garner one of the best weekly papers in North Iowa.

CHRISTMAS SEALS WILL BE MAILED OUT THIS FRIDAY

Mrs. Martha Bredbenner, chairman of the Klemme Christmas Seal campaign, announces that the seals will be mailed out Friday. When you receive the packet of seals you may keep as many as you want to and then return the balance and the remittance in an envelope which should be left at the Lau Implement Store or handed to Mrs. Bredbenner.

Each township and town has a chairman and committee to look after the annual distribution of stamps.

MASONIC FATHER AND SON BANQUET WILL BE DEC. 1

The annual father and son banquet will be held at the Masonic hall at Garner on Wednesday evening, December 1st. All Masons are invited to bring their son or a guest. Tickets may be procured from Sumner Trumbull.

HELLO, FOLKS!

Mr. and Mrs. Clifford Montgomery are the parents of a seven pound baby girl born to them on Sunday morning, November 21st.

Rye seeded this fall will provide pasture earlier next spring than any other crop.

SOME ACTIVITIES OF THE NORTH IOWA AGRICULTURAL EXPERIMENT ASSOCIATION

The North Iowa Agricultural Experiment Association located at Kanawha is completing its seventh year of operation The Botany and Plant Pathology Section of the Iowa Agricultural Experiment Station is in charge, aided by ten directors chosen annually by the 500 owners.

More and more use of the field station for research has resulted in experiments on sugar beets, potatoes, corn wheat, oats. barley, flax, alfalfa, soy beans and occasionally other crops.

More surprising is the greatly increased use of the field station by its members resulting this year in the erection of a special service building. All of the land cannot be used for experiments in any one year and that not experiments is used for increase of new varieties and making hybrid seed corn. First distributions of Iowa 444 and D67 oats and Komar spring wheat were made from this field station. Velvet and Iglos barley, Bison and Redwing flax have been increased for distribution.

Besides a corn drier the new service building contains a cleaning and treating system for small grain which is the first of its kind in Iowa. It automatically cleans and treats by the new dust method 120 bushels of wheat, oats or barley per hour.

The first cooperative production of hybrid seed corn in Iowa was started at this station in 1933 and continues to be an exceedingly popular service Orders for hybrid corn are limited to ten bushels per member and to Iowa hybrids 931, 939 and 942. The orders must be made in February or March so that acreage of each hybrid can be determined in advance of planting time. The orders are filled at harvest time, and each member dries and processes his own corn. Yields above normal in 1937 made it possible for the first time to fill all orders and have seed left over.

Iowa hybrid 931 was the only one produced at the station from 1932 to 1935, Iowa hybrid 939 was added in 1936 and 942 in 1937. Also due to the favorable year the Association has more than enough foundation stocks for its own use. These certified foundations stocks for making any of the Iowa hybrids, as well as shelled, graded and treated seed corn of hybrids 931, 939 and 942, are on sale at the farm.

GIRL SCOUT NEWS

We have been studying about rocks and minerals and Mrs. Schaeffer showed us pictures of famous English buildings, including Westminster Abbey and the Old Curiosity Shop. We planned our badge work for the winter. We began sandpapering our new screens We hope to have them to use by Christmas.

Worship Service 11:20 a. m.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG WASHINGTON, D. C.

Washington.—Supporters of the New Deal, as well as its opponents, are watching a new experiment by President Roosevelt with more than passing interest. They are watching this experiment because of various circumstances, including obviously its political phases, for they realize that the President has stepped out into a hitherto untrod field, unplowed ground, in this new experiment.

New Experiment

Chiefly because it is something entirely new and not because any one yet can tell what is going to happen, I want to report this week on the President's plan to have his eldest son, James, his No. 1 secretary, serve as a clearing house between the Chief Executive and some eighteen or more government agencies. Roosevelt, the younger, has been designated by the President to sit down once each week with heads of each of the enumerated agencies and talk over their problems, iron out those which he can help solve, co-ordinate the work between them as far as he is able to do so, and, most important to the men with whom he deals, decide which questions confronting these units of government may be matters for the President's personal consideration.

It is a big order. But Jimmy, as he is known around here, is a big man, at least physically, because he stands something like six feet, one inch. He is twenty-nine years old.

The audiences at the White House with Jimmy have already started and the agency heads who have sat through the conferences seem well pleased. At least, there has been no criticism yet, no signs of jealousy or indications of dissent among those who are called upon to take up their problems with the young secretary to the President. In fact, I have heard in only a few places a revival of the punning that went out a couple of years ago when the "Roosevelt for King" game was in its heyday, and Jimmy was laughingly labeled as the crown prince. Thus, the plan surely seems to have started off most auspiciously. But as I said, what success, what trials and tribulations, await it, no one can say.

* * *

Undoubtedly, President Roosevelt has started a plan of action that has much to be said in its favor. It has, of course, many possibilities of trouble, and there surely is argument against having the White House secretariat determine policy when the President has been elected to that job. Yet, at this time, credit must be argued along with signs and portents of trouble.

Much in Its Favor

First, let us recognize that the office of President of the United States is a man-killing job. There is nothing like it anywhere else in the world. There are not too many men who can stand up under the load of work and worry that is continually on the shoulders of the head of the nation. There is no way possible for him to escape it. Vacations? Sleep? Absence from Washington? Not a chance. The work and worry is with him always, every minute out of his twenty-four hour day.

Thus, if there is any way that can be devised to lift some of the burden, it ought to be done. No way has been found heretofore, however, and the millstone continues around the President's neck.

On the other hand, this is a democracy. In the opinion of many persons, there already is too much power lodged in the hands of individuals who were not elected, but were appointed, to office. The President has vast power and he has to unload it somewhere into the hands of those he appoints. Nevertheless, throughout the federal government scores of men and women exercise very great authority over your life and mine who were personally selected by the President—for whom none of us voted when we voted for a presidential nominee. Result: red tape, rules and regulations, do's and don'ts galore, until we hardly know whether we can eat our food without transgressing or failing to comply with some federal regulation.

All of that is by way of saying that by implementing the relationship between the President and men and women whom he has appointed to office through the insertion of an added wheel of authority, there lie potential changes in all of these governmental policies. And there lies the possibility of changes being made, for better or for worse, without the President having knowledge of them.

What of the personal side—the feelings of the officials who have to deal with a young man who can speak, to some extent at least, for his father, the President? As I said earlier, thus far none of the conferees have given any indication of disturbed feelings. They may never have any thoughts along this line. Yet, I venture this observation: if they don't resent having the President's son tell them what to do, or not to do, at some time or other, the officials concerned will be unlike most other human beings.

* * *

The Department of Agriculture is quite pessimistic about the business outlook for next year. In a series of reports, analyzing general conditions, which the department issued the other day, it made no effort to conceal its belief that there is something wrong in the business situation far beyond the recent violent decline in the quotations of the stock markets.

Business Outlook

These reports and conclusions take on considerably more weight when it is recalled that several other agencies of the government, notably Secretary Roper of the Department of Commerce, have sought vainly to make it appear that business is "good." At the same time, I think attention ought to be drawn to the fact that Secretary Wallace of the Department of Agriculture is striving to have congress pass legislation to aid the farmer. It is just possible that he thinks his objectives can be achieved more easily if the congressmen are made to believe that general business and agriculture are taking a real tailspin. That is the politics of the situation, but business reports spread on the pages of newspapers seem to show that a bad slump lies ahead.

Recently, I wrote in these columns how business was as spotted as a leopard; that some firms were making more money than ever before, and how some others were getting by only because the volume was large and faced difficulties if the volume declined. The Agriculture department statements, based now on facts and figures, show even a worse picture than I described several months ago. They indicate strongly that 1938 is to be considerably lower in the level of business than 1937, and that spells trouble.

For example, the agriculture statement predicts that there will be "a less favorable demand for farm products" in 1938 than in 1937. Home domestic demands are down and appear likely to stay down, and the export market holds no hope for an increase. Emphasizing the dependence of consumption demand upon general business conditions, the department statement explained there was no certainty as to the length of time the present slump will continue. It added that "prospects are against a sufficiently early and vigorous rise in 1938 to bring the average of industrial activity and of consumer incomes up to that of 1937."

* * *

But from the standpoint of the farmer, the picture is made worse by the department statement. It points out how there has been a rise in production costs of crops and livestock and how, staring the farmer in the face, are more of these increases, adding:

Picture Made Worse

"Along with the higher wage rates, farmers apparently will have to pay somewhat higher prices for farm machinery, automobiles, building materials, equipment and supplies. On the other hand, the prices of feed and seed will be substantially lower next spring than a year earlier."

The department did not go into detail in explaining these increases in production costs and increases in prices for things the farmer buys. It should have given facts and figures on these for they are basic and the picture is incomplete without them. Everyone knows, of course, that farm labor wants more money for its work and has been getting more in the last two or three years. Department of Labor statistics show this, and they show as well how much additional labor is receiving in its pay checks from industry. The automobile industry which has been organized by John L. Lewis and his C. I. O. labor group has been forced to pay much higher wages and naturally those wages have been added into the cost of the automobile which any one buys.

The automobile industry was only an illustration. The same is true all along the line.

The truth of the matter is that federal taxes which have been conceived by the President's brain trust professors and applied without stint or limit to industry are upsetting the whole agricultural as well as the whole business structure of the country. The load of taxes, together with a lot of queer-looking and cockeyed regulations, have continually increased the cost of production of everything from black-eyed peas to locomotives.

To Prevent Rugs From Slipp—Jar rubbers securely fasten by sewing on the under side prevent throw or scatter r from slipping on smooth floors.

ALKALIZE

Often "acid indigestion" is distressing to you — and offensive to others. But now there is no excuse for being guilty.

You simply carry your *alkalizer* with you — and use it at the first sign of "upset" stomach. Simply take two tiny tablets of Phillips' Milk of Magnesia when out with others. Or — if at home — you can take two teaspoons of liquid Phillips'. Both act the same way.

Relief is usually a matter of seconds. "Gas," nausea, "heartburn," acid breath — all respond quickly. Just make sure you ask for "Phillips."

Brevity

Brevity is very good, when we are, or are not understood.—Butler.

Safe Pleasant Way To Lose Fat

How would you like to lose 15 pounds of fat in a month and at the same time increase your energy and improve your health?

How would you like to lose your double chin and your too prominent hips and at the same time make your skin so clean and clear that it will compel admiration?

How would you like to get your weight down to normal and at the same time develop that urge for activity that makes work a pleasure and also gain in ambition and keenness of mind?

Get on the scales today and see how much you weigh—then get a bottle of Kruschen Salts which will last you for 4 weeks and costs but a trifle. Take one-half teaspoonful every morning—modify your diet—get a little regular gentle exercise—and when you have finished the contents of this first bottle weigh yourself again.

Now you will know the pleasant way to lose unsightly fat and you'll also know that the 6 salts of Kruschen have presented you with glorious health.

But be sure for your health's sake that you ask for and get Kruschen Salts. Get them at any drugstore in the world and if the results one bottle brings do not delight you—do not joyfully satisfy you—why money back.

Sentinels of Health

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—life *itself*—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure.

When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out.

Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance.

The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use *Doan's Pills*. They have had more than forty years of public approval. Are endorsed the country over. Insist on *Doan's*. Sold at all drug stores.

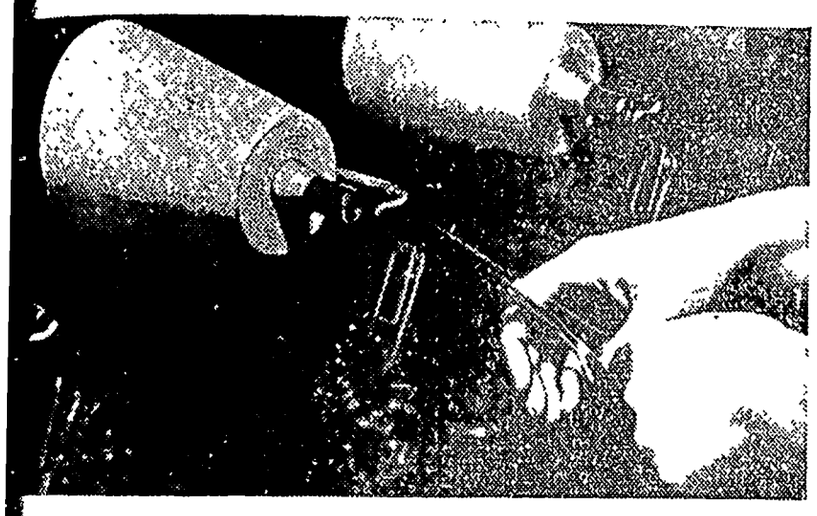
DOAN'S PILLS

SAGA OF SILK

Lowly Worm Achieves Its Moment of Glamor in PICTURE PARADE

Not a pretty thing itself, the silkworm contributes to the world's beauty by spinning the raw silk for stockings to clothe lovely legs like those of June Claire, above. Below, the Picture Parade marches through a silk stocking factory.

Raw silk, as spun by the worm, arrives in American factories from abroad, braided as are little girls' curls. It is unraveled from the tight, individual bundles and once more becomes lengthy strands.



Long strands of raw silk are woven by machinery into single strands; these, in turn, are wound on bobbins, ready for the weaving machine.

Almost magically, the strands on the bobbins of the machine operated by the man and woman above turn into flat, woven silk. Coming out of the machine, they are the exact size of the finished stocking. The stocking is folded and sewed, heel and toe sewed on separately.

When the stockings in this factory have been dyed, dried and shaped, they are given accurate tests for strength in the machine shown above. Then, before being boxed for the stores—and the legs—they are once more inspected (left).

A queer sight are the metal driers which shape the stockings.

STAR DUST

Movie • Radio

By VIRGINIA VALE

OFF-SCREEN romance is having a big influence these days in casting pictures. Paramount has given a three-year contract to John Barrymore and his wife, Elaine Barrie, and will feature them together in a picture as soon as a suitable story can be located. Making pictures with Mr. Barrymore used to be a nightmare to directors.

Some days he was three hours late showing up for work, and sometimes he disappeared for days When he did arrive on time, likely as not he would make such caustic remarks to his fellow players that their nerves were practically shattered. Marriage to the young and ambitious Miss Barrie has changed all that. She has made him settle down to work in earnest.

—★—

At last the quarrel between Freddie Bartholomew and Metro-Goldwyn-Mayer has been settled and Freddie will soon return to work. Under the new agreement he will get two thousand dollars a week for forty weeks, and three thousand weekly for six weeks of personal appearances. Also he gets a dollar a week additional for pocket money. He'll need it with a twenty-five thousand dollar bill owed for lawyer's fees.

Freddie Bartholomew

—★—

One of your tried and true friends of radio, whom you may not know by name, has just made a great success on the New York stage—but he is still on the air. It is Clayton Collier. You have known him as master of ceremonies for both the Leo Reisman and Eddy Duchin bands, hero of the "Pretty Kitty Kelly" sketch, and chief doctor in the story of "Girl Interne." With all his rushing about from radio rehearsals to stage performances, he never seems to be in a hurry, is always quite unruffled and casual in manner.

—★—

A mysterious Mr. Gallagher flew into New York and began escorting Janet Gaynor to theaters and night clubs, but the Twentieth Century-Fox publicity department wasn't fooled for a minute. They knew it was Tyrone Power all the time, and made him come out from under his assumed name and attend a huge cocktail party in his honor. There are big plans ahead for young Mr. Power. He will play Disraeli.

—★—

Ann Miller, who played Ginger Rogers' dancing partner, is playing the lead in "Radio City Revels" opposite Milton Berle, the air comic. Her discovery is one of those strange tales of Hollywood. She and her mother went to California and almost starved while she was trying to break into pictures. Finally, defeated, she took a cabaret engagement in San Francisco and the very first night she played there, an R. K. O scout saw her and signed her up. She had been trying to get into his office in Hollywood for three years!

—★—

Just the other day Warren Newell, a laborer at the Universal studios, wiped out the disgrace of ten years ago when he was discharged from a minor league baseball team for dropping a flyball in a crucial point in the ninth inning. He made a real catch! Alice Faye, catching her heel in the hem of her dress, toppled over a sixteen-foot ledge and would have landed on theater seats below if Mr. Newell hadn't rushed to the rescue and caught her just in time.

Alice Faye

—★—

ODDS AND ENDS: Bing Crosby was so delighted with the smart dialogue in Carole Lombard's picture, "True Confession," that he insisted on having the author, Claude Binyon, write his next. It will be staged at Bing's own race track, and Mary Carlisle will play the lead, as usual, because she is the only actress Bing can make love to without making his son Gary burst into tears . . . Robert Taylor will be back in time for Christmas and if he ever goes away again he will insist on Barbara Stanwyck having a telephone installed at her ranch retreat . . . Lanny Ross, having worked over his new radio program until it suits him and everyone else, may make the next "Broadway Melody" for M-G-M. . . . Warner Brothers' "Great Garrick" is the most delightful picture in many weeks, largely because of the witty way that Brian Aherne and Olivia de Haviland poke fun at the business of acting . . . Jean Hersholt will vary the monotony of playing Doctor Dafoe on the screen by playing Doctor Christian on a coast-to-coast radio program over the Columbia system.

Ask Me Another?

A Quiz With Answers Offering Information on Various Subjects

1. How much of the earth's surface is water?
2. What is the average length of a rural mail route in the United States?
3. Did Luther Burank have any of his plants patented?
4. What is the opposite of a de facto government?
5. What is the total area of the United States and all of its possessions?
6. In Greek mythology, who had dominion over the winds?
7. Is shellac a synthetic preparation?
8. Who is able to sing the highest notes?
9. Was Grover Cleveland the only Democratic President prior to Woodrow Wilson?
10. Who is sponsoring the floating weather bureau in the mid-Atlantic?

Answers

1. The superficial area of the earth is 196,950,000 square miles, of which 139,440,000 square miles are water and 57,510,000 are land.
2. The average length is 35 miles. The longest route is Route No. 1, Brawley, Calif., which is 94.28 miles in length.
3. The scientist received nine plant patents posthumously.
4. De jure government is one existing by legal right or international agreement. De facto government is a power governing irrespective of its legal authority.
5. The land and water area of the United States is 3,738,395 square miles.
6. Aeolus.
7. Shellac is secreted by an insect. While repeated experiments have been made to make it synthetically, none has been successful.
8. Miss Erna Sack, coloratura soprano of the Dresden Opera company, sings consistently within the register above high C and is able to take the C above high C. It is said that no other singer in modern times has been able to achieve this extraordinary height of voice.
9. I the sense of the modern alignment of the major parties, he may be said to have been the only Democratic President before Wilson. Johnson was a Democrat, however, as was Buchanan, and as were Jackson, Jefferson and others, and traditionally they, especially Jackson and Jefferson, are claimed by the Democrats of today.
10. This floating station is sponsored by the French ministry of air, "Air France" and the French Line. It will operate in the North Atlantic, and at regular intervals it will flash weather reports to aviators who are crossing from America to Europe, or vice versa.

Famous Hymn

The recent sale of the original manuscript of "Onward, Christian Soldiers," recalls the manner in which that stirring religious hymn came into being.

Some Yorkshire (Eng.) Pupils, years ago, planned to make a Whitsuntide procession to a neighboring church. They asked their young curate, Rev. Sabine Baring Gould, to write them a marching song. He sat down, composed the hymn in a few minutes.

Originally sung to a tune by Joseph Haydn, its music now is that of Sir Arthur Sullivan. He composed the music as the result of a sudden inspiration. The score was completed in a few minutes at a harmonium—a kind of organ. —Washington Post.

JUST JESTS

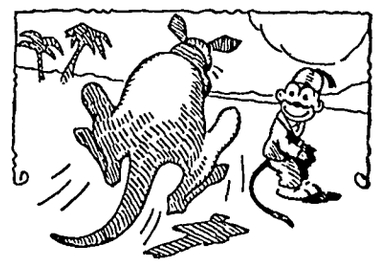
One for the Judge

Policeman (to motorist)—Take it easy; don't you see that notice, "Slow Down Here"?

Motorist—Yes, officer, but I thought it was describing your village.—Safe Drivers.

Nothing gives a girl more natural charm than a graceful carriage, says a beauty authority. But for a boy to have charm he needs a sporty coupe.

SHOWS IT



Monk—What's the matter, Kangy?

Kangaroo—I'm hopping mad this morning.

"Burglar arrested in bath." Apparently, he came clean.

Coming to Him

The dramatic critic started to leave in the middle of the second act of the play.

"Don't go now," said the manager. "I promise there's a terrific kick in the next act."

"Fine," was the retort; "give it to the author."

Firestone

GROUND GRIP TIRES WIN *First Honors* AT TROY • BIG ROCK LILY LAKE • WHEATLAND PLOWING CONTESTS

Using Firestone Ground Grip Tires, Paul Stiefboldt made the highest score for any one meet, with 92½ points out of 100. He also had the largest number of points for the four contests, 356½ out of a possible 400.

Carl Shoger had the highest average score per contest with 90 out of 100 possible points, using Firestone Ground Grip Tires.

Clarence Shoger won first place in the Young Men's Class in each of the four contests on Firestone Ground Grip Tires.

FIRESTONE Ground Grip Tires won sweeping victories this year in the plowing contests at Troy, Lily Lake, Big Rock and Wheatland, Illinois. In the plowing contests, as on the farms, more tractors were equipped with Firestone Ground Grip Tires than all other makes of tires combined. And these *all-purpose tractor tires* scored 3500½ points out of a possible total of 4100 for the four contests.

Why do plowing champions choose Firestone Ground Grip Tires? The answer is:

GREATER TRACTION — Takes a deeper, broader bite into the soil. Has positive self-cleaning action.

GREATER STRENGTH — Resists the strain of heavy pulling because every fiber of every cord is saturated with liquid rubber by the patented Firestone Gum-Dipping process. Two extra layers of Gum-Dipped cords under the tread bind the tread and cord body so solidly together that we guarantee they will not separate.

GREATER SAVINGS — Saves 25% in time and up to 50% in fuel over steel-lugged wheels.

GREATER DRAWBAR PULL enables this tire to do more work in a given time.

Specify Firestone Ground Grip Tires when buying a new tractor or any wheeled farm implement. And, for your present equipment, ask your nearest Firestone Implement Dealer, Tire Dealer or Firestone Auto Supply & Service Store about the economical Firestone Cut-Down Wheel Program.

Listen to the Firestone broadcast of the International Livestock Show from Chicago, Nov. 29, 30, Dec. 1, 2, 3. See your local newspaper for station and time. Also listen to the Voice of Firestone featuring Richard Crooks and Margaret Speaks, Monday evenings over Nationwide N. B. C. Red Network.

SPECIFY FIRESTONE GROUND GRIP TIRES ON NEW TRACTORS AND ALL WHEELED FARM IMPLEMENTS

★ More Farm Tractors are Equipped with Firestone Ground Grip Tires Than All Other Makes of Tires Combined ★

High School News

The students are eagerly looking forward to the two-day Thanksgiving vacation which is Thursday and Friday.

—K H S—

The season basketball tickets were put on sale last Thursday. The basketball boys are in charge of the sale of them. They were printed by The Times and the price is fifty cents and one dollar. Get yours now

—K H S—

New basketball posters have been issued for the '37 and '38 season. On these are printed the schedule, the names of the players and their numbers, with a large action basketball picture in the center. These posters are made possible by advertisements of local and out-of-town business firms

—K H S—

Everybody has been anxious to see the new basketball suits. A fine crowd turned out for he game Friday night, which was the first game of the season on the home floor.

—All of the above articles were wriiten by Jacqueline Kudje.

—K H S—

The Freshman Business Training class, with their teacher, Miss Brakel, took a trip to the bank Thursday. They had just completed the unit on Filing, and they saw the various kinds of files and the different methods of filing which are used in the bank. For several members of the class this trip to the bank was a first visit. They hope to make other trips of this kind during he year.

—Betty Neuhring

—K H S—

Evelyn Arnold, of the first division Typing I class, made 23 words a minute with no errors on a five minute test Friday. She is the second student in his division to type this test without any errors.

—K H S—

The senior girls are completing their dresses and will start meal planning after Thanksgiving.

—Shirley Johnson

—K H S—

The High School has secured new books, known as Careers, for the library. These are surveys covering attractive and unattractive sides of an occupation. They also give the personal qualifications necessary, the amount of capital required for an occupation, and the average salary Each occupation is discussed separately. We are certain these will help us choose our careers.

—Marjorie Lemke

—K H S—

A pep meeting was held Friday at 3:30 for the game with Ventura, and everyone showed good spirit. Many new yells were practiced.

—Marjorie Lemke

Grade School News

Grades 1 and 2

Isabelle has been absent this week. We wrote letters and drew pictures to send her.

We have been working on our engines and some are nearly finishd.

Duane had a birthday party on Tuesday. He brought each one of us a little birthday cake. We put candles on Duane's cake and sang our birthday songs for him. We played games, too.

Grades 3 and 4

Mrs. Bell visited our room Wednesday

Many of us have finished our clay bowls and are ready to paint the designs on them.

The fourth graders raised their class median in Arithmetic number drills from fair to average.

We had our first picture study lesson this Thusday. We have started a "Good Picture Booklet."

We enjoyed looking at a magazine printed especially for blind people. It was printed in Braille. This was very interesting for the fourth graders because their Weekly Reader had an article about Braille.

Grades 5 and 6

Herbert Mueller and Eunice Larsen —Reporters

We have some new Thanksgiving pictures on our bulletin boards. Each child made an original Thanksgiving poster. We cut them out free hand

In Language we studied another of Jean Fracois Millet's pictures called "The Gleaners." We wrote stories of the picture.

For our news corner we are watching for news about the special session of Congress. In our Weekly Readers this week we read about the peace meeting in Brussels, Belgium. We are watching for news about that meeting, too.

Many of us were glad to see the snow because we like to play in it.

Grades 7 and 8

Garland Brinkman, Reporter

Ellen Kilgore has volunteered to be librarian for the next two weeks.

The seventh grade received a letter from Eugene Johnson. They had written to him a few weeks ago.

Wednesday afternoon we listened to a radio program which came over KGLO. It was about Iceland.

Wednesday we finished identifying trees and plants, and each row finished its book. They are very attractive. We plan to make "charm strings" with the material we have collected

Ellen Kilgore was the only person who received one hundred per cent in spelling this week.

The patrolmen for this week are Homer Blickenderfer and Charles Bock.

KLEMME SHAMROCKS WILL PLAY CLEAR LAKE LIONS FRIDAY NIGHT

First Of Several Class A Games For The Local Basket Ballers

The Klemme Shamrocks will go to Clear Lake Friday night where they will meet the Lions, a class A outfit. which will be one of several class A schools on the schedule this year.

The Shamrocks are displaying power so far this year, but competition with a strong class A school may show weak spots in the Shamrock line-up.

A good crowd of fans from Klemme is expected to accompany the boys to the Lake Friday night

NEWS FROM GOODELL AND VICINITY

Rev and Mrs Leroy Rhodabach and baby from Ohio arrived Tuesday at the parental Gus O'Krueg home They will spend a few days visiting with relatives and friends.

Mrs. Harry Ruka drove to Garner Tuesday evening and brought her daughter, Ruth. home for a visit with her Aunt and Uncle, Rev. and Mrs. Rhodabach. She returned to school Wednesday morning

Chris Dieger has not been very well this Fall so a large delegation of men gathered and picked his corn Tuesday afternoon. It was a complete surprise on Mr. Dieger and he appreciated it very much.

Mr. and Mrs. Gerald Burk spent Sunday at the parental Jay Griggs home.

Josephine Dominy was entertained at the Henry Busse home Sunday.

Dr Dye spoke on "The Message from the Oxford Conference" before the Hancock Ministerial Association in Britt Monday morning.

The Champions S. S. class held their monthly business meeting and party Monday night.

Mr. and Mrs. Leon Sherwood returned Saturday from their trip through several southern states. They report having an enjoyable time.

The Wallace family are leaving this Wednesday for their new home in Southern Missouri. We are sorry to lose this fine family and wish them much prosperity in their new home.

Mr. and Mrs. Harvey Hubbard took the latter's sister, Mrs. Al McNutt to her new home at Chasta, Minn. They expect to spend a few days visiting there.

(SEAL) Notary Public

Where the Tax Burdens Fall

By RAYMOND PITCAIRN
National Chairman
Sentinels of the Republic

Current reports from Washington again quote Congressional leaders as favoring a brake on the rising toll of taxes

De pite earlier disappointments, the American people will hope eagerly that, this time, the promises are translated into action

Why? Because, as recent events emphasize, high taxes are clipped out of every worker's earnings, in the form of higher costs of living.

And for this indirect levy on the average citizen's pocketbook they give little in return.

Heavy taxes raise the rent of homes —but they add neither room nor comfort.

Heavy taxes jump the price of land —but they add nothing to the crops it can grow.

Heavy taxes boost the costs of fuel —but they add nothing to the amount of heat or power it produces.

Heavy taxes inflate the price of food —but they add nothing to its nutritive values.

Heavy taxes increase the cost and upkeep of equipment — whether on the farm, or in the home or factory. But they add nothing to the work it can perform.

Wherever applied, heavy taxes take much and contribute little. However disguised, they are still produced in "the sweat of the man who labors."

All citizens realize that a reasonable volume of tax income is necessary to the proper functioning of government. But they also realize that when raised to unreasonable heights, taxes become not so much a necessity as a burden.

They ask their elected representatives in Congress to realize this too—and to act upon that knowledge.

"Seven Seas," Figurative Term

The term "The Seven Seas" is not intended to be taken literally, but is a figurative term denoting all the seas and oceans of the world. When Rudyard Kipling gave the name to a book of his poems he mentioned that it might be used in this sense or to include the seven great oceans, the North Atlantic, South Atlantic, North Pacific, South Pacific, Indian, Arctic and Antarctic. Areas are: Pacific, 68,634,000 square miles; Atlantic, 41,321,000; Indian, 29,340,000; Arctic, 4,781,000; Antarctic, 5,731,-350. Average depths are Pacific, 12,960 feet; Atlantic, 12,200; Indian, 11,136; Antarctic, 10,800; Arctic, 5,-160. Exact dimensions cannot be given. The Dead sea in Palestine is 47 miles long, 10 miles wide, 1,080 feet deep and has an area of 360 square miles; its surface is 1,300 feet below sea level.

Saint Bernard of Mastiff Family

Unlike many other breeds, the origin of the Saint Bernard is a bit hazy, but early historians have agreed this type of dog belongs to the Mastiff family. The ancient records produce evidence that Mastiff dogs were brought from Asia, and used by the Romans as herders of sheep, besides being kept as watch dogs at army outposts. It has also been established that Roman soldiers used large dogs to guide sheep over the mountain passes, one of which was called the Saint Bernard Pass, no more than a pack mule path. A hostile tribe destroyed this path and cut off travel over the mountains around 950 A. D.

Lemming, Scandinavian Rodent

The lemming is a Scandinavian rodent, about five inches in length, noted for its pugnacity, its productivity and its curious mass migrations They eat as they travel, and breed with amazing rapidity. They drive away all other animals in their path, attacking cows, reindeer and even man, fearlessly.

Hands Reveal Character

Anyone who sits with hands loosely clasped in the lap is of a quiet, well-balanced mind, while the nervous person tries to control nervousness by tightly gripping the hands together, states a writer in Pearson's London Weekly. One who has a habit of clasping hands with fingers entwined is not keeping strictly to the truth, while one who partially covers the mouth with a hand while talking has certain knowledge, but is trying desperately not to reveal it A person who remains seated while conversing with another who is standing finds it very difficult to tell an untruth and any attempt to do so is easily detected by the person standing.

What Might Have Been

It is when our budding hopes are nipped beyond recovery by some rough wind, that we are the most disposed to picture to ourselves what flowers they might have borne if they had flourished. —Dickens.

A Three Days' Cough Is Your Danger Signal

No matter how many medicines you have tried for your cough, chest cold, or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with any remedy less potent than Creomulsion, which goes right to the seat of the trouble and aids nature to soothe and heal the inflamed mucous membranes and to loosen and expel the germ-laden phlegm.

Even if other remedies have failed, don't be discouraged, try Creomulsion. Your druggist is authorized to refund your money if you are not thoroughly satisfied with the benefits obtained from the very first bottle. Creomulsion is one word—not two, and it has no hyphen in it. Ask for it plainly, see that the name on the bottle is Creomulsion, and you'll get the genuine product and the relief you want. (Adv.)

In Our Need

Just to realize that there are friends in the world who care is a great help.—Sir Wilfred Grenfell.

HOW OFTEN CAN YOU KISS AND MAKE UP?

FEW husbands can understand why a wife should turn from a pleasant companion into a shrew for one whole week in every month.

You can say "I'm sorry" and kiss and make up easier before marriage than after. If you're wise and if you want to hold your husband, you won't be a three-quarter wife.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife; take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

Firmness

It is only those who possess firmness who can possess true gentleness.—La Rochefoucauld.

What a difference good bowel habits can make! To keep food wastes soft and moving, many doctors recommend Nujol.

Novel and Decorative Fastenings

By CHERIE NICHOLAS

IN THE present insistent demand for unique and ornate fastenings, fashion flings a new challenge into the realm of costume design. It is a challenge to which designers are responding with unbounded enthusiasm, since it offers new avenues of adventure to creative genius. Which explains why our fall and winter apparel is being slide-fastened or buttoned, as the case may be, with a play of imagination that is fairly breathtaking.

It adds to the fascination of the theme that whether the closings be with slide fasteners, which are quite the rage here as well as being highly endorsed by leading designers in London and Paris, or with buttons so smartly positioned on the newer modes, they are that highly decorative they supply the trimming feature as well as serve in a utilitarian way.

Once mere devices for fastening this and that together, buttons have passed through an evolution from which they now emerge as colorful exquisitely wrought things (often designed by renowned artists) which vie with costume jewelry in point of ornate beauty and decorative design.

The button industry has wholeheartedly accepted catalin because being plastic it is easily machined and carved into all sorts of cunning and lovely motifs. Best of all it brings into the field a new aurora of color which tunes charmingly into every phase of fashion. The tones and tints cover a range that extends from water-clear white to brilliant hues, also black, white or ivory and an almost endless list of pastels.

The illustration shows several from among the multitudinous uses made in the present gesture to trim as well as to fasten with decorative slide-fasteners and with buttons. For the smart fitted sport coat with its raglan sleeves and slightly flared lines accentuated with row-and-row stitchings as pictured to the left, the designer achieves a chic fastening with huge catalin buttons carved in an effective floral motif. (Button detail below.)

See the stunning dinner gown to the right. Note how meticulously it is molded to the body and how generously it flares from just the strategic point it should flare to add queenly grace. Comes now the piece de resistance—gorgeous black catalin buttons encircled with brilliants that are used from neck to hem! Detail of this jewel-like button at bottom of illustration.

The two models in the center are zipped in latest fashion. The slide fasteners which close the two small pockets and shirred front of the modish dress at the left center have colorful wee catalin windmill pulls (shown in detail below) that are as ornamental as costume jewelry. The sports dress to the right center flares slightly with tucked umbrella skirt. The slide fastener with three bright colored catalin pulls goes zip! with a flash and a dash from neck to several inches below the waistline at the back. Other models in this class use slide-fasteners with small bright catalin plaques attached to the slide several inches apart.

VOGUISH BELTS

By CHERIE NICHOLAS

Attention is centered on belts this season. Just any belt won't do. The American designer, Belmo, has created a belt for every occasion, two of which are here illustrated. Worn with a black velvet cocktail frock the belt illustrated at the top contributes the final touch of perfection. In outlining this shapely belt which is of black suede, with small gold kid flowers, the artist designer adds a glittering touch to the corselet waistline trend. It is readily seen, glimpsing the girl in sports attire, that the new belt modes add zest to any costume, particularly the sweater and suit combination, favorite of the younger generation. In this instance overlapping suede leaves riveted with metal eyelets tune to tailored and sportswear mood Harmonious shades of gray, green, wine and rust make it possible for this multi-leaf belt to blend with several outfits.

AFTERNOON WINTER SUIT IS HIGH NOTE

The afternoon suit is one of the triumphs of Paris couturiers for the winter season, and each has presented his version of the new silhouette in handsome tailleurs of rich materials and luxurious furs.

Broadcloth and duvetyn are the newest of dressy suit materials with velvet and lightweight wools popular at all leading fashion houses. Silver and black fox form immense collars, trim sleeves and hemlines and edge the bottoms of long jackets. Persian lamb, a favorite for coat trim, makes collars, cuffs, vests, and even buttons—and smooth broadtail and silky caracul are used for tailored collars and pockets.

Plaid for Dress, Blouse Suit and Coat Is Latest

Plaids are telling a fascinating story. You'll be wanting a two-piece tailored jacket suit. They give that new-this-season look, besides the plaids that are being man-tailored are that colorful and flattering they are simply irresistible. A dress of plaid woolen made on the bias and adhering to form-fitting lines will prove a treasure in any wardrobe for practical day wear. Then, to wear to the ball game, a huge roomy coat of horse-blanket plaid as bizarre as they make 'em will be a cheer leader in itself.

Enliven Black Costumes With Bright Accessories

The call for black with colorful accessories is answered in the present vogue for black costumes enlivened with red accessories. The latest interpretation of the black and red color scheme is given by smart dressed women who wear red suede hats and carry handbags to match. This combination sets a black suit or ensemble off to perfection. And there's the new red suede gloves they're wearing with black. You will yield to temptation when you see them. A red boutonniere adds infinitely to this allure.

Criminals Also Retire in Their Old Age, It Appears

By MARJORIE VAN DE WATER

Washington. — Old age pensions under the Social Security Act do not apply to employees of such industries as safe cracking and second-story work. Nevertheless criminals do retire, it seems.

Through a request to police to be careful to give owners' ages for fingerprints submitted, the federal bureau of investigation reveals that it is their practice to remove records of criminals to a "retirement file" when these outlawed gentry reach the age of sixty, "in anticipation of the time when they may be considered inactive."

The idea of old-age retirement for criminals throws new light on statistics showing the youth of arrested law violators. It raises interesting questions. Does the man over forty-five find difficulty in attaching himself to a racketeering gang as he does in finding honest employment? Does the perilous life of the outlaw no longer appeal to the more mature individual? Is the older, more experienced offender harder to catch?

Some Possible Reasons.

Probably the various crimes have their industrial hazards and industrial diseases with victims who never receive workmen's compensation. Insurance companies may compute the incidence of lead poisoning among painters, but who knows how prevalent it is among gangsters? Heart troubles are known to take a particularly heavy toll among physicians and other professional men who worry a great deal. We can only speculate over the effect of a criminal career upon cardiac diseases.

Still another factor tends to lessen the number of older men coming before the bar of justice. It is the very fact that young offenders are being arrested in larger numbers. If the criminal is brought to sentence in his youth, and has his criminal career terminated by a lengthy imprisonment, it is obvious that he is not likely to be arrested at a later age. In this way the celled corridors of prisons may be thought of as the retirement homes for criminals. They are government-supported after all.

Columbus Was Lucky in Avoiding Cannibals

Washington. — Christopher Columbus, who looked for India and discovered America, was pretty lucky to land where he did. Otherwise he might not have lived to tell the tale and America would have remained to be discovered yet another day.

Had he landed on another island he might have run into the fierce cannibal Indians, the Caribs, who were then the raiding terrors of the West Indies And he and his sailors, weakened by a long trip without satisfactory food, might have met with disaster.

This was stated by Herbert W. Krieger of the Smithsonian institution. Luckily, Mr. Krieger continued, Columbus met the peaceful Lucayan Indians instead.

But America's discoverer met the ferocious man-eating Caribs or Canibas (the word cannibal comes from their name) on a second voyage. Columbus gives in the journal he kept, Mr. Krieger declared, "a vivid description of a stew pot he observed from which projected fragments of human arms and legs."

New Pheasant Genus Is Discovered in Africa

New York. — Twenty-three years ago a brown and black feather plucked from the headdress of a native in the Ituri forest in Africa started Dr. James B. Chapin on a search that has just successfully ended with the finding of the bird that "fitted the feather."

The strange feather belonged to no known African bird. It came from a species related to the pheasants, which are Asiatic in origin and range. After his long search, Dr. Chapin, associate curator of birds at the American Museum of Natural History here, found two mounted but unclassified specimens of a bird with identical feathers in a Belgian museum.

Recently, in the Congo jungles, Dr. Chapin's hunt was rewarded by the securing of six specimens of this bird for his museum, and an accurate knowledge of its jungle habitant. This new bird genus has been named "Congo Peacock."

New Fungus Pest Gives the Golfer Cause for Anxiety

By DR. FRANK THONE

Washington. — Golfers and textile manufacturers may well unite in viewing with alarm the devastating outbreak of a new fungus disease that kills persimmon trees in very much the same manner that the Dutch elm disease kills elms. Persimmon wood is used in making the heads of wooden golf clubs and certain types of shuttles, and there is nothing quite so good for these purposes.

As yet, the area affected is quite limited, comprising not more than 750 square miles of persimmon timber in the neighborhood of Nashville, Tenn. But R. Kent Beattie of the United States Department of Agriculture, who has made a rapid but intensive survey of the situation, states that the new disease kills a tree with terrific quickness and is capable of rapid spread. Trees which were apparently healthy when he saw them late in July were totally dead when he revisited them just two months later.

Its Source Not Known.

The disease is so new that the fungus causing it has been identified only tentatively, and the source from which it came is still wholly unknown. It acts like a foreign plague in its quick and deadly effects, resembling such introduced fungus scourges as Dutch elm disease, white pine blister rust, and chestnut blight in this respect. But aside from some rather uncertain records of Japanese persimmon plantings in the general region, no exotic sources of introduction have yet been suggested.

Tobacco planters might rejoice to see persimmons wiped out, for the sprouts are stubborn weeds in fallow fields, costly to eradicate. On the other hand, persons interested in the conservation and restoration of wildlife would join with the golfers and textile men in lamenting its passing, for persimmons are a prime item in the diet of raccoons, oppossums, and several other fur-bearing animals.

Floor Your Attic and Save Household Fuel

Madison, Wis.—If you would reduce fuel oil consumption in your home, give your attic a floor.

Although the unfloored attic long has been condemned by domestic heating engineers as a source of great loss of heat, it was not until the United States Forest Products laboratory here completed a four-year study that factual information as to the magnitude of such loss became available.

In a study made in a small Madison dwelling, representative of the type of frame construction employed in regions of the United States where the winters are severe, the addition of a second attic floor decreased fuel oil consumption 5.6 per cent when the outdoor temperature was 35 degrees Fahrenheit, the average in Madison during the period from October to May, inclusive.

During the first half of the study about 42 per cent of the attic area (a strip through the center) was floored with spruce shiplap. During the last half, the entire area was floored with white fir shiplap, making a double floor over the remainder. A one-inch space was provided between old and new floors, which were nailed to joists.

Alligators and White Rabbits Don't See Well

Minneapolis.—Alligators and white rabbits have very poor eyesight as compared with man or with other animals and birds, Dr. John Warkentin, of the University of Rochester, reported to the American Psychological association here.

Acuity of vision is usually expressed in degree of arc, a measure corresponding to size of type that can be read or the size of objects that can be distinguished at a standard distance.

Cats, cottontail rabbits, woodchucks, chickens, and pigeons have a keenness of eyesight expressed by 30 seconds of arc, a figure comparable to man's vision.

Contrasted with this the aligator's score is 360 minutes.

Farm Lands Back to Timber, 190,000,000 Acres

Washington.—Thirty-five million acres of farm land have been turned back to forest since 1930 to bring the total woodland area of the United States to nearly 190,000,000 acres, figures released here by the National Lumber Manufacturers association indicate.

Depression between 1930 and 1935 was primarily responsible for the change, it was explained.

Lesson for November 28

CHRISTIAN FRUITFULNESS

LESSON TEXT—John 15:1-16.

GOLDEN TEXT—Herein is my Father glorified, that ye bear much fruit; so shall ye be my disciples.—John 15 8.

PRIMARY TOPIC—Jesus' Rule of Love.

JUNIOR TOPIC—The Loyalty of Love

INTERMEDIATE AND SENIOR TOPIC—What May We Expect to Achieve?

YOUNG PEOPLE AND ADULT TOPIC—How Christians Become Fruitful.

Thanksgiving day has just afforded each one of us a special opportunity to return praise to God for the fruitfulness of America's broad acres. It is appropriate that we think today of the Christian life as manifesting itself in the bearing of fruit.

Christian work of which we spoke last Sunday may (at least in a measure) be imitated, but fruit cannot be imitated It is the result of life and only those who know the new birth bear the fruit of Christianity.

The chapter before us is a portion of Scripture which has been the peculiar favorite of God's children in all generations. It is at the center of our Lord's words with his disciples immediately before his death on the cross.

Many are the expositions of this passage, but a beautifully simple one which came to the writer from Dr. W. Graham Scroggie is suggested as most helpful.

I. Life and Fruitfulness (vv. 1-8).

Life results in fruit and there can be no true fruit where there is no life. Christ is the vine, the Father is the keeper of the vine. We who are Christ's are the branches abiding in him, that is, living our whole life in and for him in such close union with him that his life as the vine brings forth fruit in us as the branches That is real Christian living.

But, alas, there are branches that seem to belong to the vine but they lack the one indispensable evidence of life which is the normal bearing of fruit. These the Father must take and cast away to be destroyed. While we must not read into these words more than our Lord intended, let us beware lest we explain away their serious import. These are grave words of warning to false professors of Christianity, but they are not spoken to distress and disheartened true followers of the Lord Jesus Christ.

Fruit in the Christian is undoubtedly first of all the fruit of character but that character is also to show in conduct. Note the progress —"fruit" (v. 2), "more fruit" (v. 2), "much fruit" (v. 5). In order to bear more fruit there is need of pruning and cleansing (vv. 2, 3). Pleasant? Not always, but always profitable. Let us thank God for even the pruning knife when its work is needed.

Do not miss the prayer promise in verse 7. It is an unlimited promise with a closely limited condition. Let us meet the condition and claim the promise.

II. Love and Friendship (vv. 9-16).

"This is my commandment that ye love one another." In verse 10 we read that to abide in the love of Christ we must keep his commandments and now we learn that it is his command that we love one another. We are not to await the impulse prompted by the beauty or kindness or propinquity of someone, but we are to love one another. Many a Christian who has obeyed the commandments against stealing, adultery, and blasphemy has never noticed that he is commanded to love.

The joy of Christ was fulfilled on the eve of Calvary by the love of his disciples for one another and for him. He rejoices today when we love the brethren and love him, for thus we enter upon the beautiful relationship of friends.

Dr. Scroggie says, "We may be God's children without being his friends; the one is based on his gift of life to us; the other, upon our offering of love for him. Are you a friend of God? You cannot have God and the world for friends at the same time. The friendship of the world is enmity with God. The world hates Christ, and therefore will not love you if you are like him."

But, oh! the sweet intimacy of fellowship with him. Read verses 14 to 16. Chosen and appointed by him, for "he first loved us," we are not kept in the distant position of servants but are brought into his circle of friends with whom he shares the gloricus secrets of his Father, and our Father. It is a great thing to be a Christian, a friend of the Saviour.

Intellect

Every man should use his intellect not as he uses his lamp in the study, only for his own seeing, but as the lighthouse uses its lamps, that those afar off on the sea may see the shining and learn their way.

The Past

The wise man must remember that while he is a descendant of the past, he is a parent of the future, and that his thoughts are as children born to him, which he may not carelessly let die.—Spencer

---

The Newest in Miniature

SEW - YOUR - OWN presents a house frock with the heart to be up and doing, no matter how busy you are, how old you are, or how many calories you've forgotten to keep count of. Sew-Your-Own also presents the first doll with a heart (the picture proves it). And lastly it presents a frock with a love interest for a Modern Miss, something usually confined to the movies.

Ideal for Home.

Sew-Your-Own always has had a soft spot in its heart for the Lady of the Fireside, she who cooks and bakes and sews and keeps everything right. Today's house frock for her (above left) is as neat and sweet as anyone could wish. The collar is in contrast, the saw tooth edging piped to match. Of course, it's easy to run-up and practically no trouble at all to launder. Better make two!

A Doll—a Dress.

The little lady in the center, above, knows her heart's in the right place because Mommy put it there. Dolly Dimples is her swell little playmate and her heart's in the right place, too. Ask your Mommy to send for Pattern 1203 and you'll have a great big surprise in store. Yes siree!

Her Heart Unattached.

Maybe Miss Svelt Seventeen (above right) wears her heart on her sleeve, or maybe she keeps it locked in a refrigerator. Who can tell? But this you can tell: she knows style. She's good to her figure! Her frock, an original Sew-Your-Own design, gives her real distinction — that different-in-the-right-way look. It is the ultimate in chic in rayon crepe with a satin waist front.

Pattern 1405 is designed for sizes 34 to 46. Size 36 requires 4⅜ yards of 35-inch material plus ⅝ yard contrasting.

Pattern 1203 is designed for sizes 2, 3, 4, and 5 years. Size 3 requires 1⅝ yards of 35-inch material for the child's dress. The doll's body, medium size, requires ⅝ yard of 35-inch material. The doll's dress, medium size, requires ⅔ yard of 35- or 39-inch material. One hank of wool is required for doll's hair.

Pattern 1377 is designed for sizes 14 to 20 (32 to 44 bust). Size 16 requires 2½ yards of 54-inch material. The topper in contrast requires ¾ yard of 39-inch material.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

THE Aladdin

KEROSENE MANTLE LAMP COAL OIL

Saves EYESIGHT MONEY TROUBLE

● Why? Because the light the Aladdin gives is surprisingly ample and abundant in quantity and is of a quality closely approaching sunlight, the kind of light nature provided for the human eye. It saves you money, too, because it is so economical of fuel, and its splendid light banishes trouble in reading, writing, sewing, studying, or any evening's work or pleasure. Aladdin light, its simplicity, its safety, its economy, its beauty, and its decorative and practical features must, however, be seen to be appreciated. If you need more and better light, come in at your first opportunity—we'll be glad to demonstrate one to you without the slightest obligation.

Beautiful • Modern • Shades

Aladdins are available in Table, Hanging, Bracket and Floor styles and may be fitted with exquisite decorated Whip-o-lite and Glass Shades. There's an Aladdin for every purse.

An N.Y.A. Worker Is Fluoroscoped

National Youth Administration workers of Nassau County, N. Y., are fluoroscoped by the Tuberculosis Association to detect early tuberculosis.

Here we see a man standing behind the fluoroscope screen while the doctor reads the picture of his lungs and dictates his findings to the assisting nurse.

In back of the man is an X-ray tube which looks something like a huge electric light bulb. The rays from it penetrate his chest and cast shadows on a specially treated sheet of glass called a fluoroscope screen. In a room that is absolutely dark the doctor sees before him shadows of the ribs and spine. He sees also, as if it were a ghostly motion picture, the rhythmic beating of the heart and the steady rise and fall of the living, breathing lungs. If there is any lung damage due to tuberculosis the doctor's practiced eye detects it, and if he wishes to check his findings he may have an X-ray picture taken of the chest.

Notice the heavy aprons on the doctor and nurse. These are made of lead and rubber to protect them against the penetrating rays. These rays do no harm and are absolutely painless in the short exposures to which patients are subjected, but they might be injurious to the physician examining many patients during the clinic hour.

The fluoroscope examination is one of the modern methods to uncover tuberculosis.

Hayfield Here Friday; Kanawha Plays Shamrocks Monday Night

SHAMROCKS HAVE THREE GAMES SCHEDULED FOR THE COMING WEEK

Hayfield Here Friday Night, Kanawha Monday And Goodell There Dec. 10

The Klemme Shamrocks have three games scheduled to be played within the coming week

Hayfield comes here this week Friday night to play a double header, and Kanawha comes here on Monday night. These are the first conference games on the Seven Eagles schedule

Play At Goodell Dec. 10

One of the big games of the year will be at Goodell on Friday evening, December 10th when the Shamrocks will try to upset Goodell's winning streak The writer has seen the Goodell boys in action and they have a good basket ball team again this year with two veterans on the five Raymond Hofer at guard and Kenny Boller at forward. Ahltsrom holds down the other forward position and Laten plays guard Both of these boys were on the reserve string last year Johnson, a new boy at Goodell, plays center

Goodell are the defending county champions, Seven Eagles conference winners and have never been defeated on their home floor They won the sectional tournament last year and survived one game and lost out in the second game in district competition

P. M. GRIESEMER HAS CHAIN OF HARNESS AND SHOE STORES

P M Griesemer, formerly of Klemme, but who has been the proprietor of a harness and shoe shop at Garner for several years, has purchased Lehman & Stock harness store located at 16 Delaware Ave S. E. at Mason City. Mr. Griesemer now owns four stores located at Garner, Britt, Lake Mills and Mason City.

Congress—And The Average Citizen

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

Although Congress thus far has achieved little in its special session, the American public sees, in current indications, several rays of hope.

From various statements emanating from Washington the average citizen is encouraged to believe that Government is beginning to think of him as the man for whom it actually exists

Washington, for example, is giving thought to the great army of American consumers—which includes more than 129,000,000 members. Instructions have been issued to determine why the costs of food and necessities for all the people have risen so markedly in recent years.

It is giving thought to the average citizen as a worker. Efforts are being made to supplant guesswork with actual facts and figures on the numbers of jobless, and the reasons for their unemployment.

It is giving thought to him as a wage-earner. Efforts are being made, by some members of Congress, to strike the shackles from the wrists of private enterprise, and thus encourage employers to expand those productive activities on which all payrolls depend

It is giving thought to him as a taxpayer. Efforts are being made, by some Congressmen, to cut the waste in government which has boosted public debts, public deficits and public spending to heights that take now a terrific toll from all workers, in taxes both direct and indirect.

It is giving thought to him as a citizen and constituent. Many Congressmen are now tuning in on his voice, even though it means lending a less eager ear to bureaucrats who demand huge checks, drawn on the public account, for fresh and often impractical experiments.

All these things are still promises. But, despite earlier disappointments, the American public continues to hope they will be fulfilled. If not, it's a fair guess that a lot of Congressmen are going to be asked the reason why.

FIVE ARE GIVEN ALADDIN LAMPS AT JACOBS STORE

E. F. Jacobs gave away five nice Aladdin lamps at his store Saturday night. Those receiving lamps free were Esther Trampel, Emil Lau, Russell Hanson, Pringnitz Bros. and Wallace Pavey.

Clear Lake Lions Tamed Friday By Shamrocks

NO INDICTMENT IS RETURNED AGAINST MR. AND MRS. MAY

GARNER—The Hancock County grand jury returned no indictment against Mr and Mrs. Sheryl May of Corwith, charged with arson, because of insufficient evidence.

Mr. and Mrs. May were implicated by Frank Weider of Corwith, who is now serving a sentence for burning the May home last March The grand jury has been dismissed subject to call.

Judge M. F. Edwards of Parkersburg will be back this week The petit jury will report Tuesday

WELLEMEYER HAVING PRE-HOLIDAY SALE OF FURNITURE AND RUGS

The Times Print Shop has been busy the past week getting out advertising matter for Art Wellemeyer who is holding a furniture sale at his store. Art put about 4,000 circulars into the mail advertising his cut prices on 1937 furniture and rugs.

Art explains he is holding the sale at this time to make room for new furniture which will arrive after the first of the year.

Auxiliary Meeting

The Auxiliary members of the local unit will hold a Christmas party at the home of Miss Lydia Bock, December 9th at seven-thirty o'clock. All members are asked to bring their ten cent exchange gift.

Drivers' Exams Will Be Given In Both Britt And Garner The Next Two Months

Changes in schedule of giving drivers' license exams in Hancock county were announced the past week. Instead of being in Garner twice a month, patrolmen in the future will give the tests in Britt and Garner. Tests will be given in Britt, December 6; January 3, and January 31. In Garner, Dec. 20, and January 17.

WAS HARD FOUGHT BATTLE UP TO FOURTH QUARTER

Was Third Straight Win Of The Current Season

Last Friday evening the Shamrocks annexed their third win in as many starts this season, when they outscored a speedy Clear Lake team 31 to 18. Starting early the boys ran the count to 10-4 by the end of the first period and then went into a very decided slump, scoring only 3 points while the Lions dropped in 6, making the half score 13-10.

In the second half the Shamrocks began to perk up and although threatened closely, when the score stood at 16-17, they played much better ball than in the first half In the final period they really hit their stride and led by Jorgenson, hit the hoop for 12 points to their opponents 2.

Jorgenson topped the scoring for the evening with nine field goals and two charity tosses for a total of 20 points. The remainder of the Klemme scoring was evenly divided with the exception of Kluckhohn and Barz, who were in the game but a short time, and failed to score.

Palmeter looked best for Clear Lake with two field goals and a trio of gift shots for 7 points. Phillippe was next with 6.

Following is the box score of the game.

KLEMME—31

	FG	FT	F
Grosshuesch, f.	2	1	0
Trampel, f.	1	1	2
Kluckhohn, f.	0	0	1
Barz, f.	0	0	0
Jorgenson, c.	9	2	1
Schuldt, g.	1	0	2
Lau, g	0	1	1
TOTALS	13	5	7

CLEAR LAKE—18

	FG	FT	F
Palmeter, f.	2	3	3
Phillippe, f.	3	0	0
Ostrander, f.	0	0	0
Seissiger, f.	0	0	0
Rutan, c.	2	0	3
Lewis, g.	0	1	4
H. Lowman, g.	0	0	0
TOTALS	7	4	10

TOO MANY FOXES

Dr. Paul L. Errington, Research Assistant Professor at the Iowa State College and noted authority on wildlife problems has this to say about foxes in Iowa:

"Off hand, I would judge that there are probably twice as many foxes in Iowa as there should be. I believe that it would be to the interests of public and foxes alike to lower the present fox population level by any reasonable means. The foxes, except where they are scarce locally, are numerically able to withstand material reduction, by which some existing tensions may be relieved and some excesses averted.

"As a specific means of reduction, I would recommend increased hunting during the winter months when the fur is prime and salable. This is most effectively done with the aid of hounds or by still-hunting. Personally, I would be pleased to see still-hunting gain popularity over the state, for this is a clean, exacting sport and worthy of more attention than it has been getitng."

Mystery of "The Murder Without a Motive." Detectives can't identify the "Grey Man" who left his car in the lonely lover's lane and killed the girl. A true-mystery thriller in the American Weekly, the magazine distributed with Next Sunday's Chicago Herald and Examiner.

Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington.—Word comes from Rio de Janeiro that the government of Brazil has decided at long last to place its coffee business again on a competitive basis. That is to say, Brazilian coffee once more will be sold in world market conditions. It was 14 years ago that crop control was started, and now it has flopped finally after costing the growers losses accountable in millions and after virtually wrecking some portions of Brazil's foreign trade.

Brazil Quits Crop Control

I think it might be said also that the fallacy of the coffee control policy was among the real causes which eventuated in the dictatorship that established itself in Brazil recently. President Getulio Vargas succeeded in placing himself at the head of the nation "indefinitely" and he did so, he said, because of "unrest among the peoples" of the provinces. The first dictatorship in the Western hemisphere, therefore, is a fact.

But to get to the coffee question: it was the determination of the Brazilian leaders that a policy of scarcity would force coffee prices higher in the world market. The state of Sao Paulo initiated the scheme. It failed to work, and its sponsors said the reason was its scope was limited. Thus, it was expanded until the whole nation was embraced. Still, coffee prices did not go high enough and it was then that actual destruction of coffee began. Millions of tons were dumped into the Atlantic ocean and other millions were burned—even as we in this country burned surplus wheat and corn and killed 6,000,000 pigs.

As the destruction continued and the growers found themselves tied tighter with regulations and decrees, there were some increases in prices. But the promised great profits proved to be as illusory as a mirage on the desert.

The whole thing was a boomerang. Not only were the producers in Brazil disillusioned by failure to gain the record returns they had been led to expect, but they found another sad and wholly disadvantageous result staring them in the face. There was some increase in the price—just enough, indeed, to reduce consumption to some extent—for the growers, but with Brazil reducing available supplies others got into the producing business.

Among these new coffee growing areas, Colombia sprang into prominence. Maybe Colombia coffee was not as good as Brazil's, in quality. Maybe it was not quite as acceptable otherwise. But it was cheaper, and it was profitable for Colombia planters to produce. They found a ready sale.

That, however, was not the worst. When other coffee-using nations bought coffee from Colombia and other growing areas, Colombia was able to buy other commodities from the nations buying her coffee. New trade agreements suddenly showed up; new relationships were established, and some of Brazil's former business connections throughout the world are gone with the wind. They may never be re-established.

We, in the United States, ought to give quite a bit of thought to Brazil's coffee experiment for we have had, and are threatening to have more, experiments of a kindred nature. Lessons in crop control are right expensive, and more important is the fact that sooner or later all through history, they have had to be abandoned. And when I refer to crop control, I include all kinds of production control whether agricultural or industrial. Somebody always has to pay dearly for it and usually the cost has been extended. It is reflected in other commodities and in taxes until the actual loss from the experiment is multiplied many times over.

* * *

Speaking of congress, the way it has started off makes me think that the extra session was purely a political move. I am quite sure it is going to accomplish some great good like amending the neutrality act. Of course, I suppose I should not be selfish. I ought to consider that the representatives and senators must have time to make speeches for this or that or the other so that their constituencies back home will be duly impressed with their importance. Maybe so! But I repeat that the prospect of anything worth while in either the special session or in the regular session to follow in January is decidedly dull.

Political Move

Politically, there are several things to watch for in the time that congress will be heave-ho-ing. One of these definitely now visible is the maneuvering among the Democrats to find out whether President Roosevelt really wants to be a candidate for a third term.

I think I am violating no confidence when I say that a good many of the President's real friends at the Capitol would like to know, and know now, whether he is going after a third term. He hasn't told them in a way that is convincing. He made a speech at the "victory dinner" last March 4 in which he said he had an ambition to leave the President's chair and desk with "the nation intact, a nation at peace, a nation prosperous," etc. He said he planned to do that in January, 1941.

That would seem to be clear enough. Yet, it is amazing how many members of the President's party at the Capitol contend that those remarks did not constitute a final withdrawal. They point as well to the fact that other Presidents, after being re-elected for a second term, have come out flat-footed with their announcements and have told their party, in effect, "Go out and get yourselves a new candidate."

* * *

So, I am making a small prediction. There will be plenty of odd maneuvers, unusual situations, that will appear to "just happen" that way. Their purpose will be to bring about a circumstance wherein President Roosevelt can appropriately tell all of those who have so faithfully stood by him that he is, or is not, a candidate for a third term.

How About Third Term?

The other phase of congressional activity that will prove interesting links in somewhat with the third term question. It involves the personal political fortunes of the representatives and senators who will seek re-election in 1938. It is easy to see how many Democrats, if they know definitely that President Roosevelt will seek a third term, will want to ride again on the New Deal wagon. It is equally easy to understand how some of them, desirous of observing the tradition that no man shall serve more than two terms as President, may want to take a stand opposing the course if President Roosevelt decides that way.

This condition leads far afield. I am informed, for instance that some senators and representatives who have been back home in conservative sections of the country want to dodge further support of the New Deal. This class obviously is biding its time for something to happen to justify a jump. Announcement by Mr. Roosevelt of intention to be a candidate for the third time would provide the reason. The converse is true, as well, for there are those in the house and senate who have found the President's personal popularity at home as great as ever and they are looking for an excuse to sound off that they believe in the Roosevelt policies 100 per cent and want him to have a third term.

The election results in various parts of the country will have some influence on the attitude of representatives and senators as the session continues. Take the vote in Arkansas, for example. Representative Miller won the senatorship in succession to the late Senator Joe Robinson. His victory was over Governor Bailey, who announced that the New Deal was for him and that his defeat would be a slap at President Roosevelt. It is a fact that New Dealers were pulling for him—but Representative Miller was elected.

That is just a sample. The senators and representatives are going to interpret such elections in the light of sentiment in their own bailiwicks. Undoubtedly, some are going to show more spunk in behalf of the New Deal while others have come back determined to foster their ideas of Democratic principles rather than those of New Deal.

* * *

This date being what it is, I want to record a tribute in these columns, a tribute to a grand public servant who never has sought publicity for himself nor claimed the credit that is due him. For, it was 40 years ago this week that Col. Edwin A. Halsey, of Tye River, Va., entered the employ of the senate. Now, he occupies the post of secretary of the senate, the highest available outside of senate membership.

Tribute to Halsey

The senate never convenes but that I am again impressed with the smoothness of the senate organization under "Eddie" Halsey's direction. I truly believe him to be the best informed man at the Capitol on legislative procedure. As his colored messenger once said to me: "Yessah! De cunnel he suah do know his stuff."

And that goes for Colonel Halsey's political acumen, too. He has performed the chores of the Democratic side of the senate to everybody's satisfaction. I suppose some of the senators who like to be regarded as big shots won't care for this exposure, but I have seen them saved from unnumbered mistakes that would have made them the laughing stock of their constituencies. Day after day, in season and out, "Eddie" Halsey has done more for the Democratic senators than they can ever repay. He ought to be called "the Sage of Tye River," as his counsel warrants that description. The state of Virginia could do itself a good turn if it kept "Eddie" Halsey in mind for something higher.

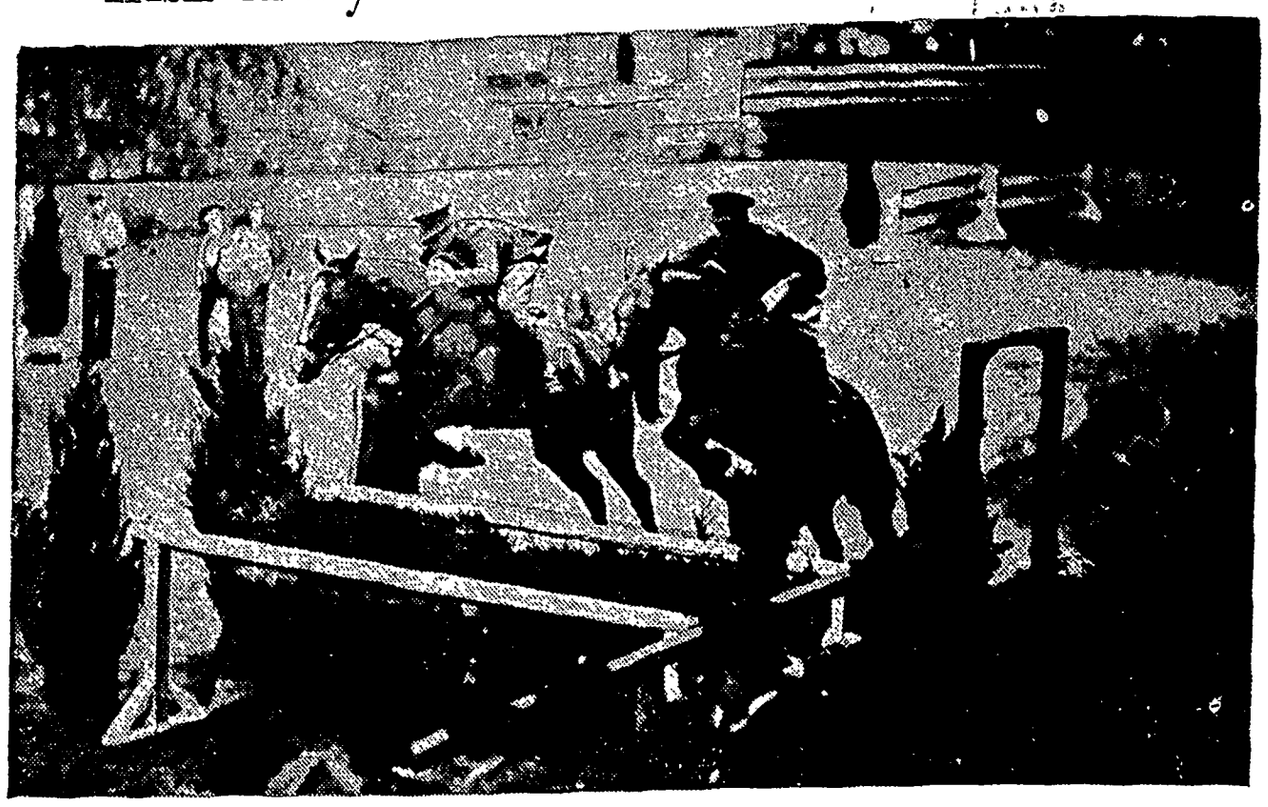
Irish Army Team Is Best at Horse Jumping



The Irish Free State army team of Lieut. G. M. Heffernan and Capt. F. A. Ahearn take the jumps during the pair jumping contest for military class at the National horse show in New York recently. They came through with flying colors to win the event.

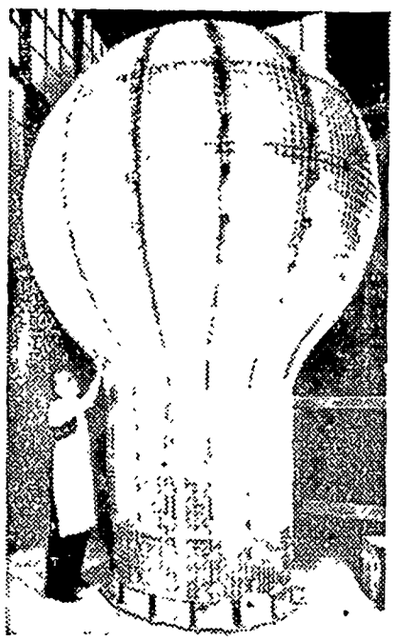
Joe Di Maggio Goes Fishing

Joe Di Maggio, sensational outfielder of the New York Yankees, now living with his family in San Francisco for the winter, is shown as he fished for striped bass in San Pablo bay. While admiring onlookers rooted for him the home-run king brought in several fish.

It's a Hair Raiser for Clark Gable

It seems that Clark Gable, movie star, has a horse named Sunny and the horse knows some tricks. One of them is to pick Gable up by the hair. Anyway the picture speaks for itself.

EDISON MEMORIAL



Shown after its recent completion at Corning, N. Y., is the giant electric light bulb which will surmount the $100,000 memorial tower to Thomas Alva Edison at Menlo Park, N. J., where Edison invented the first incandescent electric light. The bulb, 14 feet high, contains 960 electric lights with a 24-inch reflector to be utilized as an airplane beacon.

In Case of an Aircraft Raid

Prospective customers listen with interest while a street salesman in Geneva, Switzerland, demonstrates special lamp shades for use in time of an air raid. Many devices such as these are now on sale in European cities as preparations for giant air-raid drills.

Japan Demonstrates Man Power in China

When heavy rains make roads impassible in North China for Japan's highly mechanized artillery and commissary units, the Nipponese warriors simply lay aside their weapons and supply the motive power as shown here. These men are hauling a supply wagon over terrain where anything but man power might succumb to the mud.

Safe Counsel: Use Chains For Bad Weather Driving

SAFE counsel for bad driving weather, according to police officials and safety engineers, is to use tire chains.

This warning was issued today with winter driving conditions prevailing, after the report of the National Safety council that 23,000 persons died in traffic accidents during the first nine months of 1937, an increase of 9 per cent over the same period last year. With greater driving danger in winter because of ice and snow, police officials and safety engineers warned that tire chains provide the most positive anti-skid and traction yet developed.

The Contest board of the American Automobile association, in official test No. 3143, conclusively proved the greater margin of safety and stopping ability provided by Weed tire chains. Vividly illustrating their imperative necessity on snow or ice, the AAA tests showed that chains, on rear wheels only, stopped a car in 45 per cent less distance than when no chains were used, and in 66 per cent less distance when chains were used on all four wheels!

IT'S GREAT TO BE BACK AT WORK

when you've found a way to ease the pains of RHEUMATISM and do it the inexpensive way, too.

You can pay as high as you want for remedies claimed to relieve the pain of Rheumatism, Neuritis, Sciatica, etc. But the medicine so many doctors generally approve—the one used by thousands of families daily—is Bayer Aspirin—15¢ a dozen tablets—about 1¢ apiece.

Simply take 2 Bayer Aspirin tablets with a half glass of water. Repeat, if necessary, according to directions.

Usually this will ease such pain in a remarkably short time.

For quick relief from such pain which exhausts you and keeps you awake at night—ask for genuine Bayer Aspirin.

15c FOR 12 TABLETS

virtually 1 cent a tablet

Anger Is Like Rain

Anger is like rain which breaks itself whereupon it falls.—Seneca.

HELP KIDNEYS

To Get Rid of Acid and Poisonous Waste

Your kidneys help to keep you well by constantly filtering waste matter from the blood. If your kidneys get functionally disordered and fail to remove excess impurities, there may be poisoning of the whole system and body-wide distress.

Burning, scanty or too frequent urination may be a warning of some kidney or bladder disturbance.

You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel weak, nervous, all played out.

In such cases it is better to rely on a medicine that has won country-wide acclaim than on something less favorably known. Use *Doan's Pills*. A multitude of grateful people recommend *Doan's*. Ask your neighbor!

Suede Combines Smartly With Knit

By CHERIE NICHOLAS

IMPORTANT news—knit and suede have formed a partnership! If it's fashion thrills you are seeking just make a visit to the nearest display of late fall and winter knitwear fashions and see how smartly knit and suede are carrying on in their new alliance.

If you are interested in knitted apparel, and of course you are, for every woman is sensing more and more that knitted clothes not only serve most faithfully, but when it comes to "style" it's all there and—well, as we were saying, if you are interested in knitted apparel just wait before buying until you see the magic worked in the new outfits via the added touch of suede either in an accessory way such as gloves, belts, handbags, hats and shoes or by working the suede in as an integral part of the costume.

See the stunning two-piece to the left in the picture. It demonstrates perfectly how skilfully designers are using suede with knit. The knitted fabric for this model is appropriately called "huntress tweed." The modern Diana will certainly "dress to the part" in this striking twosome. Describing the knitted material that fashions it, there are solid colored cotton nubs splattered throughout a vertical rib stitch. The jacket front is of soft suede in a contrasting color and a zipper closure. The silk scarf matches the tailored suede belt in color, and the little skull cap worn snugly at the back of the head is of the same knitted material as the skirt.

As to the costume centered in the group, all the way from Tibet comes the fine soft cashmere wool so emphatically in vogue in knitted sportswear this season. Being well styled, this cashmere knitted dress will prove chic and comfortable at outdoor sports at the same time that it underwrites a promise of being well-dressed at afternoon functions. There are suede accents with gold eyelets and a suede belt with a gold buckle. The skirt is four-gored and flares gracefully.

Cashmere does service to smartness, comfort and sports style in the two-piece knitted dress shown to the right. There is a shirred yoke effect in the front part of the blouse, mounted by a neckline drawn up and bowed with a grosgrain ribbon in peasant fashion. The belt is suede The wide hip-band emphasizes the youthful silhouette and is surmounted by novelty pockets posed on the diagonal.

Which reminds us, the pocket theme is an important one. Watch the newest little jackets and see how decoratively and amusingly they are being pocketed this season. Furthermore, advance news is to the effect that designers are going to continue to "say it" for the new spring fashions in terms of novel and numerous pockets.

If you are assembling a suede accessory ensemble, look up the smart new belts made of cutout leaves in multi colors riveted together with metal eyelets. They tone up the simplest knit dress to perfection.

Another way to carry out a successful partnership of suede with knit is to top the knitted dress with a knee-length somewhat flaring coat of bright suede. This type costume is proving a campus favorite. Also to wear about town there's nothing swankier.

As to sweaters and twin sets (some of the latter top the knit pull-on blouse with a cunning knit bolero instead of the usual sweater jacket) they yield to the new embellishment of suede most gaily

IN BLACK AND GOLD

By CHERIE NICHOLAS

Black and gold, black and gold! Style creators and designers are singing the refrain in clarion tones while the vast throng of fashion followers join in a mighty chorus that resounds throughout the fall and winter mode. With the season's highlight of black and gold in mind, Madame Jolles of Vienna, noted for handbags, especially exquisite petit point as well as other media, designs the elegant bag which you see in the picture of black antelope with an imported dome-shaped gold frame and a circular center lock topped with a ruby red stone.

Corsage for Youth

Floral gifts are appreciated in different ways. A young person will usually like best an arrangement or corsage, while an older person is likely to prefer a plant.

FASHION RUNS WILD IN USE OF FLOWERS

By CHERIE NICHOLAS

It all started back in the days of the Restoration, when ladies tied beguiling bonnets underneath their chins, with flowers tucked at the brim to complete the picture of feminine charm.

Now the designers are giving us bonnets, flowers and femininity, based on Restoration styles. And we're using flowers where we never thought of using them before: nosegays pinned to chiffon handkerchiefs, violets on a black suede glove, velvet neck-bands finished with forget-me-nots, flower jewelry, and flower polishes for fingertips.

It's all part of the back-to-femininity movement, which started the cropping up of flowers and the softened, subtle nail polish shades that make the hands look really feminine. It's especially smart to match up your polish to the flower you wear—clover polish with a silver-violet flower in your hair, tulip with a brilliant tulip pinned to your black gown, thistle with a bunch of faun-colored thistles on the lapel of your brown fur coat.

Wear All the Jewels You Wish and Be in Fashion

From Paris comes report of an unrestricted use of jeweled gold and silver belts, huge clips, jeweled buttons and brilliant sequins and other amazing jewels, in way of necklaces, bracelets, rings and innumerable individual brooches, flower sprays, bow knots and such, bringing back 1900, 1860 and the Eighteenth century luxury display that characterized the modes of those periods

Luxury Motif

Lame combined with furs and rich fabrics makes handsome evening costumes at the leading Paris fashion houses.

STAR DUST

Movie • Radio

★★★By VIRGINIA VALE★★★

WHEN motion picture producers wander away from their office desks, they get the most promising ideas for pictures. For instance, it might never have occurred to the head man of the 20th Century-Fox studios to cast Shirley Temple and Sonja Henie in a film together if he hadn't happened to pass the ice rink where Miss Henie practices.

At first he was horror-stricken to find the company's precious child risking her neck trying to learn Sonja's whirlwind capers, but when he saw that she learned them as easily, and safely, as she does tap-dancing routines, he decided that she must do a skating picture with her teacher.

Sonja Henie

At Paramount, the big boss heard shrieks of hilarity coming from the portrait photographer's studio, and on investigating found W. C. Fields and John Barrymore clowning around as Romeo and Juliet. Right away he was inspired to cast them together in a loony story called "Things Begin to Happen."

—★—

Grown-ups may well envy the school children of today who learn their history lessons through such an exciting medium as the R. K. O. motion picture, "Victoria the Great." Filmed in England with Anna Neagle in the role of the queen, this picture was made with the hearty co-operation of government officials, so all the glory of real castles and authentic royal settings make it a feast for the eyes.

Sixty years of her life are covered in this story, so it is a series of dramatic high spots. And so skillfully has the story been told, it is just the story of a woman's heart, a woman who was willful and pathetic—with all her regal splendor.

—★—

Lanny Ross was all ready to sign a contract to make pictures for M-G-M, when it occurred to him that with Nelson Eddy and Allan Jones already signing on that lot, there wasn't much room for another singer. So, the shrewd Lanny hustled over to Columbia Pictures' studios and arranged to make pictures for them instead. There he will be sure to get all the good singing roles.

—★—

Those folks you hear on Gabriel Heatter's "We, the People" program certainly enjoy the evening of that broadcast. After the first broadcast, Heatter takes the whole troupe of visitors across the street to dinner. Afterward, they return to the studio for the repeat western broadcast.

—★—

All the youngsters who were thrilled over Dick Merrill's ocean flights will want to arrive for the first showing and stay all day when "Atlantic Flight," starring Dick Merrill himself comes to their local theater. In the picture he is the same engaging, modest, casual young man that he was in the newsreels. And the picture boasts some hair-raising stunt flying.

—★—

All three of the Lane sisters are now working for Warner Brothers. Priscilla, who with her sister Rosemary, provided many bright moments in Waring's "Varsity Show," will do the same for the next "Gold Diggers" in support of Dick Powell. And Lola, who has been in pictures much longer than her sisters, will be seen in "Hollywood Hotel."

—★—

Turning down several coast-to-coast radio programs offered him, Henry Hull, the distinguished stage actor, is going to try motion pictures again. He will play a prominent role in M-G-M's "Marie Antoinette" in support of Norma Shearer. About the time that picture is ready for the screen, another Marie Antoinette will be competing for attention. Deanna Durbin is going to play the role in a story written around her more tender years.

Norma Shearer

—★—

ODDS AND ENDS—Helen Menken, long-suffering "Second Wife" of the radio serial is going to make a motion picture for Warners . . . Clark Gable, weary of being a swaggering, wise-cracking hero wants to play in a tense drama about the fight against yellow fever in the tropics . . . Carole Lombard is wearing a black wig in "Food for Scandal" and she is not sure it is a good idea. Her best friends don't recognize her . . . Bob Hope, radio comedian, is such a hit in his first Paramount picture that he has signed to do more.

© Western Newspaper Union.

Waiting to Be Sewn

NOW we ask you isn't this the layout supreme for Young America Miss Modern and Mother Meticulous? Childish glee sophisticated gusto and maternal satisfaction will be the order of the day when you have run-up these swank wardrobe assets. Remember it's the natural thing to Sew-Your-Own!

For Master or Miss.

It's grand to be young in the wintertime; there's so much fun to be had. Mother, to be sure your edition of Young America has his share of outdoor fun this winter make this smart and complete ski ensemble. (For either boy or girl.) It is styled after a real ski champion's outfit and makes an instant hit with every young husky.

Sophomore Sensation.

Here's a dress after your own heart, Milady!—I betcha. Sew-Your-Own calls it its Sophomore Sensation. From gay Paris comes its concave silhouette; from S-Y-O its concise, easy to follow sewing instructions. Make your version in thin wool or velvet for Ace occasions this winter.

Carefully Planned.

Mothers are sweet in almost any kind of dress, but in the trim new model, above right, they're superbly sweet. There's something genteel about its styling. It was carefully planned to bring you the best in style, the most in comfort. A glance at the diagram will convince the woman who sews of its simplicity. Two versions will be better than one of this charming fashion. Anything from percale to sheer wool will do nicely as the material.

The Patterns.

Pattern 1965 is designed for sizes 4, 6, 8, 10, and 12 years. Size 6 requires 2⅝ yards of 54-inch material for the ensemble plus ⅓ yard knitted fabric for hat, sleeve and trouser bands and ⅔ yard zipper fastener for blouse front.

Pattern 1359 is designed for sizes 12 to 20 (30 to 40 bust). Size 14 requires 4⅛ yards of 39-inch material. With three-quarter sleeves 4¼ yards are required. The bows and belt require 2⅝ yards ribbon.

Pattern 1402 is designed for sizes 34 to 46. Size 36 requires 4½ yards of 35-inch material. The collar in contrast requires ⅝ yard.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Drive, Chicago, Ill. Price of patterns, 15 cents (in coins) each.

New Pattern Book.

Send 15 cents for the Barbara Bell Fall and Winter Pattern Book. Make yourself attractive practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns.

HOW LONG CAN A THREE-QUARTER WIFE HOLD HER HUSBAND?

YOU have to work at marriage to make a success of it. Men may be selfish, unsympathetic, but that's the way they're made and you might as well realize it.

When your back aches and your nerves scream, don't take it out on your husband. He can't possibly know how you feel.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

Faith and Logic

Faith is as much a normal function of the human mind as is logic.—William W. Keen.

Boys of America

OF COURSE what we have a right to expect from the American boy is that he shall turn out to be a good American man. Now, the chances are strong that he won't be much of a man unless he is a good deal of a boy. He must not be a coward or a weakling, a bully, a shirk or a prig. He must work hard and play hard. He must be clean-minded and clean-lived, and able to hold his own under all circumstances and against all comers. It is only on these conditions that he will grow into the kind of a man of whom America can really be proud.—Theodore Roosevelt.

CHEW LONG BILL NAVY TOBACCO 5¢ PLUG

Are Women Better Shoppers than Men?

GRANTING a woman's reputation for wise buying, let's trace the methods by which she has earned it. Where does she find out about the advantages and details of electrical refrigeration? What tells her how to keep the whole household clean—rugs, floors, bathroom tiling—and have energy left over for golf and parties? How does she learn about new and delicious entrees and desserts that surprise and delight her family? Where does she discover those subtleties of dress and make-up that a man appreciates but never understands?

Why, she reads the advertisements She is a consistent, thoughtful reader of advertisements, because she has found that she can believe them—and profit thereby. Overlooking the advertisements would be depriving herself of data continuously useful in her job of Purchasing Agent to the Family.

For that matter, watch a wise man buy a car or a suit or an insurance policy. Not a bad shopper himself! He reads advertisements, too!

BE SURE WILDLIFE HAS PLENTY OF WINTER FOOD

"Preparation should be made at once to protect wild life during the coming winter."

This suggestion is made by G I. Hendrickson, Iowa State College zoologist, who points out that while needs are not exactly critical from the standpoint of food supply, farmers and sportsmen should cooperate in providing food and shelter for the wild life of Iowa. This cooperation in the past has been splendid, Hendrickson declares.

Ragweeds, fox tail, wild sunflower, smart weeds and other weeds all furnish seed as food for such birds as bob white or pheasants. There is more weed growth over the state and the weeds are taller this year than they normally are, although possibly due to the drouth through the early summer and late fall, the weeds did not set as many seeds. This especially is true in western and northwestern counties.

In providing food for birds, Hendrickson advises that it be put near places where the birds find shelter, as along fence rows, in willow thickets, hedges, etc. "You can't feed wild life like you do domestic animals," the Iowa State College zoologist explains. If birds are forced to go very far for food during cold, snowy weather they may be unable to find their way back to shelter, or often develop pneumonia and die. The high mortality of pheasants—65 per cent—in 1935 was largely because of this factor.

Farmers, 4-H boys, sportsmen and others interested in conserving Iowa's wild life resources may find many answers to feeding and sheltering problems in two bulletins "Winter Birds of Iowa" and "Management of Upland Game Birds of Iowa" which may be obtained from county agents

Grade School News

Grades 1 and 2

The second graders are making a Pilgrim booklet. Edward bruoght his log house and we are making a Pilgrim scene in our sand table.

Iris Rosendahl had a birthday Wednesday. We had a party. We put six candles on her cake.

Most of the engines we have been making are finished. Next week we are going to start working on our big engine.

Grades 3 and 4

Mrs. Larsen was a visitor in our room last Friday.

We have a new silk flag.

We read Thanksgiving stories and poems We wrote some of our own and read them to each other.

Peggy Coobs and Shirley Stille brought birthday treats this week.

We drew Pilgrims in art class.

Grades 5 and 6

Barbara Johnson had a birthday last Saturday and on Friday she surprised us by treating us.

Junior Buntenbach told us about his ride in an airplane.

We have been tudying about the wheat regions of our United States in fifth grade geogrpahy class. We learned that hard wheat made the best flour because it contained more gluten. Using bread dough we experimented to find out what gluten looked like. We also made a poster showing wheat products.

The three days before vacation we were busy with six weeks tests

Mrs. Laren visited in our room last week.

In fifth grade history we finished our unit on "inventions." We made booklets containing stories and pictures of the early inventions.

Grades 7 and 8

Reporter—Billie Zabilka

Our seventh and eighth grades have finished a unit over native flowers and plants. Themes were written on each specimen that was brought. Each row made a booklet with a very attractive cover. The plants and flowers that were brought were made into charm strings

Outside judges decided that row IV had made the best booklet and charm string. The pupils in that row are. Billy Grosshuesch, Eugene Haberkamp, Leonard Kaduce, Betty Etchen, Dean Merkel and Phyllis Klotzbach

The fifth and sixth grade room came in our room last Wednesday to hear a radio program about Scotland. Everyone enjoyed it. We are looking forward to more programs like it.

Most of us are glad that our six weeks tests are over.

Our librarian for the next two weeks is Elwyn Jacobs.

In the six weeks spelling test Billie Zabilka got one hundred per cent Last time it was a girl.

The grade basketball boys practiced playing with the freshman boys.

GOODELL AND VICINITY

Lawrence Smith and family returned from Graetenger, Iowa, where they visited Mrs Smith's parents.

Mr. and Mrs Harvey Hubbard returned from Chasta, Minnesota, where they took the latter's sister, Mrs McNutt, to her new home .

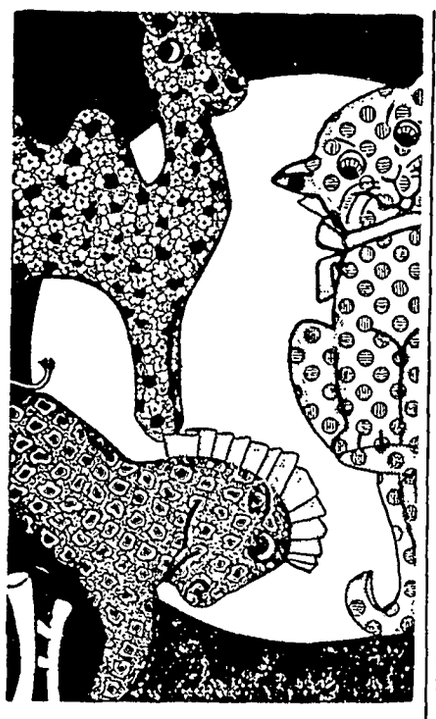
Easy-to-Make Cuddle Toys



Fun to sew—inexpensive to make—excellent for Christmas gifts is this collection of cuddle toys. Two pieces with just the necessary "trimming" of ears, mane and tails extra. The kiddies love them! Use up those odds and ends and make your toys as colorful as possible—in short irresistible. In pattern 5932 you will find a pattern of the three toys; directions for making them; material requirements.

To obtain this pattern, send 15 cents in stamps or coins (coins preferred) to The Sewing Circle, Household Arts Dept., 259 W. Fourteenth St., New York, N. Y.

Please write your name, address and pattern number plainly

AROUND THE HOUSE

In Making Vegetable Salads.—To prevent vegetable salads from becoming too watery, dry the vegetables before combining with the salad dressing.

* * *

Ten-Minute Sweet.—Line a buttered pie dish with breadcrumbs. Into a pint of milk whisk 2 eggs, 4 tablespoonfuls of sugar and a dash of vanilla essence. Pour over the crumbs and bake for 10 minutes.

* * *

Washing Voile.—Voile frocks will not shrink if you use a tablespoonful of epsom salts to every gallon of water when washing them.

* * *

For Dry Shoe Polish.—Shoe polish which has become hard and dry should be moistened with a little vinegar.

How Lawrence of Arabia Became One of the Shaws

T. E. Lawrence of Arabian fame dropped in for tea one day at the house of the famous dramatist, Bernard Shaw. One of the ladies present glanced at him admiringly. He looked very young with his light hair, delicate complexion, and small slender frame. The lady turned to Mrs. Shaw. "What an excellent looking son you have!" she exclaimed. Lawrence howled with delight when he heard this, and swore that he would thereafter be known as Shaw.

The result was that when he soon afterward hid himself in the British tank corps he enlisted as Private Shaw.

When Bernard Shaw later presented Lawrence with a copy of his play, "Saint Joan," he wrote a presentation inscription in it, "From Public Shaw to Private Shaw."

Ecuador Indians Were Skillful in Handling Platinum

By EMILY C. DAVIS

New York.—One prehistoric people mastered the difficult metal, platinum, and they were Indians of northern Ecuador. They were part of the great golden Incan empire, although last to be absorbed into the vast Indian political machine before Spanish conquest ended its amazing progress.

These ancients of Ecuador made platinum jewelry. Apparently, they were the only ones to use this metal ornamentally until recent times. They made rings and tools of it, but mostly they plated gold with it to form dangling, shiny plateldts, to catch the light.

The extraordinary point, though, is that they could blend the soft platinum with other metal to make a harder alloy. It took our civilization about a century to master that problem. We force the platinum to melt by intense heat, only possible with modern technical appliances.

Alloy of Platinum and Gold.

That Indians actually achieved a platinum alloy was discovered by Dr. Paul Bergsoe, vice president of the Danish Association for Metallurgical Research. He found a clue in some half-finished work, abandoned over 400 years ago. He declares it compels modern science to have new respect for Indian metallurgy.

The Indian method was to mix platinum grains with gold dust and heat it until the gold ran and plated the platinum grains. Then they heated it further by blowpipe until gold and platinum mingled enough to form a pasty mass that could be hammered when hot. So, by alternately forging and heating they contrived an alloy—not up to modern ones, but good enough for modern metallurgists to think it was pure platinum. Chemical analysis revealed the artificial blend.

The Indians apparently took their secret to the grave. Had treasure-hunting Spaniards observed the technique, says Dr. Bergsoe, the story of platinum in Europe might have taken a different turn.

Teeth in the Stone Age Were Very Much Like Ours

Berlin.—Late Stone age people had very much the same kind of jaws and teeth that we have nowadays, except that in modern man caries, or tooth cavities, has become very much more numerous. This, in summary, represents the findings of Prof. Herman Euler of the University of Breslau, who has made a special study of a large number of skulls found in Silesian village sites of 4,000 years ago, when central Europe was still in the Neolithic age.

As compared with modern times, the low incidence of caries is very striking. The Silesian skulls show only 0.7 per cent of children's teeth with cavities, as against 82 per cent of carious teeth in modern children. For adults, the figures are 1.76 and 92 per cent, respectively.

In size and condition of wisdom teeth, however, moderns have a decided advantage of their Neolithic predecessors, Professor Euler's research disclosed. Of the skulls from the ancient Silesian graves, 26.8 per cent had no wisdom teeth at all, whereas a check-up on German university students showed suppression of wisdom teeth in only 1.3 per cent. In general, wisdom teeth and other molars are larger and solider in moderns than in the Neolithic skulls. X-ray studies show that pulp cavities are larger in the ancient teeth.

Ship-Lizard Fossil Is in Harvard's Museum

Cambridge, Mass. — One of the world's oldest and oddest animals, the ship-lizard, is now on display here in Harvard's Museum of Comparative Zoology.

It lived in Texas some 225,000,000 years ago and its fossil remains were discovered and collected from the famous Texas red-beds by Prof. Alfred S. Romer, L. I. Price and R. V. Witter.

This ancient lizard, forerunner of the giant dinosaurs, gets its name from a sail-fin, two feet long, that runs along its backbone. It is about eight feet long, half tail and half body, and its head is only half a foot long. Scientists call it Edaphosaurus.

New Disease With Severe Effects and Very Long Name

New York.—A new disease, which may have affected as many as one out of every five adults in the country without their knowing what they had, came in for discussion at the meeting of the American Public Health association here.

The disease has the jaw-breaking name lymphocytic chorimeningitis. It is caused by a virus. In about half the cases it causes fever and symptoms similar to influenza. In the other half it affects the membranes that cover the brain and causes more severe symptoms, such as bad headaches, stiff neck, nausea and vomiting and even slight, temporary paralysis. So far, no death has been reported m a proved case of this disease.

It is difficult or impossible to distinguish this new disease by clinical means alone from another brain membrane inflammation, acute aseptic meningitis, Drs. R. D. Baird and Thomas M. Rivers of the hospital of the Rockefeller Institute for Medical Research pointed out.

Its Virus Is Isolated.

The disease was discovered and its virus isolated by Drs Charles Armstrong and R. D. Lillie of the United States National Institute of Health. They found the virus while studying viruses from St. Louis encephalitis epidemic patients m 1934. Two years before this Commander Paul F. Dickens of the United States Navy medical corps had reported two cases of what looked like acute aseptic meningitis but which he thought might be another disease caused by a virus. Since then the virus has been recovered from patients and from monkeys, mice and other animals in this country, England and France.

Diagnosis of the disease, say Dr. Armstrong, Drs. Baird and Rivers and others who have studied it, depends on examination of the spinal fluid and on a mouse protection test. This consists in mixing the patient's serum with the virus and injecting it into mice. If the patient had the disease, his blood would have antibodies in it that neutralize the virus. In that case the mouse would remain well. But if the mouse gets sick, it shows that the patient's blood had no virus-neutralizing antibodies, and therefore that he did not have lymphocytic choriomeningitis.

Dr. Armstrong and associates made this test on blood from nearly 2,000 well persons who were having routine blood tests for other reasons. They found that among the adults, almost 20 per cent had neutralizing antibodies in their blood, although none of them recalled being sick with symptoms of any brain or nerve disease. This indicates that nearly one out of every five adults may have had the disease. The reason it has been missed in these patients is probably because when it does not affect the brain it behaves so much like influenza that it would be diagnosed as such.

Carbon Dioxide Filled Lamps Supply Daylight

Lake Placid, N. Y.—Carbon dioxide filled incandescent lamps, providing an artificial daylight claimed to be a wide improvement over any previous type of artificial daylight lamp, have been commercially perfected, the Optical Society of America was told here.

The lamp is suitable for matching colors, the test which has proved the undoing of most previous artificial lights, Dr. Thomas J. Killian declared.

Previous attempts to use carbon dioxide in lamps, a long-sought goal because of its white spectrum, have failed because of the tendency of the gas to break down under the electric charge sent through it, with consequent changes in its pressure and behavior. A simple electronic control for the pressure is the new feature of the light.

Whiskers Grow Faster When Weather Is Warm

Jacksonville, Fla. — The whisker crop grows faster in hot weather. This is not hearsay. Scientific evidence, carefully gathered hair by hair, appears in the journal, Science. The crop report was made by Dr. Paul Eaton of the Florida state board of health and Mary Wright Eaton.

The evidence was gathered in an experiment involving "the measurement of the hair shaved from the same part of the face at approximately the same hour and with the same technique every day for one year," the report states.

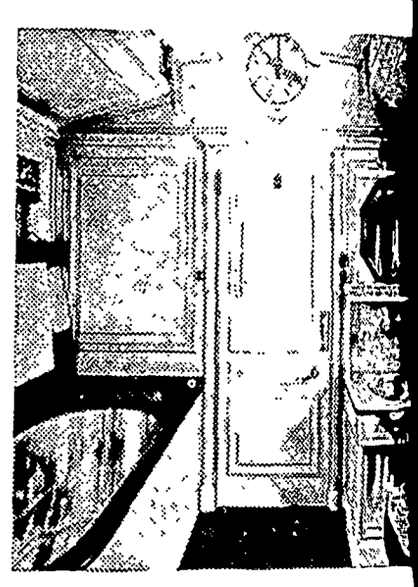
Russia Wants Muskrats

Moscow.—Muskrats, immigrant animals from America, are regarded as pests in western Europe, but in the U. S. S. R. they are being encouraged to colonize the vast northern marsh lands, as an addition to Russian fur resources.

Royalty Rolls on the Rails

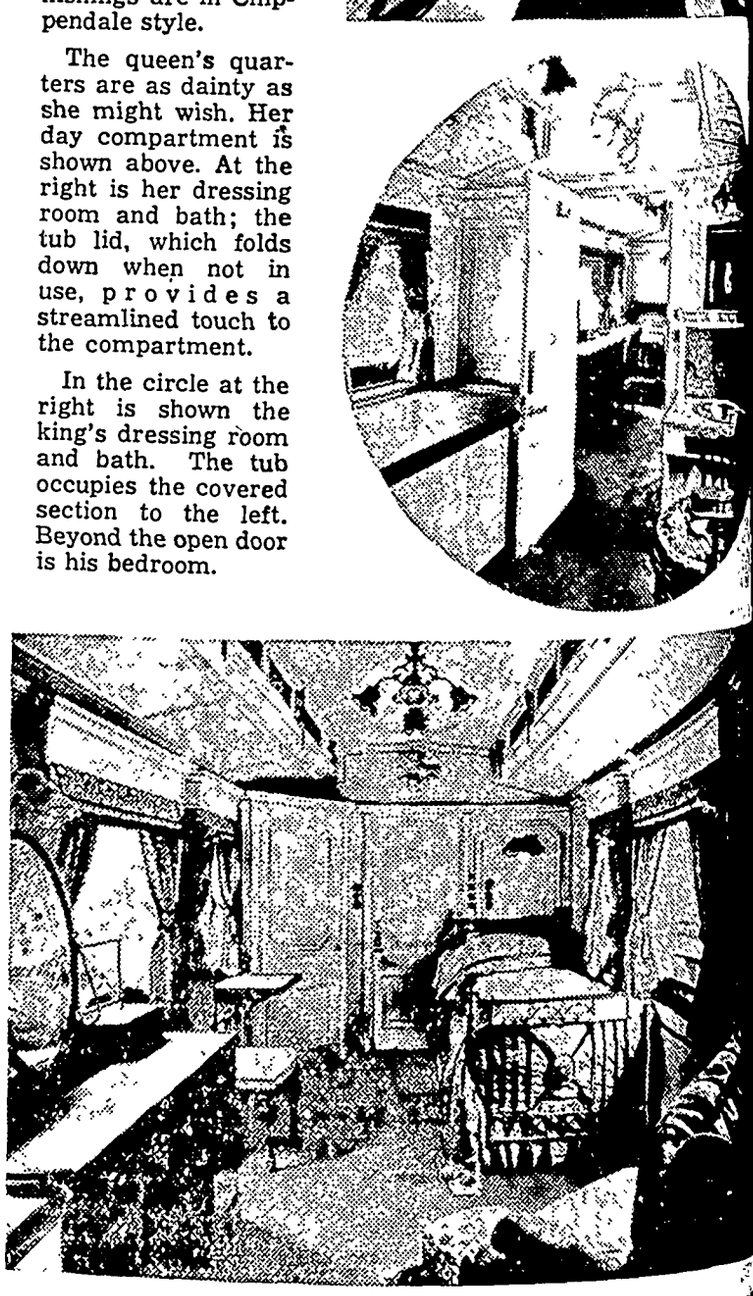
King George VI of England need sacrifice none of the comforts of home aboard the royal train, as indicated by his own compartment shown above Part of the equipment consists of two folding writing desks set beside the unusually wide windows in the center of the room, which occupies the car's full width.

LITERALLY a rolling Buckingham Palace is the royal train of two coaches in which King George VI and Queen Elizabeth ride. These pictures, the first ever taken of the State train, show the various suites occupied by the royal couple. All the compartments are beautifully paneled in mahogany with inlays of rosewood and satinwood, and each is luxuriously fitted. The furnishings are in Chippendale style.

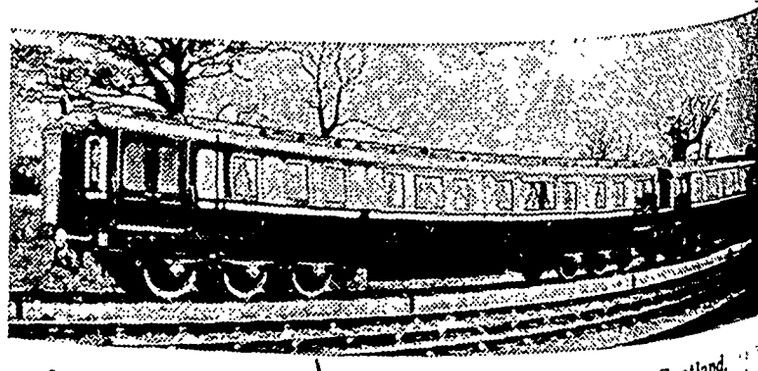


The queen's quarters are as dainty as she might wish. Her day compartment is shown above. At the right is her dressing room and bath; the tub lid, which folds down when not in use, provides a streamlined touch to the compartment.

In the circle at the right is shown the king's dressing room and bath. The tub occupies the covered section to the left. Beyond the open door is his bedroom.



Queen Elizabeth sleeps peacefully and comfortably in the royal compartment as she travels aboard the royal train. The entrance is in the center background, beside the bed which occupies a corner of the room Note the charm of the Chippendale furnishings.



In these two coaches the royal couple journeyed to Scotland.

Scenes and Persons in the Current News

Hanson of Minnesota, newly crowned national corn husking champion, shows how he husked 21.30 rn in 1 hour and 20 minutes at the national contest at Marshall, Mo. 2—King Carol of Rumania therly kiss on his sixteen-year-old son, Prince Michael, after the crown prince was made a sub- the army. 3—Lord Cecil, chairman of the First National Congress of the International Peace s he listened to discussions at the opening of the congress in London, recently.

0 Million Year Old Footprint

num Brown, curator of fossil reptiles of the American Mu- tural History, is pictured with the largest reptile footprint discovered. Found in a coal mine near Cedaredge, Colo., on expedition, the footprint of this monster dinosaur, estimated d 80,000,000 years ago, is 34 inches wide and 34 inches long.

Lesson for December 5

CHRISTIAN REST

LESSON TEXT—Matthew 11:28-30; Hebrews 4 1 11

GOLDEN TEXT—Come unto me, all ye that labor and are heavy laden, and I will give you rest.—Matthew 11:28.

PRIMARY TOPIC—When We Are Tired

JUNIOR TOPIC—God's Great Invitation.

INTERMEDIATE AND SENIOR TOPIC—How Christ Gives Us Rest.

YOUNG PEOPLE AND ADULT TOPIC—Christian Rest.

"Time, like an ever-rolling stream, bears all its sons away," so sang Isaac Watts in 1719. One wonders what he might say today! The mad rush of modern life—its relentless drawing of us all into its terrific tempo—leaves us distraught, nervous, overanxious. Nervous disorders are on a rapid increase, even among children. The condition prevails in the country as well as in the city, although it is aggravated in metropolitan centers.

Let us lay down the burdens of the universe for a bit and counsel quietly about that almost forgotten Christian virtue, rest. Nowhere can the troubled spirit find calm of soul as surely and as quickly as in God's Word—and in the One revealed there, for true rest is

I. Found in Christ (Matt. 11:28-30).

Rest for our souls is found not in the cessation of activity, but rather in joining with Christ as our yokefellow and in going on with him in meekness and lowliness of heart. Most of life's restlessness is the result of pride, of driving ambition to be somebody or to attain something. True humility removes all such disturbing factors.

But we do have a yoke and a burden to bear. Yes, it is true that not all is easy in the Christian life. But as someone has suggested, the burdens are like the burden of feathers on a bird They may seem to be too heavy for his little body, but as a matter of fact they are the thing he flies with! Such are the "burdens" of Christ.

II. Received by Faith (Heb. 4:3).

Those who believe enter into rest. Faith in God through Jesus Christ brings a man into an abiding place that the storms of life may beat upon but can never move. Fair weather followers of Jesus who fall into a frenzy of fear and worry when sorrow or loss comes upon them need to learn to walk by faith. "Be not dismayed whate'er betide, God will take care of you," is more than the pious expression of a hymn writer, it is a statement of fact.

III. Rejected by Unbelief (Heb. 4:1, 6-11).

"The worst thing in the world" is unbelief — because it effectually closes the door to God's blessing. Jesus could not do "many mighty works" in his home town of Nazareth "because of their unbelief" (Matt. 13:58). Unbelief will keep us from the rest that God has prepared for his people, for it not only hinders men from coming to the Saviour, but keeps them from resting in him after they are saved.

IV. Necessary to Useful Living (v. 11).

Only when the follower of Christ appropriates that rest of soul which results from turning from his own efforts and trusting himself fully to Christ will there be that absolute surrender of every detail and problem of life to him which will bring out in daily living the glorious beauty and power of a life at rest with God.

A poem by Fay Inchfawn which has blessed the writer's soul is here passed on, with the prayer that it may help you who read these notes:

"Well, I am done. My nerves were on the rack,
I've laid them down today;
It was the last straw broke the camel's back.
I've laid that down today.
No, I'll not fume, nor fuss, nor fight;
I'll walk by faith a bit and not by sight,
I think the universe will work all right,
I've laid it down today.

"So, here and now, the overweight, the worry,
I'll lay it down today;
The all-too-anxious heart; the tearing hurry;
I'll lay these down today.
O eager hands, O feet so prone to run,
I think that He who made the stars and sun
Can mind the things you've had to leave undone.
Do lay them down today."

How true it is that we are prone to bear all the burdens of the universe when God's Word has told us to cast all our care upon Him, for He careth for us (I Pet. 5:7). It is a powerful testimony for Christ when distraught and worry-ridden non-Christians see God's children walking steady and true in the midst of disappointments, trials, and sorrows. And the opposite is also true, that failure to trust God is a practical denial of our professed faith.

A Good Patriot

To be a good patriot, a man must consider his countrymen as God's creatures, and himself as accountable for his acting towards them.—Bishop Berkeley.

Duty

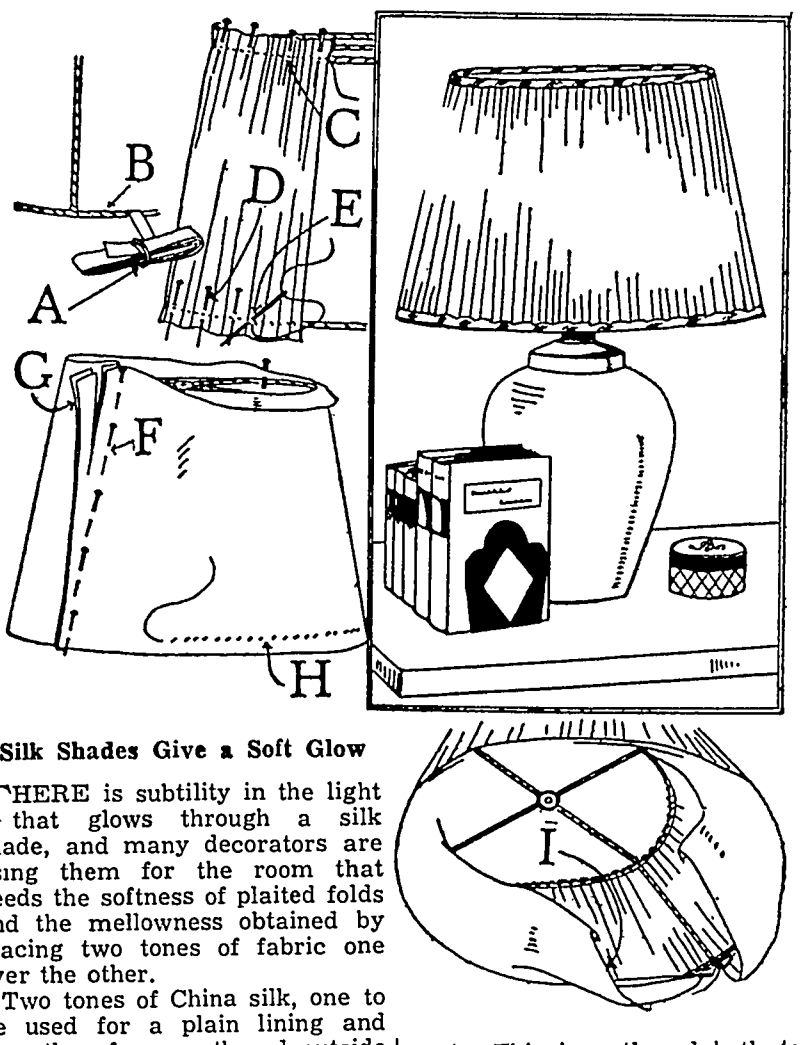
Duty—the command of Heaven, the eldest voice of God.—Charles Kingsley.

Service

All service ranks the same with God.—Robert Browning.

HOW TO SEW

by Ruth Wyeth Spears



Silk Shades Give a Soft Glow

THERE is subtility in the light that glows through a silk shade, and many decorators are using them for the room that needs the softness of plaited folds and the mellowness obtained by placing two tones of fabric one over the other.

Two tones of China silk, one to be used for a plain lining and the other for a gathered outside covering will make an attractive shade. Before you buy the material it is best to experiment with samples one over the other trying them both in daylight and over an artificial light. You will also need a roll of silk binding tape matching the top color of the shade. This tape is to wrap the wire frame. And fancy braid either in gold, silver or a harmonizing tone of silk is used to bind the top and bottom of the shade.

Slip the binding tape off the roll and wrap a rubber band around it as shown here at A. Working from the inside end of the tape wrap the frame as shown at B. The outside layer of silk is put on next. This is gathered both top and bottom and pinned to the wire covering as at C and D so that it is stretched quite tight. Joinings in the outside covering need not be sewed but may be hidden under the folds. This material is sewed in place as at E.

Next, cut a straight strip for the lining and fit it around the outside of the frame as shown here at F. Trim the joining allowing a seam as shown at G. Sew to the frame at the bottom as at H. Trim quite close at the bottom. Turn lining to inside as at I. Slip stitch the joining. Turn in raw edges at top and whip around top of frame. Pin the binding around and then sew it with stitches buried in the mesh of the braid.

Every Homemaker should have a copy of Mrs. Spears' new book, SEWING. Forty-eight pages of step-by-step directions for making slipcovers and dressing tables; restoring and upholstering chairs, couches; making curtains for every type of room and purpose. Making lampshades, rugs, ottomans and other useful articles for the home. Readers wishing a copy should send name and address, enclosing 25 cents, to Mrs. Spears, 210 South Desplaines St., Chicago, Illinois.

"Quotations"

—△—

We can do anything we want to do if we stick to it long enough.—*Helen Keller.*

Then let us laugh. It is the cheapest luxury man enjoys.—*William Matthews.*

Culture is the first fruit of education.—*Cardinal Hayes.*

This era should be the era of paradise on earth. Mankind has never had the possibilities of happiness that it has now.—*Harry Elmer Barnes.*

Advertising Reduced Cost

A third of a century ago the price of the cheapest automobile was about $5,000. Today a much better car can be bought for around $700. Advertising created demand, demand created mass production, with many times the number of jobs, and mass production improved the quality and reduced the price.

CLASSIFIED DEPARTMENT

RUGS

RUGS—Beautiful—Colorful—Useful. Oval braided Cotton Rugs, washable, reversible, sanitary. Size: 24x48 in. Price $1. Sent on approval without obligation on your part. Racine Rug Mills, 1217 Van Buren, Chicago.

WISE

The wise and pleasant way to relieve a cough due to a cold is a Smith Brothers Cough Drop. (Two kinds: Black or Menthol—5¢.)

Smith Bros. Cough Drops are the only drops containing VITAMIN A

This is the vitamin that raises the resistance of the mucous membranes of the nose and throat to cold and cough infections.

Oliver's Wider Feed Range Spreads Your Dollars Farther, Too!

4 to 28 loads per acre—that's the range you have with the Oliver Superior Spreader! It permits 7 different rates of spread—from the lightest top dressing to the heaviest—with quick change from the driver's seat. The 75-A Spreader distributes manure evenly and finely cut. A 2-horse team pulls it easily, it turns in a 14½-foot circle and it's built low.

All this means that Oliver spreads your fertilizing dollars out farther—does its job more economically—and is *longer-lasting* because it's spring hung on straight steel sills. It wins friends wherever it's used. Ask us to tell you all about it. Don't buy any spreader until you've seen how much value we have to offer you.

Health Workers Protect Themselves Against Tuberculosis

Practicing what she preaches, this Henry Street Visiting Nurse has the hospital doctor give her the same tuberculin test she has been urging for others.

Should a raised reddish area appear within forty-eight hours, an X-ray will be necessary to discover how much damage, if any, has actually been done to the lungs by the tubercle bacilli that have already entered the body.

Knowing the value of discovering tuberculosis in its beginning stages when the disease is curable, health workers often follow their own advice and have their doctors regularly examine them. When tuberculosis is discovered, the wise patient enters a sanatorium at once for the rest and constant medical supervision that can best be secured there.

The modern doctor uncovers tuberculosis by modern methods.

Mrs. Jake Bachman Died At Home In Goodell Tuesday A. M.

FUNERAL SERVICES FOR MRS. JACOB BACHMAN AT GOODELL, THURSDAY

Mrs Jacob Bachman, 69 passed away at her home in Goodell Iowa, Tuesday morning Funeral services will be held in the U. B. Church at Goodell, Thursday afternoon at 2 o'clock and interment made in the family lot in the Amsterdam Cemetery near Goodell.

Obituary

Laura Belle Bower was born at Sandusky, Wisconsin, March 9, 1869 She moved to Hancock County, Iowa, with her parents at the age of 6 years, and has been a resident of this County for the past 63 years

At the age of 18 she became the wife of Jacob Bachman on April 15, 1886 This young couple commenced housekeeping on a farm in Avery Township and after several years moved to the town of Goodell where they have made their home for the past 43 years

About four months ago Mrs Bachman suffered a stroke which kept her bedfast most of the time.

Mrs Bachman was a good mother and a good neighbor. She was a member of the U. B Church She reached the age of 69 years, 8 months and 28 days One daughter, Mable, preceded her in death 18 years ago

She leaves of her immediate family her husband, Jacob Bachman her children, Clarice, Mrs Lew Reimer, Garner, Iowa; Lena, Mrs Ben Reimer, Lemars, Iowa, and Roy Bachman, Goodell, Iowa; also seven grandchildren and four great grandchildren: Two sisters, Mrs. Chenev Nelson, Forest City, Iowa, and Mrs Tom Ludlow Chicago, Illinois: Two brothers, Leonard Bower, Wisconsin, and Walter Bower, Minnesota.

GOODELL U. B. CHURCH
W. E. Dye, S. T. D., Pastor

Sunday School 10:00 (We have classes for all ages and sizes)

Morning Worship 11:00

The sermon will be a continuation of the sermon of last Sunday morning on the subject "The Six Crowns."

Christian Endeavor 6:45.

The cantata will be on Sunday evening, December 19th at 7:30.

We can assure you a worth while service as much time is being given to the practise of it.

SHAMROCKS GO TO GOODELL FRIDAY NIGHT FOR BIG GAME

Games In The Past Have Been Thrillers For Basketball Fans

What is considered one of the most important games on the Shamrock schedule for this year will be the annual game with Goodell at Goodell's court this week Friday night

Goodell cagers have held the upper hand for several seasons but this year the Shamrocks think it is their turn to bring home the bacon. Games in the past have been clean, fast and close, supplying plenty of thrills for the fans

A large crowd of Klemme rooters will follow the Shamrocks to Goodell Friday night The return game with Goodell will be played on the Garner floor on January 28th. The game is being played at Garner in order to provide plenty of seats for the fans, who last year filled the Klemme gym to overflowing and many had to be turned away from the game because of lack of room

Can the Shamrocks upset Goodell's record of never having been defeated on their home floor? Friday night will tell.

Play Garner Next Tuesday

Next Tuesday night, December 14th, the Shamrocks will journey to Garner and play the second of the larger class A schools on their schedule for this season. Garner is reported to have a fast team and the game should be an even match all the way.

Klemme Merchants Set For Big Holiday Trade

FARM BUREAU LADIES HELD MEETINGS THE PAST WEEK

The ladies of Liberty No. 6 had their follow up meeting at the Wes Lenz home Tuesday "The Common Household Textiles" and "Home Furnishing Samples" were studied. It was decided to follow a year around program in our group. The ladies exchanged apron and tea towel patterns, and cookie recipes. At the close of the meeting the hostess served a lunch consisting of different kinds of cookies and coffee.

The next lesson will be on quilt making

Met At Addes Greimann Home

In a meeting at the home of Mrs. Addes Greimann on Dec. 1st, Miss Zollinger explained to the ladies of Liberty and Ell townships all about the classification of Textile Fibers into two main groups, vegetable and animal. A fine lunch was served following the meeting

All ladies be sure and attend your follow up meeting In your first lesson on "Home Furnishing Fabrics" you will also find out something about how fabrics are made, their various uses and tests, etc.

VAGABONDS LOSE TO BRITT JUNIOR COLLEGE

Tuesday night in the first game of the season, the Vagabonds played the Britt Junior College team and came out on the short end of a 52 to 33 score Getting off to an early start the J. C.'s built up a 33 to 11 lead by half time. The second half, however, the Vagabonds went to work and it was hard fought all the way, with the Klemme team outscoring their opponents by 3 points The lead gained in the first half, however, was to great to be overcome and the final score saw the Vagabonds taking the rap.

Next Monday night the Vagabonds will open the season on the home floor when the Fertile Independents come here. Fertile has a good team and the game should be fast, and provide plenty of thrills for the fans.

Season tickets for the Independents home season may be obtained from the players or from manager Lee Ridder.

SUNDAY SCHOOL RALLY ATTENDED BY LARGE GROUP FROM KLEMME

A large number of young people from both of the Klemme churches and Liberty attended the Hancock - Kossuth Interdenominational Rally held at the Presbyterian church at Garner, Monday which was climaxed by a banquet at six o'clock following a full day of conferences by the older boys and girls in attendance.

Several Klemme young people were on the banquet program. Mitchell Bock talked on the subject "Songs in the Temple," and the Misses Mabel Schuldt and Stella Thiemann presented a duet.

Meat loses less weight when stored in the home refrigerator if it is kept covered or is wrapped in paper—preferably paraffin paper.

KLEMME STORES BIDDING FOR LARGE EXMAS TRADE

Stores Are Well Filled With Many Useful And Beautiful Gifts

Klemme stores are in keeping with the holiday spirit and are well stocked with many gift suggestions. The stores are all nicely decorated in the Christmas mode and shoppers are already buying gifts.

A noticeable feature this year is the large variety of new Gifts that the merchants are displaying at reasonable prices.

4-H CLUB MEETING

Liberty Busy Bee 4-H Club met at the home of Mrs. Caris Kropp Saturday afternoon, Dec. 4th.

The Club was organized and talks were given by the leader, Mrs Roger Schlawin and assistant leader, Mrs. Caris Kropp, explaining the purpose and meaning of Club work.

Seven members were present. Also six junior members.

Officers elected were: Lois Reimer, President; Lorraine Bredlow, Vice President; Viola Kropp, Sec. and Treas.; News Reporters, Jean Bredlow and Jean Ardith Griffen.

FLORENCE TANNER AND EARNEST KALWARF ANNOUNCE WEDDING

Couple Will Make Home On Farm Near Belmond; Were Married Nov. 13

The marriage of Miss Florence Tanner, daughter of Mrs. Rose Tanner of Liberty township, and Earnest Kalkwarf of Belmond was solemnized at Dubuque Saturday, Nov. 13, according to announcement made last week by the bride's mother.

Miss Tanner and Mr. Kalkwarf were united in marriage at high noon that day by the Rev Maurice Lesher at St. Mark's Lutheran church. Miss Frances Tanner attended the couple.

The bride wore a dress of green crepe with black accessories, and Mr. Kalkwarf wore an Oxford grey suit.

After the ceremony the couple left for Chicago, where they spent their honeymoon. They will be at home on the George Kalkwarf farm near Belmond.

Mrs. Kalkwarf grew to womanhood in the Klemme vicinity, and received her education in the schools there She numbers many friends in her home vicinity.

Mrs. Eelko Buss Died Early Today

FUNERAL SERVICE WILL BE HELD FRIDAY AFTERNOON

Mrs. Eelko Buss passed away early this Wednesday morning at the home of her daughter, Mrs. Ed. Becker, where she had been for a few weeks. Mrs. Buss, who recently built a new home in Klemme and where she had been living, became ill a few weeks ago and went to the home of her daughter.

Funeral services for Mrs. Buss will be held at the Ed. Becker home at 1:00 o'clock Friday afternoon, and at the Klemme Methodist Church at 1:30 o'clock.

The obituary will be published next week.

The world is full of yessers, and many a man has acquired a reputation for wisdom by always saying "That's so."

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington.—"The best laid plans of mice and men" will go off at a tangent, it seems, even when one political party is numerically in supreme control of the national government. President Roosevelt called congress into extra session with very definite objectives outlined, and he repeated them in his regular message on the state of the Union. He wanted crop control legislation for relief of agriculture and he wanted wages and hours controlled by federal statute for the relief of labor. But congress, or a part of it, has turned out to be a balky mule. It has one foot out of the traces already and the driver is having a lot of trouble to keep the animal hitched.

Congress Is Balky

The above is by way of saying that scores of Democratic members of the house and many senators with seats on the majority side have come back from a summer on the hustings quite convinced that it is not popular with the voters to be a rubber stamp. I do not mean by that statement that the President has lost control of his party machinery, or that he can not crack the whip and get things done; I mean that instead of having a few recalcitrants within his own party to deal with, he now has many, and members of congress are about like coyotes — their courage increases as their number increases.

It might be mentioned in passing that at least half a dozen Democratic members of the house have come back from home with plans to run for their party's nomination to the senate next year. The reason given by those with whom I have talked is almost the same in each instance. The incumbent senator who is up for re-election has been too much of a New Dealer. "Our people are calling for something besides rubber stamps." These potential senatorial candidates have records showing opposition to the President in some vitally important New Deal policies while supporting him whole-heartedly in other phases of his program.

No one can say how far this movement will get, but anyone who has observed congresses perform in other cases where the President was in his second term can not dismiss the circumstance as without significance. It is the usual practice for sitting members of the house and senate to stick close to the President, as party leader, in his first term—because they must seek re-election with his support. But now many of them regard President Roosevelt as through and they are starting early to make their record look good to the voters whom they will canvass next year.

These few paragraphs above must serve to introduce evidence of a much deeper fact. In many important places and among many powerful or influential men in congress one hears frequent references and observations to this effect: If Mr. Roosevelt is going to retain his control of the party and carry through on the propositions which he will make from time to time, he must cast aside a part, at least, of his radical advisers and the schemes they concoct.

* * *

As I related, the President outlined his objectives for the special session. Two or three years ago, they would have been received by the representatives and senators with loud acclaim, with ballyhoo. But in the first few weeks of the extra session, there has been just as much condemnation as there has been approval.

Different Now

Nor can we overlook another phase of the situation. Not only have many of the men at the capitol declined to affirm the President's propositions; they have gone in the other direction. They have offered programs of their own. They are prepared to battle for them. In politics, that sort of a thing often has proved fatal to the plans of the man who then occupied the White House. It may not turn out that way this time but there are many observers are sure the President is going to be forced into accepting some things he did not want or does not want just now.

Take the question of taxes, for instance. Rightly or wrongly, the President is being blamed for the current business depression and criticism of this sort is rolling up like a snowball going down hill. It is being said that two tax levies which were forced through congress are largely responsible. The tax on undivided profits of corporations and the capital gains tax are used as horrible examples of these unsound policies fostered by Mr. Roosevelt. Well, the President is responsible to the extent that he approved of them. They were the product, however, of some of the dozen or so peek-a-boo artists to whom the President frequently has listened as advisors.

I think it has been generally demonstrated that the two taxes in question have been ruinous, especially to the small business. It is equally true, I believe, that business must be given some consideration if it ever is to get on a sound basis again and that it ought to share attention of legislators with labor leaders even though business has fewer votes. In any event, the burdens which the New Deal admittedly has placed on business are serving as the springboard for a part of the Democratic majority. They can properly fight for these things—and easily be too busy to push the President's program through.

So the President's plans have gone astray. They may remain that way, or they may go even further, depending upon how long the backward slide of business continues. Of one thing, you may be sure. Partly through his own fault and partly through the fault of the type of advisors with which he has surrounded himself, Mr. Roosevelt does not have the confidence of as many members of the legislative branch as he formerly held.

* * *

It is a little early to attempt a report on prospects for the regular session of congress that convenes in January. Yet, since it is quite evident there will be nothing in the current extra session beyond crop control legislation—if even that—I believe we might look forward a bit. One of the things now evident is the position congress will take on relief for destitute and unemployed. I believe I see a battle coming in that direction.

Looking Forward

It has been apparent during the last two years that congress was dissatisfied with the relief system built up by Secretary Ickes and the professional reliever, Harry Hopkins, works progress administrator. The requirements, especially for the Hopkins machine, have been met with what has come to be called "blank check" appropriations. That is, congress has passed a bill appropriating two billions or three billions or whatever was thought necessary by Mr. Hopkins. It was just as simple as that. Congress had no strings on the money, seldom was told a great deal of the details. It was money to feed and clothe the destitute.

Now, however, some observers think they detect a change. They believe they see signs that congress will put an end to the "blank check" method of handling relief. As far as anyone knows now, the President again will ask for a huge sum to be distributed for relief through Mr. Hopkins—and that is when the battle lines will form.

* * *

Congress, therefore, will be faced again with appropriation demands to provide food and clothing and likely the request for the funds will come from Mr. Roosevelt as heretofore—for a lump sum. If the number favoring the dole grows to any considerable extent, there may be a reversal of policy whether the President wants it that way or not. You see, in an election year (and all house members and 30-odd senators face election canvasses again next year) it is nice to be able to say to the voters that they are receiving something at the hands of their representative or their senator. The candidates can justify a break with the President easily, and with business sliding backward as is the case now, there will be plenty of relief needed for unemployed again. The voters can be told that they are being given charge of these relief expenditures and that they no longer will have to watch Washington bureaucrats waste the taxpayers money. On the horizon, therefore, it is possible to see the line of cleavage between the New Deal and the old line Democrats leading to elimination of the dangerous lump-sum appropriation and a restoration of relief ministration into the hands of local authorities.

Money for Relief

There is one further consideration in the general relief situation that attracts attention. I think it is reasonable to assume that the far-flung relief machine which Mr. Hopkins has built up is permeated to the core with political appointments. It is only the usual political procedure and is not confied to the present national administration. Assuming therefore, that there is such a political machine, it is hardly open to question that it is a Roosevelt machine. The picture then becomes clear: since numerous members of the house and senate want to control their own political destinies they want control of the organizations for relief in their own jurisdictions. Further, if Mr. Roosevelt should want to seek a third term nomination, those Democrats who want to oppose him would be quite powerless if they had to sit idly by and witness Roosevelt delegates picked from their own stronghold

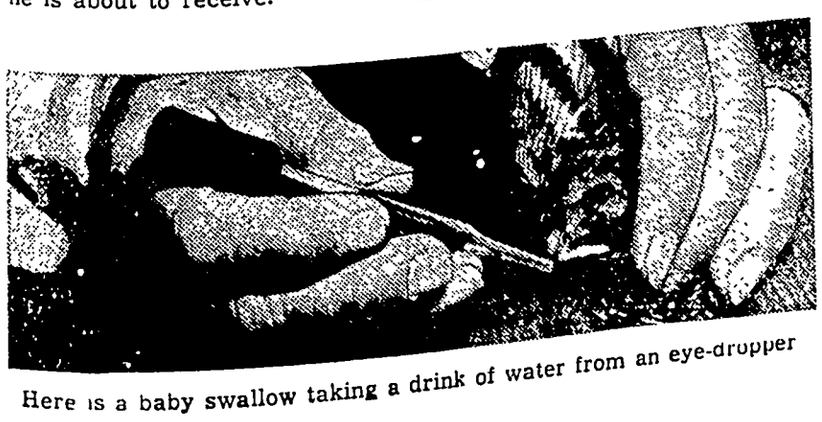
—He Rescues Baby Birds

WAYWARD offspring of the world-famous mission swallows of San Juan Capistrano (Calif.) are the objects of Father Arthur J. Hutch- on's mercy. Faced with the problem of fledglings that fall from their sts in the mission ruins and become injured, the Padre enlisted the help Mrs. Reyes Yorba, guide, and formed a tiny "hospital" on a shelf near mission gate. Here the kindly bird doctors maintain a routine as rigid as at of any well-organized infirmary. Several times a day the little feath- ed patients are fed hamburger from the tip of Mrs. Yorba's finger. This washed down with water from an eyedropper. Wounded legs and wings e carefully massaged at regular intervals. As a result, the fledglings ver fly with their parents to seek food, but stay in the mission gardens, here they are protected from harm.

Perhaps the friendliness of Father Hutchinson (left) is what brings the swallows back by the thousands, on the same day, March 19, of every year.

The little fellow at the right is ruffling his feathers in joyous anticipation of the tasty morsel he is about to receive.



Here is a baby swallow taking a drink of water from an eye-dropper

Keeping Up With Science

By Science Service

© Science Service.—WNU Service.

Earth Shaft Ten Miles Deep Needed to Solve Problems

Scientists Think Such a Project Is Possible

Rochester, N. Y.—Scientific triumphs of the future—from production of super-men to the conquest of cosmic rays—were forecast here at the annual dinner of the National Academy of Sciences.

When mankind has banished wars, science may hope for so ambitious a project as an international earth shaft 10 or 12 miles deep, said Dr. Arthur C. Parker, director of the Rochester Museum of Arts and Sciences. Such a shaft, far beyond present depth to which the earth has been probed, will enable scientists to study earth structure down where the mysterious cosmic rays have no influence There, man can find out what it is like to avoid these cosmic bullets that bombard the earth from space.

When we get under the earth's skin, said Dr. Parker, we may possibly find that the cosmic ray is "the sperm of life."

Romance in the Research.

Calling the study of hormones, secreted within the body, a challenge, Dr. Parker said:

"There is practical romance in this research for it means that the biologist of the future will have controls within his grasp that can produce the super-man or the super-woman, but, whether man or woman will depend upon what derivative of cholesterol the bio-builder uses. One can imagine also what effect the use of this substance will have upon the writer of fiction. He will analyze the love between the man and the maid. 'She was filled with C27H45OH,' the writer will say, 'and he was energized by liberal amounts of C19H30O2, which my dear readers, is so powerful that it sprouts combs on capons, so you can see what it did to our hero.'"

Fuller understanding of how the mind works, as master of the body, was also forecast by Dr. Parker, who said:

"We must look ahead for the true answer, though I am well aware that some psychologists will say they can answer now. Still, I am skeptical enough to believe that the real answer to this question will be one of the most startling achievements of this century."

Scalped Woman Is Given Fine New Scalp and Ear

Chicago.—The case of a young matron who, after being scalped and losing her right ear, was given a new scalp and ear made from skin off her back and a piece of cartilage from her rib, was reported by Dr. James A. Cahill of Washington, D. C., at the meeting here of the American College of Surgeons.

The woman was scalped because her hair caught in the flywheel of a power machine when she stooped to pick up something that had fallen beneath it. More than eight operations, spread over 19 months, were necessary to give the young woman her new scalp and ear. The results are entirely satisfactory to her now and the slight deformity remaining scarcely shows after her headdress is in place.

Egg Yolks Colored as the Customer Likes Them

Ithaca, N. Y. — The scientific chicken breeder and egg farmer can now supply eggs whose yolks are colored to suit the customer's fancy, if he follows the advice of Prof. H. E. Botsford of the New York State College of Agriculture at Cornell university.

Control of the hen's diet to let her eat more or less of a certain dye, xanthophyll, found in a number of plants and grains, is the method Professor Botsford recommends.

Customers generally prefer eggs of a medium yellow yolk, he reports. Extremely deep orange and very pale yolks are not desired by the average restaurant eater who orders his ham and eggs each morning.

Big Losses Due to Smoke

Washington —Anywhere from 10 to 30 dollars is the annual loss sustained by each person in the United States because of the atmosphere, according to estimates made by the public health service. The smoke bill can be attributed to clothes cleaning, deterioration of buildings, damaged merchandise, injuries to grass and plants, and the loss of light and ultraviolet light

"Plant Engineering" Would Produce More Satisfactory Crops

Botanist Proposes Use of Growth Hormones

Los Angeles.—"Plant engineering" as an important aid to enterprising horticulturists was forecast by Dr. Frits W. Went, botanist of the California Institute of Technology, in an address here.

The speaker's play on words does not refer to mechanical engineering in the common sense, however. The distinguished plant physiologist really meant literally what he said, viz., the constructive engineering of living plants, with the aim of producing more satisfactory crops. Nominally this may mean the making of big plants where only little ones have hitherto grown; but actually by indirect reaction the plan may bring improvement in quality as well.

The time-honored methods of improving on Nature's forms of vegetation, such as seed selection and hybridization, have well-known limitations. The plant breeder often produces trees with superb quality of fruit, but with poor yield, poor resistance to pests, disease or harsh climate, and worst of all, dwarf growth habits.

Would Use Growth Hormones.

At this point Dr. Went proposes to use growth hormones, which are potent organic chemical compounds that may happen to be missing in the case at hand. He considers it not impossible that a vegetable dwarf of choice quality may be led to develop to unprecedented size. If hormone treatment can be made to solve the problem of size and rate of growth, then much greater freedom is allowed to the expert in pollination and hybridization.

The hormone may be administered in the manner of either soluble chemical fertilizer or spray, or by soaking parts of plants or seeds. Unlike fertilizers, the hormones are applied only in extremely dilute form. For example, the rare chemical indoleacetic acid, which has exhibited high hormone potency, may be mixed with as much as 10,000 parts of water for use in soaking cuttings which one wishes to root rapidly and vigorously.

Hormone application has reference to certain cases where it is not practical to propagate a plant from seed. Such varieties are of course commonly grafted or budded upon robust seedling plants. Unfortunately the graft junction often seems to constitute at least a partial barrier to growth hormones which should be passing regularly from root to tree-top. As a result many grafted plants are somewhat dwarfed. Artificial application of hormones thus provides the remedy, assuring adequate growth.

"Loose" Protoplasm Has Rhythmic Flow of Higher Life Tissue

Philadelphia. — Protoplasm, the material basis of life, shows even in a "loose" state something of the same kind of rhythmic action that is found in heart tissue and other muscles with nervous systems to guide and co-ordinate their contractions, so states Prof. William Seifriz of the University of Pennsylvania, in Science.

Professor Seifriz has for years made a special study of one of the most familiar forms of "loose" protoplasm, the slime-molds or myxomycetes. These are close to the very bottom of the scale of living things, and consist simply of masses of naked protoplasm without cell walls or any other visible organization.

In this "loose" protoplasmic mass there are constant streaming currents, as indeed there are currents in all protoplasm within living cells of higher life forms. In time-lapse motion pictures taken by two French colleagues, Drs. J. Comandon and P. de Fonbrune of the Pasteur institute at Garches, Professor Seifriz has seen how the flow in a myxomycete sets evenly in one direction for 40 or 45 seconds, then reverses and sets in the other direction for an equal period. When the protoplasmic flow is outward, the slime-mold mass contracts, when the flow is inward, it expands.

This, among other observed properties and phenomena, is taken by Professor Seifriz as evidence that protoplasm even in its simplest, least "organized" state, is no less truly alive than are some of its more complex forms.

Slow Lightning Found

Pittsfield, Mass.—K. B. McEachron, General Electric engineer here, reports that he has found "slow" lightning that produces no thunder when its leisurely bolts traverse the sky.

Gas From Prickly Pear

Waltair, India —The prickly pear, considered a public nuisance in India because of its prevalence, is now being used to create a combustible gas having a heating value nearly half as great as ordinary coal gas

In Step With Santa Claus

KEEPING up with the Joneses is easy—it's keeping up with Santa Claus that has Sew-Your-Own in stitches currently. We got a peek at his wares, though, and frankly we copied some of his artistry. (You can see for yourself there's a "Christmasy look" about today's trio of fashions.) And happily you can do more than look and wish—you can make them realities the easy way: just sew, sew, Sew-Your-Own!

Cute and Cozy.

Look your prettiest in leisure or on the job in the lusciously feminine house jacket (young sister to the house coat)above, left. Santa Claus has ordered thousands of these for feminine friends in his good graces and you know S. C. usually shows impeccable taste in gifts. In handsome silk crepe or very lightweight corduroy it is as cosy as a love seat before an open fire. Make it either in the short length (see inset) or regular dress length.

Feminine Flattery.

Polish yourself off in a brilliantly styled new frock for the holidays just ahead. Sew-Your-Own's newest success (above center) will be your success once you wear it in the public eye. It is most gifted in its distinctive design, below-waist slimness, and all-of-a-piece simplicity. Make your version the very essence of chic in sheer wool or satin, in your most flattering color.

A Blouse or Two.

Tops in the fashion picture just now is that friendly little item—the blouse. A completely engaging one is shown here for women who sew. Wear it tucked in or peplum style. And here's a practical idea: you have a choice in sleeve lengths. For variety's sake, why not make the long sleeved model in silk crepe for dress; the short sleeved one in jersey for sports and all occasion wear?

Pattern 1412 is designed for sizes 32 to 42. Size 34 requires 4½ yards of 39-inch material and ½ yard for contrast. Short length requires 4⅛ yards.

Pattern 1394 is designed for sizes 14 to 20 (32 to 42 bust). Size 16 requires 2⅞ yards of 54-inch fabric.

Pattern 1417 is designed for sizes 34 to 44. Size 36 requires 2⅛ yards of 39-inch material; with short sleeves, 1⅞ yards.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

New Pattern Book.

Send 15 cents for the Barbara Bell Fall and Winter Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns.

Home Heating Hints

By John Barclay
Heating Expert

IT DOESN'T pay to neglect your heating plant when you know you have a good fire but the heat is below par. You run up fuel bills and make for yourself a lot of trouble and worry which could be avoided.

There are literally dozens of things that make a "sick" furnace refuse to deliver sufficient heat, and unless you are familiar with heating plants, it will pay you to call in a competent furnace man.

For instance, the check damper may be placed wrong; the turn damper may be out of position; the regulator may need adjustment; there may be caked soot in the smoke-pipe or on the heating surfaces; radiators may be wrongly pitched; draft may be partially choked; a loose bolt or a rusty joint may be wasting heat.

Those are just a few of the common things that can keep a furnace from delivering enough heat. If you cannot locate the cause quickly and easily, don't take a chance on wasting fuel money. A service man will "spot" the trouble promptly and soon put your heating plant in comfortable, healthful, economical working order. Send for him immediately.

WNU Service.

Advertising Did It

In 1869, when advertising was almost unknown, the total value of manufactured products in the United States amounted to only $3,385,860,354. As a result of creating a demand through advertising the value of our manufactured products increased over a period of 60 years to a total of $70,434,863,443.

High School News

The basketball boys are looking forward to two important basketball games away from home during the next few days: Goodell there on December 10 and Garner there on December 14.

—Bernadean Lundy

—K H S—

There will be a P.T.A. meeting at the school house Thursday, December 16. The program will be put on by the first and second grades. Their teacher is Miss Estelle Hanson. There will be singing of Christmas Carols by the high school vocal groups, and a few short talks on the theme, "Christmas in Other Lands."

—Bernadean Lundy

—K H S—

In the begnining typing classes the first thing that they work for in speed tests is thirty words a minute with not more than five errors on the paper. After this goal is reached, the student works for forty words a minute, and so on.

Friday, in a five minute test, Doris Johnson, of the first division Typing I class, made 30 words a minute with three errors. She is the first student to attain this goal this year.

—K H S—

The following people that have had B or above are on the honor roll for the past six weeks. In the senior class the members of the honor roll include Ray Jorgenson, Jr., Paul Schuldt, Novella Beier, Avis Barz, Gladys Griffen and Doris Barz. The Sophomores are Elsie Thiemann, Elsie Ward, and Margie Blumer. The Freshman are Shirley Johnson and Jacqueline Kudje.

Grade School News

Grades 1 and 2

We are learning some new songs and poems for the P.T.A. program December 16. We wrote two Christmas plays, too.

One day this week we drew names for our Christmas party on December 23.

Grades 3 and 4

The boys and girls who have books on the reading chart gave a Reading Party to the fifth and sixth graders. They told about a book they had read and read an interesting part of the book.

We cut and decorated a Christmas tree during our art period Each one of us made the tree just like we wanted it. Now we are making a Christmas drawing of our own.

The fourth graders have begun their new unit on the Amazon Region. We have an interesting bulletin board on which we hope to build the story of the life of the Amazon Indians as we study

Two new books have been added to our library Miss Azeltine is reading one of them, "Little Pear," by Eleanor Lattimore, to us. The other book is a reference book for geography. The third graders are making a series of posters from their unit in geography, "Some Things that People Have Always Needed." They also made a story in pictures, " How a Sweater Comes to Us."

Grades 5 and 6

Barbara Johnson and Wesley Suckow—Reporters

We have a new flag in our room.

In sixth grade history we have been studying about the Greeks and Romans. Miss Irvine wrote the Greek alphabet on the board for us. It is much different from ours.

Patricia, Betty, Herbert M and Duard are on the fifth grade committee to make the geography poster showing the products made from corn. Our own state is the leading corn producing state in the Union.

In fifth grade history we have started a large drawing showing the Westward Movement. Each person is making a free hand drawing to put on the picture. We are making it with colored chalk.

We sixth graders have started a geography unit on Africa. We are starting a large chalk drawing of African jungles.

Grades 7 and 8

We have a new flag displayed in the front of our room

The people who were neither absent nor tardy the last six weeks are: Betty Etchen, Billy Grosshuesch, Eugene Haberkamp, Robert Jahnke, Dean Merkel, Caroline Schwartz, Edwin Tiggeman, Chas. Bock, Lorraine Buntenbach, Arlene Buseman, Melvin Coobs, Lucille Hartbeck, Russell Wade, and Billy Zabilka.

We listened to another interesting radio program on Wednesday. It was about Finland.

Billy Grosshuesch and Edwin Tiggeman are the patrolmen for this week.

LIBERTY TOWNSHIP NEWS

Arthur and Rudy Nelson were dinner guests at the Emil Beier home Saturday

Arno Nuehring visited at the August Kropp home Sunday afternoon

All the children taking part in the Christmas program at the Liberty church are asked to come Sunday afternoon to receive their parts and to practice.

The follow up meeting of District No. 8, of the Ladies project work was held at the Mrs. Albert Lange home Friday afternoon. The lesson was on "Textile Fibers." A good crowd attended.

Miss Gladys Griffen was a dinner guest at the Arthur Knoke home Sunday.

Mrs Will Lemke and Mrs. Albert Lange called at the Mrs. Rose Tanner home Thursday.

Mr. and Mrs. Elmer Schaefer and family were Sunday visitors at the Kermit Stille home.

Mr. and Mrs. Lew Griffen were dinner guests at the Mrs. A. Schlawin home Sunday.

Mrs. Albert Lange and Mary were Garner callers Saturday.

Mr. and Mrs. Emil Beier and Mrs. August Neuhring visited Sunday at the Albert Reimer home.

The Liberty Birthday Social and Supper will be held at the church Monday evening, Dece

afternoon.

INSULATIO

"Believe It Or Not"

. . . You are paying for insulation whether you have it

"PALCO WOOL"--

—has all the properties required to meet the most severe tions and is ideal for all kinds of construction Its permanence due to its phenomenal ability to resist decay rot moisture dents and insects and its tireless resitance to settle It stands Vibration has no effect on it "PALCO WOOL" is made from Red Wood tree and with the amount of rain fall in this state makes it termite and vermin proof Red wood is a living tree and the logs have not rotted in hundreds of years lying in the forests.

"PALCO WOOL" is not capillary and there is no wick action is not a moisture gatherer after it is in the walls.
"PALCO WOOL" has a Thermal Efficiency equal to 0.25 (British Thermal Unit) per hour per square foot per inch thickness per degree difference in Temperature

COST....

Check the cost of "PALCO WOOL" with any other insulation you will find that your home insulation merchant can cut the cost of your insulation bill in half when comparures with the out-of-town "BLOW IN INSULATORS" Any ority on insulation will tell you that 60 per cent of your heat is through the ceilings and roof. What little loss you have the side walls amounts to very little Insulation in the side is fine and should be put in at time of building and so put it will shut off all heat loss around the window frames About per cent of the remaining 40 per cent of heat loss is through around the old style window frames with the large boxes the weights are hung All the "Palco Wool" or Blown in cannot close up these BTU losers, that is if you want the on your windows to work. Our advice on old buildings, unless want to experiment, is leave side wall insulation alone. It pay for itself, but we will guarantee that you will see the if placed in the ceilings.

"PALCO WOOL WILL PAY FOR ITSELF" and the cost is low. Per square foot 3 and five-eighths inch thick cost approximately five cents. A house 30 x 30 would cost about $45.00 sulate.

ALMOST 50 PER CENT OF FARMERS WANT LOANS SAYS MACARTHUR

William MacArthur of Mason City, regional corn loan supervisor Thurday was on record with a prediction that 50,000 Iowa farmers would seal "nearly half" of the 150,000,000 bushel national limit provided for by the federal corn loan appropriation of $75,000,000, according to an Associated Press dispatch.

In making his prediction, MacArthur said he expected to see a possible flow of corn loan cash amounting to $37.500,000 into the state under the 1938 program The loan will be 50 cents a bushel.

Juvenile Togs Styled to a Nicety

By CHERIE NICHOLAS

NEVER, no never, have children's winter outfits been so cleverly styled as they are this season. It is not only that each is a "picture" in its bright colors and cunning details, but when it comes to being practical and protective from the elements and snugly "comfy" at all times, as fond mothers insist must be, designers have so painstakingly equipped outfits for the younger generation with "all modern improvements," cruel winds, wet-wet rain, dancing snow flurries, not even Jack Frost himself have even a ghost of a chance to get in.

As pictures speak more eloquently than all the adjectives that might be penned, let's look to our illustration for enlightenment as to what leading designers are turning out in way of children's cold-weather suits for now and the winter to be. Here we see three cunning, and as thoroughly practical as they are attractive, ensembles that all but "stole the show" as the little girls who modeled them came stepping down the runway at a children's style clinic which was held in the Merchandise Mart of Chicago a short time ago, before a vast audience of visiting merchants.

To the fond mother who delights in seeing little daughter look as if she had just stepped out of a fashion plate, the clever ballerina-back legging suit pictured to the left will prove a real find. It is one of the newest models and forecasts what the fashionable little miss will wear through the winter. Of handsome Copenhagen blue sturdy woolen coating it is styled in a novel manner of seeming to achieve a clever ballet flare. The suit has a beaver collar which, of course, will make a hit with any little girl, and crowning glory over all, it has a matching hat with fur trim. The zipped leggings offer every protection from wind and cold.

Dewberry (a new shade this season) is the color featured in the voguish fitted coachman-style coat to the right. Here is a type that will make best-dressed little girls look even better dressed for it carries an air of distinction in its every detail Has a cape too, and when little daughter's friends see that cape they will be imploring mother to buy them one.

An adorable outfit made of a maize-colored wool of caressing softness costumes the little snow queen centered in the group. She looks just that, what with the fluffy snow-white angora edgings that trim bonnet, coat and muff. Yes, there's a little matching muff as you can see and with what pride and glee the fortunate wearer will call her admirers' attention to this precious possession. And to fill the cup of joy full to overflowing there are dainty little sprays of flowers hand-embroidered in the sweetest colors on the yoke and on the wee muff and on the very flattering matching bonnet

And, by the way, since cunning winter ensembles for little folks is our theme, if there be a doting relative that longs to bestow upon your child a grand Christmas gift why not just throw a gentle hint to him or her in regard to the fur coat, muff and hat ensembles that are so pridefully shown in this season's juvenile apparel shops and departments Or if you are thinking in terms of practical school or play-time clothes why not one of the pretty sweater and suede jerkin sets that come in such attractive colorings? Or a dressier threesome consisting of velveteen hat, coat and legging set, for legging sets are the big idea this season.

© Western Newspaper Union.

SHIRRED VELVET

By CHERIE NICHOLAS

Not too much or too little, but just right, is this charming frock of velvet. It is in the new "don't dress for dinner" length, correct for bridge club wear or matinee date and then on in to the evening. Soft baby doeskin gloves in plaster pink blend beautifully with the warm winey tones of the velvet. The styling of the gown typifies a leading trend, in that the velvet is muchly shirred and a corselet waistline is accented. Brilliant clips add the glittering note which fashion deems imperative this season.

For Afternoon

Afternoon blouses for winter are apt to have band or draped collars and back closings. Sleeves are long, and most of them are of the plain, tight variety.

NEW BAGS ARE GAY IN CARVED HANDLES

By CHERIE NICHOLAS

Suede antelope "mam'selle" handbag trimmed with catalin. Like other items in the fashion category such as apparel, jewelry, hats and even shoes, handbags now have acquired distinctive names indicative of the types they are designed to please. Mam'selle bags, which are now being shown in many shops in black, brown, burgundy and other colors, with carved catalin handles or decorations, are generally jaunty in type but not gaudy and as their names indicate, made especially for mam'selle.

Chic Little Fur Jackets Popular for Street Wear

The cool late autumn days are bringing out by the scores on avenue and boulevard stunning little fur jackets of every fur almost from leopard to aristocratic Persian lamb. The boxy types prevail but there are any number of youthful bolero and waist-depth types. Gray ensembles especially are worked out with gray woolens and brief gray astrakhan jackets. Short fur capes are also very fashionable. Many women are having their coats that have served their time as such made over either into the shorter jacket or a cape.

Lace Veils Now Popular for Evening Headdress

Society women who attend formal affairs are taking enthusiastically to the unique fashion of wearing a charming lace veil thrown picturesquely over the head, secured with a flower spray or feathered ornament or handsome jewel pin. The effect is enchanting. The veils are sometimes edged with sequins, and then again a delicate tracery of embroidery adds to their allure.

Matching Sets

Leather belts and matching buttons are shown on woolen sports frocks for winter.

STAR DUST

Movie • Radio

★★★By VIRGINIA VALE★★★

IT IS a toss up whether Madeleine Carroll or Loretta Young will be the most-exquisitely dressed screen star this winter. Miss Carroll writes from Paris that she is having the time of her life selecting costumes for "The River Is Blue" which she will start making for Walter Wanger when she returns to Hollywood.

Loretta Young was in New York recently buying fur coats, hats, and dresses by the score, just as if she hadn't had any new clothes in ages Hollywood designers have just about run out of ideas for Loretta for in her last four pictures she has had altogether some 80 changes of costume, and each one was supposed to be a knockout. The more extreme and bizarre clothes are, the better she likes them—so she keeps designers working overtime

Madeleine Carroll

—★—

You will be hearing a lot from now on about Ilona Massey, who makes her American screen debut in M-G-M's "Rosalie." Officials of the company are so delighted with her performance in a minor role that they are going to give her the title role in "Pompadour," one of the most alluring beauties in history or drama.

—★—

There is one popular radio player who will have to mend her ways if she ever goes into motion pictures—and most of them do sooner or later. Alice Frost of the "Big Sister" cast comes out of rehearsals with her forehead all smudged. She holds a pencil in her hand, and in a moment of dramatic tension invariably draws the point across her forehead.

—★—

The jinx that has dogged the footsteps of all Hollywood players who appeared on the Broadway stage this season has at last been knocked out. Frances Farmer broke the spell. She opened recently in "Golden Boy," a play about a prize fighter, and the critics went into rhapsodies over her deft playing of romantic scenes.

—★—

Radio performers develop some of the strangest hobbies, but for the present Tony Wons, the C. B. S. philosopher, is leading them all. He makes violins. He makes violins with the utmost care out of any old thing he finds lying around the home. Inspired, possibly by Bob Burns and his far famed bazooka, he has made one out of a piece of tin stovepipe and the tone to his surprise is excellent.

—★—

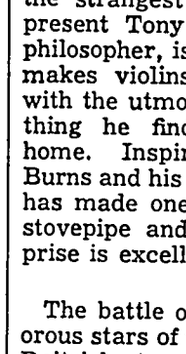
The battle of the two great glamorous stars of the screen, Garbo and Deitrich, turns out to be no battle at all when you see their new pictures, "Conquest" and "Angel." Garbo is so far in the lead that there is just no competition at all. "Conquest" is a lavishly-produced, historically-faithful romance of the time of Napoleon, and Garbo as the lovely Countess Walewska has never been more appealing. "Angel," on the other hand, is just an inconsequential modern triangle story in which the camera lingers on Miss Deitrich to the exclusion of any action.

—★—

Because of her good work in the new Fred Astaire picture, "Damsel in Distress," Joan Fontaine is going to get a strange reward. She is going to be starred in "Curtain Call," which Katherine Hepburn turned down. Don't think she minds taking this hand-me-down, though. It is a grand story.

—★—

Edgar Bergen and Charlie McCarthy will be in the cast of a new comedy that will feature Irene Dunne and as a result she is the envy of all Hollywood as well as the public at large. Her outstanding success as a comedienne in "The Awful Truth" influenced Universal to postpone their biography of Madame Curie and instead of that story to cast her in a comedy. Thus she has established herself as a double threat actress, at home in heavy drama as well as light farce.



Charlie McCarthy

—★—

ODDS AND ENDS—Constance Bennet is the envy of all the pampered stars, because Alfalfa Sweizer of "Our Gang" comedies serenades her in his hilariously uncertain tenor . . . Ken Murray and Edgar Bergen have evidently decided that they are in pictures to stay because they have both bought ranches out near Al Jolson's . . . Ann Sothern's sister, Bonnie Lake, has composed a song and sold it for "Girl of the Golden West" . . . Kay Smith is toying with the idea of trying motion pictures again.

© Western Newspaper Union.

AUSTRALIA

The Sheep Continent

Driving Australian Sheep to Pasture.

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

AUSTRALIA is almost as big as the United States, but its vast face presents a striking contrast to the American landscape. This ancient eroded land mass has no extensive mountain ranges, no great river systems. The granite ridge of Mount Kosciusko, 7,330 feet above sea level, in the southeastern corner of New South Wales, is the highest point on the continent.

For 900 miles along the southern coast there flows not a single river. Many other miles are little better served, as existing stream beds are often dry for many months.

The Murray-Darling is the one large river system of the continent. From its source in the Queensland highlands, less than a hundred miles from the coast, to its mouth at the sand reef of the Coorong, southeast of Adelaide, the stream travels 2,310 miles. Except for length, however, it is no Mississippi Its drainage area is much smaller, and much of the water is lost before it reaches the main channel.

Where American pioneers in their westward march from the Alleghenies progressively found well-watered fertile lands awaiting their plows, Australian pioneers were baffled by sterile inland areas where they could find not even water to drink.

Lakes that were only colossal salt pans; rivers that were dry or stagnant with brine; and vast rocky and sandy wastes—such were the reports that Sturt, Eyre, Stuart, and other Australian explorers brought back from the interior where their parties had suffered untold privations and harrowing hardships. Leichhardt marched inland and vanished. Burke and Wills perished of starvation on Cooper's creek.

Coastal Belts Are Fertile.

But Australia is by no means entirely desiccated. Indeed, along the coastal belts and extending for several hundred miles inland the land is flushed with fertility. A broad band of vegetation extends along the north, east, and southeast edges of the continent, covers a wide triangle in the southwest corner of Western Australia, and blankets most of Tasmania.

Its development is a fascinating story. Here, within the short span of a century, resourceful Australian settlers have carved out farms and pasture lands so big and productive that they help to fix the price of the world's bread and meat and clothing. Here they have reared bustling commercial marts with world-wide interests and growing population—Sydney and Melbourne claim more than a million people each.

Frontiers move farther inland, but even the most conservative authorities estimate that, in already developed lands, the present population could be quadrupled without congestion.

A striking feature of Australia today is the concentration of more than 62 per cent of her entire population in the six capital cities and the urban centers. Yet, paradoxically, beyond the cities and extending to the far horizons of "way out back" are found the commonwealth's chief resources.

Mobs of sheep are grazing across endless plains; cattle are bawling beside water holes and kicking up long banners of dust as they move on muster; seas of golden wheat ripple beneath sunny skies; in eucalypt forests axes ring; and from molelike burrowings in the earth men are bringing up minerals to feed factories and gold to be stacked in the world's treasure vaults.

"An improbable dream of a visionary enthusiast"—such was the libel that Australia's first settlers attached to the idea that the country might become a prosperous sheep land. Some were positive that the flocks could not thrive on Australian grasses, which are dry during the summer months, and, even if they did, the wool would deteriorate to scraggly hair in the hotter climate of the continent.

How It Became a Sheep Land.

But Capt John MacArthur, one-time of the New South Wales Corps and somewhat of a political firebrand in the infant period of Australia's settlement, thought otherwise. Therein lies the romance of an industry that has few parallels in commercial history

Wool has been to Australia what cotton has been to the American South. Today a fifth of the country's productive wealth is carried on the backs of her sheep. From the meager flocks with which MacArthur and other pioneers began their systematic breeding, there has grown the amazing total of more than 114 million animals, which supply between a fourth and a third of the world's wool requirements.

The generations of sheep breeders that followed Macarthur's footsteps have taken their flocks over wide areas of the continent. Through increased watering facilities, by means of artesian bores, millions of animals now are ranging in regions once considered useless.

As the world's wool-hungry mills have increased their demands, so station (ranch) owners also have increased the weight and quality of the fleeces.

Today the average clip (including lambs) has risen to eight-and-a-half pounds, twice that of pioneer days; but you see some wrinkle-necked old merino rams that are carrying the equivalent of seven suits of men's clothing on their bodies. In length, fineness, and strength of its fiber Australian wool is unsurpassed.

Life on the Sheep Ranch

A sheep ranch is a complete community in itself. It usually has its own post office, telegraph station, and power plant. Although not on the sumptuous scale of some of the palatial residences of the Argentine pampa, many of these commodious station homes, surrounded by flowering gardens, are perfect in every appointment and convenience. In some respects they are the Australian equivalent of old English manors.

Beyond each central residence is clustered a full complement of barracks and houses for the station hands and families; also stables, blacksmith and machine shops; laundry, butchery, and bakery. And out-lying those are the long corrugated-iron woolsheds and stock pens.

Life is unhurried in these nerve centers of the country's chief industry. The manager seldom assigns more than one task a day to his men. Some days they do little, but they are always ready to work long fatiguing hours when the occasion demands.

By the sweat of their own brows most owners have built and managed their own estates. While there are some absentee owners, by far the majority know the meaning of work. Sons, too, grow up in the business. On many stations one finds these young "jackaroos" working to fit themselves to become station managers.

With perhaps forty men under his direction, a manager's life is a busy one. There are always inspection trips to see the condition of water and grass on the runs, repairs to be maintained, and a multitude of other tasks to keep the station going.

Here in the saddle most of Australia's polo players gain their training. The men also find recreation in hunting or tennis.

Culture Is Not Lacking.

The wives of the managers are cultured and many have traveled widely. In the outback it is rather surprising to find people so conversant with the latest books, music, and, of course, the races.

Before telephones and radios came, station life was more isolated. Motorcars and even airplanes m many places have brought distant towns next door.

One of the most remarkable things, as you travel through the sheep districts, is the comparative absence of sheep on the landscape When you comment on it up in Queensland, a station man explains that he has traveled a thousand miles through one region where there were a million sheep being pastured, yet on the whole trip he has not seen a single sheep!

At Boonoke, where there are about a hundred thousand animals, the plains seem empty The flocks are broken up into smaller groups and have their own separate runs, but even on the fertile grasslands of that station there is less than one sheep to the acre. In more arid regions the acreage is considerably greater.

As you speed across the rolling plains of one station in an American truck, you see dozens of kangaroos rise up like posts above the grass and then take to their heels as you approach

Propelling themselves with only their powerful hind legs, with their tiny undeveloped front legs held high, their running seems uncanny But as your speedometer touches 45 miles an hour, some old kangaroos keep pace beside the car.

HOUSEHOLD QUESTIONS

Ripening Bananas.—Green bananas can be ripened by putting them in a paper bag and keeping them in a dark closet for a day or two.

* * *

Improving Vegetables.—Soda added in the proportion of a pinch of a teaspoon to two cups of vegetables, will improve the flavor of cooked corn, beets, peas and dried beans.

* * *

Concerning Mirrors.—Never hang a mirror where it will catch the glare of light. The back of a mirror should be protected so that no light or water could penetrate.

* * *

Kidneys With Apple Rings.—Slice three sheep kidneys in halves, remove skin. Fry lightly in 2 ounces butter. Fry also as many slices of bread as there are halves of kidneys, and a large cooking apple peeled, cored, and cut in thick rings. Place the rings on a hot dish, with a piece of fried bread and a half-kidney on each. Season and sprinkle with lemon juice. Put a scrap of butter on each and serve immediately.

* * *

Manipulating Velvet.—The correct method of pressing seams, especially in velvet, is to get a second person to hold one end of the material while you hold the other. Flatten out the two sides of the seam, then pass the iron along the wrong side.

* * *

When Mending Gloves.—Slip a thimble on your finger when mending gloves and the darning will be made very easily.

* * *

Vegetable Water Sauce.—Two tablespoonfuls butter, two tablespoonfuls flour, salt and pepper to taste, one cup vegetable water, one half cup milk and half cup vegetable water. Melt butter in a saucepan, stir the flour and seasonings into it, and stir over the fire until frothy. Add vegetable water gradually and stir constantly over the fire until it boils and thickens.

Lesson for December 12

CHRISTIAN FELLOWSHIP

LESSON TEXT—I John 1 1-7; Revelation 21 1-7.

GOLDEN TEXT—Our fellowship is with the Father, and with his Son Jesus Christ.—I John 1 3.

PRIMARY TOPIC—The Heavenly Home.

JUNIOR TOPIC—God's Great Family.

INTERMEDIATE AND SENIOR TOPIC—Comradeship with Christ.

YOUNG PEOPLE AND ADULT TOPIC—Daily Fellowship with Christ and Christians.

Fellowship—the word is rich in meaning, even as it concerns the ordinary relationships of life. It speaks of the association of man with man in a common enterprise, a sharing of problems and of victories—a partnership. Such relationships are very real and helpful. They lead to friendships which bind the hearts of men together in noble purpose and in tender consideration.

It is, however, a long step forward when we add the prefix "Christian" to "fellowship." For by so doing we not only bring men into the most glorious partnership with each other but we do two other very important things: (1) we limit those eligible to this fellowship to those who are followers of the Lord Jesus Christ, and (2) we broaden the fellowship beyond the association of men with each other, and bring them into the circle with Christ. What a high and noble fellowship! Do you belong? Christ says, "I am the door: by me if any man enter in he shall be saved" (John 10:9).

Our Scripture selections for today are from two books of the Bible. Both speak of an eternal Christian fellowship but the first stresses its present expression in a life of holiness and the other its future of blessed communion.

I. Christian Fellowship—Now (I John 1:1-7).

The First Epistle of John presents fellowship with God as depending on three things "which form in their combination a very beautiful picture of truth . . . God is light (1:5), hence fellowship with God depends on our walking in the light. God is righteous (2:29), hence fellowship with God depends on our doing righteousness. God is love (4:7, 8), hence fellowship with God depends on our possessing and manifesting love" (James M. Gray).

Every clause and phrase of the passage before us is so full of spiritual truth that it should have our full time but we must limit ourselves to pointing out one outstanding fact; namely, that Christian fellowship is made possible because we have a Saviour, the Lord Jesus Christ. He it is who reveals the Father—the One in whom there is "no darkness at all" (v. 5). If we follow him we must "walk in the light as he is in the light" (v. 7). This allows for no dark corners, no crookedness in word or act, no backbiting nor evilspeaking.

Let us open the hidden recesses of the heart to the light of God and put every evil thing under the "blood of Jesus Christ which cleanseth us from all sin" (v. 7).

II. Christian Fellowship—for Eternity (Rev. 21:1-7).

Our present communion with God and with one another is most precious—but how often it is marred by sin and disturbed by the wickedness that surrounds us in the world. We look forward to that day when we who are the followers of Christ shall be delivered not only from the penalty and the power of sin, but also from its very presence.

There will be "a new heaven and a new earth" from which every evil thing has been taken away, in which all has been renewed in righteousness. Then will come the glorious consummation of all things when God shall come to "dwell with them and they shall be his people, and God himself shall be with them and be their God" (v. 3).

That communion shall never be disturbed by the falling of any tear. There will be no mourning, no crying, no pain (v. 4). Little wonder that these words have been the comfort of God's people in their darkest hours. They are not the futile words of human solace. They come from the eternal God.

Three questions have intrigued the curiosity of man. (1) Where did I come from? (2) why am I here? and (3) where am I going? The Christian is the only one who has a satisfying solution for the problem of the origin of all things, "In the beginning God"; a reason for the existence of all things, "To me to live is Christ"; and a satisfactory consummation of all things, "And God himself shall be with them." It is a great thing to know Jesus Christ as Saviour and Lord.

True Religion

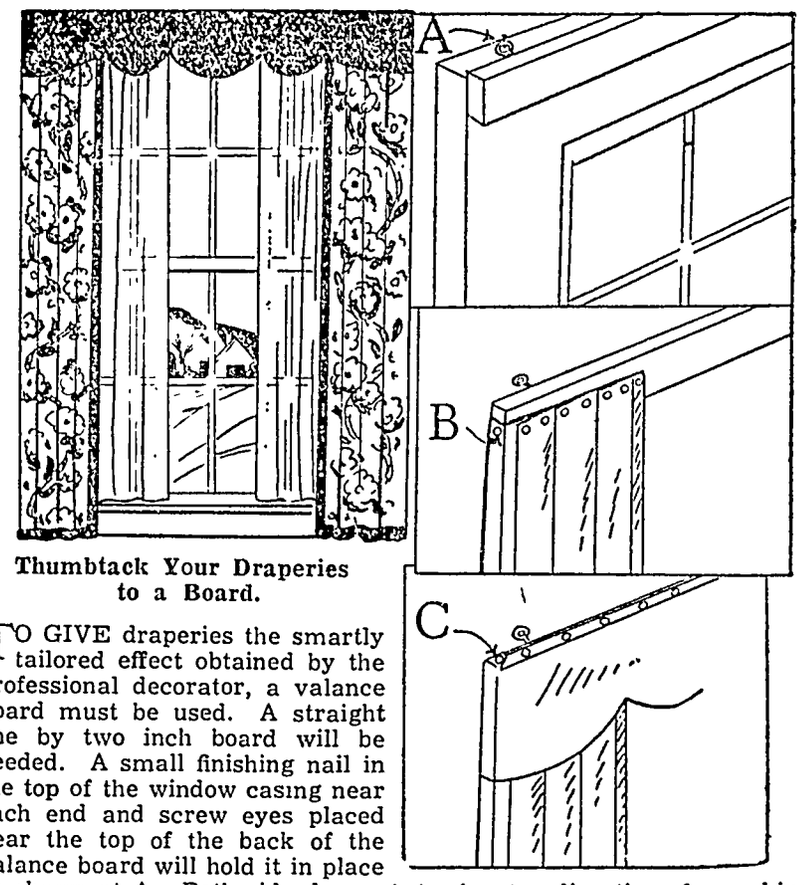
True religion extends alike to the intellect and the heart. Intellect is in vain if it lead not to emotion, and emotion is vain if not enlightened by intellect; and both are vain if not guided by truth and leading to duty.—Tryon Edwards.

Values

I am told so many ill things of a man, and I see so few in him, that I begin to suspect he has a real but troublesome merit, as being likely to eclipse that of others.—Bruyere.

HOW TO SEW

by Ruth Wyeth Spears



Thumbtack Your Draperies to a Board.

TO GIVE draperies the smartly tailored effect obtained by the professional decorator, a valance board must be used. A straight one by two inch board will be needed. A small finishing nail in the top of the window casing near each end and screw eyes placed near the top of the back of the valance board will hold it in place as shown at A. Both side drapes and valance may be thumbtacked to the board and then be quickly hung all at once by hooking the screw eyes over the finishing nails. Think of the advantage on cleaning day! Just lift board and all off the nails and take outside for dusting.

Tack the side drapes to the board first as at B, arranging fullness in flat pleats. In making the valance, allow enough material to fold around the ends of the board as at C; then tack it along the top, stretching it just enough so that it is perfectly smooth.

The valance shown here is made of glazed chintz and matches the glazed chintz border that faces the edges of the side drapes. The glass curtains may be hung just inside the window frame or to the bottom of the valance board.

Every Homemaker should have a copy of Mrs. Spears' new book, SEWING. Forty-eight pages of step-by-step directions for making slipcovers and dressing tables; restoring and upholstering chairs, couches; making curtains for every type of room and purpose. Making lampshades, rugs, ottomans and other useful articles for the home. Readers wishing a copy should send name and address, enclosing 25 cents, to Mrs. Spears, 210 South Desplaines St., Chicago, Illinois.

Uncle Phil Says:

Good Deed Is Never Lost

He who sows courtesy, reaps friendship; and he who plants kindness, gathers love.

The man whose faults are the kind everyone can talk openly about—and does—is generally beloved.

Nothing much comes of a man preserving his old love letters, but when a woman does, look out.

Everybody deserves some compliments. See that he gets them.

An absorbing "survey" should be a survey of one's own faults. Make a list.

Despite Better Judgment

There is nothing in knowing what not to do, if you bullheadedly go ahead and do it, anyway.

If one hasn't much to lose, one can contemplate his misfortune with quite complacent philosophy.

The kind of charity that appeals to your heart is the kind that can be bestowed without hurting the feelings of the recipient.

Rockefeller had the genius for making money, but he could not impart the secret to anyone else, though he tried to in maxim and precept.

Shamrocks Spill Ancient Rival In Eagle's Conference Game

KLEMME TEAMS WIN TWIN BILL FROM FAST GOODELL CAGERS

Game Was Fast And Rough And *Full Of Speed And* Thrills

The Klemme Shamrocks finally upset Goodell's winning streak by defeating both teams on their home floor last Friday night The Goodell first team, County Champions, Seven Eagles Champions *and Sectional Winners* the past year, have never before been defeated on their home floor.

In a fast rough game, the Klemme Shamrocks had a hard time warding off defeat but kept enough baskets ahead in the last half to win 29 to 27. Goodell lead at the half 15 to 13, but the Shamrocks jumped into a 23 to 18 lead at the end of the third quarter.

Jorgenson and Trampel operated the big guns for Klemme. while Boller for Goodell was the main threat ably assisted by Hofer. Lau and Schuldt Klemme guards played a tight game and Schuldt found time to lace through two baskets. Grosshuesch, Shamrock forward was snowed under every time he came near the basket but found an opening once for a ringer.

KLEMME—29	FG	FT	F
Grosshuesch, f.	1	0	3
Trampel, f.	4	0	2
Jorgenson, c.	7	1	0
Schuldt, g.	2	0	2
Lau, g	0	0	3
TOTALS	14	1	10

Free throws: made 1 out of 2.

GOODELL—27	FG	FT	F
Boller, f.	5	2	0
Ahlstrom, f.	2	1	0
Johnson, c.	1	0	0
Hofer, g.	3	1	1
Latch, g.	0	1	1
TOTALS	11	5	2

Free throws: made 5 out of 13.

Reserves Win

The Little Shamrocks and Goodell Reserves opened the program which netted another victory for the undefeated Little Shamrocks. 26 to 14. Barz, midget on the team, was the Shamrock hot-shot, sinking six field goals and bucketing three gift shots for a total of fifteen points. Grange. Stille and Wicks each found the ring once, and Stille gathered in three free throws for good measure For Goodell, Barkema, Evenson and Boller each rang up a field goal and Peterson sank two.

Play Again Jan. 28th

Goodell and Klemme will meet again on the Garner floor on January 28th. With the close game at Goodell, the coming game should draw a large crowd from both towns.

Tenth Of All Farm Phones In U. S. Are In Iowa

Iowa farm homes contain more telephones than do those of any bordering states. Iowa has a tenth of the two million telephones in farm homes in the United States.

KLEMME AND WODEN TO BATTLE FOR CONFERENCE LEAD HERE FRIDAY EVE

Have Each Won Three and Lost None To Maintain Perfect Standing

The Seven Eagles Conference leadership will again be at stake Friday night when the Klemme High School Shamrocks tangle with Woden on the local court Woden is proving itself to be a powerful team in the county this year, having won three straight games in conference competition so fans will be treated to a real battle when these teams meet.

Games in the conference last week left every position in the standings in dispute First, second, and third places are all ties Klemme and Woden are perched at the top of the ladder each with three victories and no defeats Crystal Lake and Goodell have divided evenly in the only two games they have played and have a joint claim on second place. Hayfield and Kanawha are sharing the cellar position with no victories and three defeats in as many games played

Games this week, in addition to the Woden fray here, are Kanawha at Crystal Lake and Hayfield at Goodell.

CONFERENCE STANDINGS

Team	Won	Lost	Pct.
Klemme	3	0	1.000
Woden	3	0	1.000
Goodell	1	1	.500

Klemme Streets Decorated For The Coming Holidays

The business section of Klemme presents a beautiful holiday appearance since being decorated in Yuletide fashion with a Christmas tree mounted on every electrolier and with strings of colored lights across the intersections.

Each of the trees on top of the lamp posts are lighted with colored strings of lights. Lee Ridder was in charge of the decorating and did a good job of it

P. T. A. Thursday Night This Week

Children of the primary room will furnish the main part of the program at the parent-teachers meeting Thursday night of this week Under the direction of Miss Hansen, twenty children will put on an entertainment consisting of two plays, several songs and several poems. Everyone likes to see children of this age perform so a real treat is in store for those who attend

Other features on the program will be the singing of Christmas carols by the high school mixed chorus, and talks by a few of the parents and teachers on "Christmas in Other Lands

American Legion Auxiliary Notes

The regular meeting of the American Legion Auxiliary was held at the home of Miss Lydia Bock, December 9

After a short business meeting a Christmas party and exchange of gifts was enjoyed.

The unit voted to have a food sale Saturday, December 18 at the Kluckhohn store, beginning at 8:00 a m

December is rehabilitation month. Ten cents per member has been sent in to the state organization from the local unit as well as all units over the state This money is used to bring Christmas parties and Gifts to veterans confined in hospitals and other institutions To many of these, Christmas which should be the happiest time of the year, would only be another day except for the loyalty of Legion posts and their auxiliaries who bring Christmas joy to them

Locally the unit will provide Christmas baskets for several unfortunate families in this community.

Miss Bock served refreshments at the close of the evening.

Next regular meeting will be at the home of Mrs. Ben Coobs.

This will be an afternoon meeting. Members please note change of time.

Wife Of Klemme Civil Veteran Died Here Tuesday Evening

MRS. LEW LEWIS PASSED AWAY AFTER LONG ILLNESS
Funeral Services Will Be Held

Friday At Methodist Church At 1:00 P. M.

Mrs. Blanche Lewis, wife of Civil War Veteran Lew Lewis, and a pioneer resident of Klemme, died at her home here Tuesday night, December 14, 1937 at 10 o'clock, following an illness of long standing. Mrs. Lewis had been bedfast most of the time during the past several months and was under the care of a nurse. At the time of her death she was 68 years 11 months and 27 days old.

Obituary

Blanche McGrady was born December 17, 1868 on a farm in Clayton county, Iowa and was the sixth child of a family of ten born to her parents, James McGrady and wife Laura (nee) Wallace.

When the deceased was one year old the family moved to a farm in Cerro Gordo county three miles north of what is now the town of Ventura. The family traded at Clear Lake and there Mrs. Lewis attended such schools as they had in that early day sixty-five years ago. She grew to womanhood in that vicinity.

At the age of 18, on December 29, 1886, Blanche McGrady and Lew Lewis were united in marriage and commenced housekeeping Most of the 50 golden years of their married life was spent in the vicinity of Klemme.

Mr. and Mrs. Lewis have always been known as a very congenial couple, kind and helpful and the latch string to their door was always out to friends and neighbors and everyone in the community was their friend "Ma Lewis," as she was affectionately called, was "Mother" to the whole town.

Mrs. Lewis was a member of the American Legion Auxiliary and was also a member of the Rebeka lodge.

She leaves of her immediate family her husband, Lew Lewis; two step-children, Mrs. Henry Yahnke of Garden City, Minn., and Charles Lewis of Long Beach, California; four sons, Henry, Verner and Ernest of Klemme and Holly in California; nine grand children and three great grand children; two brothers, Gilbert McGrady of Mineapolis and Fred McGrady of Layfatie, Oregon, and one sister, Mrs. Clara Berkely of Waterville, Washington

Mr and Mrs. Lew Lewis celebrated their Golden Wedding Anniversary last December when they held open house for their many friends and neighbors.

Funeral services for Mrs. Lewis will be held Friday afternon at 1:30 o'clock at the Methodist Church and the sermon will be preached by Rev. Zabilka. Interment will be made in the family lot at Clear Lake where lie two infant sons and other relatives.

HEAVY SNOW FELL IN NORTH IA. SUN. NIGHT

Highways Opened By Plows Early Monday Morning

The heaviest snow of the season fell in North Iowa Sunday night and early Monday morning to a depth of between eight and ten inches on the level.

Snow plows were called out early Monday morning to open highways and country roads.

Snow Removed From Streets

After the heavy snow Monday morning the Main Street was plowed and the snow pushed to the curb. A gang of men worked all day loading trucks and hauling the snow away from the street.

A Christmas Cantata by Stults

"King Immanuel"

Will Be Presented by the Choir of the Klemme Methodist Church

Sunday Evening, Dec. 19, 8 O'clock

A few Special Numbers will also be presented

Benediction ..... Rev. Wm. Zabilka

The Public Is Cordially Invited To Hear This Special Christmas Music

Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington.—Congress has been doing a deal of talking about helping business to get on its feet, but it has not yet accomplished much. The house ways and means committee, it is true, is making some headway and a number of senators, including the powerful Senator Harrison of Mississippi, are asserting the necessity for a reversal of federal policy. But, again, there is much more talk than action, and in the meantime the country's business is sliding lower and lower.

Much Talk, No Action

The difficulty in the present situation and the thing that probably has been more responsible for the business slump than anything else is that business heretofore has been unable to tell what the federal government is going to do. It has become evident already that with a somewhat changed atmosphere in congress, there are many business men who are more hopeful than a month ago. Business men, big and little, are quick to note that there are senators and representatives who think the time has arrived for business to receive some consideration. And it ought to be added that unless business does get some consideration, this current depression is going to be as bad as the last one. The federal government must give attention to the agricultural problem and it must fit that job into some consideration of the other half of American life, namely, the commerce and industry outside of agricultural life.

It will be recalled that during the first two years of President Roosevelt's administration there was a flock of laws passed that were of great value to the country. Many of them were of a temporary character and were enacted on that basis. That would have been fine if the administration had stopped there. But it did not. The roaming herd of so-called thinkers who were scattered far and wide in federal jobs had to have their innings. At least they thought they had to have a turn at bat. All of their pet theories had to be tried out. The result: many laws that were purely experimental, dangerous, damaging and a burden to business.

With many millions of others, I expected at that time to see these queer looking laws shaken down, corrected, or repealed where it was found necessary. That has not happened. Again, the result: the country's business from the smallest general store at a cross roads or a garage, or a gasoline station to the greatest corporation, like General Motors or Pennsylvania railroad, has had to suffer under the heavy heel of the national government. The reason that congress is showing signs of a movement that will revise the tax structure is because these smaller businesses out through the country have now got their fill of government red tape, complex reports, visits of investigators, new tax forms and levies, or what have you. Those people are making themselves heard here in Washington.

So if congress takes some action looking to a fair deal for business, just as it is quite determined to do something for agriculture, I entertain no doubt about the response it will get from the business interests. As far as business has made itself felt, it is apparently asking only to be treated equitably with labor. Every one knows that the last three or four sessions of congress have been frightened to death every time a labor leader showed up on Capitol hill. The reward given congress was the C. I. O. sitdown strikes, violence and a general mess. The condition has left a goodly number of senators and representatives a bad taste in their mouths.

* * *

There is plenty of dirty linen in the business closet. It has a hard wash day ahead to restore it to the respect of the bulk of the people. Business has been smug. It has thought too little, in many instances, of its obligations to the public at large. But surely there is a point beyond which federal punishment ought not go since there is a responsibility also in the other direction. Unless business gets a reasonable chance to stand on its own feet, how is it going to re-employ workers and reduce the relief rolls?

Messing in Business

Every individual wants to earn some money. He wants a return for his labor. He dreams some day of a retirement, a lay off when he can watch the world go by. I can see no reason why the federal government should not encourage, rather than discourage, such a thing. It is the conviction of a very great many, an increasing number of people that the federal government is messing too much into business.

But aside from that phase. There are a number of things happening that are difficult to understand. At a time when business is sliding off like a snowball going down hill, the President steps out and orders an investigation by the federal trade commission into "high prices." The inquiry, of course, is directed at monopoly. I have no doubt at all that there will be a blast from some government official pretty soon in which "big business" again will be told it is crushing the "little fellow" and that the public is suffering from the high prices maintained by a "trust." There may be even a fireside chat because a President's voice penetrates everywhere.

At a time, too, when the prices of bonds and shares of corporation stock are sinking like they have double pneumonia, out bursts Chairman Douglas of the securities and exchange commission with a small cargo of dynamite about crooked dealings underneath in the stock exchanges of the country. Fortunately for the hundreds of thousands of small investors, the stock exchange quotations did not fall much further as a result of Mr. Douglas' learned remarks. The prices already had fallen below the knees. But the Douglas statement certainly gave no confidence to those who were beginning to believe that congress would try to undo some of the wrongs previously done.

Just about the same time and during frequent appeals from the senators and representatives that the tax laws had to be overhauled, the President sent a report to congress. It was a report by the New York Power authority, charging the power interests with some weird misdoings. I happen to know some of the folks on the staff of the power authority and I feel that they know just about as much about the power problem as I do—which is to say they are pretty dumb about the situation. Of course, those alleged economists have brilliant ideas about reforming America, and I am dumb about that, too.

Further: While this power authority report was being emblazoned upon the front pages of newspapers, President Roosevelt was holding long conferences with Wendell Wilkie and Fred Carlisle, who personalize the "power trust," if there be a power trust. Mr. Roosevelt was talking with those men in an effort to get the large power interests to go ahead with construction and expansion programs to provide work for unemployed.

* * *

The political strategy of blaming everything on "big business" worked well for a time, just as the old demagoguery about "Wall Street" used to inflame thousands when a politician orated and slapped his legs with widely swinging arms. But the picture is different now. The attack on business has become a mill stone on business and it has crushed little as well as big—and since there are so many more smaller ones than there are trusts and monopolies, members of congress are hearing about it from men whom they went to school with at home.

Different Picture

But what is to be done? Let congress repeal about five hundred laws that force business to pay more for the privilege of doing business than it gets out of its whole volume; reduce or revise the direct taxes and bring the thousand and one items of tax out in the open so the people can see and know what they are paying; cut out forty or fifty of the silly experiments that were worked up by the coterie of individuals who are constantly feeding Mr. Roosevelt half-baked and cockeyed schemes for spending money and thereby reduce the federal expenses—these and many more of honest purpose can be done. If they are done, business again can employ workers and as it employs workers, they come off the relief rolls, and as they get wages, they buy. This means profits and profits mean tax receipts by the treasuries of state and nation.

To show how some of these taxes come about, I am told that Herman Oliphant, general counsel to the secretary of the treasury, promoted the ridiculous tax on undistributed profits of corporations. When it was pushed through congress Mr. Roosevelt said it would force corporations to declare dividends of all of their earnings and he was for it. It did just that. But when the corporations had distributed everything to their shareholders and their volume of business fell off, they had no money left to tide them over until business picked up again. Hence, some of them are on the verge of bankruptcy. I do not know where Mr. Oliphant got the idea, or how he sold it to Mr. Roosevelt. I do not know of any business connection that Mr. Oliphant ever had with any important corporation. It is important, however, to note that Mr. Oliphant has made no move whatsoever to defend this brain child that turned out to be such an unwanted baby. (And while writing about Mr. Oliphant, it may be noted that until Secretary Morgenthau came onto the scene, there was never any need for a general counsel to the secretary of the treasury.)

e you ever alone n a strange city?

ou were you know the value of this newspaper

in a strange city. It is pretty dull. the newspapers don't seem to many of the things that interest Headline stories are all right, here is something lacking. That hing is local news.

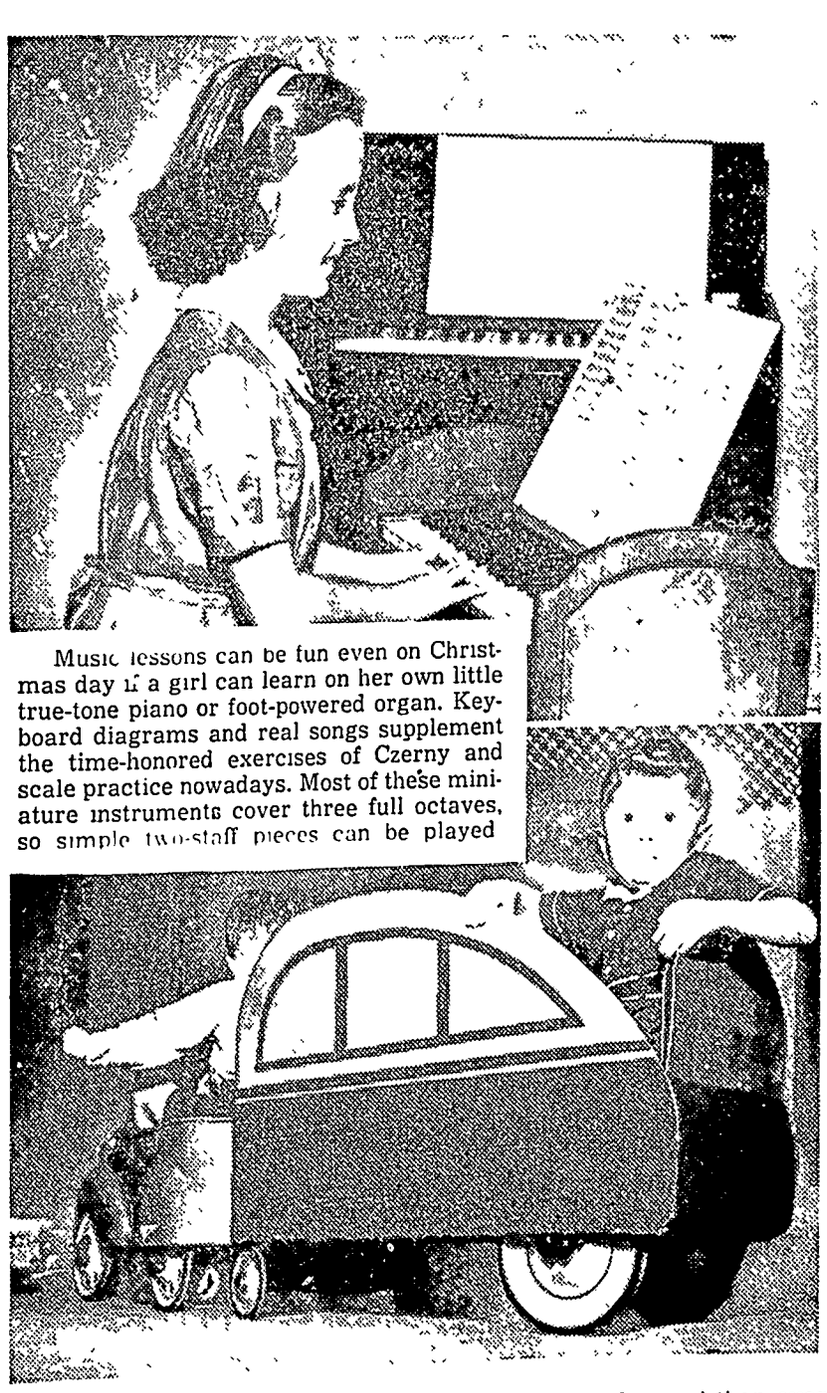
—all good newspapers are edited ally for their local readers. News r friends and neighbors is needed with that of far off places. That a newspaper in a strange city uninteresting. And that is why ewspaper is so important to you. W is a good time to get to . . .

OW YOUR NEWSPAPER

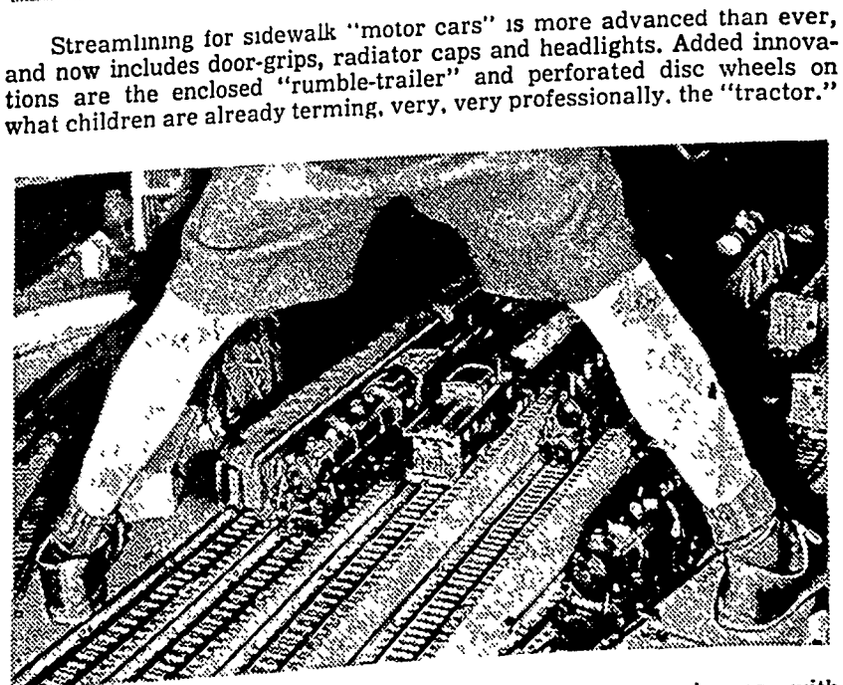
Toys Go Realistic for 1937

CHRISTMAS toys for little boys and girls of this modern age must be as near the real thing as possible. Christmas "babies" are more real than ever, not only in dress (this one wears a knitted yarn Gertrude) but in other ways, as the name Betsy-Wetsy doll indicates.

Young transportation tycoons will have a real Christmas this year. Miniature trucks, airliners, tractors and buses are faithful copies of the real thing.



Music lessons can be fun even on Christmas day if a girl can learn on her own little true-tone piano or foot-powered organ. Keyboard diagrams and real songs supplement the time-honored exercises of Czerny and scale practice nowadays. Most of these miniature instruments cover three full octaves, so simple two-staff pieces can be played



Streamlining for sidewalk "motor cars" is more advanced than ever, and now includes door-grips, radiator caps and headlights. Added innovations are the enclosed "rumble-trailer" and perforated disc wheels on what children are already terming, very, very professionally, the "tractor."

Track layouts this year are almost as perfect as real ones, with wooden ties and innumerable switches. This plan would be a little too fancy for most boys, but many a mile of track will be laid through America's front parlors during Christmas week!

Oil for the wheels, another realistic note.

Lesson for December 19

THE BIRTH OF JESUS

LESSON TEXT—Luke 2:8-20.
GOLDEN TEXT—For unto you is born this day in the city of David a Saviour, which is Christ the Lord.—Luke 2:11.
PRIMARY TOPIC—When Jesus Came.
JUNIOR TOPIC—When Jesus Came.
INTERMEDIATE AND SENIOR TOPIC—The Birth of Our Saviour.
YOUNG PEOPLE AND ADULT TOPIC—God's Gift of a Saviour

Few indeed are the stories that will bear retelling or the books that are worth re-reading. Rare is the song that we care to hear more than once How significant then that we come to the observance of Christmas each year with hearts full of delight in the story of the birth of Jesus, eager again to hear the account from God's Word, and to listen with attentive souls for the sound of the angel's song in the Christmas music.

The birth of our Lord as the incarnate Saviour of men is still front page, headline news, even in 1937. The glad tidings of his coming still color the thinking and living of a world that has gone far from him, that lives today in hatred and enmity, even while outwardly recalling the coming of the One who was to bring peace on earth. We have even gone so far that men feel that the way to promote peace is to use the sword. Until the Prince of Peace himself shall reign there may be no other way. But let us be certain at this Christmas time that the tender baby hand from the cradle at Bethlehem has reached our hearts and lives, bringing us peace with God and good will toward men

The first seven verses of our chapter relate the coming of Mary with Joseph to God's appointed place at his appointed time, for the entrance into this world of the Son of God as the "Word" that "was made flesh and dwelt among us" (John 1:14). Our lesson opens with the proclamation of the blessed good news to the shepherds in the field.

I. "Unto You Is Born . . . a Saviour" (vv. 8-14).

Christ was a great teacher, one whom the common people heard gladly, "for he taught them as one that had authority, and not as the scribes" (Mark 1:22). He was a leader among men, and lived a life which was an example beyond that of any man. But mark it well, this was not the central and essential purpose of his coming. He came as a Saviour. His mother was told before his birth that she should "call his name JESUS: for he shall save his people from their sins" (Matt. 1:21).

It is not enough to be among the countless thousands who superficially observe Christmas with greetings and gifts. We must with the shepherds go and present ourselves in personal devotion to him. If you have not met the Lord Jesus as your own personal Saviour do it now. And if you know him, make this a Christmas in which Christ is supreme.

II. "Let Us Now Go . . . and See" (vv. 15, 16).

Their fear changed to assurance by the words of the angel, the shepherds at once "go" and "see." Would that all those who heard today did likewise. The shepherds might well have found all manner of excuses for not going. They had sheep to care for, they were not prepared for a journey. No, the urge was upon them "and they came with haste . . . and found" Jesus.

III. "When They Had Seen . . . They Made Known" (vv. 17-20).

Mary the mother of Jesus had special reason to ponder these things in her heart. But the shepherds "returned, glorifying and praising God for all that they had heard and seen."

"Let the redeemed of the Lord say so" (Ps. 107:2). When we have found the Lord Jesus we must not simply rejoice in the satisfaction and peace that has come to our own souls. We are saved to serve. The normal expression of the new life in Christ is the proclamation of the gospel to the ends of the earth. Only in that spirit do we truly keep Christmas!

To every one that sees these lines—whether editor, typesetter, or proofreader—whether a reader in the midst of the clamor of the great city or in the quiet of a distant countryside, whether old or young, whether well or on a sickbed, whether alone, far from family and friends, or in the bosom of your family, the writer of these lines extends in the name of Christ a most hearty good wish for a blessed Christmas.

Lesson of Experience

Experience teacheth many things, and all men are his scholars; yet he is a strange tutor unteaching that which he himself hath taught.

Deeds That Make Us

Our deeds still travel with us from afar, and what we have been makes us what we are.—George Eliot.

Burdens

God has furnished us with constant occasion of bearing one another's burdens.

Sew-Your-Own Joins Santa

DID you know, Milady, that Santa Claus and Sew-Your-Own have joined forces to make this the brightest, charmingest Christmas you've ever known? Yes, it's a fact! And you who've tried so hard to be good (and never a little naughty) are going to be rewarded to the full. Gifts by Sew-Your-Own from Santa Claus to you. Here's what you may expect (but remember, "Do not open until Christmas").

You're in line for personalized gifts this year, lucky lady, and what could be closer to your heart's desire than a velvet housecoat—nothing indeed (Sew-Your-Own knows every girl's weakness). So keep your fingers crossed and say a little prayer that December 25th will find you merry, cozy and beautiful in this festive young fashion.

Darling and Practical.

For Miss Keep-the-Home-Beautiful we've specially designed a pair of really different aprons. One is the kind to wear when actually doing kitchen chores, the other is a dressy model—so pretty you will make a darling hostess. Sew-Your-Own sends these out in one package but Santa may split them up, so don't feel slighted, Miss K-T-H-B, if your stocking gives forth only one—either the tea time model or the all-around-the-clock style.

If you're a very young lady you may find Gift No. 1393 or Gift Set No. 1423 packed neatly in your stocking one fine morning soon. The former, a dress plus dainty shorts, will be a peachy combination to wear to parties when you want to be "dressed up swell." The Temple Trio, a hat, scarf and muff set, was designed to put a little "Hollywood" in your Christmas. It's as bright and cheerful as you could wish for. Hope you're the winner, little lady!

The Patterns.

Pattern 1210 is designed for sizes 14 to 20 (32 to 42 bust). Size 16 (full length) requires 5⅞ yards of 39 inch material; in medium length 5¼ yards.

Pattern 1422 is designed for sizes Small (34-36), Medium (38-40), and Large (42-44). Plain apron requires 1⅞ yards of 35 inch material for medium size. The dressy style requires 1½ yards of 39 inch material for medium size, plus 4 yards of machine ruffling for trimming, as pictured.

Pattern 1393 is designed for sizes 6, 8, 10, 12, 14 years. Size 8 requires 2⅝ yards of 39 inch material.

Pattern Set 1423 is designed for sizes Small (18 in. head size), Medium (20 in. head size), and Large (21½ in. head size). The ensemble, medium size, requires 1⅛ yards of 54 inch material.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Drive, Chicago, Ill. Price of patterns, 15 cents (in coins) each.

New Pattern Book.

Send 15 cents for the Barbara Bell Fall and Winter Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns.

Ask Me Another

A General Quiz

1. What is the only walled city in America?
2. Why is the sky blue?
3. What land lies closest to 0 degress latitude and 0 degrees longitude?
4. What was Aaron Burr's conspiracy supposed to have been?
5. What harbor has two tides a day?
6. What is the length of the longest pipe line in the world?
7. Name a few authors who had to wait a long time for financial success.

Answers

1. Quebec.
2. Because the particles of dust which are floating in the upper atmosphere reflect only the blue waves of light.
3. The British Gold Coast colony is nearest.
4. To form a new empire in the Southwest out of Mexican or Louisiana territory.
5. The harbor of Southampton, England.
6. The longest pipe line was recently built under American direction across Asia Minor, and extends for a distance of approximately 1,150 miles.
7. Joseph Conrad wrote for 20 years before he sold a book. In the first nine years of George Bernard Shaw's literary endeavor, he realized about $30. A. A. Milne earned about $100 the first year he spent as a full-time author.

A Three Days' Cough Is Your Danger Signal

No matter how many medicines you have tried for your cough, chest cold, or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with any remedy less potent than Creomulsion, which goes right to the seat of the trouble and aids nature to soothe and heal the inflamed mucous membranes and to loosen and expel the germ-laden phlegm.

Even if other remedies have failed, don't be discouraged, try Creomulsion. Your druggist is authorized to refund your money if you are not thoroughly satisfied with the benefits obtained from the very first bottle. Creomulsion is one word—not two, and it has no hyphen in it. Ask for it plainly, see that the name on the bottle is Creomulsion, and you'll get the genuine product and the relief you want. (Adv.)

GET RID OF BIG UGLY PORES

PLENTY OF DATES NOW...DENTON'S FACIAL MAGNESIA MADE HER SKIN FRESH, YOUNG, BEAUTIFUL

Romance hasn't a chance when big ugly pores spoil skin-texture. Men love the soft smoothness of a fresh young complexion. Denton's Facial Magnesia does miracles for unsightly skin. Ugly pores disappear, skin becomes firm and smooth.

MORE FOOD PER DOLLAR IN 1938 IS PREDICTED

Seasonal Purchases Should Aid Budget Still More, State College Specialist Suggests

A favorable price situation for food that must be purchased was pictured for Iowa farm families in [illegible] by Miss Ruby Simpson, extension management specialist, in the [illegible] for farm family living.

Foods are expected to continue the downward price trend begun the last half of this year. Meat prices will drop noticeably, especially in high quality meats.

The only other commodity in which a price drop is anticipated is in cotton, wool and rayon cloth. The drop will not be reflected in ready-to-wear, however, for manufacturing costs will slightly increase clothing prices. Price increases are predicted for furniture, shoes, fuel and household equipment. Because in some families less cash will be available for farm living, due to lower net cash income, fewer non-necessities will be purchased.

A recent survey of the food situation by extension nutritionists revealed that most Iowa housewives have on hand a normal and fairly adequate supply of home canned and stored fruits and vegetables, Miss Simpson said. Although fall gardens were destroyed by grasshoppers in some counties, much canning was done early and the pests came to late to damage more than the foliage of root vegetables. The supply of most commercially canned vegetables is the largest on record.

By buying food with an eye on seasonal price changes, the Iowa farm homemaker can supplement her home supply with a relatively smaller grocery bill, Miss Simpson said. When some foods show a setsonal rise, others frequently may be substituted.

Foods as a whole reach their low around March of each year and gradually rise until the November high is reached. Fruits are usually at their lowest during November, December and January and at their highest during August.

Cereals change but little in price the year round. Dairy products drop rather sharply in the summer months when production is at its peak and rise from September to a high point in December. Butter follows this pattern rather closely The year's highest point for eggs is usually November and December.

Potatoes and sweet potatoes usually reach a seasonal low point in October and November. Citrus fruits, particularly oranges, are at their lowest price from December through January, when they rise sharply until May and continue upward more gradually until October. Bananas change little the year round because they are imported, imports being smaller and smaller and prices higher from November through March.

STOLEN AUTOMOBILE FOUND AT FORT DODGE

Sheriff L. M. Brower recovered an automobile stolen from Lawrence Sobek, farm hand at the Albert Schmidt farm near Klemme Monday, and abandoned at Fort Dodge.

R. V. Littledog, also working for Schmidt, left with the car and had not been arrested Tuesday.

His home is believed to be at Council Bluffs.

The Rock of Gibraltar is 1,396 feet high.

Shamrocks Beat Garner For Seventh Victory This Season

SHAMROCKS WIN CLOSE GAME FROM GARNER

Was Hard, Clean Game And One Of The Fastest Of The Season

Tuesday night the Shamrocks defeated a fast and scrappy Garner team 35 to 29, in what was the fastest game, to date, this season. Trailing through most of the first half the Shamrocks finally opened up late in the second quarter, and grabbed an 18 to 14 lead at half time.

At the opening of the second half both teams poured in a volley of shots, but Klemme managed to hold a five-point lead as the third quarter ended.

The last quarter saw Garner taking many shots and adding eight points to their score, while Klemme, playing more or less of a stall game, bucketed nine points as their opponents were pulled out of position.

Grosshuesch hit the hoop for six field goals to share scoring honors with Jorgenson, who garnered five field goals and counted twice on free throws. Trampel made good on two from the field and four from the free throw line for eight points, while Schuldt got one of each for three points

Denny, c.	2	0	3
Anderson, g.	4	1	1
Missal, g	0	2	2
TOTALS	13	3	13

Free throws: made 3 out of 11

The Little Shamrocks suffered their first defeat of the season when the larger Garner reserves trounced them 20 to 9. Four of the Little Shamrocks had never seen action on a floor so large as Garner's and were rather lost

Barz got two field goals, while Stille and Grange each got one Kluckhohn added a free throw to make up the total score. Zolke led the Garner attack with four field goals for eight points.

NOTICE OF PURCHASE AT TAX SALE

To Philip Bock, et al.

YOU ARE HEREBY NOTIFIED, That on the 7th day of January, A. D, 1935 the following described piece of real estate, situated in the County of Hancock and State of Iowa. Owner of said Certificate of Tax Sale

It is estimated that an increase of a half cent a loaf in bread will add $50,000,000 to the public food bill in a year.

STRETCH HENS' WORKING HOURS BY USING LIGHTS

Turn roosting hours into feeding and laying hours during the season of short days and relatively high egg prices.

Artificial light, says H. L. Wilcke, head of poultry husbandry at Iowa State College, may be used to advantage during the fall and winter months to increase egg production. If lights have not already been turned on, they should be at once, he suggests, as it is profitable to keep the laying birds busy and off the roosts for at least 12 to 14 hours each day. There are several methods for using artificial lights.

One method is to use one 50-watt bulb, or its equivalent, for each 200 square feet of floor space. The lights should be turned on in the morning early enough to provide the suggested 12 to 14 hours of light, or they may be turned on in both the morning and evening. If the lights may be dimmed the latter method will probably prove the best, but if not, only morning lights should be used, as shutting off lights abruptly at night will leave to many birds unable to find their way to the roosts.

A second method for using artificial lights, as suggested by Dr. Wilcke, is to use lights all night—a 15 to 25-watt bulb for each 200 square feet of floor space. A light reflector should be used so that the light hits below the dropping boards, the roosts being shaded. The self-feeder and waterer should be directly under the light so that those birds wishing to feed during the night may do so Dr. Wilcke explains that while most of the birds remain on the roost at any one time, there are always some down feeding at any hour.

If electricity is not available, kerosene and gasoline lanterns properly protected by wire netting may be used profitably. Also, during the months of highest egg prices poultrymen often reap additional profits by using a brooder stove, or other small stove, encased in metal sheeting, to heat the laying house. Insulation of the walls of the house will aid further in making the quarters less drafty

The only mineral given to cows at the Iowa State College Dairy Farm is bone meal. The grain ration includes' 2 per cent of this mineral.

AMES MAN IS FINED FOR DRUNK DRIVING

Quigley Bound Over To Court On Check Charge

GARNER—C R Corrick of Ames, arrested for drunken driving near Garner Wednesday, was taken before Judge M. H. Kepler at Charles City Friday where he pleaded guilty and was fined $300.

He was arrested by Jamse O'Connor, Garner Marshall.

County Attorney W. D Daly filed information against Francis Quigley of near Klemme. Quigley was given a hearing in the court of Justice H. V Reed and was bound over to the next district term of court. The complaining witness was Tom Quigley, a brother on whom he had written checks totaling to $7 50.

MUCH MALTING GRADE BARLEY PRODUCED IN IOWA THIS YEAR

Iowa farmers this year produced an unusually large amount of barley good enough to make the "malting" grade and earn premium prices, says E. J. Dyas, Iowa State College extension agronomist.

During two months, August and September, for which complete records are now available, 432 carloads of Iowa barley graded in the malting subclass when marketed At the same time only 30 carloads of barley were designated as "blighted" on official inspection certificates

The proportion of barley in the malting grade is the highest in several years, Dyas says.

Iowa's 1937 barley crop is estimated at 13,361,000 bushels.

Economists at Iowa State College believe that it may be next winter or fall before good quality fat cattle will again command maximum price.

YOU NEED THE BEST FOR

Winter Driving

It don't pay to use low grade gas and oil for winter driving Demand the best . . it means better performance in every way.

White Rose Gasoline

is especially refined to give your car maximum power and pick up in coldest weather, together with quick starting which conserves your battery.

—Gertrude Grosshuesch

—K H S—

The advanced Home Economics class will entertain the school board and the faculty December 21st at a dinner at the school.

—Gertrude Grosshuesch

—K H S—

Eloise Etchen served a breakfast to the other senior girls and Miss Wallace and Miss Brakel, their guest, Thursday noon, December 9th Irene spitler was appointed as the assistant. The menu included oranges, grape nuts, egg omelet and bacon, whole-wheat raisin bread and coffee

This breakfast was a part of the girls' work in Home Economics.

—Adala Wille

—K H S—

LaRayne Stille, of the first division Typing I class, was the second student to type 30 words a minute on a five minute test His rate was 30, with 5 errors.

—K H S—

The bookkeeping class started their second practice set this week.

The boys and girls glee clubs have joined together to form a mixed chorus and have been practicing Christmas songs.

—Marjorie Lemke

—K H S—

The physics class has experimented with the various types of window painting, to try and find a solution to the glare in the assembly.

—Marjorie Lemke

—K H S—

Between the halves of the Hayfield first team game, sixteen girls from the physical training class, with Elaine Buntenbach as drum major, gave a drill. They were accompanied at the piano by Miss Brakel. After marching for a time they formed a letter "K" and gave several yells, after which they continued the drill.

—Marjorie Lemke

—K H S—

The Junior Class is selling candy at home basketball games. Patronize the Junior class!

Grade School News

Grades 1 and 2

The second graders are reading from new books now. We enjoy our new stories and workbooks

Melvin has a new story book He has been reading some of the stories to us.

The first graders are making riddle books

Grades 3 and 4

We are reading Christmas stories and learning Christmas songs.

We have been using the rythm band instruments. We are learning to play Jingle Bells as well as to sing it.

You should see the Santa Claus pictures that we can draw!

Next week we hope to be working on our Christmas Unit. One group will study about "Christmas Carols," another group about "The Christmas Story" and another group about "Christmas in Other Lands.'

Grades 5 and 6

We are having a dental campaign in our room. Five people have turned in signed dental cards Duard and Corrine tied for getting theirs back first. Junior, Ewald and Patricia are the others who have handed theirs in. We hope to have a perfect record.

We listened to a radio program Wednesday describing a trip across Siberia.

The following people had perfect scores in spelling last week: Edward, Betty, Ewald, Duard, Lawrence and Corrine.

Herbert Mueller has been absent this week with chicken pox.

The sixth graders finished their health posters on the milk unit. We did the printing with the lettering pen.

In art we have started making Christmas pictures. The first was a crayon drawing of Santa Claus in his sleigh drawn by reindeer.

Grades 7 and 8

Reporter—Russell Wade

This week dental cards were distributed to the members of our room We hope that everyone will return his card signed.

The seventh grade has organized a reading club They named it the R.E.A D. Club. This week we wrote our constitution. We plan to elect officers soon

Those who received 100 per cent in spelling are. Melvin Coobs, Lucille Hartbeck, Billy Zabilka, Billy Grosshuesch, Eugene Haberkamp. Elwyn Jacobs and Caroline Schwartz.

The patrolmen for this week are Elwyn Jacobs and Eugene Haberkamp.

Both of these services are worth while and we invite the public to attend.

NOT MUCH LEFT

J. N. Darling, noted cartoonist and equally famous conservation authority, in a recent radio address, pointed out the necessity of preserving wildlife wih the statement, "Thirty-five years from now we will have left just three acres of tillable land per capita. Three acres of tillable soil is the lowest possible minimum on which man can maintain a standard of living which we consider ours. After that we head downward toward the level of the Chinese."

AIR MAPPING OF IOWA'S FARM LANDS COMPLETED

Aerial mapping of farm lands in Iowa, under original contracts for 1937, has been completed, according to information given Iowa State College extension officials by O D Klein, chairman of the state agricultural conservation committee.

Klein also announced that the original contracts have been extended to permit the flying of additional areas this fall if weather continues favorable.

Aerial mapping of about 427,000 square miles in several states was undertaken by the Agricultural Adjustment Administration this year as a means of providing more accurate farm measurements and a relatively cheap and improved method of determining performance on farms under the Agricultural Conservation Program, Klein explained

The work completed recently in Iowa by the Gaschet Aerial Survey of Des Moines, covers an area of 11,786 square miles, according to the original contract. This area covered twenty-two counties in Iowa. he said while six more counties are included in the extension of the area, which will add 2,935 square miles of aerial mapping for this state in 1937.

The counties of Iowa that will be mapped under the extension granted are Davis, Monroe, Appanoose Wayne, Lucas and Decatur.

"Aerial maps," Klein pointed out, "eliminate much of the expense and daily incident to farm measurement each year by providing records which can be used for a large number of farms year after year

INTEREST SHOWN IN WINTER SPORTS

The public's increasing interest in winter sports is evidenced by the large number of requests for information about facilities in State Parks.

At the present time the only toboganslide provided is in Pine Lake State Park at Eldora Many parks provide natural skiing areas and are open to the public during the winter.

At Gull Point State Park in Dickinson County, Stone Park at Sioux City, Palisades State Park in Linn County and Lacey-Keosauqua State Park in Van Buren County, large lodges equipped with heating plants are available for witner parties or gatherings. Arrangements should be made in advance with the Custodian in charge.

The Conservation Commission hopes the public will make greater use of the state parks during the winter than ever before and that local interest will create the need for added winter facilities in the parks. The toboggan slide at Pine Lake State Park was constructed by the State in response to local interest of the people at Eldora and surrounding territory

Blessed is the man who has mastered the art of listening to his wife and the radio at the same time.

ARE YOU LOOKING FOR

PRICE OR VALUE

IN THE SEED CORN YOU PLANT?

Before buying your 1938 supply of seed corn, ask yourself this question, "Is it sound economy to save $1.00 per acre on seed corn now and probably lose $6.00 an acre next fall?"

THE cheapest possible seed corn you can plant can be picked right out of your own crib. There is no way of knowing how it will produce. It isn't cold or drouth resistant—it won't withstand heavy winds—but IT IS CHEAP. In fact, it won't cost you anything but your time in selecting it . . . plus the market value of the corn.

If on the other hand—you select your seed corn on the saner and safer basis of VALUE—here is what **PIONEER**— the quality Hybrid Seed Corn—has to offer you.

PIONEER costs approximately $1.00 an acre to plant. But here's what you will get. New, improved hybrid crosses, expertly bred and developed from superior inbred strains—backed by the largest commercial corn-breeding program in the Middle West.

You will get a strong, vigorous seed from ears that have been detasseled from 12 to 15 times. You will get a superior seed that has been dried to 12%—with an average of 95 % STRONG GERMINATION — that has been carefully hand sorted and expertly cleaned and graded.

PIONEER refuses to take any short-cuts. PIONEER is only interested in the finest quality hybrid seed corn it is possible to produce.

Beware of cheap seed corn. Check well its breeding—the care and skill with which it was produced and processed. Don't let the lure of a dollar an acre at planting time cheat you out of a probable additional profit of $6.00 an acre at corn-picking time.

For the BEST VALUE in Quality Hybrid Seed Corn See Your Local PIONEER Representative

Funeral Service Held At M. E. Church Friday For Mrs. Buss

KLEMME WOMAN DIED AT HOME OF HER DAUGHTER

Mrs. Buss Had Been Ill For But A Short Time

Mrs Jennie Harberts Buss was born January 18. 1868 in Ogle Co, Illinois and died at the home of her daughter, Mrs Ed Becker, December 7 1937 She was 69 yrs, 10 months and 20 days old Sh came to Wright county with he parents in her youth It was here where she met Eelko Buss to whom she was married December 22 1892 Three years later they mov ed to the farm east of Klemme where they built up a fine home for themselves and their children

To this union were born eight children all of whom survived ex cept twin boys who died in thei infancy Those surviving are

Rauke of Hampton, Harry wh is preaching in Morley, Iowa, in the United Brethern Church, Ed gar on the home place, Mrs E Becker Mrs Sylvan Johnson an Mrs Dwight Helps, all living o farms east of Klemme

Mrs Buss was a member of th Methodist Episcopal Church i Klemme Often she had expresse to her pastor her interest in th church, which was manifested b her presence whenever possibl and also her support. Mrs Bus was a quiet and unnassuming soul yet left an imprint upon all who knew her which will not easily vanish away The heritage whic she left her children as a kind d voted, Christian mother is one tha all might well covet

Mrs Buss took sick about fiv weeks ago while visiting in Bel mond During this period she wa never considered critically ill and even sat up in bed Tuesday and ate her meals But late Tuesda night the angel of death came

Besides her children all wh are of matured age she leaves t mourn her death, two sisters, Hel- en Harberts and Mrs. Abbie Mein- ders of Belmond; Four brothers, John, George and Herbert of Bel- mond and Harry of Careton, South Dakota There are also eleven grand children and other distant relatives and a large host of friends

Funer l services were held from the Methodist Church in Klemme with the Rev Wm. Zabilka offic- iating.

Interment was made in the Klemme Cemetery beside her husband who died in 1926.

Mrs. Kenneth Zwald visited at the Herman Gast home Monday.

Mr and Mrs. Frank Bredlow and family visited at the Wilbur Meckstraw home Sunday.

TRY THIS ONE

The Fox will test the skill of every trapper. He is a very cun- ning and smart furbearing ani- mal Foxes like to cross streams on fallen logs or stepping stones. One popular set for a fox is made by placing meat on a stick in water about four feet from shore. The bait should appear to be floating on the water. Several stepping are then placed between the shore and the bait The trap should be placed on one of these stones and careful- ly hidden with moss or leaves.

Card Of Thanks

We wish to take this means of expressing our thanks for the words of sympathy and folral offer- ings contributed in memory of our beloved one.

Xmas Shopping
Get You Down!

•

So many have told us that before they had a checking account at this bank their shopping on credit made double work for them. There was the time taken for shopping and the extra time taken to run around the first of the month and pay bills. If they paid cash they had to wait for change and receipts.

A checking account here saves time—it takes the "hopping" out of shopping. You write the correct amount of money needed; cancelled checks are legal receipts; and charge purchases are readily paid by check through the mail the first of the month. Shop- ping by check is more convenient—and much safer!

Heart Ailments and Childbirth Studied by a New Method

"Scanography" Devised by a Dallas Physician

Dallas, Texas.—Better diagnosis of heart disorders is promised by "scanography," a new kind of X-ray photography, just presented to the medical profession by Robert H. Millwee, Dallas physician.

It enables scientists to study the ebbing and flowing of the blood in the heart. For the first time also it makes possible undistorted photographs of all bony structures within the human body.

Childbirth and motherhood should be made safer. For scanography permits the physician to determine accurately the dimensions of the mother's pelvic bones and the exact size of the head of the baby that is to be born.

The full name of this new tool of diagnostic medicine is "slit scanography X-ray photography."

Distortion Is Avoided.

Basic feat of the new Millwee method is to take clear and undistorted X-ray photographs of the human body and its various parts. To the layman perhaps the best way to explain the value of the new technique is to recall that in ordinary photography, when one is photographing a high building, it is necessary to adjust the camera so that in the resulting picture the building will not appear to be falling away or toward the viewer of the picture. Just "shooting" the picture produces the distortion that is so well known.

Dr. Millwee's scanograph method achieves the same purpose in X-ray photography where distortion of size in the various parts of the picture may mean, and has meant on occasions, a wrong diagnosis.

In scanograph photography, Dr. Millwee explained, the part of the body to be pictured is covered with a lead shield containing a series of slits. The X-ray tube moves across this series of slits and thus takes a series of long narrow pictures, one after the other on the X-ray negative. By varying the speed of movement of the X-ray tube, exposures in adjacent sections are taken several seconds apart as desired.

First Aid Kits May Be Harmful Unless Use Is Supervised

Chicago.—Warning that unsupervised use of first-aid kits in industrial plants may do more harm than good was issued by Dr M. N. Newquist of Chicago at the meeting here of the American College of Surgeons. He also declared that industrial organizations should, as far as possible, use hospitals already established in their communities for treatment of injuries to employees, rather than set up their own hospitals within the industrial plant.

"The use of first-aid kits in extremely decentralized industrial operations may be necessary," he said, "but their unsupervised use in industrial establishments as a whole should not be permitted.

"Fewer, and more centralized, first-aid stations or dispensaries are desirable in order to insure adequate treatment and records.

"Industrialists will find that in the long run they can obtain more efficient hospital service at less cost from organizations whose sole purpose is to conduct hospitals than they could by establishing their own hospitals."

New Evolution Theory Offered by Englishman

Washington.—Evolution by internal urges of various organs, as determined by the animal's use or disuse of them, is put forth in place of the Darwinian idea of natural selection and the Mendelian concept of genes or hereditary units, by Prof. W. P. Pycraft, well-known English zoologist, in the annual report of the Smithsonian institution.

Professor Pycraft's theory is that the body molds itself by diverting food, and hence growth, to those organs which are most stimulated in its ordinary activities. Consequently these organs are more developed than those which are less stimulated.

Orange Peel Oil

Rio de Janeiro.—Orange peels discarded by orange juice dealers are being used for the purpose of extracting oil. Although the industry is only in the experimental stage here, operations have produced sufficient orange oil for export.

Turn Lever and Find Out How Long You Are Going to Live

Many Other Questions Answered by a Machine

By JANE STAFFORD

New York.—How long are you probably going to live? How does a cut finger heal? What happens when it gets infected? Where is that sacro-iliac joint that got out of whack and doubled you up with backache the other day? What is the scientifically approved way of brushing the teeth?

The answers to these and hundreds of other questions everyone has about the human body and its needs appear in a new exhibit at the New York Museum of Science and Industry.

The exhibit, planned so that visitors can push buttons and pull levers and then watch the wheels go around, tells the "Story of Man." The material was constructed abroad for the Oberlaender Trust and was loaned to the museum here for its first showing in America.

Most interesting, probably, is the exhibit which enables visitors to predict their own length of life. You turn a lever until your present age and your sex show on two dials. Then you turn the lever again and a third dial tells the age to which you will probably live, based on life expectation figures.

Learn About Your Blood.

Another unusual exhibit lets the visitor do a little blood mixing of his own and understand that complicated matter of the blood groups, so essential in blood tranfusions. You can see for yourself how the blood serum and blood cells mix if the blood samples are from compatible groups, and how the cells clot dangerously together if serum from blood of an incompatible group is added.

A fearsome model that looks like a Hallowe'en nightmare is the man of muscle and bone—a skeleton with red strips representing the muscles of the body. Even more peculiar, looking, in fact, like an electrical man, is the figure that is half bony skeleton and half yellow wires. This model shows all the nerves on half the body.

Beginning with a model, enlarged 200 times, of the tiny egg from which human life starts, the exhibit shows the development of the body and all its organs and how they tick.

Myths About Eagle Are Severely Shaken by Investigation

Washington.—Impartial scientific investigations of real live bald eagles deflate those birds quite a bit. Not that our eagle is debunked, exactly, but we learn that a lot of things we knew about the eagle consisted of "facts that weren't so."

Results of long study of eagles, and compilation of the studies of other scientists, are presented in a new Smithsonian institution book, written by Arthur Cleveland Bent of Taunton, Mass.

His Preying Methods.

True, the bald eagle is a bird of prey. But he is also not fond of the hard work involved in preying, and lives mostly on fish cast ashore dying or dead, or taken away from a smaller fish-catching hawk, the osprey. He can do his own fishing, but not so cleverly as the osprey, so he prefers to rob him.

When fish are scantily available, as in winter, the eagle does turn to true bird-of-prey tactics. He takes any bird or mammal that he can handle, and that runs up as big as Canada goose. Despite his size, he is an athlete in the air, often turning upside down and diving under his victim to strike from beneath.

He does not build his home on a cliff nearly as often as on top of a tall tree, even in the Rockies. And there are far more bald eagles in Florida, least cliffy of states, than anywhere else in the Union. Eagles have even been known to build their nests right at ground level.

And when a human intruder comes, says Mr. Bent, the bald eagle does not defend his nest. He just plain vacates.

Porch Vine Is Being Used in Fight Against Erosion

Washington. — Kudzu, more familiarly known through the South as "porch vine," has been put to work to literally "rope down" the soil against erosion.

Agriculture department soil conservation experts report that "porch vine" forms an ideal soil binder, for it rapidly produces a dense growth whose runners bind the topsoil in place, thus stopping the inroads of the weather on the countryside. Runners 60 to 70 feet long, with new roots every few feet at the nodes, characterize the vine, which is also a legume, thus serving to fertilize the soil at the same time.

A Christmas Awakening

by Katherine Edelman

"WITH Christmas drawing near, why can't we get together and make plans—" Robert Dutton read no further. With calm deliberation, he put the heavily scrawled letter back into its envelope.

"Always the impractical Hal," he said slowly. "No wonder he never gets anywhere."

A list of appointments waited upon his desk. Visits from two of the most important men in town, a delegation about a right-of-way through a tract of land he had just purchased; a reminder of a talk he had promised to make at a luncheon. Important things, he thought, things Hal would never be called upon to do.

Hastily he went through his mail. A square envelope in a familiar hand caught his eye. He opened it a little curiously. What could Miss Denby be writing him about? His long fingers drew out an artistic Christmas card. A conservative wish and an old Christmas carol printed in English letters. That was all, except the signature, "Eleanor Denby."

A flush stained his face, an undefinable something sent the blood singing through his veins. "Eleanor," he said softly; "a beautiful name; how queer that I never heard it before."

Then, as if resenting his weakness and sentiment, he dug into his mail again. But try as he would, he could not concentrate on the things that had meant anything to him before. Something had happened to Robert Dutton; a Christmas greeting from a secretary whom he had scarcely noticed left him visibly unsettled.

Christmas memories surged through his heart. He was back in the old home again. Everybody was rushing around in circles. He saw the big tree in the corner of the parlor; the kitchen table piled high with good things to eat. And Mother and Dad, with happiness beaming upon their faces.

He picked up Hal's letter again. After all, maybe his kid brother wasn't so crazy? The thought was pushing through his mind that maybe it was he who lacked real sense. This time he read the letter in a

"We're Going to Forget Business for Today," He Said.

different mood. "Let's give Dad and Mother the surprise of their lives. Let's go down and make one grand Christmas for them. You can turn everything over to someone else for a week—anyone can handle things like that—there's nothing personal or precious about them."

"Nothing personal or precious about them!" He turned the words over in his mind. Hal was right. Someone else could handle the things that had seemed so terribly important. A few hours of confusion, perhaps; then things would go on as before. The world would forget him in a day.

His fingers reached for the pen upon his desk. "Dear Hal," he began, "I heartily agree with your proposal that we get together and make plans to give Dad and Mother the biggest surprise and the grandest Christmas ever—" He was smiling broadly, almost laughing aloud, as he finished the letter with a flourish.

Five minutes later Miss Denby entered his private office to find a new Robert Dutton. She almost dropped her book in surprise at the expression upon his face, and the new way in which he greeted her.

"I'm ready to begin, Mr. Dutton," she began nervously, when he made no motion to start the routine of the day.

"We're going to forget business for today, Miss Denby, and go Christmas shopping, that is, if you want to help me out." He fumbled with his tie as he spoke, noticing for the first time the soft curving of her white neck. "Your Christmas card," he went on, "wrought some miracle. I've found out that business and making money aren't everything in life. They're both fine in their way, but there are other things, too; precious things that I've been overlooking." He came closer to her side and looked hard into her eyes. "For instance, going shopping with a good-looking and adorable secretary."

STAR DUST

Movie • Radio

By VIRGINIA VALE

DEANNA DURBIN will do a play on Broadway early in the spring if all the experts concerned with her upbringing agree that it won't be too much of a strain on her.

Any decision affecting her welfare has to be pondered over by her mother, her manager, her vocal teacher, and the physician at Universal studios and they are all a little reluctant about adding any further public appearances to her already very public life. Until recently, Deanna could go light-heartedly about her work at motion-picture and radio studios, but lately such crowds have followed her wherever she went that it is a source of worry to everyone around her.

Deanna Durbin

—★—

All the tumult and hysterical shouting over Fred Allen's return to his radio program does not mean that Walter O'Keefe is being neglected or forgotten. O'Keefe so endeared himself to radio listeners while he was substituting for Fred Allen that he could have walked right into another big program, but he demanded a vacation first.

—★—

When a young newcomer to the screen steals most of the glory away from two enormously-popular stars, you can expect to see her in bigger and better parts right away. So, when you see Loretta Young and Tyrone Power in "Second Honeymoon," be all ready to clap hands for Marjorie Weaver who is the outstanding hit of this gay and giddy comedy. When the picture was previewed, Marjorie was all set to go back home to Louisville, Kentucky, to make personal appearances with the picture, but so great was the audience response to her performance, the trip was called off.

—★—

Warner Brothers' directors have decided that they just cannot stand the strain of wondering whether their handsome heroes will be able to come to work on Monday morning, so they have sent out some pretty stringent orders about what is not to be done over week-ends, or any other time. Fernand Gravet has had to give up steeplechase riding. George Brent and Errol Flynn cannot pilot their planes.

—★—

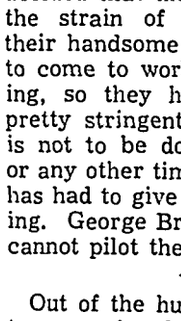
Out of the hundreds of young actresses who daily apply for work at New York radio producers' offices, the majority specialize in one type of characterization only. In trying to explain how slim their chance is of getting anywhere, many radio producers point to Helen Claire of the cast of "Aunt Jenny's Real Life Stories," on CBS. A typical week's work for Miss Claire called for her to play the Serpent in "Methuselah," the character of Adelina Patti at the ages of sixteen and forty-one, a hillbilly girl, and Alice in "Alice in Wonderland."

—★—

Russel Gleason thought the Twentieth Century-Fox studio was kidding him when they told him he had been cast in "Love on a Budget." He had just announced his engagement and was taking a keen interest in all bankroll-stretching theories. But very seriously, he had been cast for a role in this latest of the Jones family series.

—★—

By far the gayest and most delightful of the new pictures is "It's Love I'm After," featuring Leslie Howard, Bette Davis, and Olivia de Haviland. It does not sound new, because it is that old, old story of the matinee idol, the spitfire leading woman who is in love with him, and the moonstruck young woman who blindly adores him. What is new is the refreshing, witty treatment the story has been given. Never before have the three featured players been so deft.



Leslie Howard

—★—

ODDS AND ENDS—Gertrude Berg was fairly snowed under with flowers recently when she rounded out eight years as author, producer and star of "The Goldbergs." Players love to work with her, she is so patient, so helpful, so like the compassionate Molly she plays . . . Dolores Costello makes her comeback to the screen in "Girls on Probation" and according to fellow workers it is a brilliant comeback . . . James Stewart gets the grand role opposite Joan Crawford in "Shopworn Angel." Gary Cooper played it in the version made years ago . . . George Raft is determined to be a director some day, so he has agreed to work as an apprentice in various technical departments of the studio in order to learn the business thoroughly. He can only do it when he is not acting, of course, so he is asking Paramount to give him nice, long vacations between pictures . . . John Barrymore is going to make another Bull dog Drummond picture.

Historic Hoaxes

By ELMO SCOTT WATSON

© Western Newspaper Union.

A Bogus Declaration

ONE day in 1930 newspaper headlines in Toronto, Canada, carried this startling declaration: "Draft of Declaration of Independence Signed by Penn, Instead of Jefferson, Is Fabulous Art Treasure Now Here." The story under those headlines stated that Mrs. Ellen Field of Stoke Poges, England, last of the lineal descendants of William Penn, had on her deathbed ordered certain fabulous heirlooms returned to America.

Among the "treasures" was a faded and blotted parchment, said to be the original draft of America's most famous document and presumably written by John Penn, first governor of Pennsylvania. One word in that headline was quite correct—"fabulous."

It was pronounced that by experts who pointed out that John Penn could not have been the author of the Declaration for the very good reason that he was a Tory and had served a term in jail for his pro-British sympathies. Moreover, the minutes of the Continental congress show that Franklin, Adams and Jefferson were members of the committee appointed to draw up the Declaration and it is a matter of historical record that Jefferson actually wrote it.

The original manuscript has disappeared (the document preserved in Washington is an engrossed copy). It was probably destroyed because it was a dangerous document to have around when the outcome of the Revolution was still in doubt. Further examination of the Toronto parchment showed that the text of it may have been a contemporary copy of the original draft. But the signatures were clearly forgeries. So the forger who hoped, perhaps, to sell his "treasure" for a large sum to the United States government was foiled.

The First Bathtub

LATE in 1917 Henry L. Mencken, "simply to have some fun in war days," as he later declared, wrote a story for the New York Evening Mail. It stated that the first American bathtub was installed on December 20, 1842, by Adam Thompson in his home in Cincinnati where he proudly displayed it to his friends at a party for men and all the guests took baths. When the news of this got about, physicians denounced the bathtub as a menace to public health. In Boston a city ordinance prohibited its use except upon medical advice. Virginia levied a $30 tax on each bathtub installation and the Philadelphia city council tried to pass an ordinance prohibiting its use betweeen November and May, etc., etc.

All of this was written in a spirit of "good clean fun." Then, to his surprise, Mencken discovered that his "spoofing" had been taken seriously. Other writers began using the "facts" in his story. Medical men cited them as proof of the progress of public hygiene. They even appeared in standard reference works.

Finally in 1926 Mencken wrote an article which was syndicated to 30 newspapers in all parts of the country, confessing the hoax. It appeared in his sixth series of "Prejudices" under the head of "The American Public Will Swallow Anything." But despite all his efforts to prove the story a fake, it still bobs up regularly and his "facts" about the first bathtub are solemnly reprinted as an authentic item of American social history!

* * *

"Barberous Jokes"

SOON after the bobbed hair fad had spread to Germany, a number of prominent citizens of Leipsic were surprised one day to receive a notice, written in the florid official German style. It said that the women of their household must pay their "bobbed hair tax" at once. There was a rush to the city hall where clerks, puzzled at first by the descent upon them, finally convinced a group of anxious women that they had been the victims of a practical joker.

Just as puzzled, a few years later, was the secretary of the barbers' union in Chicago when he read in the papers that his union had instructed him to write a letter to Rudolph Valentino, asking him to shave off a beard which he had grown for his role in a movie. According to the story, the barbers' union had passed a resolution pro the beard, on the ground that it would have a tendency to influence many young men who patterned themselves after him, to wear such facial ornaments. If they did that, it would ruin the barber business and they wanted the screen idol to "cease and desist."

After the first story had been printed, the secretary denied that he had received any such instructions. He knew nothing about the resolutions nor did he know how the story originated. Neither did any one else. But some people shrewdly suspected that it might have been started by Harry Reichenbach, the famous press agent, who was doing publicity for Valentino at the time and who just happened to be in Chicago when the story first appeared!

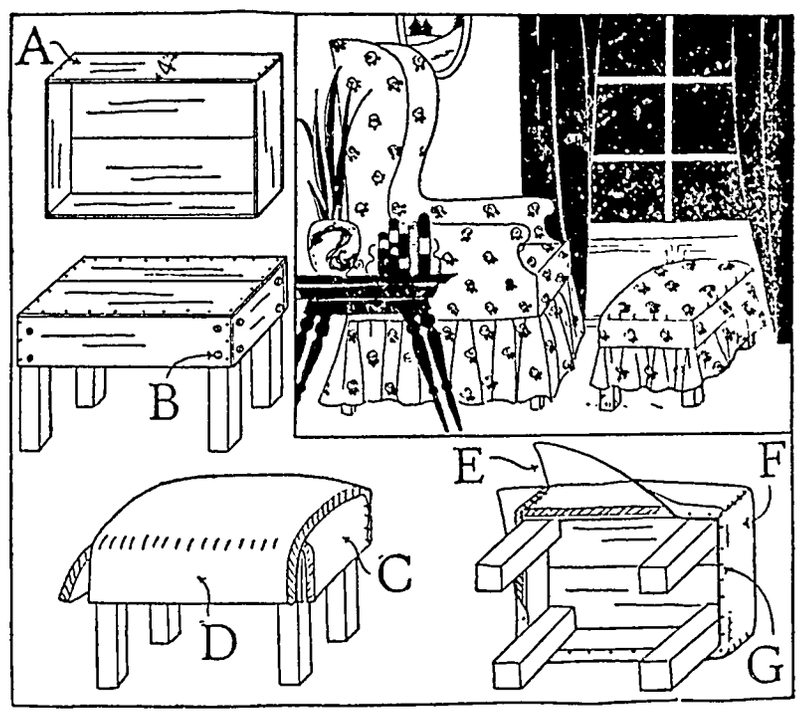
HOW TO SEW

by Ruth Wyeth Spears



Make This Attractive Ottoman.

GET a wooden box from the grocer. It should be about as long as the width of the chair with which the ottoman is to be used. The depth of the sides should be four inches as shown here at A.

The legs should be made of two by two's or you may have a set of nicely turned legs from an old table or other piece of furniture that may be cut down to the right length. Fasten in place with long screws through the corners of the box as shown here at B.

About half a bat of cotton will be needed. Put five or six layers of the cotton on the top, cutting the first layer about four inches smaller all around than the top of the box. Place it in the center. Cut the next layer a little bigger and the others still bigger until the last one is the same size as the top. Now, cut a layer of cotton to go over the top and down over the ends as at C and another to go over the top and down the sides as at D.

Cut a piece of heavy muslin to fasten tightly over the cotton. Cut the corners of the muslin as at E. Sew with heavy thread as at F and then tack as at G.

To make the cover, stretch the top tightly over the muslin and sew it along the sides through the muslin, then make a straight four-inch band to go all around and add the ruffle to it.

Every Homemaker should have a copy of Mrs. Spears' new book, SEWING. Forty-eight pages of step-by-step directions for making slipcovers and dressing tables; restoring and upholstering chairs, couches; making curtains for every type of room and purpose. Making lampshades, rugs, ottomans and other useful articles for the home. Readers wishing a copy should send name and address, enclosing 25 cents, to Mrs. Spears, 210 South Desplaines St., Chicago, Illinois.

Favorite Recipe of the Week

Pumpkin Custard a Real Treat.

TREAT the family to a pumpkin custard as a change from the usual pie. Canned pumpkin is suggested because it is already cooked, mashed and ready to use, which saves considerable time and energy. Bake the custard in a basin, not too large or too deep. A good size would be one which holds a quart.

Pumpkin Custard.

2 cups canned pumpkin
¾ cup sugar, part brown
1 teaspoon cinnamon
¼ teaspoon cloves
½ teaspoon ginger
¼ teaspoon nutmeg
1 teaspoon salt
3 eggs
2¼ cups milk

Beat pumpkin thoroughly with dry ingredients. Beat eggs slightly, add to milk and combine with pumpkin mixture. Pour into baking pan, set in a pan of water (½ inch deep on pan), and bake for about 45 minutes in a moderate oven (375 degrees), or until a knife comes out clean when inserted in the center. Chill before serving, unmold onto chop platter, and garnish.

MARJORIE H. BLACK.

MOVIE

Be considerate! Don't cough in the movies. Take along a box of Smith Brothers Cough Drops for quick relief. Black or Menthol—5¢.

Smith Bros. Cough Drops are the only drops containing VITAMIN A
This is the vitamin that raises the resistance of the mucous membranes of the nose and throat to cold and cough infections.

After the ceremony the young ouple left immdiately for a trip St. Louis, Mo., whre they ex- ected to visit Mr. Greimann's rother, Mr. and Mrs. Maurice reimann and family. —Garner eader.

FUNERAL SERVICES HELD MONDAY AT M. E. CHURCH FOR HENRY MARTEN, 90

Henry A. Marten, age 90, one of the pioneer farmers of this vicinity, passed away Thursday evening at the home of his niece, Mrs J J. Stille of Liberty Township

Funeral services were conducted by Dr. Wm. Zabilka in the Methodist Church, Klemme, Iowa on Monday afternoon December 20th. and interment made beside his wife in the Garner Cemetery

Obituary

Henry August Marten was born Sept. 26, 1847, in Klein Gusborn, Hanover, Germany, the youngest of four sons born to his parents who were farmers.

He was baptized and confirmed in the Lutheran Church, and attended the public schools of Germany. Later, in America, he attended revival meetings conducted by Rev Schmidt in Clayton County, Iowa, where he joined the Methodist Church and has been a faithful member until his death.

When he moved to Hancock County he and his family attended the German Methodist meetings at the old Court House in Concord, later he attended the Liberty Township Church, and after he retired, his membership was transferred to the Garner Methodist Church

At the age of 21, in 1869, Henry Marten came to America, he worked as a farm hand, near St. Paul, Minnesota, in Clayton County, Iowa, and in Wright County. Then in 1883 he came to Hancock County and purchased the farm in Twin Lake Township where the Dave Schwichtenberg family now live Here he lived with his family for 16 years, after which he retired and moved to Concord, this was in 1889, and here he lived for 35 years In the fall of 1934 he went to Jefferson, Oklahoma and lived for three years with his niece. Mrs. Lizzie Feuerhelm. Early in 1937 he returned to Iowa and has been living with the J J. Stille family of Liberty Township, at which place he passed away

Henry Marten and Louise Kruger were married, March 31, 1880, by the Rev. G. Haefner, at Eldora Iowa. To this union was born one son, Otto This couple lived together almost fifty years, until death claimed the wife in 1929.

Henry Marten enjoyed lesure, lived simply, was frugal in his expenditures and thus accumulated a modest amount of wealth.

His last illness was La Grippe, and his end came at 10 p. m., Dec 16, 1937, having reached the age of 90 years, 2 months and 20 days

He leaves to mourn his passing, his son, Otto Marten of Garner, Iowa, a niece Mrs. Lizzie Marten Feuerhelm, and a number of families who are directly related to his late wife, Louise Kruger Marten, among these are·

W. C. A. Gast, Herman Gast, J J. Stille, all of Klemme; Wm. Stinaker, Sr, Thompson, Iowa; Frank Wolter, Lone Tree, Iowa, Mrs. Henry Olson, Clarion, Iowa; Mrs. Lydia Dorenkamp, Belmond, Iowa; Otto Gast, Beltrami, Minn.; Geo Gast, Beltrami, Minn., and Mrs. Martha Janssen, Ackley, Iowa.

LAGE CROWD ATTENDED THE METHODIST CANTATA

There was a large crowd present at the Methodist Church Sunday evening when the choir presented their annual Christmas Cantata. The cantata was well given and their were a number of solos and group parts as well as the chorus numbers. All were very well given and Mrs. Zabilka, director, is to be complimented.

1-MINUTE SAFETY TALKS

By Don Herold

Motoring Humility

The hardest thing in this world to "sell" is humility

I mean the hardest thing to impart to anybody else is humility.

The very act of trying to give somebody else humility about anything arouses everything else in him BUT HUMILITY

We are all inclined to shun HUMILITY because it is a virtue that is so close to the weaknesses of cowardice and craven submissiveness. We are all so scared somebody will get a little the better of us, if we give them an inch

Yet HUMILITY is exactly the quality that humans need a whole lot of, to solve a whole lot of their problems.

We have it in golf and in other sports. We yield. We give the other player the benefit of doubts We praise his poor shots and discount our own good shots. In other words, we are not scared to be gentlemen.

But when we climb into an automobile, we put a chip on our shoulder and a feather in our cap. We are not going to let anybody slip anything over on us on the road. "Well, who does that so-and-so think he is, trying to beat me to the crossing!"

Nor do we admit for a minute that we may have our driving faults. Nor do we concede that there is a possibility that we MIGHT some day be the cause of an accident.

No, we are the exception to the rule. We are the person who drives fast but drives well Only dumbbells have smashes.

The sooner we all realize that humbleness and deference and courtesy at the steering wheel are sporting qualities, and the sooner we admit that, even in our hands, an automobile is an instrument capable of dealing out death and disaster if we handle it carelessly or cockily, even for an instant, the sooner we shall learn humility towards other drivers, towards Fate, and towards laws of momentum and centrifugal force, and the sooner will we cut down the motor car's annual American toll which, according to The Travelers Insurance Company, is 36,800 killed and 967,840 injured.

The automobile is a blessing—but a dangerous one. Drive it with great humility in your heart.

Iowa Union Telephone Co. Settled Local R. E. A. Dispute

TELEPHONE COMPANY WITHDRAWS OBJECTIONS AGAINST THE R. E. A.

Officials Met At Garner Tuesday And Ironed Out Difficulties

Objections which had been filed by the Iowa Union Telephone Co against construction of R. E A. lines in this community have been withdrawn, according to Carl Anderson, local manager.

This action means that Rural Electrification lines can now be built in this territory without being hampered by legalities. In explaining the action of the Iowa Union Telephone Co. Mr. Anderson gave the other side of the story and told how the telephone company was only trying to protect their own interests and had no intention of slowing up progress

The whole story in a nut shell is practically this: When R. E A or any other power lines are built it becomes necessary for the telephone company in that territory to rebuild their lines to eliminate interference set up by the power lines. This rebuilding process is a great expense to the telephone company and they were asking that R. E. A. pay for the material needed to rebuild the lines. In as much as there seem to be no funds available by R. E. A. to pay costs of damages, it then remained for the telephone company to foot the entire bill, and so objections were removed, and peace again restored.

A number of prominent farmers of the community were invited to the meeting Tuesday so that they might get the information first hand. Those present were well pleased with the attitude taken by the Iowa Union Telephone Co. in the matter.

Mr. Anderson stated that the company expects to start rebuilding all of the lines early in the spring. The new metallic system will give farm lines the very best in service.

A diplomat is a man who can make his wife believe that she would look fat in a fur coat.

SHAMROCKS WREST CONFERENCE TITLE FROM FAST WODEN QUINTET

Last Friday night Coach A. L. Kingery's Klemme High School Shamrocks climbed into the top spot in the Seven Eagles Conference when they defeated Woden, on th local floor, 36 to 26.

Woden, who was expected to be a tough team, fulfilled all expectations and put up a battle all the way, but the Shamrocks managed to maintain about a 6 to 10 point lead through most of the game.

Jogrenson led the Shamrocks to victory, dumping in ten field goals and two free throws for 22 points. Helm and Gerdes were the main guns in the Woden offensive with 9 and 8 points respectively.

Following is the box score:

KLEMME—36

	FG	FT	F

Propaganda Goes Gruesome

THE World war not only made more people aware of the word "propaganda" than they had ever been before but the use of this instrument in "molding public opinion" reached greater heights—or descended to lower levels, whichever way you wish to look at it—than ever before. One of the classic propaganda stories, broadcast all over the world, was that the Germans were using their dead to manufacture soap. This story was first circulated in China (where ancestor worship is strong) to win that country to the side of the Allies.

The story had its origin in a curious coincidence. One day two photographs were delivered to the office of Brig. Gen. J. V. Charters of the British Army Intelligence staff. One of them showed some dead German soldiers being hauled away to be buried. The other was a picture of dead horses on the way to a soap factory.

Whether or not what took place next was deliberate or accidental has never been definitely established. But the fact remains that the captions on the two pictures were switched and the one showing the dead German soldiers declared that they were "on their way to the soap factory."

Propagandists saw in this picture an opportunity for further exploiting the idea of "German ruthlessness," as well as evidence of the desperate condition of Germany and the picture was reprinted all over the world with that caption under it. Despite indignant denials by the Germans, many people still believe that they did indeed use their dead to manufacture soap during the World war.

Boomerang

WHEN Eugene Field joined the staff of the Chicago Daily News in August, 1883, and began writing his column "Sharps and Flats," he learned that it was the custom of the News to give each employee a turkey as a Christmas present. Thereupon he wrote a note to Melville E. Stone, the publisher (later famous as the head of the Associated Press) saying that he didn't like turkey but he could use a new suit of clothes.

The day before Christmas, when the other News workers were getting turkeys Field was handed a bundle. When he opened it, he discovered that it contained a convict's suit of black and white stripes. Field gravely thanked Stone for the present and the next day appeared at the office wearing the suit.

In fact, he wore it every day, much to Stone's distress. For whenever the editor happened to have distinguished callers in his office, Field was sure to walk in, attired in his convict's suit, even to the cap, and pretend to be busy attending to the coal stove in the office. Naturally, it caused the visitor to wonder why a "convict" should be working around the News office and it required considerable explaining on the part of the publisher.

It wasn't long until Stone was heartily sick of the joke he had played on his columnist. He tried to get Field to give up the suit but the humorist insisted that nothing could make him part with "Mr. Stone's gift." Finally in desperation, the publisher arranged with one of the News employees to steal the suit from Field's rooms and that ended Stone's joke which had proved to be such a boomerang.

* * *

The Lamplight Funeral

THE late Arthur Brisbane was once unintentionally responsible for circulating a story which turned out to be a hoax but which stirred the whole state of Georgia to the deepest indignation. It was the story of holding the funeral of a young girl in a Georgia cotton mill at night to permit her fellow workers to attend because the mill owners refused to allow its employees to leave during working hours.

The Atlanta Constitution immediately began an investigation and discovered (1) that, instead of a girl, it was a woman of twenty-five whose funeral had been held at night; (2) that she had never worked in the cotton mill; (3) that the funeral was held at night to meet a family exigency; (4) that many of the employees of the mill were present at the burial, which was held next day; and (5) that the man who had given Brisbane his "facts" had admitted being in error.

The famous columnist, however, refused to back down on his story and accused Clark Howell, editor of the Constitution, of trying to "cover up" bad working conditions in the textile industries of the South. Thereupon Howell produced signed statements from the minister who officiated at the funeral, the mayor of Covington, Ga., where it was held, the editor of the News, the local paper, and the president of the cotton mill to prove that the whole story was a hoax perpetrated by some one who wished to damage the textile industry.

Niftiness for New Year's

LIKE to give yourself a lift for the New Year, Milady? Then spruce up with Sew-Your-Own — the easy way to chic. Here, for instance, are three swell swing models that will make you modern as tomorrow and put you in the running for the title, "best dressed woman." Right now it's parties you're thinking of, so pick a pair of eligibles from today's trio and you'll be groomed to hobnob with the smart young set.

Will You Dance?

The New Year's Party will be festive and so will you in the model at the left in black moire. This is a very young frock and not a little flattering to the debutante figure. It has a skirt that's built for dancing, and the oh, so slender waist is no drawback (take it from one who knows). Be sure, young lady, to have your version ready to go when the invitation to celebrate comes flashing over the wire.

Spic 'n' Classic.

There's always a "morning after," and that's when you'll be glad to have a spic and classic frock like the one above, center. It is suitable to take back to school to rouse the roommate's envy and, pleasantly enough, it's so easy to cut and stitch, a freshman can't go wrong. Make one version in flat crepe and a carbon copy in sheer wool—it is superb both ways.

Ah, My Friends.

How about a two-piecer of lame and velvet for that rousing family reunion over the holidays? The model above, right, is two pieces, but it's one with chic and figure flattery. You'll have your aunties making ohs and ahs and the bright young cousins calling [illegible] "the duchess"! What's [illegible] you'll look the part—a stun[illegible] compliment to your family as well as to the New Year.

The Patterns.

Pattern 1330 is designed for sizes 12 to 20 (30 to 40 bust). Size 14 requires 4⅜ yards of 39-inch material plus 6 yards of grosgrain ribbon to trim as pictured.

Pattern 1397 is designed for sizes 12 to 20 (30 to 40 bust). Size 14 requires 3½ yards of 39-inch material.

Pattern 1396 is designed for sizes 32 to 44. Size 34 requires 1⅞ yards of 39-inch material for the blouse; 1⅞ yards of 54-inch material for the skirt.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

New Pattern Book.

Send 15 cents for the Barbara Bell Fall and Winter Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns.

Favorite Recipe of the Week

Cranberry Jelly With Waldorf Salad.

ONE of the most refreshful tasting, and attractive looking salads is that of cranberry jelly and waldorf salad. It is effective to use for a buffet supper and blends well with any meat, fowl or casserole dish that is to accompany it.

Select a good size chop platter and place the well seasoned salad in the center of the dish and around it arrange pieces of cranberry jelly. Canned cranberry jelly is convenient to use because it always jellies, is firm and easy to cut, and is available in most markets. The slices may be left round, cut into halves, quarters or into fancy shapes by using a special cutter. The following ingredients will be needed.

1 can cranberry jelly
2 apples
1 cup sliced celery
Mayonnaise

If the apple has lovely red skin you may prefer to leave it on; otherwise, peel the apple and cut into pieces. Combine the apple with the celery and blend with mayonnaise. You may like some salt added to the apples. Arrange the salad as directed.

To get the cranberry jelly out of the can easily, cut both ends off the can.

MARJORIE H. BLACK.

Rising Tide

A new magazine has made its appearance on the newsstands of the country. It is pictorial in character under the name of the "Rising Tide," originally issued in England and now being prepared for distribution in eleven countries under nine different languages. The magazine is reported to be a non-profit publication carrying no advertising but such matter that is of interest to the people of the world who are seeking answers to their own problems. It is said that these problems are covered without regard to race, class or creed.

Many doctors recommend Nujol because of its gentle action on the bowels. Don't confuse Nujol with unknown products.

Christmas at the Homestead

By Agnes Myers

HE doorbell, Amanda! It may be the man with the hobby-horse," cried Natalie as she gathered up a con-ap of Christmas ribbons and red wrappings strewn about ng room.

was a sound of quick g and crunching of boots on per. The old servant opened t door and a man set an s package in the hall, said ng about the blustering rm and was gone.

e woman carried the pack-o Natalie, a chirpy sound of ittle tinkling music issued e bulky bundle. Her black apped with delight as she heavy cords.

tumbled a hobbyhorse, a me fellow with a leather a white, woolly lamb with eyes and a bell on his neck; eared rabbit with a perky nd a queer little whimsical t seemed to laugh with merry every time it was moved. was a wispy angora cap, just ough for a baby, and a tiny muff, oh, so little, of real fur tippet to match.

nda gasped! "All 'em Chris-ifs! No one cep'in you, Mis would ever think of sech I jes hopes 'em Harlow 'preciates the—the—" but ice wavered. The sleeve of lpaca frock brushed across immed eyes as she picked up umpled brown wrappings and om the room.

y next morning Natalie set-ack m a train for a five-hour er heart brimming with hap-

y changes had come over the girl's life. Edith, her older

, Natalie Parker!" Exclaimed the Dumfounded Youth.

, married Arnold Harlow and in Hillsboro. Her house ad-d the lovely old rambling stone stead where Benjamin Parker, lower, lived with his daughter lie and the faithful Amanda. Mr. Parker passed away lie closed the house and went each kindergarten in Boston. nda went with her.

e train dashed along through hirling snowstorm. Deep in the er mood of reminiscent reverie, lie fell asleep.

Hillsboro!—Hillsboro!"

e awakened with a bound. ching her grip, a box of barley y, and almost dragging the bersome and unwieldy pack, lie, still half asleep, stepped at the very end of a long frosty form.

tall young man in a big fur was waving good-by to some-on the train as it pulled out. In excitement he took a long, free de backwards on the platform crashed into Natalie.

he two went down in the drifted w m a heap. The cord broke on big bundle. Helter-skelter the ltitude of Christmas gifts scat-ed in every direction.

They looked at each other in blank astonishment—then amazed recognition.

"Why, Natalie Parker!" gasped the dumbfounded youth.

"Bruce Draper!"—exclaimed the bewildered girl, actually spellbound.

From somewhere in the snow came the sound of queer little rippling music. They looked at each other again with wide open eyes, then burst into rollicking laughter.

They gathered up the wayward toys and Bruce loaded them into his car. With the girl beside him, a triumphant smile played over his face, and they talked excitedly as the motor raced over the hills.

"Mother and Aunt Em just left for grandfather's farm and I'm going up tomorrow, but now tell me about yourself, Natalie."

"Bruce, surprises are so much fun. Edith doesn't know I'm coming."

Natalie got a real surprise, however, in a few moments, for no one was home at her sister's house. After repeated ringing and pounding, she looked at Bruce in dismay.

Her eyes wandered toward the Parker home.

"Oh, Bruce! I have the keys of the stone house! Let's go over and build a fire; we can at least keep warm until they come."

With logs from Harlow's woodpile Bruce soon had a roaring fire romping on the hearth. They stood be-

Bruce Soon Had a Roaring Fire Romping on the Hearth.

fore the flames, the girl's blond hair like an aureole of gold framing her face; the man, tall and bronzed, alert and capable.

"Let's look through the house," suggested Natalie, leading the way.

At the turn on the stairs there was a wonderful beehive window on the landing, and a friendly window-seat. They lifted the lid. Many things were stored in the seat.

"What's this box? Candles!—Christmas candles!" called out Bruce. "Let's light up the windows!"

Back down stairs they dashed and soon the rambling stone house was a glitter of lights. Bruce went over to Harlow's to get some more logs, and returned with the wood and a package.

"Natalie, somebody delivered these holly wreaths at Edith's; I found them at the back door. We'll put them in the windows. Ho, ho!—What's this? Mistletoe, too!"

"Here's a footstool, Bruce; tack it on the hall arch."

With a flutter of ecstacy Natalie looked up smiling, but the firm face of Bruce Draper wore an expression of grave appeal. With a combination of strength and tenderness he took her in his arms.

"Dear Natalie, this mistletoe is a symbol of the plighting of love's troth." His voice trembled.

There was a moment of silence, a moment of mutual confidence and understanding which had been almost instantaneous. Her blond head rested in the hollow of his shoulder. Through the half-closed eyes warm tears gathered—his words clung to her senses like a benediction.

* * *

The heavy front door swung open suddenly. There stood Edith, Arnold, little Phillip and Peter—and tiny Marjorie, looking in wonder, as Natalie and Bruce awkwardly stammered and blushed in confusion.

"Well, well," chuckled Arnold, "we saw the lights—we—we thought —er—," and crossing the hall he gripped Bruce firmly with a friendly hand, while Edith kissed her happy-hearted sister.

"Look here, Bruce," said Arnold, "let's make this the reopening of the old homestead and send for Amanda."

Washington Digest

National Topics Interpreted By WILLIAM BRUCKART

NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington. — Much has been written and much more has been said concerning the complexities of modern civilization and modern business. Many times have we heard how closely agriculture is related to other industry; how general commerce and industry is interwoven with every phase of our life. There can be no doubt of this condition. No proof is required. Nor is it necessary to argue that when one section or segment of business is on its sickbed, there is a resulting bad reaction upon every other phase of commerce and industry to a greater or less extent.

Railroads Face Crisis

With these fundamentals in mind, it becomes obvious that probably the most important development of a national character in the last few weeks is the appeal of the country's railroads for the right to increase their rates by 15 per cent. The details of their condition, as presented in hearings before the interstate commerce commission, show they are confronted with a crisis. Since they are under the rigid supervision of the federal government, the federal government is the doctor in the case. They will live or die by the command of the interstate commerce commission.

The case they have presented shows, for example, that they have had to cut thousands upon thousands of workers off of the payroll; that they have been unable to buy more than one third of the customary annual purchases from other businesses, and that more than one fourth of all the railroad mileage in the nation is now being operated as bankrupt property—that is, the property is in the hands of court receivers.

So, adverting to the observations of the first paragraph of this discussion: a gigantic industry can not run at a loss without resulting in a bad heart or partial paralysis in other industry. Higher rates are always opposed for the very human reason that none of us enjoys taking any more money out of our pocket than we must. Many lines of business oppose rate increases on the railroads because of the fear that it will reduce their volume of sales. But it occurs to me that in consideration of a question of freight rates and charges which the railroads make, we ought to think of their situation as we do of other lines of business. Our retail grocer is not going to sell at a loss; the druggist can not subsist unless he makes a profit however small it may be, nor is the farmer going to continue to produce unless he gets a reasonable return from his work. The only difference between these and the railroads is that the railroads can not raise their rates unless the interstate commerce commission, a government agency, says they can do so.

Further, there is a tendency on the part of a goodly number of persons throughout the land to question the accuracy of statements made by business. No doubt you have heard, as I have, the remark that "you can't tell whether so-and-so's business is bad off or not. Big corporations can cover up and make black look like white." Indeed, while I was listening to one of the I. C. C. hearings in this case, a man in a neighboring seat made something of the same observation as I have quoted. My answer to him was in substance that none of the railroad officials would dare lie to the commission, even if they were so inclined, because the commission has access to every item of expense and income, even all actions of the management, of the carriers.

It might be added in this connection that officials of the interstate commerce commission understand there is to be a request by the interstate truck operators for an increase in rates if and when the rail lines are allowed higher rates. The trucks are represented as slowly starving to death—but they can't and won't boost rates until their competitors, the railroads, charge more for their services.

* * *

I believe there is no better way to set forth the plight of the railroads, as presented to the commission, than to include here some excerpts of the statement made officially in the case by Dr. J. H. Parmelee. He is director of the bureau of economics of the Association of American Railroads and, as such, knows the details.

Plight of Carriers

"Today," Dr. Parmelee said, "the carriers are reducing forces and are curtailing their purchases of equipment, materials and supplies. They are forced to do this because of the financial condition in which they find themselves. This retrenchment has a serious economic effect on employment, on the manufacturers of railway supplies and their employees and on all business activity. Such a policy with its unwholesome economic consequences only partially offsets the rising tide of costs.

"The railroads in 1927 to 1930 installed more than twelve times as many locomotives each year, nearly five times as many freight cars, laid nearly three times as many tons of rails and laid nearly twice as many cross ties as they averaged in the depression years from 1931 to 1936.

"Capital expenditures for 1929 and 1930 averaged $863,164,000 a year. During the depression years from 1931 to 1936, the average of capital expenditures was only $206,813,000.

"Similarly, the trend of railway purchases (of things they must use in operation), of fuel, material and supplies declined sharply during the depression years and never has returned to anything like normal. Railway purchases in 1929 and 1930 amounted to $1,184,017,000 in each of the two years. In the five years from 1931 to 1935, the average per year was about $559,000,000. In 1936, the expenditures in this direction were up to $803,421,000. (Figures for 1937 are incomplete but there has been another decline because of necessary curtailment of buying.)"

Dr. Parmelee turned to the question of railroad receipts for their services. He told the commission that the depression years had left the railroads without any reserves. For seven years, he said, the railroads have been barely getting by, and pointed out that at no time between 1931 and 1937 had they earned more than 2.57 per cent on their investment as it is appraised by the commission. In three of those seven years, the records show, the railroads' receipts did not amount to as much as their fixed charges, a term which includes interest on their debts, taxes and required amounts for paying off parts of their debts. In other words, all they earned in those years was just enough to pay the people who work for them and buy the necessary fuel and operating supplies.

* * *

Rising Costs

The argument to the commission is predicated, therefore, upon rising costs, general expenses, and the dozen or so railway presidents who testified before the commission stressed the fact that these expenses are out of control by the railroad authorities. Dr. Parmelee figured that these higher costs of fuel, supplies, wages and taxes had laid a burden on the railroads that is greater this year by $664,789,000 than it was in 1933. The companies hope to get $567,287,000 of this sum from the 15 per cent increase in freight rates, and the railroads of the East are asking that passenger fares be increased from 2 cents to 2½ cents a mile, which they think will bring in an additional $47,500,000. From this it is seen that the carriers still will fall short of the full amount needed, but their argument, as I understand it, proceeds on the theory that they should not seek more of an increase than is sufficient to keep them from going broke. If the new depression conditions subside, there will be a larger volume of freight next year. That will enable them to make a profit. That is, a greater volume of business with the new rates will provide a profit unless there are new government taxes and other burdens laid upon them. In this connection, I looked up the effect of the social security and carriers' taxing act. Commission records show the rail lines are paying $111,000,000 in taxes annually under these two levies alone, a burden the companies did not have two or three years ago.

So it is evident that the rail lines are in a bad fix. They are confronted on the one hand with mounting costs of operation and on the other by declining receipts from the smaller volume of business. At the same time, it seems to me, the country has more than a passing interest in their plight. This is so because during the last two months, for example, close to 60,000 railroad employees have been laid off—out of work, in the rail industry alone. With the decline of purchasing of supplies by the rail lines, other industry has suffered, has laid off men.

Looking at the thing another way, one might call attention to federal appropriations for relief which have been in excess of three billions a year during the last several years. The figures given above show that the railway purchases—just one industry—have fallen off more than 500 millions, or about one-sixth of the relief appropriations. If the appropriations to aid all unemployed are only six times as large as the drop in railway expenditures, it is easy to see what an influence is wielded and why I have taken the position that it is necessary to consider the railways' petition from the standpoint of the country as a whole. We, as citizens, have a burden to carry whether it is done through the railways or through some other avenue. None of those rail workers wants to be without a job, I am sure.

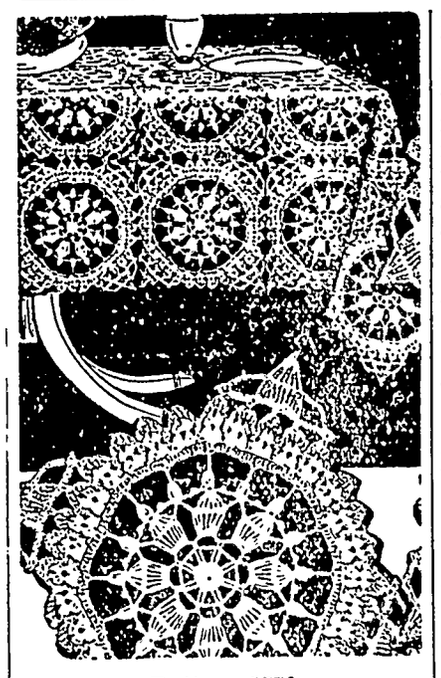
Cartwheel Crochet Cloth



Pattern 1570

There's magic in this two colored crocheted square—when it's joined into a cloth or spread, it looks like two medallions! Begin right away on the first 8 inch square. Its "repeats" will follow in quick succession for it is simple to do in economical string and makes delightful pick-up work. You may use the same color throughout, if you prefer. Pattern 1570 contains chart and directions for making the square; material requirements; illustrations of the square and of all stitches used; a photograph of the square; color suggestions.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Ave., New York.

Please write your name, address and pattern number plainly.

Uncle Phil Says:

See What It Led To

Adam and Eve had but one fault—curiosity; a small one to lose Eden for.

The "man of few words" doesn't realize how tiresome they become.

A statistician in listing the common causes of fatigue in men, overlooked a waistline of 46 inches.

Alone They're Insufficient

Memories are all right to live on provided you have something else.

A sharp tongue has a bitter mind behind it.

In youth, we follow the fads for the fun of being in the crowd; but they really take no hold on anyone.

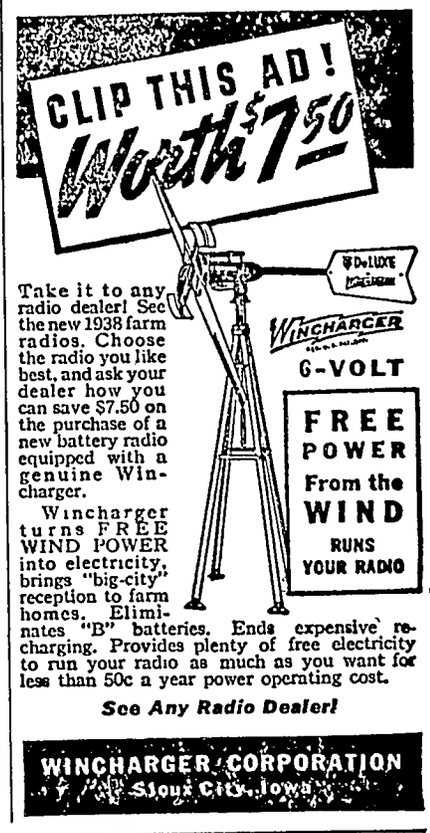
There are some admirable people who never let it be known that they are unhappy because they are too proud to.

I've Heard It Said, But Wouldn't Believe It

Henry George of single tax memory was noted for his indifference to dress, says his biographer, Louis F. Post, in "The Prophet of San Francisco." On one occasion he happened to be the sole passenger on a sleeping car. The negro porter lamented to Mr. George "the po'ness of business." The reformer was inspired to hand him a large tip.

Looking from the money to Mr. George's not over-fastidious clothes and then back to the money, the porter exclaimed incredulously:

"Dat all fo' me? Well, you sure never can tell 'bout a frog till yo' see him leap."



Take it to any radio dealer! See the new 1938 farm radios. Choose the radio you like best, and ask your dealer how you can save $7.50 on the purchase of a new battery radio equipped with a genuine Wincharger.

Wincharger turns FREE WIND POWER into electricity, brings "big-city" reception to farm homes. Eliminates "B" batteries. Ends expensive recharging. Provides plenty of free electricity to run your radio as much as you want for less than 50c a year power operating cost.

Christmas—1937

By RAYMOND PITCAIRN

National Chairman
Sentinels of the Republic

Again, throughout our own and many other lands, men pause to remember the first Christmas night that brought to a troubled world not a new panacea, but a New Spirit.

It was the Spirit of Peace: borne on a celestial song which not time, nor greed, nor human ambitions have ever quite muted. With each recurrent Christmas it echoes in the hearts of men, as centuries ago it echoed over the star-lit hills of Galilee.

It is a welcome, a necessary, refrain. It comes with a message to all.

To the humble and the obscure—first to hear it on that solemn midnight—it tells again that peace and strength and comfort come from sources infinitely deeper, infinitely wiser than any earthly leadership.

To the powerful and ambitious that seek new empire, it tells again that the King of Kings came not in military glory, but as a Prince of Peace, who continued to conquer long after the strongest legions were dust.

To all who strive for grandeur and the pride of great possessions, it tells again that a humble stable, with its cot of scented hay, looms larger in the mind of the world today than the richest palaces of Imperial Rome.

That is because the New Spirit which came with a Song in the air and a Star in the sky is the spirit of love and compassion. While it rules, hatreds and warring rivalries between man and man, between class and class, between nation and nation, are forgotten. When it fails, those hatreds flare anew.

Christmas, then, returns as a call to all men to keep that Spirit alive. Through successive generations, humanity has sought to hold the Song and follow the Star—often failing. Through our own generation and those to come, Christmas reminds us, the quest must continue until "the reign of violence is o'er."

And then the ancient message, "Peace on Earth, Good-will toward Men," shall have glorious reality as well as imperishable beauty.

NOTICE OF PURCHASE AT TAX SALE

To Philip Bock, et al.

YOU ARE HEREBY NOTIFIED, That on the 7th day of January, A. D., 1935 the following described piece of real estate, situated in the County of Hancock and State of Iowa: Lot 1, Block 4, Morningside Add. to Klemme Corp. was sold at Tax Sale by the Treasurer of said County to Carl Anderson who is now the lawful holder of the Certificate of Purchase thereof; that the right of redemption will expire, and a deed for said land be made unless redemption from such sale be made within ninety days of the completed service of this notice. Tax Sale Certificate No. 1400.

Dated this 6th day of December, A. D., 1937.

LIBERTY TOWNSHIP NEWS

Miss Hilda Schaefer, daughter of C. C. Schaefer, formerly of Liberty township, but now of Rockford, was married to Floyd Wilson of Rockford, at Garner last Wednesday. The bride is a sister of Emery Schaefer and Mrs. Robert Hanson, and the newlyweds spent their honeymoon visiting with these and other relatives.

Miss Lucille was an over night guest at the Kermit Stille home Monday.

Mrs. John Feuerhelm of Oklahoma, visited a few days at the Wm. Gast home this week.

Mr. and Mrs. Floyd Wilson were Mason City visitors Thursday.

Mr. and Mrs. Wm. Lemke visited at the August Lau home Sunda evening.

Mr. and Mrs. Earnest Pringnitz and daughter, Beverly, and Mrs. Otto Pringnitz and Fred and Bernard Pringnitz and Ruth Abele and Carrie Albers were dinner guests at the Harry Pringnitz home Sunday.

Mr. and Mrs. Albert Lange and daughter, Mary, were Garner callers Monday.

The Christmas program at the Liberty Church will be held Friday evening at 7 o'clock. All children taking part in the program are asked to be at the church at 6:45 sharp.

Mr. and Mrs. Jerry Fox and son of Britt, spent Monday at the Heafte home.

Mr. and Mrs. Elmer Schaefer and family were Mason City visitors Saturday.

Mr. and Mrs. Emmet Hoyt and son visited at the George Christie home Monday evening.

Mrs. Charles Ax visited at the Albert Lange home Saturday afternoon.

Mr. and Mrs. Caris Kropp were Mason City shoppers Monday.

Mrs. Charles Ax and Mrs. Walter Bredlow were Mason City business callers Wednesday.

Mr. and Mr. Herman Gast were at Mason City Friday.

Leo Brown visited at the Albert Lange home Saturday and Sunday.

Mr. and Mrs. Lewis Abele and daughter, Ruth, and Ethel Pringnitz were Mason City Shoppers Tuesday.

Glenn Lange was a dinner guest at the Floyd Greimann home Thursday.

Mr. and Mrs. Emory Weaver and son visited at the Roy Schaefer home Thursday.

NEWS FROM GOODELL AND VICINITY

•

Mr. and Mrs. Al McNutt of Chaska, Minn., spent the week end with the latter's folks last week.

Audrey Griggs and wife are spending a few days with relatives at Rockford.

Mr. and Mrs. Nick Waage are the parents of twins, a boy and a girl. A shower was held in honor of the babies Friday p. m. in the Community Hall.

Mr. and Mrs. Gus O'Krueg were Belmond callers Thursday afternoon.

Mr. and Mrs. E. J Nelson are spending a week at Roland visiting relatives.

A large number of people from this vicinity spent Saturday in Belmond to see the Santa Claus and Merry Christmas parade, which was certainly a fine display. It created great enjoment to the "grown-ups" as well as the children. After singing Christmas Carols the kiddies were treated to candy, nuts and apples.

Mr. and Mrs. Le Bamford and baby left Saturday night for Colorado for a few weeks visit with Mrs. Bamford's folks. Merle Ruka is doing chores for them. Mr. and Mrs. Gerald Burk took them to Belmond.

Mr. and Mrs. Harvey Hubbard entertained Mr. and Mrs. Anson Avery Thursday evening.

A Christmas Cantata was given in the U. B. Church Sunday evening to a large crowd.

Students from here who are attending the various colleges arrived home last week end for the Christmas vacation.

Verner Nelson and family and Clarence Bachman and family were Belmond shoppers Saturday.

Truman, Willard and Boyd Nelson drove to Roland Sunday and attended the celebration of the Silver Wedding Anniversary of their Aunt and Uncle. Their parents, who had been visiting their, returned home with them.

Mrs. Anson Avery accompanied her sister and brother-in-law, Mr. and Mrs. Gilligan to Des Moines, Monday.

The grade pupils of the Goodell School gave a Christmas program Tuesday evening in the Community Hall.

The Goodell basket ball team defeated Swaledale on the Swaledale floor Monday night by a score of 28 to 26. The Swaledale reserves won by a score of 13 to 9.

OUT-OF-ADJUSTMENT SEPARATOR DOES NOT OPERATE EFFICIENTLY

Your cream separator may be "grinding" out small cream checks instead of large ones if it is not operating efficiently.

C. A Iverson, of the Dairy Industry Department, Iowa State College, suggests that

1. Be sure that the separator is level and setting solidly on the floor A separator not level will cause more wear of the bearings on one side of the spindle than on the other and will decrease the life of the machine. It the separator is not resting solidly upon the floor the bowl containing the discs weaves also causing excessive wear.

2. Keep the milk as clean as possible and strain it properly so that dirt and other matter will not clog the discs.

3 Wash the milk resevoir, discs and spouts after every operation This is important in marketing sweet cream and it will insure cleaner skimming. Cream should be kept properly cooled

4. Turn the separator at the proper rate of speed. A separator that is turned slower than its designated speed will not remove all the fat from the milk

OUR PAPER

This week the work of the paper was given over to the students, and an editor and assistant editor were elected I was elected editor and my assistant is Novella Beier I guess the pupils thought it would be nice for me to follow in my father's foot steps

The paper is to be put out by the students, with the advice of Miss Brakel and Mr Galbreth Under the editor and his assistant we have reporters for each of the four grades They are Jackie Kudje for the freshman. Arlene Blickenderfer for the sophomores, Irene Suckow for the juniors, and Doris Barz for the seniors. Also we have reporters for the music, sports, and the new nonsense column They ae Elsie Ward Ruben "Flash" Grosshuesch, and Raymond Wille respectively.

We are going to try and give you all the school news, and keep you folks informed on what goes on up here Also try to give you a few laughs with some of the students remarks and doings Here's hoping you read our school paper every week Wishing you a merry Christmas and a happy New Year

—Editor Ray Jorgenson, Jr

MUSIC NEWS

The band was glad to learn that Mr. Elstad had purchased some new numbers for them. The new selections were entitled "Merry Widow" by Frank Lehar, "Lost Chord" by Arthur Sullivan, and "Kunihild" by Cyril Kistler

Under the direction of Mr. Elstad the Mixed Chorus contributed two musical numbers to the P T A program which was held Thursday night December 16 They sang "Silent Night" and "O, Come All Ye Faithful" Irene Becker accompanied them on the piano.

High School News

NEWS OF THE CLASSES

Most of the freshman girls have completed their smocks, pajamas or house-coats Monday the girls who had completed their article started making Christmas candy

—K H S—

We have completed our old outlines, in history, over the middle ages We are now starting on our new outline of the Beginning of Modern Nations.

—K H S—

In general Science we have been having demonstration on the work of the different parts of the engine

—K H S—

Were you wondering where all the delicious odors floating around the school house last Thursday came from? They came from the Home Ec room where Doris Barz and Novella Beier were preparing a luncheon to serve to the rest of their class, Mr Galbreth, Mr. Kingery and Mr Elstad The senior girls are taking up the study of meal planning and each girl had to plan a luncheon at a cost not exceeding 29c per person Doris' menu was selected to be prepared and served and Novella Beier helped her.

—K H S—

Tuesday evening the girls served a dinner to the school board members, their wives, and the faculty

—K H S—

Last Saturday night the seniors had a sleigh party. The team was furnished by Elmer Trampel, and eats were furnished by the girls. The students and teachers had a very enjoyable evening.

—K H S—

In English, Miss Wallace gave us an outline which covers clauses, phrases, comples and compound sentences and Review of Test Exercise which we are working on at present and until after Christmas vacation.

—K H S—

The manual training boys are making the folowing articles: Frederick Bell, cribbage board; Harold Swalve, magazine rack. Fritz Gobeli, corner shelf, Walter Greiman, corner shelf, Calvin Schaefer, corner shelf. John Schwichtenberg, magazine rack; Allen Barz, wall shelf Keith Stille, wall shelf, Duane Tees, wall shelf

? ? ? ?

A certain junior boy has quite frequently been seen giving one of Miss Merritt's blond eighth graders a ride to school (Better watch out, Harold.)

I would like to know why a blond and blue-eyed sophomore girl makes so much noise when walking around the school.

Did you ever notice that smile a certain blond freshman has for a dark, curly-haired, flashy junior?

While Mr Kingery was enjoying a faculty party Wednesday evening a group consisting of two senior and four Junior boys had a fine time shoveling snow around his car

Did you notice how a certain member of the basketball team beamed after the Garner cheer leaders gave him a yell?

Eugene says, "Please don't write anything about me." Guilty conscience?

Paul Schuldt can't think what to get his girl friend for Christmas Speak up. Marian, what do you want?

There has been some difficulty as to what to name this column Any one who has a name for it may submit it to either Miss Brakel or Raymond Wille

SPORTS CHATTER

Did you notice that Schuldt didn't have a rabbit's foot tied around his neck the first half of the Garner game? Mrs Jorgenson was kind enough to loan him hers for the rest of the game Don't forget it next time, Paul. It may mean a loss . In the second team game "Buck" had his shirt on backwards Maybe that's why they lost The boys on the team didn't think Klemme did so good at yelling. There were enough there so that they should have raised the roof The Garner cheering section gave Jorgenson a yell when he was hurt What's the matter with the Klemme rooters? Let's not let Garner get ahead of us You notice Wicks wasn't playing against Garner Well he was afraid maybe he would have to buy the Garner girls a malted milk! Or was it that the pick-up failed him—which is impossible . . We wonder why Kluckhohn didn't ride home with the team . . The people that weren't at the Garner game missed something Everyone noticed the disgusted look on Prof's face as he sat at the score keepers' desk Cheer up Prof Lot's of us saw it

Grade School News

Grades 1 and 2

Iris and Ardel Rosendahl have been absent this week.

The second graders finished their Christmas gifts and the first graders began working on theirs Thursday.

Our Christmas party is Thursday afternoon. We have a white tree with blue decorations There are presents on our tree, too.

Grades 3 and 4

Afternoons of this week have been busy and happy ones in our room. we are finding out many new things about Christmas and stories and poems are being written in our extra time. We also made pictures about stories we have read.

Grades 5 and 6

Julia Bell and Herbert Schwartz —reporters

In sixth grade history we have been studying about the spread of Christianity and the teachings of Jesus. We brought our Bibles to school and each person read and discussed a parable.

Herbert Mueller is back in school this week.

We have our Christmas tree up. We have also started to make Christmas gifts for our mothers.

Mrs. Voetberg visited in our room on Wednesday. She brought us some pecan nuts from Oklahoma.

Junior's side is ahead in our health contest.

Grades 7 and 8

Reporter, Ellen Kilgore

Garland Brinkman is librarian for two weeks.

Ellen Kilgore brought an old newspaper dated 1901. It told about McKinley's death, and we have been studying his administration

Monday Harlan Buss visited our room. Mrs. Voetberg visited on Wednesday and brought us some hard-shelled pecans from Oklahoma.

On Wednesday Miss Merritt appointed a committee to decorate the tree, and a committee for our Christmas program.

The seventh grade has been reading "The Christmas Carol" We have written a play and are going to dramatize it.

The seventh grade reading club held a meeting Monday and elected the following officers Betty Etchen, president; Phyllis Klotzbach, vice president; Caroline Schwartz, secretary; and Billy Grosshuesch, publicity agent.

Since a scientist declares that there were no apples in the Garden of Eden, then it must have been a peach that Adam fell for

ITEMS OF INTEREST FROM AVERY TOWNSHIP

Mrs. Aug. Trampel and daughters, Gertie and Esther, and son, Elmer, were business callers at Garner Saturday afternoon.

Mr and Mrs Robert Roths were Mason City business callers Wednesday.

Miss Helen Reimer was visiting at the Fred Bachman home Sunday afternoon.

Gilman Marshall was a Friday evening visitor at the Robert and Clyde Marshall home

Mrs. Verner Nelson and daughter, Ardella, spent Tuesday in Meservey visiting at the Mrs. Henrietta Wilkins home

A large number from this vicinity were in Belmond Saturday afternoon to see the Christmas parade.

Miss Lois Kennedy is assisting with the work at the Harlow Helps home for a few weeks.

Mrs. Paul Cavitt, Miss Anna Trampel and Arthur Conners were Mason City visitors Tuesday.

Mr. and Mrs. Robert Marshall were visiting Monday evening at the Harlow Helps home.

Johnnie Trampel and Fred Caroles were business callers at Galt Saturday.

Mr. and Mrs. Harlow Helps were at Forest City on business Friday.

Miss Iris Sherwood, who teaches at Latimer, spent the week end at the home of parents, Mr. and Mrs. Leon Shrwood.

Miss Anna Trampel, Mr. and Mrs. Lee Aldrich and children of Rowan, and Mr. Arthur Connors were Sunday afternoon vistiors at Will Bohning home in Belmond.

Hand That Rocks the Cradle Also Brings Home Bacon

Women Produce Big Part of the Family Living

Washington.—The hand that rocks the cradle not only rules the world but brings home the bacon.

Women in America today, whether they pound a typewriter or cook the family dinner, produce a large share of the family living, Miss Mary Elizabeth Pidgeon, chief of the research division of the Women's bureau, United States Department of Labor, has found. Her investigations of woman's economic status and contributions are contained in a report just made public.

Women are at the head of one out of every 10 families in the United States, she found. Probably more than one-tenth of the nearly 11,000,000 employed women are the entire support of families of two or more persons. More than a third of these are home-makers as well.

High Money Value of Her Work.

The housewife herself, working at least a 50-hour week every week of the year, makes an enormous contribution to the family income, but one that is difficult to put into dollars and cents. The cost of her labor in preparing the family meals according to one estimate is $1,167 a year. This is based on 15 cents worth of labor per meal—a very cheap estimate, Miss Pidgeon points out. If preparing the family meals represents about one-third of the housewife's services, then the money value of her work would run to over $3,500 a year.

Women, by going into industry and taking jobs outside the home, have not forced men out of jobs, it appears from Miss Pidgeon's findings. Women found employment outside the home primarily because of the shift from household to factory manufacture or from hand skills of women to machine processes. It is not a question of women's taking jobs from men but of the adaptation of the sexes to the work of the world.

"Ordinarily the jobs performed by the two sexes differ and hence replacement as such does not occur," she states.

When employment of women does increase though that of men may decline, it is due, Miss Pidgeon finds, to changes in process and the lower wage customarily paid women.

Australopithecus May Be the Ancestor of Man

Pretoria, S. A.—Man is related to the ape stock through Australopithecus, a strikingly man-like extinct ape represented by two fossil skulls discovered in South Africa, declares Dr. R Broom of the Transvaal museum here, in a communication to the British science weekly, Nature.

Dr. Broom's case for Australopithecus as a direct ancestor of man is based in part on a newly discovered molar tooth from a lower jaw, found in the same cave where he unearthed one of the two skulls. This tooth combines primitive human and ape characters in a remarkable way. In size, however, it is anything but human; it is as big as a gorilla's, and far larger than that of a human being or a chimpanzee.

Intentional Collisions to Test Railway Cars

Columbus, Ohio.—Heavy railway cars crashing into each other in "collisions by arrangement" are the newest laboratory apparatus used in equipment engineering tests. These drastic experiments were described here at the second industrial research conference of the Ohio State University Research foundation.

Both passenger and freight cars are used, L. W. Wallace of the Association of American Railroads reported. Fully loaded, they weigh 84 tons each on the rails. Instruments set into them at 120 places on top and sides measure the strains developed in the crash.

Koala Stages Comeback

Sydney, Australia.—Koalas or native bears, appealing, furry little tree-dwelling animals that look like live Teddybears, are staging a comeback in the wild. This gratifying result of 20 years of effort for protection of these unique animals is reported by the Wild Life Preservation society of Australia.

Use for Sewage Grease

Berlin.—Grease contained in sewage disposal is being recovered here for soap and other industrial purposes.

Children May Seek Death Because of Lack of Affection

Reasons for Suicide Studied in Bellevue

By MARJORIE VAN DE WATER

New York.—Little children are not all joyous, carefree sprites filled with life and the joy of living. For some who are hardly beyond infancy, this world has already become an unbearable place.

In Bellevue hospital in a children's ward are little youngsters aged from a mere six years to thirteen who have attempted suicide and are, in the formal words of the physicians, "preoccupied with death."

Child suicides seem to have had but a slender hold on life. The reasons given for death attempts often appear trivial to an adult. Perhaps it was a bad report card and a parent's hasty reproof afterward. Maybe just disappointment at being unable to attend the circus or a party. Why should such a silly little matter precipitate such tragic action, we ask.

Looking behind the precipitating action, the underlying cause of child suicides has been sought by Drs. Lauretta Bender and Paul Schilder who have watched those children "preoccupied with death" at Bellevue's children's ward.

You will be surprised at the answer they have found.

For Spite or Lack of Love.

Children attempt suicide because of spite. The child suicide wants to get even. Unconsciously, he may say to himself as so many children have said aloud, "You'll be sorry when I die!"

And that leads to another reason for child suicide—or rather the reason for spite—urgent need for, and a feeling of lack of, love. Many of the children who go to Bellevue preoccupied with death are orphans. Some are unwanted children. Some feel that they are rejected because of physical disabilities.

Perhaps in their hearts these youngsters do not want to die. They may want only to try to kill themselves. They dream wistfully of hearts awakened at last to love and swift hands reached out to thwart them. To children, death is not irreversible; they may hope that death will serve to set their lives right again. For the orphans, these physicians suggest that the attempted suicide probably represents the desire to be again with the parents.

How Would You Like Clothes Made From Fiber of Soybean?

Urbana, Ill.—Have you ordered your new suit of soybean clothes yet? There's no rush, but still the time is coming when the correct garb for the well-dressed person may possibly be a garment made from ancient China's wizard vegetable, the soybean.

In a quiet corner of the University of Illinois campus here scientists have started a research project to see what can be done about it. What they hope to achieve is a synthetic textile fiber made from the protein element with which the soybean is so liberally supplied.

The work is being conducted in the United States regional soybean industrial products laboratory in which the federal government and 12 midwestern state agricultural colleges are co-operating.

First Get the Protein.

The study of the possibilities for production of fibers from soybean protein is one of four which have been set up in the soybean meal section of the laboratory, according to Dr. O. E. May, director of the research program.

"Our first project," he explained, "deals with production and study of purified protein fractions from soybean meal. This is a broad subject and probably will consist of fundamental studies which will find application in our more practical projects.

"Our second project deals with the utilization of soybean meal in production of plastic materials. A third project is a study of the utility of soybean meal and protein in production of adhesives, glues, size and coatings. The fourth project seeks to determine if it is possible to produce textile fibers from the soybean protein."

Hairnet and Sunbonnet Worn in Ancient Egypt

Chicago.—Hairnets are old-fashioned, for women in Egypt wore them about 1,600 years ago. But such hairnets!

A hairnet of that era, exhibited here at the Field Museum of Natural History in a collection of ancient textiles, is a knitted cap of bright red wool with tie-strings. The style was to swath the hair in linen veils and stretch the net over that.

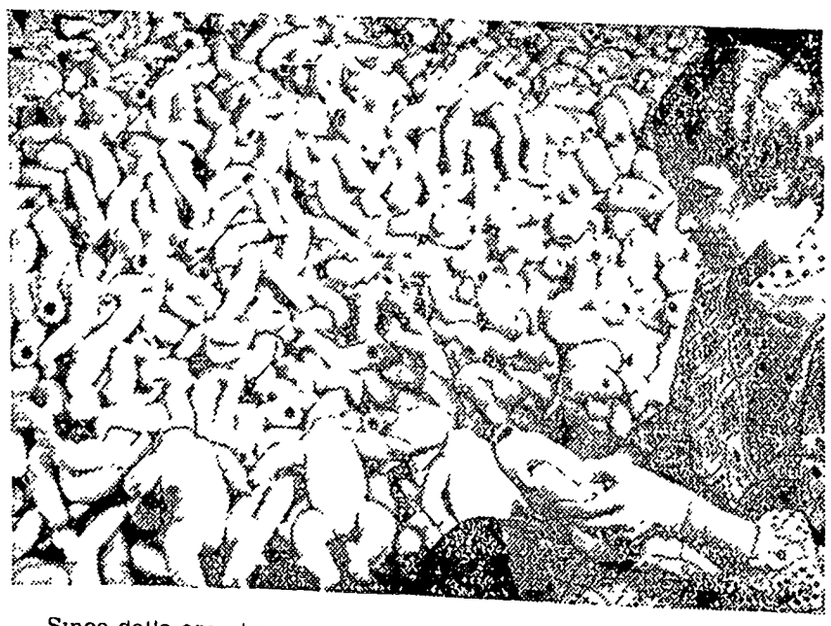
Sunbonnets are Egyptian, too. One displayed has embroidered lines of brown silk making a plaid effect on tan linen

Christmas Morning Mothers!

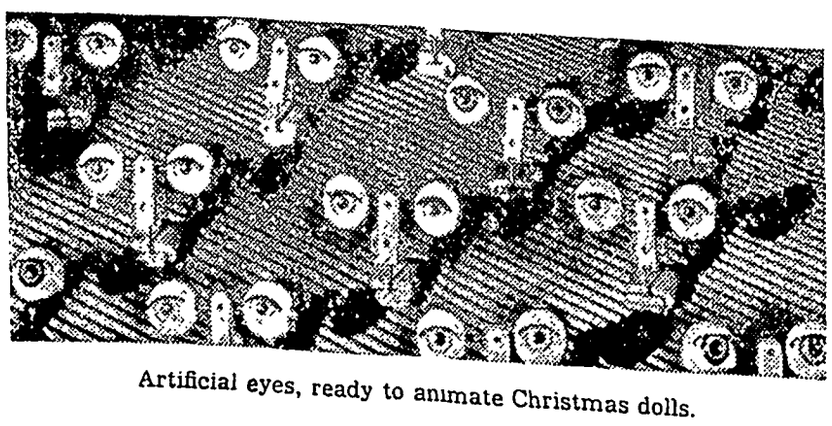
CHRISTMAS dolls are producing many a juvenile "ooh!" and "aah!" this year. Betsy has a portable folding bath tub with undercloth and safety strap. Also complete changes of underclothing (really necessary!)

It's Monday after Christmas but wash day doesn't last long for the modern young lady with a washing machine. Thoroughly spoiled by modern conveniences, she uses a built-in wringer, folding ironing board and a dryer

The Dionne quintuplets are three and a half now and Santa Claus has kept pace with the years of these international idols. Since they're not babies any more, he had to perfect "grown up" toys. Hence this see-saw on which Yvonne, Cecile, Annette, Marie and Emilie play under the eyes of a watchful "mother." As last year, the world-famous quints will be prominent in 1937 Christmas doll circles.



Since dolls are always top favorites with the little mothers who creep downstairs on Christmas morning, whirring machines have been turning out thousands of them this year. Here is a mountain of arms and legs made to simulate the texture of baby's skin.



Artificial eyes, ready to animate Christmas dolls.

STAR DUST

Movie • Radio

★★★By VIRGINIA VALE★★★

HALF of Hollywood is diligently searching for giddy comedies, the sort that have made Carole Lombard and Irene Dunne outstanding stars. The rest of the film colony figure that the public is going to be fed up on loony antics soon, and are getting ready to delve into very serious film biographies.

Garbo still wants to do a comedy, but has turned down four stories that the studio has submitted to her. Kay Francis is all set to launch into a laugh epic. Tyrone Power and Loretta Young have started work on "Her Masterpiece," hoping that it will be as entertaining as their current "Second Honeymoon."

Kay Francis

In the biographical division, there is the life of Clara Barton in which Irene Dunne will star, the life of Alexander Graham Bell, inventor of the telephone, in which Tyrone Power will be featured, and the life of George Sand, woman novelist, which will star the dainty Annabella.

—★—

In the latest radio poll Charlie McCarthy, to no one's surprise, is voted the most popular radio star, and by a wide margin, too. The great hit of the ventriloquist's dummy and the growing appeal of Betty Lou, that imaginary character on the Vallee hour, has set radio sponsors to looking for novelties. And the next one to bid for your approval will be a talking parrot. Sketches are all written for the bird, but the feathery star itself has not been located. It seems that all the tryouts have been a failure.

—★—

It takes a long time to score success in radio, motion pictures, and on the stage, so it is a good idea to start at the age of eleven as Joy Hodges did. She is almost twenty-one now and can point with pride to the months when she sang on the radio with Ted Fio Rito's and Ozzie Nelson's orchestras. You will see her on the screen in Universal's "Merry Go Round of 1938" and she is playing the lead with George Cohan in the outstanding Broadway hit of the year, "I'd Rather Be Right," which spoofs the New Deal in amiable fashion. She supported herself all through her four years at Des Moines high school by singing at revival meetings and on the radio.

—★—

When you see Carole Lombard in "Nothing Sacred," and Barbara Stanwyck in "Breakfast for Two," you may assume that a course in boxing is a necessary part of every screen actress' training. Barbara puts on gloves and goes after Herbert Marshall for all she is worth, pummeling and swinging until you begin to fear that Marshall will have to play masked bandit roles the rest of his life. Carole doesn't stop for gloves or any such niceties. She just goes into a slap-happy routine with Fredric March with no holds barred.

—★—

The M-G-M radio hour, improving every week, is going to be even better, because it has been decided to concentrate more on comedy. Ted Healy, who hasn't had a chance really to distinguish himself in their pictures, has walked off with all the honors in their radio shows. All inquiries about audience reaction bring a request for more Healy specialties. You will be getting them from now on. Soon R. K. O. will launch a radio hour with Milton Berle as master of ceremonies—probably late at night so that it won't interfere with your going to the theater to see their pictures.

Milton Berle

—★—

ODDS AND ENDS—Grand National has ambitious plans to star Tex Ritter, Ken Maynard and Ruth Mix in one big super-Western . . . When you hear a dog barking in the radio serial, "Pepper Young's Family," it isn't a sound-effects man at work. It is the well-trained pet of Jean Sothern, regular member of the cast . . . Charlie Farrell, encouraged by the great comeback of his former partner, Janet Gaynor, is going to try a comeback too, with Paramount . . . Eleanor Holm had to swim alongside two alligators in "Tarzan's Revenge." Two rifle marksmen stood by, just in case . . . Latest actor to want Olivia de Havilland to play opposite him in a Broadway stage play is Brian Aherne but she still says "No" . . . Voting will begin soon for best screen performance of the year and Charles Boyer is likely to win for his portrayal of Napoleon in "Conquest" . . . Meanwhile several radio sponsors have voted Nadine Connel currently subbing for Jeannette MacDonald Sunday nights, the best woman singer on the air.

Lesson for December 26

CHRISTIAN CONSECRATION

LESSON TEXT—Philippians 1:12-26.

GOLDEN TEXT—For to me to live is Christ and to die is gain.—Philippians 1:21.

PRIMARY TOPIC—Our Best Friend.

JUNIOR TOPIC—Answering Jesus.

INTERMEDIATE AND SENIOR TOPIC—Choosing a Life Purpose.

YOUNG PEOPLE AND ADULT TOPIC—What Christian Surrender Means.

Consecration is one of the words expressing Christian truth which has been so much used and so often misused that it has lost its savor. The writer remembers many a "consecration service" which meant nothing to those present except the fulfilling of a certain formula or program. The purpose of the meeting was excellent, but results were lacking because it had become a mere formality.

Paul the apostle knew nothing of any theory of consecration. He knew and lived and proclaimed such an abandonment of self to Christ and his cause as really required no statement in words—it was his life.

We close today a three-month series of studies in the Christian life. We began at the right point by considering "Christian Sonship," for no one can live until he is born and no one can live a Christian life until he is born again. We have considered together God's grace in keeping, renewing, guiding, blessing, and communing with his own. All these precious truths call us to devote ourselves to Christ in glad and full consecration.

Men give themselves thus to the building of a fortune, to the propagation of a political or social theory, to the pursuit of an occupation or profession. Why should not the Christian give himself in like measure for Christ and his holy cause?

Paul, in the verses of our lesson, shows that spirit and boldly declares that he follows Christ regardless of trying circumstance—he does so now, "in the body," not later in glory. And it matters not whether it be by life or death—"Christ shall be magnified."

I. "What Then?" (v. 18).

Paul was imprisoned for the gospel's sake. Did that stop him? no; he made the very guards who were assigned to watch him in his house into missionaries of the cross. He won each one as he took his designated period of service and sent him out as a testimony to "the whole praetorian guard and to all the rest" (v 13 R. V.).

Then, some of his Christian associates taking advantage of the fact that he was imprisoned, went out to preach just to show that they were as good as he. They made their very preaching an expression of their envy of his popularity and hoped to heap more sorrow upon him. Did he get angry and bitterly fight back? No; he thanked God that Christ was preached. We need more of that spirit in our day.

II. "In My Body."

One of the glaring fallacies of human thinking is the idea that at some favorable time in the future we shall be able to enjoy life, do mighty deeds or serve the Lord. For example parents fail to enjoy their children because they are always looking forward to the next stage of their development. The time to enjoy and help our children is now. The time to serve the Lord Jesus is now. The day will come when we shall be glorified with him, but it will then be too late to speak to our neighbors about Christ.

III. "To Live Is Christ and to Die Is Gain" (v. 21).

Humanly speaking when a matter is one of "life or death" it is a question whether death may not intervene. The hope is that this may not be the case and every effort is made to prevent it. How different with Paul. He rightly points out that to a Christian death means entering into perfect fellowship with Christ and unlimited service for him. Every human limitation will then be put aside—knowledge, service, communion, will all be perfect and complete.

He would not, however, turn away from his present privilege and duty. Since it is God's will that he should abide in the flesh he will do it in such a way as to make it literally true that to him "to live is Christ." Every life has a purpose and that ruling passion which controls and directs a life is what should be written into the sentence, "To me to live is . . " What is it—money, position, pleasure, sin? Or is it Christ? If he is your life, then you enter into the New Year with the assurance that it will be full and satisfying, and gloriously useful.

Spiteful Words

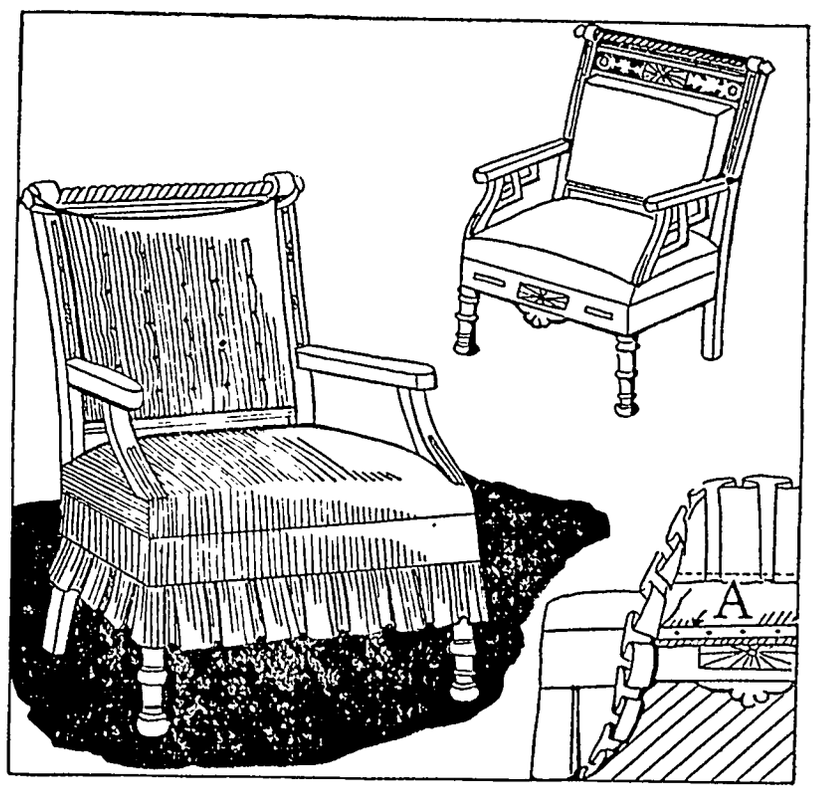
A spiteful word cuts both ways. A slander hurts the man or woman who spreads it in a more deadly, though unseen, way than it hurts its intended victim. Victor Hugo nobly says, "Every sword has two edges; and the man who wounds with one, wounds himself with the other."

Only One Real Failure

There is only one real failure possible; and that is, not to be true to the best one knows.—Canon Farrar.

HOW TO SEW

by Ruth Wyeth Spears



Making Over a Chair of the Ginger-Bread Era.

TO modernize the old walnut chair at the right the pieces under the arms were removed and most of the carving covered up. The padding at the back was removed entirely and replaced by a fiber board which was covered by a loose cotton filled cushion tufted like an old fashioned bed comfort except that the tied thread ends of the tufting were left on the wrong side.

This back cushion was fastened in place with tapes that slipped over the knobs at the ends of the upper carving. If the knobs to hold the cushion had been lacking it could have been tacked in place along the top on the under side by using a strip of heavy cardboard to keep the tacks from pulling through the fabric as shown here for tacking the box pleated ruffle around the seat as at A. A plain rust colored heavy cotton upholstery material was used for the covering.

Every Homemaker should have a copy of Mrs. Spears' new book, SEWING. Forty-eight pages of step-by-step directions for making slipcovers and dressing tables; restoring and upholstering chairs, couches; making curtains for every type of room and purpose. Making lampshades, rugs, ottomans and other useful articles for the home. Readers wishing a copy should send name and address, enclosing 25 cents, to Mrs. Spears, 210 South Desplaines St., Chicago, Illinois.

Pleasures are satisfying in inverse ratio to their cost.—*Bruce Barton.*

Every great cause is embraced first by an aggressive minority.—*Albert Einstein.*

A nation can be judged by its humor.—*Sinclair Lewis.*

The loveliest rainbow is in our vision rather than in the sky.—*Will Durant.*

Try and be a champion in whatever line of endeavor you choose in life.—*Jack Dempsey.*

Millions to Billions

There was paid to factory wage earners in America in 1869 the comparatively small total of $620,467,474. Because of an increased demand created by advertising for factory products the amount paid to workers had grown to $11,620,973,254 in 1929.

Sabbath School 10:15 a. m.

Epworth League 7:30 p m. at Klemme

E. L. Rally Monday 6:30 p. m.

FISH SPEARING

With streams freezing over, the unlawful spearing of fish starts, reports the Conservation Comission. Several arrests have been made including two men who were apprehended on the Raccoon River, the scene of much unlawful spearing during the past few years.

One had 10 catfish and one wall-eyed pike in his possession which had been speared. He is serving 15 days in the Greene county jail. The other was fined $10 and costs.

The Commission calls attention to the new laws which make speaing unlawful, except that carp, buffalo, quillback, gar and dogfisn may be speared in the overflow waters of the Mississippi River and in the Cedar River in Muscatne County.

Another thing that is just around the corner is the interest on the mortgage.

KLEMME REFORMED CHURCH

GOODELL UPSET BY CRYSTAL LAKE QUINTET ON HOME FLOOR

Fast Goodell Team Meets Second Defeat On Their Own Floor

Crystal Lake's speedy little basket ball team pulled a surprise last Wednesday night when they defeated the Goodell five on the Goodell floor, 29 to 27 and handed Goodell their second defeat on their own floor.

Crystal Lake started the fireworks by looping in two buckets in the first minutes of play and led Goodell throughout the four periods, 6 to 4, 16 to 10, 26 to 21 and 29 to 27.

Jilek and Swan were the stellar performers for Crystal Lake, while Boller led the Goodell squad.

The Crystal Lake seconds beat the Goodell seconds 17 to 12.

Trapping Season Ends Soon

The open season for taking fur-bearing animals will officially close on January 10, 1938, according to the Iowa laws.

Trappers may hold their furs for 10 days after the close of the season. A special permit obtained from the Conservation Commission will permit the trapper to hold skins for a longer period.

The season on fox, weasel, wolf, coyote and ground hog remains open throughout the year.

New Year Hopes

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

Now, as a tired old year ebbs outward and a fresh new year sweeps in, America, as is the custom at this season, takes inventory of her hopes.

It is an excellent time to do this—for the New Year's celebration expresses the hopeful Spirit of Youth; and America, above all nations, is a Land of Youth. In America, the vigor, the strength, the imagination, the faith and the courage of Youth still persist as our dominating characteristics.

What America hopes is that in 1938 those qualities will be given room for action. What she hopes is that the fears and hobbles and leading-strings, borrowed along with many other odd devices from the tired old nations of Europe, may be cast aside, and that our people again may be permitted to face the future with their traditional initiative and faith.

What she asks is assurance that our distinctive American qualities and virtues may find expression, without discouragement from government or other sources.

For the American people have all the resources to make the year 1938, and those that follow, successful.

They have resources in lands, in minerals and in equipment, unequalled elsewhere on earth. They have unlimited reserves in skill and strength and intelligence. And, greatest of all, they have boundless faith in their personal competence and national destiny. Without such confidence they could not have created our great nation.

If these resources, material and spiritual, are permitted to be realized; if this faith receives opportunity for expression, nothing can stop America. If her people are only given reason to believe that her natural progress will not be interrupted by borrowed theories and inhibitions, America will plunge resolutely ahead.

Today America sees some promise of these things. If that promise develops into definite assurance, America can face 1938 not simply with hope, but with a renewed and inspiring faith in her future.

FAMILY RE-UNION HELD AT WILLE HOME CHRISTMAS DAY

There was a large family gathering and dinner held at the home of Mr. and Mrs. Henry Wille on Christmas day. The following were present for the big event:

Mrs. John Bock and Mitchell, Mrs. Wm. Schlawin, Mr. and Mrs. C. J. Wille and family, Mr. and Mrs. Carl Wille and family, Mr. and Mrs. Albert Barz and family, Mr. and Mrs. Fred Barz and Doris, Mr. and Mrs. Fred Greimann and family, Mr. and Mrs. Lyle Burr and Caroline, Mr. and Mrs. Harvey Barz and family, Mr. and Mrs. Harold Rockow, Mr. and Mrs. Werner Schlawin and LaVohn, Rev. and Mrs. Grosshuesch and family, and Edmund Josten

RURAL YOUNG PEOPLE TO MEET FEB. 11-12 AT AMES

Dates for the annual conference of Iowa Rural Young People's Assembly have been set for Feb. 11 and 12, closing days of Farm and Home Week at Iowa State College, according to plans announced by George Strayer, president and in charge of rural youth work. The conference has been lengthened from a day and a half to two full days.

Feature of the conference will be awarding of a plaque to the rural youth organization in Iowa, which has scored highest in the standard goal contest for the year. Certificates of merit will be awarded all other groups meeting requirements.

Voting delegates, one from each county organization, will meet to choose 1938 officers.

Ell Township 4-H Girls Had Party

The Ell township club held their Christmas party at the home of Mrs. Fred Greimann, Dec. 28th.

Eleven members, their mothers, and four guests were present.

The afternoon was spent in singing Christmas songs, playing games, and everyone brought a gift for the "grab-bag" which everyone took apart.

The Leader, Mrs. Fred Greimann: Assistant Leader, Miss Bernice Weaver, and Music Chairman, Mrs. Roy Quintus, were presented with gifts by the 4-H girls.

Lunch was served by the girls, which consisted of Honey Nut Bread Sandwiches, pickles, cup cakes and Ice Cream.

LEGION GAVE AWAY POULTRY FOR XMAS

The Klemme Legion announces that the following received poultry last Wednesday night: Barbara Johnson, turkey; and the following each received a goose: Fred Walkenhause, Mason City; Carl Schneider, Garner; and Fay Smock, Klemme.

The following received ducks: John Etchen, Herb Marshall, Paul Mueller, all of Klemme; C. H. Brager and N. E. Brear, of Garner.

Chickens were given to Clarence Bredlow, Klemme; Louis Jurgemeyer, Garner; Cecil Stille, Garner and Ben Mullin, Goodell.

Kudje's Entertain

Mr. and Mrs. A. J. Kudje entertained at three tables for six-thirty chicken dinner Sunday evening, followed by bridge. Dr. Dulmes won high for he men and Mrs. Galbreth was high for the ladies. Dr. Voetberg won the travel prize. Dr. and Mrs. Voetberg, of Oklahoma, were out-of-town guests.

PRESTONE MAKES POOR WHISKEY!

Our "snooping reporter" brought one in this morning that is too good to keep.

A certain pious church-goer found what he believed to be a partly filled bottle of "Christmas Cheer" and proceeded to take a good healthy swig from the contents of the nicely labeled whiskey bottle. The liquor had a peculiar taste and fearing he might have gobbled something not so good, he asked the young man working in the establishment "What kind of whiskey is in that bottle?" Whereupon the young man busted out, "Whiskey, hell, that's Prestone."

And that's why he was consuming milk in a local store; to counteract any ill effects that the swig of Prestone might set up in his "innards."

The moral is, "Buy your own whiskey Ben, and leave the Boss' alone!"

Stores Will Be Closed On Wednesday Nights Hereafter

The stores in Klemme will not be open on Wednesday nights, beginning next week. However, they will be open as usual on each Saturday night during the winter months.

Rev. and Mrs. Dye Slightly Injured In Car Mishap

Tuesday evening Rev. and Mrs. Dye of Goodell were injured when their car went into the ditch at the Jay Griggs corner souheast of Klemme. They were brought to Klemme for medical attention but their injuries were not serious.

HELLO, FOLKS!

A ten pound baby boy was born to Mr. and Mrs. Melvin Neuberger, Monday morning, December 27.

DID YOU KNOW

That all fines collected in counties through prosecution of fish and game law violators remain in the counties for the school funds? Fees collected by Conservation officers in connection with cases go to the general state fish and game fund; they do not go to the officers.

HENS LAST FEW POUNDS OF FEED ARE PROFITABLE ONES

A leghorn hen requires 64 pounds of feed a year when producing no eggs; 71 pounds when producing 100 egs; 81 pounds when producing 200 eggs, experiments have shown.

It's the last few pounds of feed that make the egg profits, W. R. Whitfied, Iowa State College extension poultryman points out.

At this time of the year with dwindling daylight hours, it calls on all the poultryman's feeding skill to maintain egg production.

"Feed at this time of the year not only needs to be plentiful and easy to get but tempting," Whitfield said.

"A palatable mash fed separate from scratch grain will encourage the birds to eat all they can in their short daylight feeding periods. Laying birds must eat to capacity. That's the only way to get maximum production—and profits.

He warned against using a mash ground so fine it packs when squeezed in the hand.

"A medium ground mash, which falls apart again after being squeezed is much more palatable for chickens," Whitefield said. A mash should be made up of ground corn. wheat, oats; some meat scraps or tankage; dried milk if fresh milk is not available; and, of course, cod liver oil. A little bright green alfalfa hay should be fed in a rack.

A MAN AND HIS MONEY

John Kaduce, Paul Thiemann, Wilma Swalve and Esther Knoke.

JUST OUTSIDE THE DOOR

Irene Suckow, Raymond Wille, Harold Swalve, Roy Baack and Leo Brinkman.

Between plays the audience will be entertained by Vocal and instrumental selections.

Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington.—Authorities generally agree that good administration can make even a good law better in its results and bad administration can definitely ruin it. The same is true, of course, of any law. A bad law's effect can be doubled or trebled by irresponsible administration of its provisions. Of this, I believe there can be no doubt. Certainly, we have fresh evidence on the point over which we can ponder and the truth of the above statements seems inescapable.

Workable Labor Law

I have been among those who have criticized the national labor relations act, and the national labor relations board created by it. It has always impressed me as being a half-baked statute. That it has many weaknesses, there is no doubt. That it has worked out in biased form and that it has done grave damage to the feeling of the general public toward labor organization, there certainly can be no doubt. Or, to summarize the situation, it has been made painfully evident that Senator Wagner, New York Democrat, who sponsored the law, took prejudiced advice when he drafted the measure. He was given only one side of the picture.

But I suspect the law can be made workable and I entertain no thought at all that it should be abandoned entirely. We need a national labor policy expressed in statute form. Changes in its provisions ought to be made, but to my way of thinking there is a more urgent circumstance. The urgent need is improvement in administration of the law in order that the benefits of even a weak and biased law will not be denied to the country's economic life.

It is the recent administrative acts under the law that have brought it into the spotlight again. These acts should be reviewed to bring the whole situation into proper focus for examination, and I shall refer to two of them in this connection. They will substantiate my earlier criticisms.

Early in December, we learned of how the national labor relations board subpoenaed the editor of a magazine. It called for the editor to supply all of the background of information upon which he based an article that was critical of the board. Since the article was critical of the board and its methods, officials of the board regarded the background information as "essential." The article in question had been reprinted and circulated among workers in several mills, according to the board, and this fact was used by the board as a basis for bringing the editor under the board's jurisdiction.

Ten days after the first unusual exercise of power by the board, it took another unprecedented step. Rather, one of its attorneys took the unprecedented step, but since the attorney was an employee of the board, it seems clear the action is chargeable to the board because it is the responsible, policy-making head of the agency.

* * *

The second case resulted from the refusal of an editor of a small daily newspaper to tell a trial examiner for the board who wrote an editorial in his newspaper, the St. Mary's (Pa.) Daily Press. Harry T. O'Brien, the editor, declined to answer the question put to him by a board attorney in a public hearing. He stood pat and the trial examiner, Charles H. Bayly, and the attorney, Jerome I. Macht, called his attention to provisions of the Wagner act requiring him to answer. The question of freedom of the press as guaranteed by the Constitution was mentioned, but according to the stenographic record of the hearing, the trial examiner and the attorney each held to the provision of the law as being superior to the other guarantee. Or at least, that is my impression of the proceedings.

Editor Stands Pat

As far as I am informed, the board has taken no further action in the O'Brien case. It has moved, however, to enforce its subpoena in the case of Hartley W. Barclay, the magazine editor. A federal court has been asked by the board to enforce the subpoena which Mr. Barclay ignored. He probably will be compelled to appear. At least, he should be compelled to appear in response to the subpoena. No one can ignore a subpoena. As for supplying the information—that is a different matter. His refusal to supply confidential information and imperil the freedom of the press is, indeed, quite a different matter.

As one writer, I hope Mr. Barclay and Mr. O'Brien stick by their guns. I hope, too, that the board will not imperil its existence and the good points in the law by attempting to assert power which I do not believe it possesses. There is no excuse, legally or morally, for a crew of officious individuals to undertake the sort of things disclosed in these two instances. They abuse confidence and besmirch the titles which they bear.

Further, they have forced an issue that ought never to be raised. It is a sad day in our country when government officials, great or minor, try to break through the guarantees which the Constitution gives you and me. It portends more evil things.

Consider, for example, my own personal situation. If the board's attorneys get away with the sort of thing represented in these two instances, how long, I ask, will I be permitted to write as I am now doing, freely, frankly? And if they get away with it, how long will it be until you, who do me the honor to read my reports, will find yourselves without any honest expressions in anything you read? It is not blackjacking the press yet, but if it goes further, that will be the proper term to apply.

Returning, now, to the original premise, namely, that a good law may be destroyed or the effects of a bad law may be made worse by bad administration, it appears to me the conditions related demonstrate the theory as a fact. I have noted some comment on the floors of congress that the board was not aware of what was happening in these two cases; that it had issued no such orders, etc. Such observations require no answer. Anything that is done by any employee of a government agency is done by that agency because it is to that agency, not to any particular person who may be on its payroll, that congress gave authority to act.

* * *

I am beginning to doubt that the American farmer is going to have his problem solved, or even partially bettered, by the present tactics. The word "tactics" is used advisedly. Congress has not acted with the full freedom that ought to obtain insofar as the current crop control legislation is concerned. It is suffering from an overdose of some strange medicine, currently called "Wallace's formula." There is real doubt whether the ailment from which agriculture suffers is as bad as the Wallace prescription of medicine for its cure.

Farm Problem

Use of the word "tactics" can be further justified if the legislation is considered from the angle at which the problem is approached. I refer in this to the projected limitation on production. That is to say, I believe in processes that will allow all of the production that is possible and that there are ways for handling the surplus without turning over a great industry, like agriculture, to have its fate decided by one man or group of men. The fact is that while Secretary Wallace and his advisers are learned men, they are still human beings. I hold to the old-fashioned belief that even those learned men are not equipped to tell farmers how much they ought to plant and what they ought to plant. It stretches my credulity too far for someone to ask me to believe any government official or anybody else can forecast next month what the demand is going to be next year. And that is almost an accurate statement of what is proposed by the current model of farm relief.

The reason I called the influence "Wallace's formula" goes back several months. It is my recollection without checking up the dates that I reported some goings-on by Mr. Wallace last summer. At that time, I said the agriculture secretary and numerous of his subordinates were traipsing about the country, telling the farmers what was good for them. It was quite evident then, as facts have since proved, the Department of Agriculture was staging a gigantic propaganda for Mr. Wallace's type of farm legislation. He persuaded a couple of senators to go into the interior and hold hearings and it was from these hearings that Senators McGill of Kansas, and Pope of Idaho, both Democrats, obtained their ideas for the bill that the senate considered.

Unless the usual signs at the capitol fail me, the vast majority of the farmers of this country do not want to have their production limited. Probably, the best general statement that can be made on that phase of the legislation was made by Senator Borah of Idaho, who attacked the theory of compulsion vehemently in a speech. Aroused to use of his full oratorical powers, Senator Borah declared to the senate:

"This bill, if enacted, will accomplish two things. First, it will place the farmer under complete bureaucratic control. Second, it will bring about a reduction of crops when millions are hungry and in need."

That thought will be echoed more after the country has tasted of the fruits of the bill than now according to my way of thinking. Therefore, it seems to me that rather than face economic suicide as Senator Borah predicted, congress could very well lay plans to permit unrestricted growth of crops and couple with that the means of taking the surplus off the hands of the farmer.

Shawnee River" ay Be Real Name

Washington.—Maybe we should g, 'Way down upon the Shawnee er,' if the famous old Suwanee er got its name from those gyp- Indians, the Shawnees.

Pointing out that there are two ories explaining the Suwanee riv- s name, neither proved, Dr. John Swanton, of the bureau of Ameri- n Ethnology, says that Shawnee dians were gypsies of the Indian ce While other eastern Indians yed home, or at least within fa- liar boundaries as a rule, Shaw- e groups roamed the map, leav- g traces of their presence from w Jersey to Texas. Creek Indi- s in Georgia twisted their name o Sawanogi.

Dr Swanton says there is one issing link, needed to prove Indian igin for the name Suwanee. So r, no evidence has shown the awnees roaming as far south as e Okefinokee swamp in southern eorgia, where the Suwanee rises, ough they may well have been ere They are known to have en as far south as the Chattahoo- ee river, near Atlanta.

The other theory of the river's me, which is more widely ac- pted, is that it is a shortened rm of a Spanish name given the ver, San Juanito, or Little St. ohn

Cannibalism Just Traveler's Myth, Declares Scientist

By EMILY C. DAVIS

"Cannibalism is a pure trav- eler's myth."

This statement, which will surprise many people, comes from Prof. M. F. Ashley-Mon- tagu, anthropologist of New York university.

Professor Ashley - Montagu has grown weary of what he considers unfair tactics in accusing certain inhabitants of the earth of cannibal- ism. It is particularly unfair, he feels, to call prehistoric men this hard name because they cannot pos- sibly arise to sue for libel.

What happens, as he points out in a report to the journal Science, is this:

When charred human bones are found at some campfire that burned out thousands of years ago in the Old Stone age, it is generally as- sumed that cannibals feasted there And if the human bones are cracked, indicating that a human being extracted marrow, why, that settles all doubt. These folk were cannibals, which suggests to most minds that they had the low habit of gobbling up other humans as un- concernedly as they would eat ele- phant steak.

No "Missionary Stew."

But, Professor Ashley - Montagu does not find such evidence convinc- ing, and he declares that it would not stand up in any Primate court.

He points out that, in modern times, starving primitives — and even civilized men—have been known to kill and eat their young. But no one would call these peo- ple cannibals. He also points out that many primitive tribes do oc- casionally consume certain parts of the human body for ritual purposes.

"But," he adds emphatically, "no people of whom we have any knowl- edge makes any habit of cannibal- ism."

The argument sums up to this: Men, even civilized men, have been known to eat their fellows, unde- niably. But Professor Ashley-Mon- tagu would have us relegate to fairy-tale realm those ghoulish pic- tures of savages gleefully dancing around a pot of missionary stew for an ordinary Thursday night meal.

Second Favism Case in United States

Chicago.—For the second time in medical literature a case of favism is reported in the United States.

Favism occurs not uncommonly in Italy and occasionally in Germany It is a type of hemolytic anemia that occurs among some persons who eat the bean Vicia fava, or who inhale the pollen of the blossoming plant.

These beans—broad, smooth, kid- ney shaped Italian beans—are eat- en by Italian residents in this coun- try, but not until 1933 was the first case of favism reported in Ameri- can medical writings.

The young man has recovered from his severe illness, and his physician, Dr. John E Hutton of New York Post-Graduate hospital, describes his case and the disease in general in the Journal of the American Medical Association

Only a few persons who eat this type of bean become ill, according to Dr. Hutton. They may have been eating beans for years with impu- nity when suddenly, usually in adult life or in old age, they get a severe attack of favism.

The prevalence of the condition in Italy varies from year to year. It occurs oftenest after the first in- gestion of green beans in season and among those who eat them fre- quently. Death may occur after eating only a small quantity.

New Zambesi Bridge to Be Single Span

Johannesburg, South Africa.—Sky- scrapers towering out of the wildest Rhodesian bush will be the land- marks by which travelers in two years' time will recognize the most spectacular structure of its kind in southern Africa, the new bridge across the Zambesi river.

First definite particulars can now be given about the huge project, which is being financed by the Beit Railway trust, founded by Alfred Beit, partner of Cecil John Rhodes. It is to link Salisbury, capital of Southern Rhodesia, with Lusaka, capital of Northern Rhodesia.

Unlike the famous Victoria Falls arch, erected in 1904, the one which will be flung across the Chirundu gorge further upstream will be a suspension bridge, carried by cables suspended from towers 120 feet in height.

One single span, a fifth of a mile long, 1,050 feet to be exact, will carry the roadway over the abyss. Together with its approach spans, of which there are to be four on the Southern Rhodesian side, the bridge will measure nearly a quar- ter of a mile from end to end, mak- ing it twice as long as the Victoria Falls structure

DAUGHTERS OF THE RISING SUN
Get into the Swim

Picture Parade

WHILE their men war against China, Japanese girls seek to free themselves from the traditions and customs of the Far East. Nowhere, perhaps, is the trend more noticeable than in the world of sports, for Nippon would like to see her daughters show up the rest of the world if the sched- uled Olympics are held in Tokyo in 1940. Above: Girls learning to swim in a Tokyo Y W C. A. pool.

Golf is popular among Japanese women; the convert to the sport shown above is learning the finer points from a "pro." Shorts for sport wear are the rage among Japanese as well as American women, as the picture of two Japanese girls walking out on the courts for a game of tennis evidences.

Tokyo girls are fast becoming expert in the art of archery. Note that the three girls on the firing line illustrate the positions in inserting an arrow and aiming it. Their fellow marksmen stand by, ready to take turns at hitting the bull's eye.

Even the women in Japan can handle a shootin' iron. This young lady's favorite sport is hunting, and here she proudly exhibits the spoils of a day in the woods.

Full sail ahead! Progress is the watchword of modern Miss Japan.

Catch Up on Chic

IF YOU'RE a bit behind in the thrilling game of Sew-Your-Own, Milady, why not take ad- vantage of the holiday season and catch up? Today's trio is especial- ly right for "vacation sewing" be- cause it consists of simple prac- tical pieces that require little time and trouble. Make all three and you'll have gone a long way toward putting the old punch back in the game.

Streamlined Styling.

The slip at the left is all you could wish for from the standpoint of styling. It offers superb lines from the moderately low cut V neck, through the dart-fitted waist right down to the very hem. The clever overlapping back is light proof and provides an action pleat so necessary for complete satis- faction. Important, too, is the fact that you may choose the ma- terial you wish in your own color. Better make it in duplicate for many meticulous months ahead.

Pretty in Sheer Wool.

The two-piece in the center is, like the slip, heavy on style. The defined waist is effectively young as is the flowing skirt and little round collar. It is just the frock to give one lots of git-up-and-git for the second semester, or "to break the ice" whenever one is anxious about one's appearance. It can be the height of chic in sheer wool—very pretty in flat crepe.

Modern Home Dress.

When it's home you're thinking of you naturally turn to a frock like the third member of the trio at the right. This button-all-the- way model is different enough to delight you and simple enough to set you sewing at sight. It is cut for comfort but with an ever watchful eye on that elusive little thing called chic. Crisp contrast may be had in the collar and cuffs and in that trim row of buttons that march down the line—and then back again. Look fresh in your version in pretty percale.

The Patterns.

Pattern 1946 is designed for sizes 14 to 20 (32 to 44 bust). Size 16 requires 3¼ yards of 39 inch fabric. One yard of ribbon is required for shoulder straps.

Pattern 1404 is designed for sizes 12 to 20 (30 to 38 bust). Size 14 requires 4⅛ yards of 39 inch material.

Pattern 1390 is designed for sizes 34 to 48. Size 36 requires 4⅝ yards of 35 inch material. The collar and cuffs in contrast re- quire 1¼ yards material.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Smiles

On the Block

Boss (storming)—You're fired.

Stenog—Fired. How you talk. I supposed they sold slaves.

Backward

A high school girl, seated next to a famous astronomer at a din- ner party, struck up a conversa- tion with him by asking, "What do you do in life."

He replied, "I study astron- omy."

"Dear me," said the girl, "I fin- ished astronomy last year."

Not One of 'Em

Mrs. Duff—Some things go with- out saying.

Duff—Yes, my dear, but not your tongue.

In Figures

Mother-in-law—Why don't you and Nellie stop scrapping? A man and his wife should be as one.

Hankins—But we really are 10.

Mother-in-law—How's that?

Hankins—Well, in Nellie's mind she's the one and I'm the naught.

Eye slowness of blondes makes them less safe as drivers, is an optometrist's warning, but most men will just wink at it.

Tell Willie

Willie—Please, teacher, what did I learn today?

Teacher—Why, Willie, what a peculiar question!

Willie—Well, that's what they'll ask me when I get home.

Glass Curtain

In the National theater of Mex- ico City, known as the Palacio de Bellas Artes, a huge glass curtain executed by Tiffany of New York, is one of its most striking fea- tures, and is perhaps the only one of its kind in the world. It is composed of thousands of pieces of vari-colored glass and the novel lighting arrangement re- veals the snow-crowned volca- noes, Popocatepetl and Ixtaccihu- atl, at sunrise, midday and sunset.

Constipated?

Nujol

Regular as Clock-work

What a difference good bowel habits can make! To keep food wastes soft and moving, many doctors recommend Nujol.

The children and teacher, Miss Viola Koehler, of District No. 2, gave a program and exchanged presents Thursday afternoon. Members of the District were invited and coffee and cookies were served to all present. They will have a week's vacation.

Mr. and Mrs. Bert Closson and Miss Bonnie Bachman, of Davenport, came Friday evening for a visit with relatives in this vicinty.

Anna, Clarence and Harmen Trampel, Arthur Connors and Mrs. Paul Cavitt and son, Robert, were visiting at the Mrs. August Trampel home Sunday afernoon.

Mr. and Mrs. Harlow Helps and children were Sunday evening visitors at the Clarence Bachman home.

Mr. and Mrs. Fred Bell and children, and Mr. and Mrs. Will Lassahn of Swaledale were entertained at the Wm. Bell home on Christmas day.

Mr. and Mrs. Fred Bachman and Wayne and Bonnie, and Mrs. Bachman's niece and husband of Mason City, and Mr. and Mrs. Bert Closson of Davenport were all entertained to a goose dinner at the Robert Roths home on Christmas day.

Miss Helen Reimer who teaches in the Prairie Queen school left Friday afternoon from Belmond for her home at Le Mars, Ia, to spend her week's vacation at the home of her parents, Mr. and Mrs. Ben Reimer.

Peter Trampel and son, Harmen and daughter, Mrs. Paul Cavitt, spent Tuesday at the John Trampel home.

Mr. and Mrs. Fred Bachman and Bonnie and Wayne, were callers at the Jake Bachman home in Goodell Sunday.

Miss Delores Cook, who attends Morningside College is spending the holidays at the home of her parents, Mr. and Mrs. J. J. Cook. Miss Margaret Veenstra, who attends teachers college in Cedar Falls, Miss LaVohn Sherwood, who attends Waldorf College in Forest City and Miss Iris Sherwood, who teaches in Latimer are also home for the holiday vacation.

High School News

? ? ? ?

Wicks has had a couple of dates with a girl from out of town! ! ! (I guess she hasn't got his number as yet.)

A few weeks ago Paul Schuldt was wondering what to get Marian for Christmas but last week he was wondering what to get his D. C. from Chicago.

We wonder why four senior boys gave Mr. Galbreth a box of candy.

It seems that those smiles a blond freshman had for a flashy junior brought results.

Why do Klemme boys always go to other towns to get their dates?

Marian would like to know why a certain person writes such nice letters instead of telling her his feelings.

It is around that Buster and Dorance have gotten acquainted with some out of town girls. Bring them around for inspection boys.

—K H S—

MUSIC NEWS

The band added a new piece to their music collection. The piece was "Feist Football Medley," introducing "All American Girl," Down The Field," and "You Gotta Be A Football Hero," by Paul Yoder.

—K H S—

NEWS OF THE CLASSES

The typing I class made Christmas designs last week on the typewriter. It was something new and everyone had fun doing it.

Saturday evening, Decembre 18, the senior class enjoyed a bob sled party at the Trampel home.

After everyone got cold the class drove back to the school house where the girls served a lunch.

The sophomores had a peanut shower on Mr. Kingery Tusedav. When Mr. Kingery was in the center of the room, Marvin yelled " Let him have it." Mr. Kingery turned around and looked so strange at Marvin and we all began to fire. Mr. Kingery said afterwards that he thought he was going to be shot. We spent part of our class period filling our stomachs.

On Tuesday afternoon we had a shower on Mr. Galbreth. We had all planned to fire at him when he came in front of our class, but he had a large mirror with him and he held it over his head. He told us that he brought the mirror with him because it was about to fall off the wall but we think that he must have brought it for protection.

Thursday afternoon the sophomores presented part of a Christmas program held in the high school. With "Dode" Grange at a cornet, Marie Schmidt at a clarinet, "Butch" Swalve at a clarinet, Dwaine Johnson at a bass, Marian Waterman at a triangle, and Elsie Ward at a trombone, the famous group played "Jingle Bells." The assembly sang it.

Grades 1 and 2

Mrs. E. G. Schaeffer and Eleanor Schaeffer were visitors in our room last Monday.

Phyllis Kirkwood has been absent this week.

We had our Christmas party on Thursday. Our tree was white with blue decorations. There were presents under the tree.

We sang some Christmas songs for Mrs. Stille and Mr. Ridder on Thursday.

Grades 3 and 4

The boys and girls wrote a play "Jane's Christmas Week," from their stories and Christmas lessons. They played the story, Thursday. After the story we enjoyed hearing Miss Azeltine read some of our favorite stories and poems. We all sat around the Christmas tree while our gifts and treats were passed out.

The boys and girls of the third and fourth grades and Miss Azeltine hope that you had a Merry Christmas and extend best wishes for a happy New Year.

Grades 5 and 6

Eunice Larsen and Betty Blickenderfer—Reporters

Last week we made finger paintings on which we wrote the words, "Merry Christmas." Miss Irvine put some on the bulletin boards.

We had our Christmas party Thursday afternoon. Each grade dramatized a Christmas story that they had read in reading. The room was divided into four groups, each group acting a Christmas charade from the others

When it came time for distributing the gifts we were all excited. It was fun to see what was in all the curious packages. Last of all, we had a "grab-bag." Many of those gifts were funny.

We had three birthdays in our room this week but we only knew about one, Herbert Mueller's. Herbert Schwartz and Marvin Wade kept their's secret until it was past.

Grades 7 and 8

Ellen Kilgore—Reporter

We put our Christmas tree up Friday. It is a white tree decorated with tinsel and blue lights.

We have been busy this week making gifts and planning our Christmas party. We played games and later the gifts were distributed by Eugene Haberkamp, Billy Zabilka, and Ellen Kilgore, who took part in a trip to Toyland.

Lucille Hartbeck, Arlene Buseman, Melvin Coobs and Billy Zabilka received 100 per cent in spelling on Friday.

KLEMME LOCAL NEWS

Mr. and Mrs. R. A. Jorgenson entertained in honor of Dr. and Mrs. Voetberg, Tuesday evenin After a six-thirty chicken dinner bridge was played at three tables. Mrs. A. H. Dulmes won the high prize, Dr. E. G. Schaeffer, won high for the men and Mrs. Voetberg received a guest prize. While Ray Jr., his grandfather and cousins were on their trip home this summer, they were guests at the Voetberg home in Oklahoma.

The following enjoyed a turkey dinner Christmas day at the home of Mr. and Mrs. George Albers Sr. and family; Mr. and Mrs. William Rueben and daughter of Kanawha, Mr. and Mrs. Ted Albers and family of Swaledale, Mr. and Mrs. Walter Lauster of Thornton, Mr. and Mrs. John Albers and sons, Mr. and Mrs. Edgar Buss of Klemme and Fred Pringnitz of Garner. In the afternoon gifts were exchanged.

It's nice to meet a person who offers to do good without charging anything.

What one does not need is dear at a penny.

His First and Last

They sat at the table, he and she, and gazed into each other's eyes, while he mechanically consumed the food which was set in front of him.

She—Ah, I'm glad you like it. Mother says there are only two things I can make properly—potato salad and marmalade tart.

He—Indeed? And which is this?

Father Knows

Little Billy, aged four, was being shown the shape of the earth on a globe atlas by his mother. After pointing to all the countries with their peculiar shapes, she asked:

"Now, Billy, what shape is the world?"

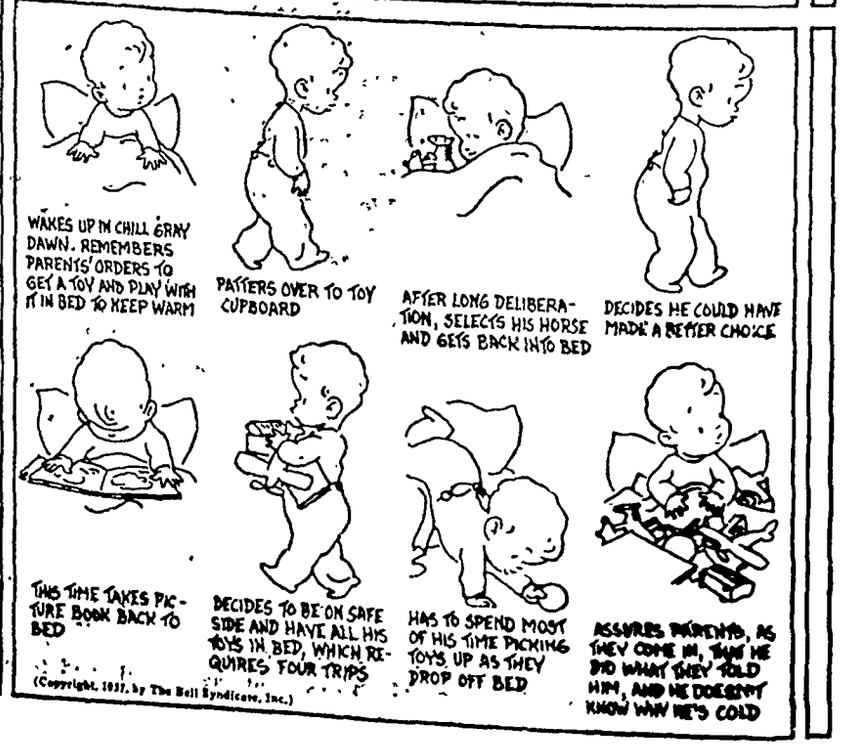
Billy, looking very wise and happy, beamed on her with: "It's in a terrible shape, Daddy says."

His Super Good Deed

Scoutmaster—What is your good deed for today?

Scout—Mother had only one dose of castor oil left, so I let my brother have it.—Tit-Bits Magazine.

BED TOYS By GLUYAS WILLIAMS



WAKES UP IN CHILL GRAY DAWN. REMEMBERS PARENTS' ORDERS TO GET A TOY AND PLAY WITH IT IN BED TO KEEP WARM
PATTERS OVER TO TOY CUPBOARD
AFTER LONG DELIBERATION, SELECTS HIS HORSE AND GETS BACK INTO BED
DECIDES HE COULD HAVE MADE A BETTER CHOICE
THIS TIME TAKES PICTURE BOOK BACK TO BED
DECIDES TO BE ON SAFE SIDE AND HAVE ALL HIS TOYS IN BED, WHICH REQUIRES FOUR TRIPS
HAS TO SPEND MOST OF HIS TIME PICKING TOYS UP AS THEY DROP OFF BED
ASSURES PARENTS, AS THEY COME IN, THAT HE DID WHAT THEY TOLD HIM, AND HE DOESN'T KNOW WHY HE'S COLD

They're Teaching 'Em Young in Nippon

Wearing cardboard shrapnel helmets and carrying toy guns, these Japanese children are being instructed in the rudiments of warfare as part of their childish play. When the real thing comes along and they are old enough to bear arms for their emperor, they won't be altogether raw material.

Rent for Roval Landlord

Little Kenneth Hodge, two, is pictured as he said good-by to the two greyhounds, Shot and Nimble, before they were taken away from Launceston, England, to be presented to King George VI as part of a feudal tribute in accordance with an ancient Cornwall custom. Other items in the feudal tribute were silver spurs, a riding cloak and a pound of pepper.

Capt. "Bill" Wood Is Named New Coach of Army

Captain William H. (Bill) Wood, former Army backfield ace and a twelve letter athlete during his cadet career, who has been named head football coach at the United

States Military academy at West Point, N. Y., to succeed Captain Garrison H. Davidson. Captain Wood graduated from the academy in 1925.

KING ZOG SPEAKING

Celebrating the twenty-fifth anniversary of Albanian independence from Turkey, King Zog of Albania is shown before the microphone through which he addressed his subjects at the beginning of the festival that marked the event.

License Plates Boost N. Y. Fair

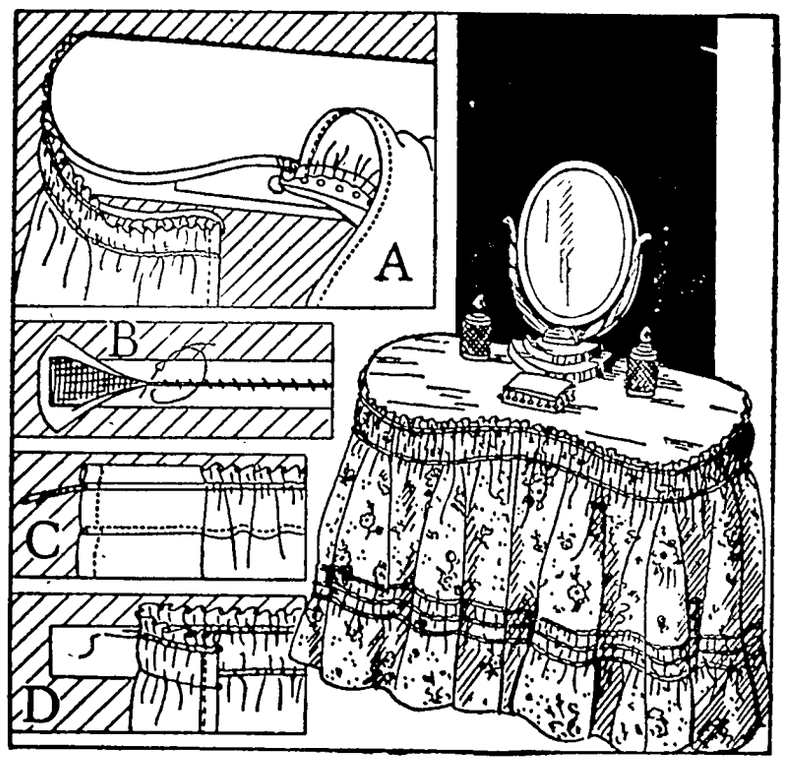
Pretty Nettie Bomze displays the 1938 World's fair license plates which will help to advertise the New York World's fair to be held in 1939. World's fair promoters believe this will be an effective means of telling the world in advance about the exposition.

Gives Birth to Fifth Caesarian Baby

The Barrett family shown at Mercy hospital, Chicago, where the fifth child was born to Mr. and Mrs. Isabel Barrett recently by caesarian operation. Left to right are James Morgan, newest addition to the family; Mrs. Barrett; Maurice, the father; Alice, twelve; Theresa, eleven; Maurice, Jr., ten; and John, six. The extraordinary series of difficult births is believed to be close to a record.

HOW TO SEW

by Ruth Wyeth Spears



A Dressing Table Skirt With Corded Shirrings

THIS dressing table has a curved front and hinged arms on which to mount the skirt so that it can be opened to permit access to the drawer. To mount the skirt it must first be sewed to a band of covered buckram. Cut the buckram in a strip 2½ inches wide. Cover it with a straight piece of material as shown here at B.

Make the heading at the top of the skirt just the depth of the thickness of the table edge so that it will cover the edge of the table when the arms are closed. Use ¼-inch cable cord for the shirring. This is sewed to a safety pin and run through tucks stitched in the material as shown here at C.

The top of the ruffle is also shirred with cords. When the shirrings are all finished, sew the top of the skirt to the covered buckram strip as shown at D and then thumb tack it in place as at A.

Every Homemaker should have a copy of Mrs. Spears' new book, SEWING. Forty-eight pages of step-by-step directions for making slipcovers and dressing tables; restoring and upholstering chairs; couches; making curtains for every type of room and purpose. Making lampshades, rugs, ottomans and other useful articles for the home. Readers wishing a copy should send name and address, enclosing 25 cents, to Mrs. Spears, 210 South Desplaines St., Chicago, Illinois.

Uncle Phil Says:

Respect Due Precedent

Respect for precedent has a solid basis. Don't be contemptuous of precedent, but study its claims to authority.

If you want to enjoy retrospection, recall your happiness, not your sorrows.

Gossip thrives less among men particularly because it means a black eye if not worse.

Women often say it is hard to please men by the way they dress; but let a man pick out a woman's sartorial outfit and she'd be a fright.

Men have had but one burst of extravagance in clothing in the last 30 years. It was when they paid $8 for a silk shirt.

HOUSEHOLD QUESTIONS

Preventing Rust in Oven.—After using the oven, leave the oven door wide open, to allow it to cool down thoroughly. This allows all moisture to escape and prevents rust.

* * *

Watch Your Step.—Painting the bottom step of the cellar stairs white makes it more conspicuous and often helps to prevent accidents.

* * *

Salt and Pepper Shaker.—A large shaker containing six parts salt to one part pepper and kept on the stove will save steps when seasoning cooking foods.

* * *

Sliding Dresser Drawers.—Rubbing a candle stub or wax along the sliding edges of dresser drawers will make them move in and out much more easily, even when heavily loaded.

* * *

Lining a Coat.—When lining a coat, put the coat on inside out. Have the lining all ready stitched up, and slip it over the coat. It will fall into position naturally. Pin it in place, and finish in the usual way.

* * *

Home-Made Flower Holder.—If you cannot buy a flower-holding frog (the stand with holes pierced in it to steady flowers in a vase) to fit an oblong vase, a block of paraffin will serve the purpose very well. Holes may be made with a heated ice pick or some other round instrument.

TRADE

PEACE

MARK

When a cough due to a cold plagues you, give your throat peace with a Smith Brothers Cough Drop. Black or Menthol—5¢.

Smith Bros. Cough Drops are the only drops containing VITAMIN A
This is the vitamin that raises the resistance of the mucous membranes of the nose and throat to cold and cough infections.

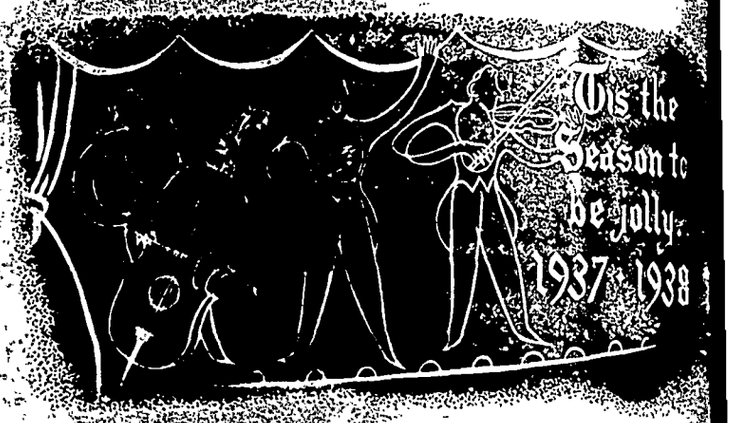
LOADS OF HAPPINESS TO ALL

We are appreciative of the opportunity of serving you in 1937 and ask for friendship throughout 1938.

HANCOCK COUNTY CO-OPERATIVE OIL ASSOCIATION



Words are but poor things to express our appreciation of many favors during the year just past. May we show how grateful we are by being of greater service to you during 1938.

KLEMME CO-OPERATIVE GRAIN COMPANY

As we move into a new year we want to express our gratification over the cordial relations that have existed between us, and to express our desire that they may continue and increase during the year to come.

KLEMME FOOD MARKET

Th New Year will mean much to all of us—new objectives, higher standards of achievement—better service. We promise a constant effort to serve you even better in the coming year.

IOWA UNION TELEPHONE COMPANY

Whatever the New Year may bring we face it unafraid. For friendships of the many whom we have served in the past give courage and hope for the future. For your kindness may we take this opportunity to express our sincere appreciation, and to extend to all the greetings of the season.

NORTH IOWA GRAIN COMPANY
